# Pentagon to share in surpluses

**By Barry B. Burr**

The Department of Defense is mounting a sweeping effort to share in reversions when contractors terminate pension plans.

Agreements from about 312 major contractors are being solicited, but a total of 13,000 contractors could be affected.

Rules adopted by the Defense Department likely also would apply to contracts with all other executive departments of the U.S. government.

Already, Defense Department officials have negotiated a settlement with FMC Corp., Chicago, for a share of its pending reversion of approximately $400 million to $500 million.

The department is trying to reach a settlement with Fairchild Industries Inc., Chantilly, Va., on its $48 million reversion.

During the past year, Defense Department officials have talked to executives at about six other contractors about turning over a share of the surplus assets in terminated plans.

Aside from these negotiations, the Defense Department recently began issuing notices seeking a general "advance agreement" on terminations from its contractors. Contractors are to agree that in the event of a termination of an overfunded plan, they will share the reversion with the department.

At the same time, the Defense Department is seeking an advance agreement from contractors on full-funded limitation status. Under it, the department would cut pension contributions for newly negotiated contracts, and would seek reimbursement from contractors for contributions made to plans after they are fully funded on an ongoing basis.

Also, the Defense Department is examining the effects on its costs of Financial Accounting Standards Board Statement 87, the pension accounting rule for corporations, *in some cases seeking credits for* pension contributions.

Representatives of two contractors — Texas Instruments Inc. and a unit of Allied-Signal Inc. — are objecting to the requirements.

"We think it's grossly unfair," said Gary W. Hill, manager-office of government affairs at Texas Instruments, Dallas.

"They have sent those to us and have asked us to sign them," Mr. Hill said. "We refused. We already informed them we won't sign the agreements.

"Upon termination of a pension plan, the U.S. government has no vested right over the disposal of assets and liabilities," Mr. Hill said. On the funding issue, he said, "They're taking an overly simplistic view of what is the definition of full funding."

He said Texas Instruments isn't planning any termination. Information was unavailable on its status on full-funded limitation.

Mr. Hill, who is also chairman of the procurement committee of the National Security Industrial Association, said the agreements would be discussed at the association's meeting Nov. 12 in Washington. Some 400 defense contractors belong to the association.

Texas Instruments reported that for the third quarter, it reduced pension costs almost $12 million as a result of adopting FASB 87. The drop was a significant reason the giant electronics and defense firm returned to profitability, other TI officials said.

Irene Leary, senior pension analyst at TI, said the adoption of the new accounting rule resulted in calculated pension expenses drastically lower than in previous periods.

According to TI, pension expense was $4 million in the third quarter of 1986, down from $15.9 million in the third quarter of

# Investors nix partnership plan

## Pension funds vetoed deal because of tax liabilities

**By Brad Rudin**

Institutional investors concerned with tax liabilities for pension funds were the driving force behind Community Psychiatric Centers' failure to reorganize as a master limited partnership.

This should send warning signals to corporations contemplating similar moves, Wall Street experts said.

While the change to a master limited partnership provides a boon to a company because it eliminates corporate-level taxation, the conversion worries tax-exempt institutions because dividend payments to them are taxable as unrelated business income.

Faced with the prospect of paying federal income taxes, many tax-exempt institutional investors said, "Oh my gosh, we're going to pay taxes, that's not what we're in business for," said Ned Oelsner, a managing director at Dean Witter Reynolds Inc., which served as CPC's adviser.

On reflection, however, institutional investors may say, "Net net the value and even the cash we are getting is more after we pay tax than what we had before," Mr. Oelsner said.

But interviews with pension fund executives and others prove tax-exempt institutions don't view master limited partnerships as attractive investments.

"What's supposed to be good isn't that good," said Robert N. Gordon, president of Twenty-First Securities Corp., New York.

J.P. Morgan & Co., which owned 10% of CPC's shares as of June 30, reportedly threw its weight against the corporation's plan to reorganize as a master limited partnership.

A Morgan spokesman declined to comment specifically on this point, but observed: "As institutional investors, we do make our views known to companies we invest in on occasion, always in the framework of the benefit for whom we are investors."

Other institutional investors include INVESCO Capital Management Inc., Atlanta and Sears Asset Management, Chicago.

Community Psychiatric Centers, a Santa Ana, Calif.-based operator of psychiatric hospitals and dialysis centers, announced the reorganization plan Oct. 8. The corporation, citing opposition from tax-exempt investors, withdrew the plan Oct. 29.

Stockholders were offered one unit in the partnership for each share of CPC stock. Each unit would have been sold for a maximum price of $32.375, the same as

# *New Senate may look at reversions issue*

**By Joel Chernoff**

WASHINGTON — The Democrats' capture of control of the Senate may lead Congress to rein in employers' ability to take out surplus assets from their overfunded pension plans.

"I would think we're going to see legislation that will seriously put the screws on that," said Stuart Brahs, executive director of the Association of Private Pension and Welfare Plans, a Washington-based trade group.

"We will certainly have our work cut out for us," said Vicki Caldeira, assistant director for employee benefits at the National Association of Manufacturers, Washington.

In the election, Democrats gained eight Senate seats to take a 55 to 45 majority. A Democrat-dominated Congress may mean yet-harsher burdens for employers, who have been pummeled in numerous tax and pension bills in recent years.

"I don't think (the election is) good news but one should not

*Sen. Howard Metzenbaum, D-Ohio, who led the attack on corporations terminating overfunded plans, could have more influence this coming session.*

# 2 RCA execs leave; GE staff to manage fund

By Marlene Givant

NEW YORK — Two RCA Corp. financial executives have resigned, and the $3.5 billion pension fund will be internally managed by the investment staff of General Electric Co., Fairfield, Conn., RCA's new owner.

Brian J. Heidtke, formerly vice president and treasurer, and Pam McCann, formerly staff vice president and assistant treasurer — have resigned from New York-based RCA.

Mr. Heidtke has joined Colgate-Palmolive Co., New York, as vice president and treasurer, succeeding Thomas J. Volpe, who joined The Interpublic Group of Companies, New York, earlier this year.

He had been with RCA for 10 years, serving as vice president and treasurer for one.

Ms. McCann, who was in charge of the pension fund and investor relations at RCA for three years, plans to join Syrus Associates, a New York-based firm providing marketing consulting to money managers, in early January.

Now that the two have left, "we're bringing (the pension fund) in-house," said Dennis D. Dammerman, GE's chief financial officer and senior vice president-finance.

The internal team headed by Dale F. Frey, vice president-investments, will manage $26 billion in RCA and GE pension assets, Mr. Dammerman said.

Many RCA executives have departed since the acquisition in June because their duties overlapped with those of GE executives. Neither Mr. Heidtke nor Ms. McCann is expected to be replaced.

John A. Rolls, RCA's former chief financial officer and senior vice president-finance, left in July to become executive vice president and chief financial officer of United Technologies Corp., Hartford, Conn.

"With all the changes going on I don't think my leaving was any great surprise to RCA," said Ms. McCann.

She believes her new position will round out her experience in the field.

"I had a strong feeling that going to Syrus gives me an opportunity to do kind of a third leg of the stool — to broaden my own background within the industry," she said. Ms. McCann will be a partner in the 11-year-old firm.

Prior to joining RCA, she was director of pension investments at NL Industries Inc., a New York-based chemical, metals and oil and gas company.

Previously, she spent two years as a selection consultant for the consulting group of Chemical Bank, New York.

"(The Syrus position) is much more on the sell side than I've ever been. I think I'm going to enjoy it," she added.

Jettie Edwards, formerly an investment management consultant with Buck Pension Fund Services, New York, also will join the Syrus team.

In another corporate move, David Prince, manager of trust assets for BellSouth Corp., Atlanta, has joined The Southern Co., Atlanta, as assistant treasurer and manager of short-term finance and investment fund analysis.

Mr. Prince, was manager of trust assets at BellSouth for 1½ years.

Among his new responsibilities will be management of the $1.6 billion pension trust and $500 million savings plan.

Mr. Prince said he changed companies because it was a step up.

"I was not in any way dissatisfied (at BellSouth). This was just an opportunity that just came along . . . This is a promotion for me," he said.

He has not yet been replaced. ■

# NYC continuing revamp

## 17 hired to handle $8 billion fixed-income sector

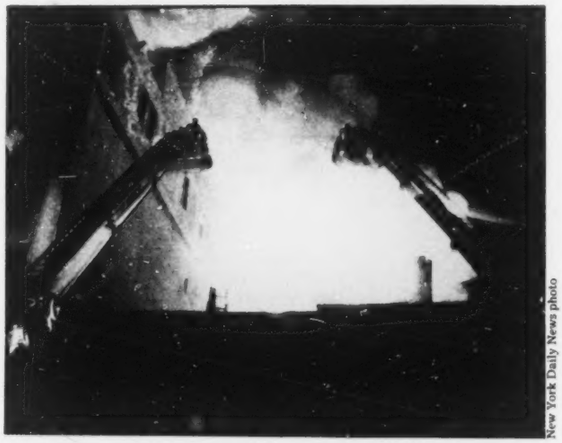
By John Covaleski

NEW YORK — New York City pension officials are nearly finished restructuring the fund's $17.1 billion fixed-income portfolios, hiring 17 managers for $8.21 billion.

New managers for the New York City Fire Department Pension Fund and New York City Employees' Retirement System funds were given specific market sectors in which to invest, tight controls over weightings within the sectors and incentive fees for performance that betters the baseline performance of their specific sectors.

All but $400 million of the $17.1 billion slated for fixed-income restructuring has been redistributed since summer. The remainder is in the New York City Board of Education Pension Fund, and is expected to be redistributed within a month.

The major victim of the restructuring was Citicorp Investment Management Inc., New York, which managed $10.2 billion for the city funds in June and lost all but $290 million it manages for the board of education fund.



New York Daily News photo

City officials rejected Citicorp's bids to manage assets for the firefighters' and employees' funds.

Marvin Damsma, third deputy controller for the city, said Citicorp performed well, but "didn't match the bid presentations" of the other candidates."

He declined to comment on speculation that Citicorp's ouster was connected to its investments in South Africa.

He noted Citicorp achieved a compound annual return of 19.2% for the city funds for the five years ended Dec. 31, com-

# SEI, other universes disagree on median

By Fred Williams

Median equity returns from SEI Funds Evaluation Services are at odds — by as much as 400 basis points — with the median returns from other monitoring companies, apparently because the SEI numbers exclude cash and are based on only a fraction of the SEI universe.

Generally, SEI's returns are higher than those of other performance universes in rising markets — when a portfolio without cash would do best — and lower than others in down markets — when a portfolio with cash would do best.

In 1985, for example, the median SEI portfolio returned 32.9%, well above the 29.6% average for five other major equity indexes. The medians for other indexes for the year ended Dec. 31 were: CDA Investment Technologies Inc., 28.5%; Pensions & Investments' Performance Evaluation Report, 29.1%; Trust Universe Comparison Service, 31.4%; Frank Russell Co., 29.3%; and INDATA, a service of Gordon, Haskett & Co., 29.5%.

The median SEI portfolio would have placed in the upper quartile of several of the other indexes for the year. The upper quartile cutoff for the CDA universe was 31.8%; PIPER, 32.5%; Frank Russell, 32.2%; and INDATA, 32.5%.

For the first nine months of 1986, the SEI median portfolio has been up 12.8%, vs. 10.2% for CDA; 11.9% for PIPER; 12.4% for TUCS; 11.9% for Russell; and 11.6% for INDATA.

In the third quarter, when cash fared better than stocks, the SEI median was down-8.1%, compared with an average decline of 7.07% for the median portfolio of the other five indexes examined.

Keith McDowell, SEI vice president of marketing services, said SEI's exclusion of cash could account for the differences.

"I don't have any easy answers," Mr. McDowell said. "Most of the others don't have equity-only and have some cash built in there. It is my strong suspicion that there is cash in their funds."

Cash is included in PIPER's, Russell's and INDATA's numbers, and minimally (less than 5%) in CDA's. TUCS' numbers exclude cash.

In addition to segregating cash, SEI's median likely is skewed because it is based on statistics from only 300 portfolios of a 2,500-portfolio universe. Industry observers also say the 300 used are the first 300 to report their re-

*Continued on page 102*

# *Northern's RCB buy scotched over price*

By Trudy Ring

Disagreement over price may have been what scotched the proposed sale of Rogers, Casey & Barksdale Inc., Stamford, Conn., to Northern Trust Corp., Chicago, industry sources said.

Opposition by RCB's clients may have been another factor, sources said, although some clients disputed that. Publicity about the deal also may have contributed to its demise.

Northern Trust officials issued a terse statement Oct. 29 saying discussions concerning the possible acquisition had been discontinued. "The termination was amicable, and the parties will continue their other business relationships as in the past," the statement said.

Northern Trust officials declined to elaborate on the statement, while RCB officials did not respond to requests for comment.

But some consultants, money managers and pension fund executives said price may have been the key sticking point. In general, the sources asked not to be named, and no price was given.

"I heard the price was pretty steep," one consultant said. "RCB really wanted a lot of money."

"What they were expecting dollar wise was significant," another consultant said.

Other sources added the acquisition talks seemed to be moving along smoothly and that price appeared to be the only factor that could have caused the deal to fall apart.

In general, a consulting firm's annual revenue is considered a fair sale price, one source said. This may be adjusted, however, to reflect the firm's cash flow and expected profitability.

But a source said RCB could be considered part investment management firm because it acts as a "manager of managers" for some clients. Purchase prices for investment management firms are

## Opinion

# Divestiture to get needed test

THE QUESTION OF WHETHER divestiture of the stocks of companies doing business in South Africa from pension funds breaches a trustee's fiduciary duty is apparently to receive a court test.

The trustees of the Baltimore Employees' Retirement System will file a test case in Baltimore Circuit Court testing a city ordinance that requires divestiture of South Africa-related securities because they believe the ordinance conflicts with their fiduciary duties.

Baltimore's Board of Estimates, which could have blocked the suit, is to be commended for allowing it to proceed. The matter needs an airing in court and should have been tested in court when the divestiture movement first gathered speed.

Unfortunately, until now no trustees have felt compelled to test the matter, although trustees in California were concerned enough about the legality of divestiture to seek indemnification from the Legislature to protect themselves.

And beneficiaries and taxpayers, who might ultimately bear any additional costs of divestiture, have largely been unaware of their exposure.

We hope the court will settle two questions:

- Whether trustees can use the assets of a pension fund to achieve some end unconnected with the welfare of the beneficiaries for whom they are overseeing the trust, even if it may inflict some costs on those beneficiaries in the long run.

If the court rules in the affirmative, it should give guidance as to what ends are of sufficient import to allow actions such as divestiture.

- Whether the federal legislation applying sanctions on South Africa pre-empts state and local actions requiring divestiture.

Some legal authorities have argued the divestiture movement pushes state and local governments into foreign affairs, a province of the federal government.

These issues need to be settled, and a court ruling can settle them.

# Sherwin-Williams decision sensible

THE DEPARTMENT OF LABOR has approved a corporation's request for a loan from its overfunded pension fund, even though such loans are prohibited transactions.

It allowed Sherwin-Williams Co. to borrow up to $65 million from its plans.

The decision to grant an exemption to the prohibited transactions rules is a sensible one because it offers an alternative to corporations that wish to gain access to surplus pension assets but that are reluctant to terminate the pension plan.

Normally, loans to pension sponsors from their funds are to be opposed because they may weaken the security of the pension benefits. If the pension sponsor should fail, a significant part of the assets backing the pension benefits might be worthless. This was the reason the prohibited transactions section was written into the Employee Retirement Income Security Act.

The problem does not apply in the Sherwin-Williams case, however, because the Sherwin-Williams plan is overfunded and because the Labor Department imposed strict conditions on the loan.

First, the loan must be secured by unencumbered collateral. Second, an independent fiduciary will oversee the loan. Third, a market rate of interest must be paid for the loan.

As a result of the Labor Department decision, Sherwin-Williams has apparently decided not to terminate its pension plans to recapture the surplus assets.

But for the department's pragmatism, and Sherwin-Williams' management's willingness to settle for less than the entire pension surplus, another large pension plan would have been terminated, with a consequent weakening of the private defined benefit pension system.

## Letters to the editor

### Info not withheld

To the Editor: Both the headline and body of your article "PBGC holds back on data" (*Pensions & Investment Age*, Sept. 29, p. 64) leave the reader with the impression that the Pension Benefit Guaranty Corp. withholds information under the Freedom of Information Act to a much larger degree than other government agencies. When the facts are examined, they show the opposite.

I refer you to Access Reports Freedom of Information, (Vol. 12, No. 18, Sept. 10, 1986, p. 4) which compares 1985 FOIA annual reports from more than 75 agencies.

The PBGC received more than 1,000 FOIA requests during 1985 and had only TWO APPEALS. This in itself shows that requesters have a high degree of acceptance of our FOIA determinations. Moreover, PBGC's "percentage of requests denied" is only 7.4%. Only eight of the agencies listed had a lower percentage of requests denied.

The conclusion that PBGC as a practice withholds data under FOIA is unfounded.

Having only two appeals of its decisions shows the PBGC is making correct determinations under FOIA. Appeals are rarely needed because the requested records are being disclosed up-front. In the relatively few cases in which requests are denied, there is no need to appeal, because the determinations are accurate and sound.

**Judith E. Beckelman**
Director
PBGC Communications
& Public Affairs Department
Washington

*Editor's note: The article was misleading.*

### 401(k) boom on

To the Editor: Regarding the *Pensions & Investment Age*, Sept. 29 story: "Bill to reshape benefits — Defined contribution plans will change, but won't die," the congressional passage of the tax reform bill has driven interest in 401(k) plans to a fevered pitch. This seems to be quite contrary to the points made in your recent article.

Our client and prospect activity has never been greater for 401(k) plans. It seems that employers are responding to employee demand that a 401(k) plan be implemented so that they may save on the most favorable basis for retirement.

Employed Americans want to replace their IRAs and defer taxes . . . 401(k) is their employer-sponsored alternative. The tax bill may want to break Americans of their habit of deferring taxes, but I am sure that old habits are hard to break.

Purchase, N.Y.

### Profile corrected

To the Editor: The First National Bank of Boston would like to correct a mistake made on a figure sent to *Pensions & Investment Age*, which was published in the September 1986 real estate directory.

As of June 30, 1986, the book value, in equity, should be changed from $168.9 million to $131.9 million, resulting in a total book value of $181.8 million, with a total present market value of $201.6 million.

**Kathryn J. Kelterer**
Real estate marketing assistant
Bank of Boston
Boston

### Funding data flawed

To the Editor: Your article on the funding levels of state retirement systems ("Plans find ways to bolster funding") in the Oct. 13 issue provided an interesting and useful overview of the funding of state retirement systems.

The article used the funding ratio, or ratio of assets to accrued liabilities, as the measure of funding level. The funded ratio is just one very rough measure of the financial status of a retirement system. Focusing on the funded ratio by itself can lead to misleading conclusions. The article states that the funding ratios have increased because of diminishing unfunded liabilities.

Actually, it is possible for the funding ratio to increase from one year to another, even though the dollar amount of unfunded liability may have increased during the same period.

For example, according to a recent study of the financial condition of public retirement systems in Illinois, the aggregate funding ratio for all the public retirement systems in the state increased from 53.2% to 56.3% during the most recent year, even though the aggregate unfunded liability increased by approximately $30 million.

Thus, in order to provide a more complete picture of funding progress, it would have been useful to show the change in the unfunded liability during the most recent year, in addition to the funding ratio.

The article did not indicate what actuarial cost methods were used in determining accrued liabilities for the various retirement systems. Because of possible differences in actuarial cost methods among the retirement systems, the funding ratios shown for the various systems may not be directly comparable.

Under a statement that will be released very shortly by the Governmental Accounting Standards Board, public retirement systems will be required to report their liabilities, using a standardized actuarial cost method, known as the projected unit credit cost method. I would therefore suggest that in future surveys of this type, the liabilities of the various systems be reported using the projected unit credit cost method in order to provide comparable information.

**PIPER**

*The statistical data are extracted from Pensions & Investments' Performance Evaluation Report, a quarterly performance evaluation published by* Pensions & Investment Age. *PIPER details comparative performance data on equity and fixed-income funds at more than 200 banks and insurance companies. PIPER is compiled by Rogers, Casey & Barksdale Inc., Stamford, Conn.*

# Few funds top S&P 500 return

By Brian Lehrer

A host of different strategies produced impressive results for selected bank and insurance company equity funds in Pensions and Investments' Performance Evaluation Report for periods ended Sept. 30.

Although some funds posted sterling returns, fewer than one-third managed to outperform the Standard & Poor's 500 stock index in any time period except the quarter.

The median PIPER fund returned −7.3% in the third quarter, compared with −7% for the index. For the 12 months ended Sept. 30, the median fund returned 29.1%, while the index returned 31.8%.

For the three years ended Sept. 30, the median fund had a compound annual return of 14.3%, and the index, 16.5%. Annualized return figures for the latest five years were 18.8% for the median fund and 20.2% for the index; for the 10-year period they were 13% for the median fund and 13.6% for the index.

First Interstate Bank of Nevada, Reno, was the quarter's champion, with a return of 4.2%.

Robert Lee, vice president, said he uses an "aggressive" market-timing approach for the $15 million fund.

"We recognize cyclical bear markets and anticipate these circumstances to raise cash in our portfolio to avoid losses," he said.

The portfolio now is 100% in cash, primarily in U.S. Treasury bills. At the outset of the quarter, 20% was concentrated in gold and electric utility stocks, which was liquidated as the market fell.

"It will be several months before we are buyers," Mr. Lee predicted.

First Interstate fell below the S&P 500 over the five-year period, with a return of 13.7%, the three-year period, 23.5%, and the one-year period, with a return of 26%. Over the 10-year period its return was 16.2%, above the S&P 500.

Bank of the West, San Jose, Calif., was one of the top performers in the PIPER survey. Its equity fund was among the top three for the three-year period, with 23.5%, and the one-year period, with 45.7%.

It ranked in the top 10% for the quarter — with a −0.4% return — and the five-year period — with a 23.7% annua-

## *Banks' bond mix differs*

# Going long puts 3 ahead

By Marcia Parker

The managers of three top performing bank and insurance company commingled fixed-income funds for periods ended Sept. 30 all banked on a strategy — going long — that paid off.

Leading the way during the one-, three-, five- and 10-year periods was United Bank of Denver's bond fund, which outperformed more than 200 pooled fixed-income funds in Pensions & Investments' Performance Evaluation Report.

Two other repeat top performers joined United in the one-, three- and five-year periods ended Sept. 30. In all three periods, Centerre Trust Co., St. Louis, ranked second and First Interstate Bank of Denver came in third.

The percentage mix of corporate and government bonds differed for the three top performers, but all went with longer maturities.

United of Denver, which is very heavily weighted in government bonds, has an average life of nine years. First Interstate, which emphasizes corporate bonds, went with longer maturities of about 17 years. Centerre, which is overweighted with government and agency bonds, has the longest average maturity at 18.3 years.

W. Lon Schreur, president of United Capital Management, the division of United Bank of Denver that manages the bond fund, attributed the strong performance to "having one of the longer average life bond portfolios in the country."

The fund, with $30 million in assets, is 85% invested in government bonds and 15% in corporate. Mr. Schreur said the average maturity is being shortened; by spring, it should be closer to five or six years than the current nine. In the near term, Mr. Schreur said, the fund would remain heavily weighted with government bonds.

For the 10-year period, the fund's compound annual return was 13.1%, compared with 10.8% for the Shearson Lehman Government/Corporate bond index.

Its five-year compound annual return was 25.1%, compared with 16.2% for the index. The three-year compound annual return was 22.7%, compared with 15% for the index. The return for the 12 months ended Sept. 30 was 33.7%, compared with 19.2% for the index.

For the quarter, when the fund was ranked in the fifth decile, the return was 2.2%, compared with 3% for the index. Mr. Schreur said that during the quarter, the long average life hurt the fund "a little," but he didn't elaborate.

Centerre Trust employs a strategy focusing on interest rate anticipation. With $80 million in assets, the fund is about 64% invested in government securities and 36% in corporate bonds that have an average rating of AA. The average maturity — 18.3 years — is expected to remain unchanged.

"We are succeeding because we have consistently had the same investment policy in place for 14 years," said Dick Hibbs, vice president of marketing at Centerre.

For the one-year period, the fund returned 33%, compared with 20.7% for the Shearson Lehman index; for three years, a compound annual 21.1% compared with 16.7% for the index; and for five years, an annualized 24.7% compared with 19.6%.

For the 10-year period, Centerre's fund ranked fifth, with a 12.8% compound annual return, compared with 10.7% for the index.

In the quarter, it returned 2%, ranking in the seventh decile.

With assets of $64 million at the end of the third quarter, First Interstate's long bond fund is invested about 60% in U.S. corporate funds and 40% in government and agency bonds.

John R. Cormey, vice president of Denver Investment Advisors, which manages the Common Trust I fund for First Interstate Bank of Denver, said the firm's approach is to look at the fixed-income market as two separate

Whether your concern is an employee benefit plan, corporate funds, or your own portfolio, your goal is the same: performance.

And Barnett has an enviable track record to offer: a performance in the top 25% of the country's equity money managers for the past five years, a time period in which the market has had both up and down cycles.*

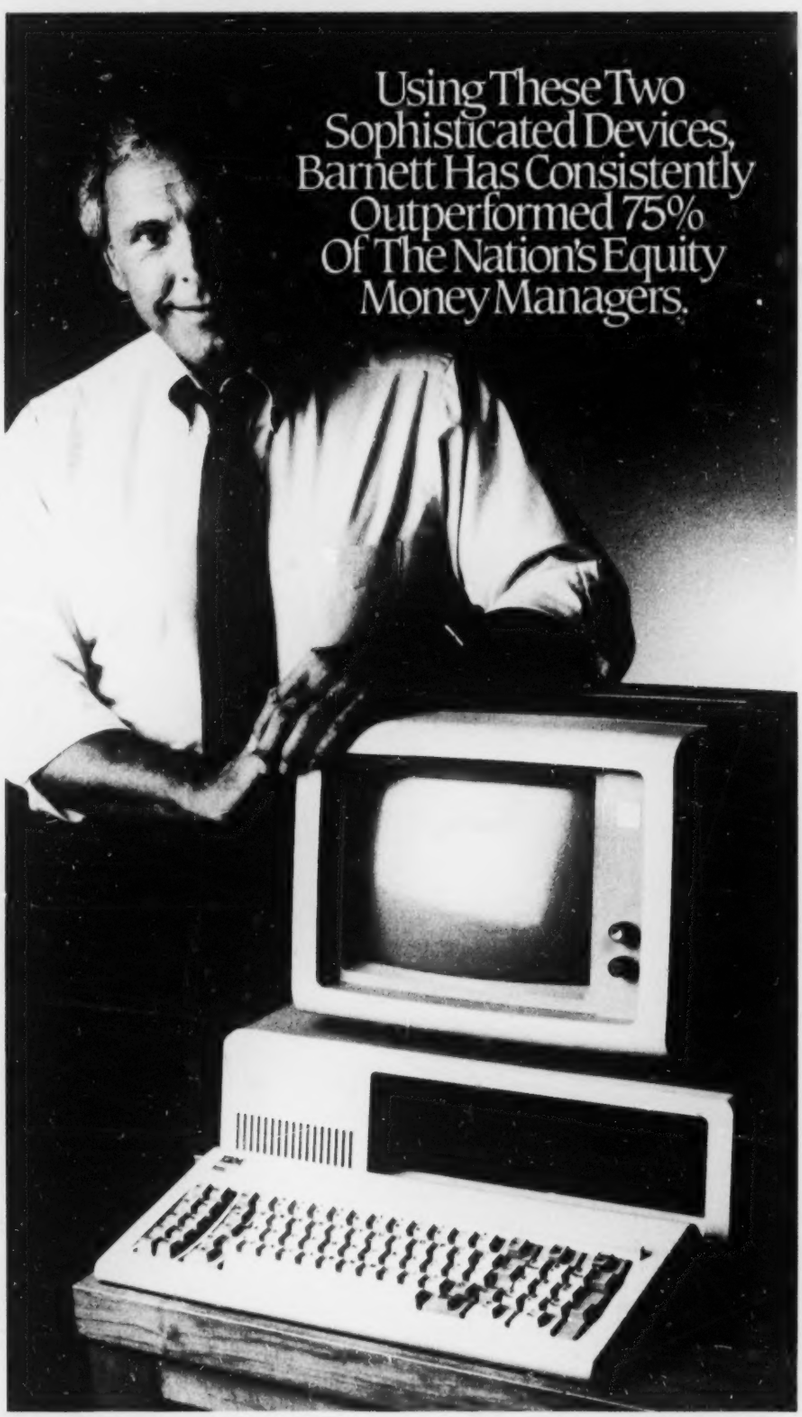
Two important resources make this kind of performance possible.

One, of course, is a group of investment managers and analysts with the kind of experience that gets results.

The other is a sophisticated device called the Barnett Evaluation System℠. Several computer models continually measure the financial status of nearly 7,000 companies, analyzing each as a potential investment, then narrowing the list down to a portfolio of fewer than 50 outstanding investment opportunities.

If you'd like to know more about how Barnett Trust can help you with your investment needs and, at the same time, take care of all the details and paperwork, call your local Barnett Trust office.

One of our two-legged sophisticated investment devices will be right over.



Barnett Bank

Barnett Banks Trust Company, N.A.
Barnett Is Florida's Bank.
All Barnett Banks are members of FDIC.
*As measured by SEI Corp. December 31, 1985/Funds Evaluation Services

# Few equity funds . . .

*Continued from page 65*

lized return.

Joseph Hefner, vice president and chief investment officer, said the bank's $4.3 million fund focuses on large-capitalization companies with recognizable names. The bank's strategy, he said, is "not to lose money."

Mr. Hefner said some of the fund's biggest holdings are **Syntex Corp.**, a pharmaceuticals company, **Philip Morris Inc.** and **Borden Inc.** Some 35% of the portfolio is concentrated in utilities.

The fund recently added **Abbott Laboratories,** and **Minnesota Mining & Manufacturing Co.** to its portfolio.

Another top performer in the one-year period was Pittsburgh National Bank, whose $20 million fund landed in the top five with a return of 43.3%.

Frank Blanc, assistant vice president and senior portfolio manager, said the fund uses a computer-based stock selection process that keys on price momentum and favorable earnings progression.

The program generates about 20 stocks and screens the best eight or 11.

"We try to avoid overpriced stocks, and buy at the lower end of the value range," Mr. Blanc said, "and we have a holding period of about 18 months."

The portfolio is overweighted in consumer-oriented stocks like drug and food companies. Some of its biggest holdings include **Merck and Co. Inc., Eli Lilly & Co.** and **Deluxe Check Printers Inc.**

Harris Trust and Savings Bank, Chicago, finished third for the one-year period with a return of 43.8%. Though it did not fare as well in other time periods, it has consistently outperformed the S&P 500.

John Kirscher, senior vice president, said the $126 million fund employs a decision model that focuses on price/earnings ratios, dividend discounts, price and earning momentum and a change in estimates.

The portfolio is overweighted in banks, utilities, autos, aerospace, insurance and home building. "We have a very good savings and loan exposure," he said.

Some of its biggest holdings are **U.S. Gypsum Corp., National Gypsum Co., California Federal, Golden West Financial, Great Western Savings Bank** and **Home Federal Savings and Loan of San Diego**.

First of America, Kalamazoo, Mich., finished in the top three over the three-year period, with a return of 23.5%, and in the top 10 for the one-year period, with a return of 41.3%.

The $94 million fund employs a specialized approach to the low p/e investment strategy. It looks for undervalued stocks with a record of good historic growth and positive earnings.

"We focus attention where earnings expectations are improving compared with earlier time periods," said Craig Vander Molen, managing director of Securities Counsel, Kalamazoo, Mich., the wholly owned subsidiary of First of America that manages the bank's portfolio.

The portfolio is concentrated in financial, consumer and cyclical stocks. The heaviest emphasis is on financial stocks, some of which are **Great Western Financial, American Express, First Bank System** and **Ahmanson & Co.**, a savings and loan.

First of America was comfortably nestled in the top 10% over the five- and 10-year periods, with returns of 23.1% and 16.4%, respectively. The news was not as good for the quarter: First of America finished out of the top 10% with a −5.1 return, but it still outperformed the S&P 500.

Provident National Bank, Philadelphia, was an outstanding performer over the five-year period, finishing seventh with an annualized return of 24.2%.

Portfolio managers of the $250 million commingled fund buy low p/e stocks, said Carol McMurtie, senior vice president of Provident Capital Management, Philadelphia, which manages the bank's portfolio.

Some of its biggest holdings are **Citicorp** and **IBM**, with large holdings in utilities, railroads and airlines.

"Our portfolio tends to represent what has a low p/e at the moment," Ms. McMurtie said, "so it changes a lot."

She said the Bell operating companies have been among Provident's best performers over the past five years. "A lot of our best money has been made because we haven't lost it," she added.

Provident's returns have been ensconced above the S&P 500 in every time period in the PIPER survey.

First Wisconsin National Bank, Madison, placed third over the 10-year period with 19.7%.

The $130 million fund concentrates on small companies that are growing faster than the economy. It is heavily overweighted in financial and retail companies.

Some of its biggest holdings are **Columbus Mills, Laidlaw Transportation** and **Crump Cos.**, an insurance company.

First Wisconsin-Madison has had stock in Columbus and Crump for six and five years, respectively. "We hold on to our winners," said J. Scott Harkness, senior vice president and chief investment officer. ■

# Users of sector rotation listed

About 23.3%, or 129, of 552 investment managers surveyed by *Pensions & Investment Age* list sector rotation as part of their bond investment approach.

These managers move from government bonds to corporate bonds or agency bonds depending upon the interest rates each of these sectors is offering, or is expected to offer. For example, if corporate bonds are carrying higher interest rates than usual relative to government or agency bonds, sector rotational managers will move more of their assets into corporate bonds and reduce their commitments to the other securities. Sector rotational managers have much historical data on the normal interest-rate relationships.

Sixty-three of sector rotation managers have more than $1 billion under management.

What follows is a list of those managers. Information was compiled by the managers for *P&I Age*'s May 19 special issue on the nation's leading investment advisers.

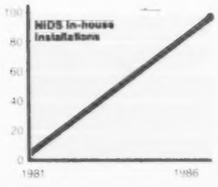
**Figures refer to total tax-exempt assets under management, $ millions.*

The portfolio management business is more vulnerable than ever to marketing issues:

## Doesn't using a Service Bureau only increase your vulnerability?



**Traditional investment advisors no longer exist. Suddenly, the industry has become the most competitive one on earth, and as clients have become more sophisticated, they have become more demanding.**

**No one doubts that effective marketing and quality customer service depend on information. No one doubts that good information is information you can control. Yet many money managers still trust their most important information to outside service bureaus.**

**The only way to regain control of your data is through an in-house solution. But, it must do more than process data. It must be manageable.**

**Experience: The Only Guideline**

As the world's leading vendor of in-house portfolio management hardware and software, National Investor Data Services has helped more than a hundred firms make the transition. Our clients include such firms as: Pacific Investment Management Co. of Newport Beach, CA; Fiduciary Counsel Inc. of New York City; First Chicago Investment Advisors of Chicago; and Neville, Rodie & Shaw, Inc. of New York City. We know the risks and the problems at first hand. We understand that each company's requirements are unique. And we are fully aware that most money managers are not engineers.

We knew these things before we ever sat down to design NIDSPORT-II. We also knew we could design a system that would give you portfolio status, accounting, performance analysis and reporting from data captured once...would deliver instant, real-time updates...would let you ask what-if questions and would save you a great deal of money.

We have met all these objectives. Today, NIDSPORT-II is not only the most widely adopted in-house portfolio system, it is also the standard by which other systems are judged.

**Not Just Bits and Bytes**

NIDSPORT-II is more than hardware and software. It is training, service and support unparalleled in the industry. It is an active, independent users' group. And it is a commitment to staying at the leading edge of technology.

NIDSPORT-II offers the benefits of in-house portfolio management without the transition trauma. If you'd like more information about NIDSPORT-II, just write or call: Carl Froebel, President, National Investor Data Services, Inc., 33 Flying Point Road, Southampton, New York 11968, (516) 283-1100.

# Mutual funds target growth

WASHINGTON — The prospect for continued growth is the challenge and the opportunity for the mutual fund industry, said Richard M. Reilly, the newly installed chairman of the Investment Company Institute, Washington.

"While it's true that we've made substantial inroads, the total number of investors still represents a relatively small percent of the overall market," said Mr. Reilly, who succeeds George F. Reed.

"Our biggest challenge is also our biggest opportunity: to make certain the public understands the products they are getting, so their expectations will be realistic."

Mr. Reilly also said the market is virtually unlimited as long as investors understand what can and cannot be delivered.

The mutual fund industry itself has grown to more than $650 billion from $45.8 billion a decade ago.

The ICI is the national association of the American mutual fund industry.

Its membership includes 1,660 open-end investment companies, their investment advisers and principal underwriters. The institute's mutual fund membership comprises about 90% of total industry assets and some 25 million shareholders. ■

# Few use quantitative analysis

About 8%, or 53 of 663, of equity managers surveyed by *Pensions & Investment Age* list quantitative analysis as part of their investment approach.

Managers using quantitative methods to select investments typically subscribe to the Modern Portfolio Theory, which says there is a definite relationship between risk and return and that the market is very efficient at digesting information about stocks and adjusting prices to reflect that information.

Almost one-third of equity managers citing MPT analysis have more than $1 billion in tax-exempt assets under management.

Information was compiled from questionnaires submitted by the managers for *P&I Age's* May 19 special issue on the nation's leading investment advisers.

## Emerging growth managers listed

About 12.5%, or 83 of 663, equity managers surveyed by *Pensions & Investment Age* list emerging growth stock as part of their investment approach.

Managers using emerging growth invest in young companies they believe will be successful. Such a company generally is evaluated on the type of product or service it offers, the reputation of its management and its earning potential.

Almost one-quarter of equity managers citing emerging growth stock have more than $1 billion in tax-exempt assets under management.

Information was compiled from questionnaires submitted by the managers for *P&I Age's* May 19 special issue on the nation's leading investment management firms.

**Figures refer to total tax-exempt assets under management, $ millions.*

The 1,000 largest tax-exempt funds will be listed in the Jan. 26 issue. Details are given on asset size, asset mix and investment managers.

# Our entry point windows make custom plan administration a breeze.

When pension administration systems don't automatically process custom plans, most vendors provide you with a choice of ways to tailor your system. You can specify the changes required, then wait 6-8 weeks while your vendor makes them. Or you can hire expensive programmers to write new routines for you.

Some choice.

But that won't happen to you with ACTI. Because our systems for defined contribution and defined benefit plans feature our exclusive entry point windows, which make processing unique plans a breeze, regardless of their complexity.

We've been providing hard-working solutions to employee benefit problems since 1968. And our DCVAL and DBVAL systems have given hundreds of pension administrators a productivity edge. And the ability to serve their clients better.

What's more, our systems are designed and kept up-to-date by employee benefit professionals. So you'll find that our standards are every bit as exacting as yours.

To find out more about ACTI and how our systems can help, just call or write for more information or a demonstration. And we'll show you how our entry point windows could change your outlook on custom plan administration. Call 1-800-DNA-ACTI (in Texas, 214/891-0900).

I'm interested. Please send details of ____ defined contribution ____ defined benefit systems.

# Buyers of low p/e stocks told

About 29.3%, or 194, of 663 equity managers surveyed by *Pensions & Investment Age* list the purchase of stocks with low price-earnings ratios as part of their investment approach.

The p/e ratio, the price of stock divided by its earnings per share, gives investors an idea of how much they are paying for a company's earning power.

Low p/e stocks tend to be in low-growth or mature industries, in stock groups that have fallen out of favor, or in blue-chip companies with long records of earnings stability and regular dividends.

Investors using this approach search for companies where some development has made the low price relative to earnings inappropriate, e.g., an unnoticed change for the better in management.

They expect the market in general to eventually recognize and reward this change.

Almost one-quarter of equity managers citing purchase of low p/e stocks have more than $1 billion in tax-exempt assets under management.

Information was compiled from questionnaires submitted by the managers for *P&I Age*'s May 19 special issue on the nation's leading investment advisers.

ERISA. What you don't know could hurt you.

Complying with ERISA requirements without the advice of the Department of Labor is like wearing a blindfold to work every morning. It's a self-imposed disadvantage that sets you up for big mistakes.

The Washington Service Bureau's **ERISA Update** is the intelligent alternative to blindfolds. It begins by providing subscribers with the full text of all Department of Labor Advisory Opinions and every Pension Benefit Guaranty Corporation Opinion Letter issued to date. Added to that is exclusive coverage of the text of selected Information Letters from both agencies.

Abstracts of each item, exclusively prepared by the Washington Service Bureau, offer a concise recap of important points at a glance. The abstracts are conveniently organized by ERISA section, and topical and alphabetical indices provide additional access.

Any way you look at it, ERISA can affect you. You can feel those effects as they happen, or after it's too late.

Every week you wait gives the DOL time to release a few more letters. And, what you don't know could hurt you.

**Exclusive coverage of prohibited transactions**

A subscription to the **ERISA Update** also provides the most comprehensive coverage of Prohibited Transactions including:

- Abstracts and full text of all final denial letters relating to Prohibited Transactions.
- Abstracts of Federal Register notices proposing and granting Prohibited Transaction Exemptions.
- Abstracts and full text of all Prohibited Transaction interpretations.

**Easy to use**

**ERISA Update** is provided to you in a loose-leaf format and is updated monthly. We provide you with binders and divider tabs arranged by ERISA section.

To subscribe to **ERISA Update** or for more information, call Angela Sasso at **833-9200** (within the District of Columbia) or toll-free **(800) 221-3184,** or contact your local Commerce Clearing House representative.

# Equity firms with sector rotation style

About 21%, or 137, of 663 equity managers surveyed by *Pensions & Investment Age* list sector rotation as part of their investment approach.

A sector is a particular group of stocks affected in the same way by economic developments. As the economy moves through different phases from recession to recovery, to boom, to decline, different business sectors are affected at different times. Sector rotators attempt to determine which sectors of the stock market will be positively affected by the next development in the economy and buy those stocks in advance. They attempt to sell those stocks at their peak and rotate into the stocks that will be positively affected by the next stage of the economic cycle.

One-third of equity managers citing the sector rotational style have more than $1 billion in tax-exempt assets under management.

Information was compiled from questionnaires submitted by the managers for *P&I Age*'s May 19 special issue on the nation's leading investment advisers.

**Figures refer to total tax-exempt assets under management, $ millions.*

# Sales of funds at record pace

WASHINGTON — Sales of stock, bond and income mutual funds totaled $16.5 billion in September as the industry rolled toward the end of a record year, according to the Investment Company Institute, Washington, the national association of the mutual fund industry.

Bond and income funds led the way again as total sales for the first nine months of 1986 hit $157.5 billion, more than double the comparable figure of $77 billion for the first nine months of 1985.

Total sales for all of 1985 were a then-record $114.3 billion.

Total sales for August 1986 were $18.3 billion, and the comparable sales figure for September 1985 was $9.5 billion. Third-quarter sales totaled $53.1 billion compared to $30.8 billion for the third quarter of 1985.

These figures represent sales of all stock, bond and income funds, but exclude the short-term funds (money market and short-term municipal bonds), which are tracked by assets on a periodic basis.

Assets for all mutual funds totaled $676.8 billion, compared to $676.3 billion in August. ■

## Pentagon to get credit from UTC

By Barry B. Burr

United Technologies Corp. has agreed to provide credits of $20 million to the Department of Defense because one of its pension plans reached the full-funded limitation status, according to the Air Force Contract Management Division.

In addition, the Hartford, Conn.-based company proposed to provide another $70 million in credits, called "downward price adjustments" by the Air Force, should another of its pension plans meet the full-funded status, according to the Contract Management Division, which monitors large Air Force contractors from Kirtland Air Force Base, Albuquerque, N.M.

The United Technologies agreements are part of a broad Defense Department effort seeking to share in the saving contractors realize when their pension plans reach the full-funded status.

A United Technologies official confirmed the agreements and the credits. "But we won't go into any more detail than that," said Michele Farley, manager-financial public relations.

Kari J. Fielder, manager-public affairs at the Air Force division, said further details on the United Technologies credits were not immediately available.

Another contractor, Lockheed Corp., Los Angeles, re-

# Funds top targets, cut international

By Marlene Givant

Cumulative returns in excess of 150% have pushed many tax-exempt funds over their target allocations for international investment and, as a result, at least four have cut back on their overseas commitments.

- The $4.8 billion pension fund of United Technologies Corp., Hartford, Conn., has cut back its international equity investments by 41%.
- The $750 million fund of Scott Paper Co., Philadelphia, slashed its international equity investments by 50%.
- The $1.5 billion endowment fund of Stanford University, Palo Alto, Calif., cut the international equity allocation to the 8% to 12% range from more than 13% of assets.
- The $50 million Wenner Gren Foundation for Anthropological Research, New York, halved its international exposure to 15% from 30%.

Superb returns pushed the funds above their targets. The Morgan Stanley Capital International Europe Australia Far East index returned a cumulative 150% between Jan. 1, 1984 and June 30, 1986, and many managers performed above the index.

In early October, United Technologies' international equity portion was sliced back to a level below its 20% target.

"We were 70% overweighted (over the target) in international equities. Now we've cut back to neutral," said Beverly Hamilton, vice president-investor relations and pension investments at UT.

International equity apparently was reduced to about $340 million, or 15% of total equity, from its Sept. 30 level of $576 million, or 25.5% of total equity.

The fund has terminated Putnam International Advisors, Boston, and Batterymarch Financial Management, New York, but officials wouldn't explain why.

The amounts the firms had managed were not available and Ms. Hamilton declined to comment on the asset shift.

At Scott Paper, officials made a gradual shift to its target of 10% international equity from 20%, terminating two managers in the process, according to Andrew Yost, pension fund manager.

"We dramatically cut our exposure beginning in the first quarter (of 1986). Our exposure was approximately double our 10% target. We chose to terminate managers."

One of those terminated was Putnam International. He did not disclose the name of the other manager terminated.

Part of the assets taken from international equity will be shared among one or more of Scott Paper's domestic equity managers. The remainder will be placed in a "buying reserve" until the fund decides how to allocate

# Boesky falls, prices follow

By Marci Baker

Investment bankers and institutional "junk bond" managers predict immediate price concessions on high-yield offerings in the emotionally charged aftermath of the investigation of Drexel Burnham Lambert Inc. in connection with Ivan Boesky's insider trading activities.

But junk bond players believe the largest-ever insider trading scandal ultimately will help the market, causing the investment community to rely less on Drexel and more on other investment banking firms for underwriting and market-making.

Still, other investment houses don't appear to be jumping in to seize market share while Drexel is down. Investment bankers are taking a wait-and-see attitude, although most agree Drexel eventually won't dominate the market.

Meanwhile, high-yield money managers stepped up trading activities late last week as price declines in the market created buying opportunities.

"We're in the middle of a maelstrom right now," said one junk bond investor, who, like most of those contacted for this story, did not wish to be identified.

"Nobody knows what's going on. Long term, the fundamentals are in place so that this scandal is not going to hurt the market. The question right now is to what extent there's going to be a short-term volcanic eruption."

Mr. Boesky agreed Nov. 14 to pay a record $100 million to settle insider trading charges brought by the Securities and Exchange Commission in relation to his risk arbitrage activities. Since then, he has continued to cooperate with the SEC's widening investigation, causing fear on Wall Street about who else will be implicated.

Photo by Mary Herlehy

*Ivan Boesky and Drexel Burnham are feeling the backlash.*

SEC officials indicated they are exploring Mr. Boesky's ties to Drexel's junk bond operation. Michael Milken, the emperor of Drexel's junk bond kingdom, has been subpoenaed, along with several other Wall Street executives.

Drexel dominates the junk bond market and is best known for giving corporate raiders the means — via the high-yield, low-investment-grade bonds — to pursue takeovers.

Between $10 billion and $12 billion in junk bond securities were to hit the public and private placement markets before year end, many of them acquisition-related transactions under pressure to be completed before the tax laws change next year.

There's "no question" the uncertainty over the involvement of Drexel and Mr. Milken in the SEC probe "will have some impact on pricing," one banker said. "Some concessions will have to be made."

"No one wants to buy in a down market," another banker said. "We could be pricing something that could be worth a point or two less the following day."

Even so, there's little evidence that new deals are problem ridden.

Drexel completed a $1 billion offering Nov. 18 for Safeway Stores, Oakland, Calif., to finance its leveraged buy-out by management and leveraged buy-out specialists Kohlberg Kravis & Roberts, New York, with seemingly little difficulty. The deal — $750 million of senior subordinated 10-

# Mercer-Meidinger and Hansen eye merger

**By Chuck Paustian**

DEERFIELD, Ill. — Officials of A.S. Hansen Inc. and William M. Mercer-Meidinger Inc. are considering a merger that would strengthen Mercer-Meidinger's position as the largest benefit consulting firm in the world.

Mercer-Meidinger, New York, which has been on an acquisition path during the past several months, was selected by Hansen's directors over 11 other firms.

Sources said the other firms included Buck Consultants Inc., New York, and Saatchi & Saatchi Co. PLC, the British advertising firm and parent of Hay/Huggins Co. Inc., a Philadelphia benefits and actuarial consulting firm.

Details of the proposed merger, approved at a special meeting of Hansen's directors Nov. 17, were not available. The purchase price has been estimated, however, at $50 million to $55 million.

Steven W. Fargason, chief executive officer and chairman of the board of Deerfield, Ill.-based Hansen, and Howard Lund, Hansen's chief operating officer, will meet with Mercer-Meidinger representatives to work out the details. They will report their findings to Hansen's board of directors by Dec. 8.

Industry sources, including former Hansen employees, speculate the merger was prompted by a group of older employees wishing to cash out before retirement.

Melvin W. Borleis, vice president and director of benefit consulting at Hansen, gave another reason. "We're an ongoing enterprise and a major consulting firm, and we're doing this to explore business opportunities," said Mr. Borleis, adding the wishes of older employees, while taken into account, were not the driving force.

"My own opinion is that I don't see this as the case. In my mind, that (the older employees) is not the reason," he said.

If the proposed merger is consummated, Mercer-Meidinger would distance itself from its competition in terms of size.

According to statistics compiled by Business Insurance, a sister publication of *Pensions & Investment Age*, Mercer-Meidinger is the largest consulting firm — with $226 million in gross revenue from benefit consulting in 1985.

The others are Towers, Perrin, Forster & Crosby, New York, with $180 million in gross revenue from benefit consulting; The Wyatt Co., Washington, $151 million; and Johnson & Higgins, New York, $101 million.

Rankings based on gross revenue from total operations in 1985 showed TPF&C was the No. 1 firm with $250 million, followed by Mercer-Meidinger, $235 million; Wyatt, $175 million; and Johnson & Higgins, $113 million.

In 1985, Hansen had gross revenue from benefit consulting of $48.4 million and gross revenue from total operations of $55 million.

Mercer-Meidinger's position is further strengthened by other recent acquisitions, including Frederick Teague & Co., an executive compensation consulting firm in Chicago. The Teague acquisition was Mercer-Meidinger's third in the past six months (*P&I Age*, Oct. 13).

Mr. Borleis said Mercer-Meidinger's proposal was selected for

# Team approach

## N.Y. contracts aid minority firms

**By John Covaleski**

NEW YORK — Two New York public pension funds are implementing separate strategies to solve the dilemma facing some pension fund executives seeking minority firms for money management duties.

Officials of the New York State Common Retirement Fund and New York City Retirement Systems each approved separate plans in which small, minority-owned financial firms with limited pension fund exposure will work with larger, established firms to manage money for the funds.

In each case, the minority firm lacks either the experience or the track record to meet the funds' guidelines to qualify as sole managers, but the larger firms they are teamed with do meet the criteria. Inability to meet those requirements is a common problem among minority firms, which have not been in business long enough to establish the track records required by many pension executives (*Pensions & Investment Age*, March 31).

*Arthur W. White Jr., president and CEO of United Mutual*

At the New York State fund, $100 million in equity assets previously managed only by Equitable Investment Management Corp. now is run in a joint arrangement with Equitable and United Mutual Life Insurance Co. United Mutual is a black-owned firm in New York's Harlem with no previous pension fund investment experience, with $11.6 million in total assets and a negative return

*Continued on page 46*

# Comparison story on SEI incorrect

The Nov. 10 issue of *Pensions & Investment Age* incorrectly reported the median equity return of the SEI Funds Evaluation universe differed significantly from that of other universes, and that the difference might arise from SEI's methodology.

On a comparable basis, there was no significant difference between the SEI results and the results measured by other universes.

The error occurred because the equity-only results of balanced accounts for the SEI universe were compared with the equity-plus-cash results of the other universes. SEI publishes both equity-only results of balanced accounts and the equity-plus-cash results of equity funds.

The equity funds-plus-cash in the SEI universe, for example, had a Sept. 30 year-to-date median return of 12.2% compared with 11.9% for the Pensions & Investments' Performance Evaluation Report universe, 12.4% for the Trust Universe Comparison Service, 11.9% for the Frank Russell Co., 10.2% for the CDA Investment Technologies Inc. and 11.6% for the INDATA universe.

For all of 1985, the SEI universe median was 30% compared with 29.1% for PIPER, 28.5% for CDA, 31.4% for TUCS, 29.3% for Russell, and 29.5% for INDATA.

The methodology used by SEI in generating its median returns would have no adverse impact on the returns. SEI gathers its performance figures from pension fund custodians and the sample from which the median returns are calculated is selected so that it is representative of all SEI accounts. It is not based on the first accounts reported.

In addition, the results generated from the sample are later compared with results from the

# Cash Management

## Issuers ready to pour more into 'junk' paper

Barry B. Burr

Coca-Cola Bottling Co. Consolidated is considering increasing its $75 million commercial paper program, so strong has been its reception despite the lack of a short-term rating by any of the credit-rating companies or any credit enhancement, according to its treasurer.

The Charlotte, N.C.-based distributor of soft drinks in the South and British Columbia never sought a rating because "we're highly leveraged and not the type that would get a prime rating," said David V. Singer, vice president and treasurer.

Moody's Investors Service Inc., New York, rates the bottling company's long-term debt Ba 3, while Standard & Poor's Corp., also in New York, rates it BB+, he added.

But like a growing number of companies, Coca-Cola Consolidated wasn't deterred from the commercial paper market.

Unlike many firms with doubtful credit standings, the company rejected buying a standby letter of credit, or other credit enhancements, that would enable it to obtain a prime rating, the perceived route to issuing commercial paper, he said.

Working with Salomon Brothers Inc., New York, as its commercial paper dealer, Coca-Cola Consolidated sold its program to money market investors on the bottling company's own credit standing.

The program accounts for about 90% of Coca-Cola Consolidated's short-term borrowing, the rest coming from banks, Mr. Singer said.

He said the bottling company is thinking of expanding the program; but how much and when depends on its short-term financing needs. "That obviously would be the way to go," he added, referring to the attractive rates.

Its unrated paper sells for an average spread of 55 basis points more than the Federal Reserve's composite average rate of 30-day commercial paper of AA rated companies, Mr. Singer said, adding it beats its bank borrowing by 25 to 30 basis points.

"We haven't had any trouble selling it," he said of the program that began in October 1985.

Coca-Cola Consolidated isn't alone.

An increasing number of companies are issuing what some industry executives call junk commercial paper — commercial paper that is neither rated nor backed by a credit enhancement.

It represents a fundamental change in the commercial paper market, which was once the preserve of only the best-rated corporations, according to dealers. The change parallels the growth in junk bonds, they said.

The likelihood of getting a below-prime rating in commercial paper no longer necessarily deters corporations from tapping the market for short-term financing without a credit enhancement, usually in the form of a standby letter of credit issued by a bank.

Issuers view their unrated paper as a cost-effective alternative to credit-enhanced paper or to bank credit.

"It's really one of the recent success stories" in finance, said Howard Pollack, senior vice president at Shearson Lehman Commercial Paper Inc., New York.

Navistar Financial Corp., Schaumburg, Ill., a unit of Navistar International Corp., Chicago, has raised its unrated program to $390 million outstanding from about $50 million in November 1985 when it began, according to John Bongiorno, the subsidiary's president. The unrated paper program now provides more than half of Navistar Financial's $750 million in short-term financing; the rest comes from banks.

Because of Navistar's financial troubles, the unit lost its rating in the early 1980s, he added. It didn't issue commercial paper until Shearson Lehman offered the current program.

As for having a credit enhancement, Mr. Bongiorno said Navistar Financial "really didn't think we had to, given our revolving (credit) line," obtained to provide an alternative lending source.

He said the unrated paper sells at a rate "as much as 50 basis points" under what Navistar Financial pays to borrow from its banks.

He said he expects Navistar Financial may recover a prime rating, if its parent succeeds in its latest financial restructuring.

"As we begin to recover our rating, we already will have a presence in the marketplace and enjoy" the good will of investors, Mr. Bongiorno said.

Unrated issuers as well as dealers cited a similar reason for favoring unrated paper over credit-enhanced paper. They said investors in unrated paper have to become familiar with the issuer, a recognition that increases in value as the company wants to issue longer public debt, even if money market investors are not the same group as bond investors. With credit-enhanced paper, they said, investors look only at the bank or financial institution backing the paper, rather than at the issuer.

As Coca-Cola Consolidated's Mr. Singer put it, with a letter of credit, "Our name wouldn't be out in the marketplace. There

## *Account analysis gets NCCMA nod*

By Chuck Paustian

ANAHEIM, Calif. — After a successful unveiling of its account analysis prototype, the National Corporate Cash Management Association's standards committee doesn't plan to rest on its laurels.

The standards committee presented its long-awaited account analysis model at the association's seventh annual conference to appreciative reviews.

"Ideally what's happening with the NCCMA is exactly what we want to happen," said Patrick J. Finan, senior systems analyst with Procter & Gamble Co., Cincinnati.

> *"It's kind of like having a kid. I'm glad it's over with, but it still has to grow up."*
>
> — Raymond L. Cushing
> Nordson Corp.

Procter & Gamble is developing an electronic account analysis transmissions system. Mr. Finan said the NCCMA's prototype will aid P&G's current system.

In an interview, Raymond L. Cushing, corporate cash manager at Nordson Corp., Cleveland, and chairman of the standards committee, said while the account analysis prototype is a major step, a lot more work is still to come.

"It's kind of like having a kid. I'm glad it's over with," Mr. Cushing said, referring to the work and anticipation surrounding the presentation of the model. "But, it still has to grow up."

Mr. Cushing, who also was elected a director of the NCCMA during the conference, said the committee has begun work on related projects, including an account analysis data glossary, expected in mid-1987, and a joint effort with the American National Standards Institute to develop electronic transmission guidelines, expected some time in 1988.

Mr. Finan said P&G's system might serve as a starting point for ANSI's efforts.

Other projects scheduled for 1987 include a prototype lockbox questionnaire — developed with the Bank Administration Institute, a trade group based in Rolling Meadows, Ill; a dictionary of cash management terms; and a model contract for customer service agreements.

The prototype NCCMA account analysis statement is divided into five sections: customer information; current and historic balance and compensation information; adjustment detail; a management summary of accounts; and service description and cost information.

"It solves a lot of problems," said Mr. Cushing. "I like the way it handles the adjustment."

In the past, he said, a bank's adjustment for errors made in previous statements could go undetected unless the cash manager reviewed previous statements and reconciled those with the current one. In addition, the cash manager would have no way of double checking the amount of the adjustment or the bank's calculation.

Under the prototype, any adjustments would appear both in the adjustment detail section and the historic balance and compensation section of the statement.

Mr. Cushing said the other major improvements of the prototype include bank compensation data, the product families or service groups, and activity information for each account.

The bank compensation section of the statement allows corporate cash managers to know exactly where they stand in terms of compensating their bank, whether it be on a balance or fee basis.

## Fed proposes redeposit plan

By Barry B. Burr

WASHINGTON — After a test program showed improved processing time and reduced costs, the Federal Reserve Board proposed to provide a redeposit service for "small" checks that are returned because of insufficient or uncollected funds.

Under the proposed "return item reclearing service," Federal Reserve Banks would intercept dishonored checks and redeposit them for a second presentment on behalf of the collecting institution. The practice would speed processing time and reduce costs, according to the Federal Reserve.

Under the proposal, each Federal Reserve Bank would set its own limit on the dollar amount of checks eligible for the return item reclearing service.

Earl G. Hamilton, assistant director, Federal Reserve Board bank operations division, Washington, said there would not have to be any limit on the dollar amount of each check redeposited through the proposed service. But he said it likely would be less than $900 each, and probably closer to $100 each to minimize risk.

The Federal Reserve Banks would charge a fee to offset all costs associated with the service. The Fed notice gave no estimate of the fee.

Participation in the service by commercial banks and other senders of checks would be voluntary.

Banks upon which the checks are drawn still would be required to send back checks being returned within 48 hours or otherwise risk liability for any loss occurring to the sending bank.

Representatives of a number of major cash management banks said they were unaware of the proposal and declined to comment.

Test programs, beginning in 1984, at the Federal Reserve Banks of Atlanta, Cleveland and St. Louis found about 60% of the dishonored checks are paid upon second presentment.

According to a 1985 study by the Bank Administration Institute, a Rolling Meadows, Ill.-based trade group, cited by the Fed, slightly less than 1% of the 42 billion to 44 billion checks written annually are returned unpaid. Of the checks that are dishonored, 53% have a value of less than $100.

The reclearing service accelerates presentment items for most returned checks by one day, because the item no longer is returned to the sender before being redeposited. In addition, the time required for the check to finally be paid also is cut by at least one day.

The Fed proposal noted many collecting institutions, before charging their customers for checks returned for insufficient funds, routinely try again to deposit for collection low-dollar dishonored checks. The reason is

**PIPER**

*The statistical data are extracted from Pensions & Investments' Performance Evaluation Report, a quarterly performance evaluation published by* Pensions & Investment Age. *PIPER details comparative performance data on special equity and international funds at more than 50 banks and insurance companies. PIPER is compiled by Rogers, Casey & Barksdale Inc., Stamford, Conn.*

# Special equity leaders played it safe

**By Brian Lehrer**

Discipline and conservatism produced some of the best results for bank and insurance company commingled special equity funds in the periods ended Sept. 30.

Despite fine performances by selected funds, the median special equity fund in the Pensions & Investments' Performance Evaluation Report outshone the Standard & Poor's 500 stock index in only the 10-year period.

The median fund returned −11.3% for the quarter, while the S&P 500 registered −7%.

For the 12 months ended Sept. 30, the median fund returned 24%, while the index returned 31.8%. For the three years ended Sept. 30, the median fund posted a compound annual 7.3% vs. the S&P's 16.5%.

Annualized figures for five years were 17.3% for the median fund and 20.2% for the index, and for the 10-year period, 17.3% and 13.6%, respectively.

The top fund for the quarter was RepublicBank Dallas, whose Select Equity Fund returned 10.5%. First Interstate Bank of Nevada, Reno, and CitiCorp, New York, rounded out the top three with returns of 4.6% and −0.7%, respectively.

RepublicBank's $9 million select equity fund is the anomaly to the conservative strategies. A highly volatile fund with only five or six stocks, its managers follow a low price-earnings approach.

"We manage it the same way we do our other funds," said H. Edward Anderson, senior vice president, "but we take it one level of risk more by taking rather large bets."

Some of the three-year-old fund's holdings are **IBM Corp.**, **American Bankers Insurance Group** and **Amcast Industrial Corp.**

First of Maryland's, Baltimore, special equity fund finished in the top 10% for the quarter, posting a −4.8% return.

"The umbrella that overrides our investment strategy is asset allocation," said Steve Ralston, portfolio manager. "We try to diversify as much as possible."

The fund, with slightly more than $10 million in assets, strives for low-beta investments and makes decisions based on a stock's consistent growth or secular change.

Mr. Ralston said First of Maryland sells its stocks at predetermined target prices. "Very rarely do we ratchet it up when we achieve the desired price," he said.

The portfolio is 92% securities and 8% cash. **Subaru of America Inc.** and **Dunkin' Donuts Inc.** have been some of its most successful stocks, although Mr. Ralston attributed the portfolio's strong showing last quarter to "very heavy cash."

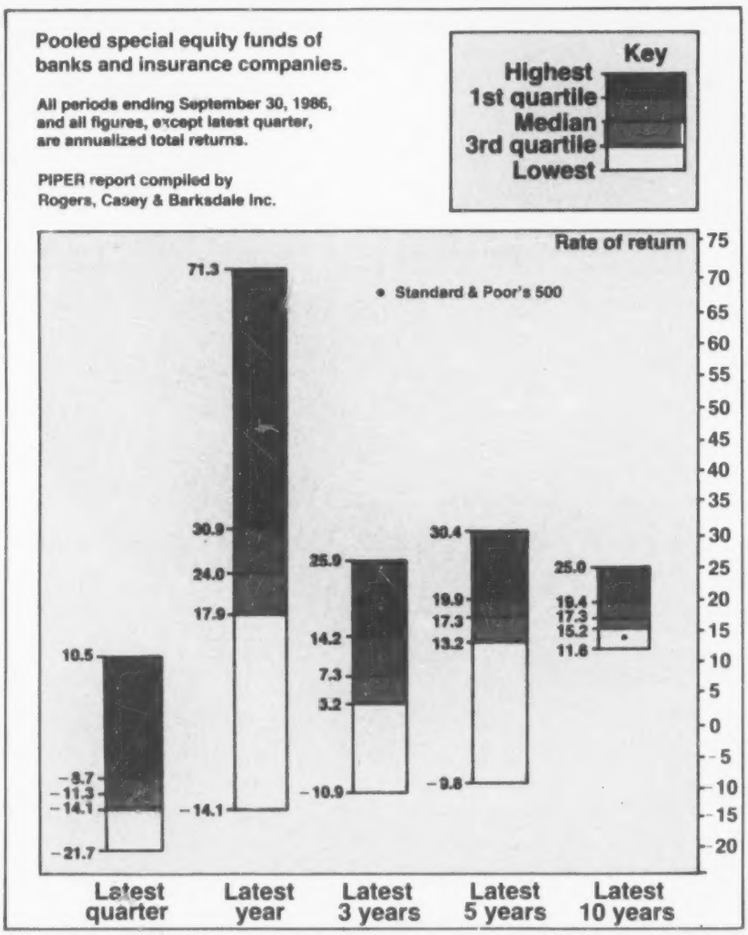
The fund fared similarly well in the five- and 10-year periods, finishing in the top 20%, with compound annual returns of 21.8% and 22.3%, respectively. Over the one- and three-year periods it slid below the S&P, with returns of 22.8% and an annualized 12.3%. In the one-year period it finished in the bottom half of all PIPER funds, and in the three-year it finished in the top 30%.

RepublicBank also finished first for the one-year period, with a return of 71.3%. Chase Manhattan Corp., New York, and The First National Bank of Neenah, Wis., placed second and third with returns of 53% and 48.9%, respectively.

First of Neenah's $6 million equity income fund espouses a relatively conservative approach, said Michael Flesch, vice president.

The fund's objective is high current return along with capital appreciation. Managers look for higher-yielding stocks and convertible preferred stocks and bonds.

"We like our equities to yield at least 4% or more," Mr. Flesch said. "When they don't, we sell right cover calls, which brings up the whole return."



He said the fund is overweighted in real estate and financials. Some of its best returning stocks are **Philip Morris Inc.**, **New Plan Realty Trust** and **Washington REIT**.

Another top performer in the year was American Fletcher National Bank, Indianapolis, whose E Fund finished seventh, but still in the top 10%, with a return of 42.7%.

The $2 million fund has stocks that tend to be low-beta and low price-earnings, said Leif Nulsen, senior vice president. "It (the fund) has achieved an above-average return with a below-market risk," he said.

The fund is overweighted in financial issues and credit cyclicals, like regional banks and savings and loans, capital goods, technology and utilities.

Some of its better performing stocks are **Kroger Co.**, **Kellogg Co.**, **Eli Lilly Co.**, **Philip Morris** and **Hasbro Bradley Inc.**, Mr. Nulsen said.

"We generally look for a stock that is selling at a low price relative to its historic price level, but is also generating good cash flow and revenues," he said. "You might classify us as a value-oriented contrarian type of manager."

The fund, started in 1980, finished fifth for the three-year period, with a return of 18.5%, and its −5.3% return for the quarter topped the S&P and put it in the second decile. Its compound annual 20% return dipped below the S&P index in the five-year period, placing it in the top 30%.

Another top performer in the survey was Fidelity Management Trust, Boston, whose $535 million aggressive equity commingled pool finished sixth for the year with a 43.4% return.

Frank Parrish, executive vice president and chief investment officer, said the company's investment strategy is not based on any specific blueprint.

"Basically we use a very broad discipline," he said. "We tend to use a bottom-up approach."

The portfolio is evenly divided between small-cap stocks, growth stocks and blue chips, he said. The fund is overweighted in consumer cyclicals, mostly automotives, and financial services, which comprise 21% and 25% of the portfolio, respectively.

Some of its best returning automotive stocks are **Ford Motor Co.**, **Chrysler Corp.** and **Volvo of America Corp. Student Loan Marketing Association** and **Federal National Mortgage Association** are two of its financial service stocks.

The pool, started in 1981, finished fourth over the three-year period with a 20.2% return, but was not included in the five-year period.

Society National Bank, Cleveland, fin-

# International funds focus on the Continent

**By Marlene Givant**

No longer enamored with the Japanese market, top-performing managers in Pensions & Investments' Performance Evaluation Report continued to emphasize continental European stocks in the third quarter.

Some managers did, however, overweight Japanese, as well as West German, currencies over British sterling and U.S. dollars.

PIPER tracks the returns of 31 bank and insurance company international and global equity and fixed-income commingled funds.

The $55 million International Employee Benefit Equity Fund of the Bank of America, San Francisco, topped all others for the quarter, year and three years ended Sept. 30.

The fund, managed in London by BA Investment Management International Ltd., posted a total return of 20.8% for the quarter, 127.8% for the year and a compound annual 45.7% for three years.

The Morgan Stanley Capital International Europe Australia Far East index returned 15.3%, 90.1% and an annualized 43.3% for those periods, respectively.

American National Bank & Trust Co. of Chicago's index fund ranked second for the quarter, with a 20% return.

For the year ended Sept. 30, Bessemer Trust Co., New York, ranked second, with 105.3%, and Centerre Trust Co. of St. Louis ranked third, with 99%.

BA Investment expects a souring world economy and therefore avoided stocks it considers most sensitive to economic factors in the third quarter.

It avoided capital equipment, technology and basic industry stocks in favor of financial stocks, particularly in France and Spain, and service and consumer-oriented stocks, mainly in the U.K. market. Those sectors are relative beneficiaries of slow economic growth and falling interest rates, said Chris Carter, international equity manager.

For financials, the most value was in European stocks, particularly those in France and Spain. For service and consumer stocks, the most value was in the U.K. stock market, he said. "We still feel on virtually every count the Japanese market remains significantly overvalued."

At the end of the third quarter, the fund had only 10% in the Japanese market, reduced from 20% at the end of last quarter.

While Japan is assigned a weight of about 50% in the EAFE, Mr. Carter said BA Investment will continue to phase out Japanese stocks.

In addition to controlling market and sector risk, BA bridled currency risk by selling sterling forward in yen and deutsche mark currencies.

"We're underweighted in Japan but feel less happy about being that much underweighted in yen currency," he said.

Yen exposure remained at 30% for the third quarter but in the fourth quarter BA might shift more to deutsche marks. This is because of the relative willingness of Japanese authorities to lower interest rates while West Germany is stubborn on interest rate policy, he said.

To further ward off effects of a bear market, the fund is building cash levels.

"Interest rates pushed down worldwide (in the third quarter). In the second quarter, there was little risk of being in equities," he said.

"We now feel the risk in equity markets on the whole is increasing and we are beginning to build up the level of cash in the portfolio. At the end of the third quarter we had 15% cash. Over the fourth quarter we would expect to increase that further."

American National Bank & Trust's $20 million international equity fund, which was second for the quarter, is an index fund tracking the EAFE.

"We don't try to exactly track the index. We try to replicate the return and risk characteristics," said Jim Kartalia, director of marketing. "We own (stocks of) only 11 of the 60 countries in EAFE. The tracking error tends to

*Continued on page 41*

# Special equity . . .

ished 10th for the year, with a return of 38.1%.

The $16.2 million earnings momentum fund, started in January of 1985, follows a "very disciplined" three-stage investment strategy. Portfolio managers look for growth companies that have grown at least 5% during a six-year period, with "very consistent" earnings in that time, that have experienced accelerated operating earnings in the current quarter.

The portfolio is overweighted in consumer staples and financial, and underweighted in technology and utilities. But weightings are not a cardinal element of Society National's tactics, said Jim Foster, vice president.

"We take a bottom-up approach," he said. "Weightings are secondary and earnings are primary."

Some of the fund's best returning stocks are **Waste Management Inc.**, **Nordstrom Inc.**, **Merck & Co. Inc.** **Philip Morris Inc.**, **Russell Corp.** and **Charming Shoppes Inc.**

For the quarter, the fund finished in the bottom half of the PIPER survey with a −11.5% return.

California First Bank, San Diego, was another top 10 performer for the year, as its fund placed eighth, registering 39%.

William Jeffery III, president of Califor-nia First Capital Management, La Jolla, the investment-management arm of the bank that handles the fund, said the roughly $15 million fund follows an aggressive-growth, bottom-up approach. "We are earnings-driven," he said.

The portfolio is overweighted in specialty retailers, 40%, and technology, 30%.

Some of its retail holdings are **Liz Claiborne**, **Consolidated Stores** and **Cherokee Group**. Some of its technology holdings are **Ashton Tate**, **Seagate Technology** and **Autodesk**.

Although the fund finished in the bottom 20% for the quarter and the three-year period, posting −20% and 0.7%; it finished in the top 20% for the five-year period, with a compound annual 21%, and placed third for the 10-year period, with an annualized 23.5%. For the three-year period, RepublicBank remained perched at the top with a compound annual 25.9% return, while CitiCorp and First of Neenah returned 21.7% and 21.3%, to place second and third.

CitiCorp's real estate stock fund took the gold for the five-year period, with a compound annual 30.4% return, while Chase Manhattan and Provident National Bank, Philadelphia, had annualized returns of 25.8% and 24.7%, respectively.

The Growth Fund of MTrust, Dallas, reigned for the 10-year period with an annualized 25% return, while Equitable Bank, Baltimore, and California First Bank, San Diego, returned 24.2% and 23.5% to round out the top three. ■

# International . . .

*Continued from page 39*

be random. We're not sure (whether it will be up or down) during a given quarter or month. If you look at the last five years, EAFE did 30.7%. Our international fund did 29.4%. We're including transaction costs, etc. In the long haul we'll track pretty well."

While Bank of America has avoided many Japanese stocks, Bessemer Trust, the second-ranked fund for the year, overweighted them. Peter Scully, vice president, said that overweighting was to thank for the 105.3% return on its $75 million Fund E portfolio for the period.

"The key was we were heavily weighted in Japan — over 50% — with emphasis on Japanese domestic equities in utility, retail, construction and financial sectors, as opposed to export companies," he said.

More recently, "we have been taking some profits in Japan, moving some of that money into Hong Kong and Europe. We see more value in those markets at this point. (There's been) a tremendous run-up in the Japanese market. It's fully valued . . . We think there are good opportunities on the Continent."

The fund, which is now all equity but is not precluded from holding bonds, is jointly managed with the bank's London office.

Centerre Trust's $125 million Collective International Fund W, which ranked third for the year, is managed by Centerre in conjunction with Morgan Grenfell Investment Services Ltd., London.

The fund's strong return was attributed to its emphasis on West German and Japanese currencies and overweighting in Japanese stocks.

"Currency and overweighting in Japan really account for the vast majority of that return. First we did make sure that we were fully invested in terms of the yen and the mark. We really didn't hold dollars; (we) primarily emphasized those two currencies," said John Rabenau, a vice president at Centerre.

Mr. Rabenau stressed, however, that to add value the managers concentrated more on stock selection and country weightings than the currency factor.

"We tended to have overweighting in Japan. A major portion of Morgan Grenfell's approach is not the currency factor but equal emphasis on stock selection and country weightings. They don't emphasize currency as a major force in adding return. (We thought) more in terms of country weighting than individual stocks."

No managers beat the EAFE's 30.7% compound annual return for the five-year period, but IDS International Inc., Minneapolis, ranked second, returning 30% on its $51 million international collective fund.

The firm uses a top-down as well as bottom-up approach.

"We develop a macroeconomic geopolitical overview as the first stage in the process. We take a generalist approach (before choosing stocks)," said Diane Vener, assistant vice president.

Following IDS was American National Bank & Trust's fund, with a compound annual 29.4%, and Marsh & McLennan's Putnam International Trust, with 27.7%.

United States Trust Co. of New York, eked past the EAFE for the 10-year period, with a 22.5% compound annual return on its $30 million international ERISA equity fund compared with the index's 22.4%.

"Over that 10-year period the strategies have not all been the same," said Harry Rowney, vice president and chairman of U.S. Trust's international investment policy committee.

Initially, the fund was managed in-house. In the past five years, it entered into a joint venture with Foreign & Colonial Asset Management, New York.

As for the overall investment philosophy, Mr. Rowney said, "it would be a top-down approach, some evaluation on economies, currencies and markets to conclude which markets seem most appropriate for investment. Then (we) look for values within those markets and economies."

There were only two other funds tracked in the 10-year period, Morgan Guaranty Trust Co.'s international equity fund, which returned a compound annual 20% and First Chicago Investment Advisor's international equity fund, with 18.9%. ■

## What about *your* fund?

AT LAST! Someone has come up with the ideal combination for pension plan equity investing . . . the General American *Dual Index Fund* concept. Combine the rewards of investing in small companies with the experience of the stock market as a whole. General American is proud to offer Equity I, an index fund that tracks the S&P 500, and Equity II, a companion index fund that tracks the smallest 20% of NYSE-listed stocks. Invest with the *assurance* of PREDICTABILITY of results . . . matching the indices. A unique combination that makes sense for *all* equity investors.

# Boston managers merge

BOSTON — Mini merger mania hit the Boston investment management community in early November when two well-known firms announced plans to merge with or be acquired by two others.

By year end, Hagler, Mastrovita & Hewitt Inc. will be acquired by United Asset Management Corp., the publicly traded holding company in the business of buying money management operations.

In addition, Rollert & Sullivan Inc. will join its operations with Fort Hill Investors Management Corp. in December.

Hagler, Mastrovita manages roughly $1.4 billion in institutional assets. The purchase will bring to 12 the number of money management firms under the UAM umbrella, while total assets under management for the holding company will climb to roughly $15 billion.

Fort Hill's assets under management will climb to about $700 million after the merger with Rollert. About one-third of that amount represents accounts currently being run by Rollert & Sullivan, said Gordon Rollert, the firm's president who will become vice chairman and a member of the investment committee for the merged companies.

The moves come amid a flurry of acquisition or initial public offerings among investment management firms.

Indeed, UAM went public only this past summer in a $40 million offering. While the recent activity underscores a trend toward consolidation in the industry, the timing of these latest moves may in part be tax-related.

Money managers thinking about having their firms be acquired or go public have a strong incentive to do so by year end. Stockholders can cash out and be taxed at a 20% rate on the capital gains they realize only until year end. In 1987, the effective capital gains rate will climb to 28%.

While this may be a motivating factor for some investment managers to move now, Mr. Rollert said the changing tax laws did not play a role in his decision to merge with Fort Hill.

"I want to spend as much time as I can managing money and dealing with clients," Mr. Rollert said. "This is a situation that will allow me to do that."

Another advantage, he said, is that he will be aided in his investing activities with the support services of a larger organization.

Officials at Hagler, Mastrovita did not return calls by press time.

Hagler, Mastrovita is the first firm to be acquired since UAM's offering and some think the company will announce at least one more transaction by year end.

Archer des Cognets, UAM's senior vice president-marketing, declined to comment on that matter beyond what the firm stated in its six-month financial reports, released in September. The report stated UAM expected to do "one or more deals" by the end of the year.

Hagler, Mastrovita is primarily an equity manager, although it runs some fixed-income and balanced accounts as well. It looks for undervalued companies relative to their earning power, mingling sector rotation with low price-earnings stocks and Graham & Dodd techniques.

Style is less a factor in UAM's buying strategy, however. "Generally, what we're looking for are firms that have demonstrated good strong track records," said Mr. des Cognets. Hagler, Mastrovita fit that bill.

Officials at Fort Hill, meanwhile, have been looking to diversify and offer money management services that complement its own value-oriented, risk-averse approach, said Orie Dudley, Fort Hill's chairman and chief executive officer.

Rollert's growth-stock equity style carries greater risk with it.

The fit goes a number of steps further, he said, in that Rollert is an equity manager running mainly corporate pension fund and university endowment accounts, while Fort Hill runs primarily balanced accounts for a large number of union and municipal pension plans.

The deal also will help Fort Hill move into another arena — mutual fund management. Rollert has run the Nova Fund, a $25 million mutual fund specializing in high-technology stocks, which is expected to become part of Fort Hill, pending approval of the fund's shareholders.

The merger comes after hard times for both investment firms, where performance suffered and accounts were lost. But they have begun to rebound.

Mr. Dudley said growth-stock management is returning to favor. Numbers for both firms have improved.

During the last fiscal year, Rollert achieved 20.35% growth for its equity-plus-cash portfolio and 21.27% increase in its balanced portfolio.

Fort Hill's 10-year annualized return recently ranked in the top 20% of SEI Corp.'s universe of balanced funds. ■

# The perfect balance for Master Trust.

National Bank of Detroit's master plan for Master Trust is the perfect balance of high-caliber people and high technology.

It all begins with a single, knowledgeable NBD administrator, who listens carefully to your concerns, and develops the Master Trust formula that will best achieve your objectives.

Your administrator is backed by a team of NBD professionals, each with a particular area of expertise. This "team approach" provides you with accurate, timely information, and assures you of a quick response.

Our NBD professionals are supported by some of the most sophisticated data processing and computer systems available. This state-of-the-art technology provides the flexibility needed to customize NBD Master Trust to your needs... just what you'd expect from one of the first and largest Master Trust programs in America, with assets of over $20 billion.

Combining human expertise with advanced technology, our NBD Master Trust program offers you a wide array of accurate, reliable services including: Guaranteed safekeeping. Benefit disbursements. Cash management. Accounting and financial reporting. Portfolio review. Performance measurement. Securities lending. Global custody. And, of course, our on-line information system.

For more detailed information on what the NBD Master Trust program can do for you, contact one of our professionals at (313) 225-3221. The perfect balance. You'll find it pays to put NBD's master plan for Master Trust to work for you.

One of America's great banks

*Continued from page 2*
consideration because, "if there was a business combination, it would have to be one that provided the best future and protection for Hansen employees and clients as well as (giving) value to shareholders."

"Over the past several years, there have been all kinds of discussions that have taken place with all kinds of people for a variety of reasons," he said.

Douglas Stegner, vice chairman of Mercer-Meidinger, confirmed discussions with Hansen officials were taking place, but declined to describe the nature of the talks.

Mr. Stegner did say, however, that his company's recent acquisitions will not hurt its ability to pay for a firm the size of Hansen.

"I don't think we'd be talking with them if we thought we didn't have the resources," he said.

While the price Mercer-Meidinger would pay for Hansen was not disclosed, historically the purchase price of consulting firms has been about equal to one year's billing revenue of the target firm.

James A. Curtis, chairman of Milliman & Robertson Inc., an actuarial firm in Seattle, said some recently acquired European firms were sold for as much as 1.7 times annual billing revenue.

"It used to be that one thought in terms of one times a year's billed income," said Mr. Curtis. "But, it sounds like that might be on the low side now."

Mr. Borleis agreed with Mr. Curtis. "That seems to be a rule of thumb in this industry. Whether that's coincidence or reality, I don't know," he said.

Hansen officials may be considering the merger as a means of allowing some of its older employees to sell their shares of stock, after other means of appeasement failed.

In March, Hansen's directors switched the valuation method for its shares from a book value method to a market-value approach. The switch increased the price of the stock by about 60%, said a former employee.

He said while the increase in stock price pleased some of the older employees, who had accumulated large holdings, it angered the younger professionals looking to purchase more equity in the company.

David A. Powers, executive director of the Colorado Fire and Police Pension Association, Denver, a client of Hansen's, said he is aware of the disruptions taking place within the firm.

Older employees still might believe the price of their Hansen stock is too low.

"What you have is a faction of older employees who are getting close to retirement who are forced to sell back their stock at an artificially depressed price," Mr. Powers said.

Mr. Powers said his fund uses Hansen for actuarial and investment consulting. He said the fund probably would stay with Hansen on the actuarial side. He added he would be "highly sensitized" to any changes on the investment consulting side.

Mr. Borleis said he doesn't anticipate any departures from either Hansen's personnel or its client base. ■

# SEI median . . .

total universe to ensure there is no significant difference.

The sample size was incorrectly reported to be 300, said Jim Minnick, senior vice president at SEI Funds Evaluation, but he declined to specify the correct size saying it varied according to the kinds of accounts being reported upon.

*P&I Age* regrets the error.

• An Oct. 27 article describing **Moore, Grossman & deRose Inc.**'s lawsuit against Frederick A. Moran incorrectly stated Mr. Moran allegedly sent account transfer forms to clients of Moran, Moore, Grossman & deRose, as the firm previously was known, before he left it. Although the complaint alleged Mr. Moran "tried to solicit clients while still employed" at the firm, it did not specifically state when Mr. Moran sent the account transfer forms to clients, the plaintiffs' lawyer said. Mr. Moran denied sending the forms while still employed by the firm.

• The Pensions & Investments' Performance Evaluation Report fixed-income fund performance figures for **Beverly Bank**, Chicago, were printed incorrectly in the Nov. 10 issue. The correct returns for periods ended Sept. 30 are: for the quarter, 2.9%; the year, 21.3%; three years, a compound annual 17.7%; five years, an annualized 20%; and 10 years, an annualized 12.5%.

• The **Salomon Brothers Broad Investment Grade bond index** figures for the quarter, one-, three- and five-year periods ended Sept. 30 were reported incorrectly in the Nov. 10 issue. The correct numbers are 2.5%, 20.4%, a compound annual 17% and a compound annual 19.9%, respectively.

Performance figures are unweighted total rates of return. Prior to 1983, the universe of accounts was a composite of the fixed income account portion of the ten largest discretionary pension and tax-exempt balanced accounts. After that, the composite was increased to include all fully discretionary fixed accounts and the fixed income account portion of balanced accounts. Comparison universe is SEI Bond Funds: Total Fund as of 12/31/85.

# Late news

## PBGC withdraws bid

CHICAGO — The Pension Benefit Guaranty Corp. has withdrawn its request to impose a lien on Navistar International Corp.'s assets, pending resolution of the PBGC's lawsuit against Navistar.

In exchange for the withdrawal, Navistar agreed to give the PBGC five days' notice of any planned action that would encumber more than 75% of the company's assets. In that event, the PBGC would be free to seek further relief, which Navistar could oppose.

The PBGC sued Navistar, then called International Harvester Co., in 1981, charging the Chicago-based company is responsible for the unfunded pension liabilities of its former Wisconsin Steel Co. unit. Wisconsin Steel, Chicago, terminated its underfunded pension plan after filing for reorganization under Chapter 11 of the Federal Bankruptcy Act in 1980, three years after the steelmaker was sold to Envirodyne Industries Inc., also of Chicago. The PBGC had been seeking a $125 million lien on Navistar to secure its claims.

## LTV waiver denied

DALLAS — An Internal Revenue Service decision denying The LTV Corp.'s request for a waiver of its $215 million pension contribution for 1985 may put pressure on the Pension Benefit Guaranty Corp. to take action on the severely underfunded plans.

Dallas-based LTV was notified that its request for a waiver on 12 plans with total assets of $1.5 billion had been turned down by the IRS, said an LTV spokesman. Most of the assets are held in four plans.

Steven Brooks, a steel analyst with Moody's Investors Service, New York, said the IRS decision, while not unexpected, would put pressure on the PBGC to step in and terminate the plans as it did earlier this year for LTV's Republic Steel plans.

If the PBGC accepts the nearly $2.3 billion in additional liabilities included in the LTV plans, Mr. Brooks said Congress may have to authorize additional money for the agency.

A PBGC spokesman said agency officials are taking a careful look at the LTV situation but no decision has been made.

If the PBGC were to terminate the 12 LTV plans, its current $2 billion deficit would more than double to $4.3 billion.

## RJR picks Bennett

RALEIGH, N.C. — Robert Bennett Jr. will succeed Gene Hoots as president of RJR Investment Management Inc., the in-house subsidiary that manages the $2.4 billion pension fund of RJR Nabisco Inc.

Mr. Hoots is scheduled to leave in late November to join the New York money management firm of Reich & Tang Inc. as vice president-client services.

Mr. Bennett most recently headed RJ Reynolds Credit Corp.

## Fund takes action

SACRAMENTO, Calif. — The $37 billion California Public Employees' Retirement System has introduced resolutions to 43 companies that have "poison pills," according to Jose M. Arau, principal investment officer.

Poison pills are designed to make hostile takeovers prohibitively expensive.

"We think poison pills without shareholder approval infringe upon shareholders' rights of determining whether direct action is in favor of shareholders," Mr. Arau said.

Among the companies to which the resolutions were submitted are: NCR Corp., Dayton, Ohio; Monsanto Co., St. Louis; Aluminum Co. of America, Pittsburgh; Union Camp Corp., Wayne, N.J.; Great Northern Nekoosa Corp., Stamford, Conn.; Honeywell Inc., Minneapolis; and Unisys Corp., Detroit.

Thirty of the resolutions were sponsored with the California State Teachers' Retirement System and one with the Wisconsin State Board of Investment, Madison.

## UAM acquires 2 firms

BOSTON — United Asset Management Corp., a holding company of institutional investment management firms, announced it has acquired Investment Counselors of Maryland Inc. and The Rothschild Co., both in Baltimore.

The sales prices were not disclosed. The terms of the acquisitions state each firm will continue to operate independently. United Asset receives an undisclosed portion of the firms' gross revenue.

Investment Counselors, which offers stock, equity and balanced management capabilities, runs about $1.8 billion in assets, of which about $1.3 billion is tax exempt.

Rothschild, an equity manager employing low price-earnings, emerging growth and Graham & Dodd principles, manages about $900 million in total assets; about $600 million is tax exempt.

UAM now owns 14 investment management firms, with about $17.7 billion in assets under management (*see story page 42*).

## Sysco Corp. hires

HOUSTON — The Sysco Corp., a major national wholesale food distributor, hired RepublicBank Dallas as trustee for its $6 million profit-sharing plan.

Republic was selected because of its reputation in the trust area, said Sysco Treasurer LaDee Riker, and because the company already had a commercial banking relationship with the bank.

## Harris, Dunedin fund

CHICAGO — Harris Bank has appointed Dunedin Fund Managers Ltd., Edinburgh, Scotland, as investment adviser for non-U.S. securities.

The first joint product of the bank's trust department and Dunedin will be a commingled foreign equity fund, which will invest mainly in European and Far East stocks.

Conrad R. Metz, Harris' assistant vice president and a member of the equity research division, has been named U.S. coordinator of the fund.

Dunedin manages approximately $2 billion; Harris Bank has more than $12 billion in pension, profit-sharing and personal assets under management.

## Joint venture set

BERKELEY, Calif. — BARRA, a company specializing in investment technology, and Nikko Securities Inc., Tokyo, have formed a Tokyo-based subsidiary, NB Investment Technology Ltd.

The firm's principal product is the Japanese Equity Model, a software model of the Japanese securities market to be used as a data base in investment analysis.

It will offer BARRA's domestic and international products in Japan and has begun developing a Japanese fixed-income model.

Three Japanese money management firms are clients. Its president is Osamu Tanaka, former head of Nikko's Paris office.

# Project gets $160 million from U S WEST

By John Covaleski

JERSEY CITY, N.J. — In a significant move into developmental real estate, the $6.3 billion U S WEST Inc. pension fund will invest about $160 million in an unfinished office project in Jersey City, just across the Hudson River from Manhattan's financial district.

The Harborside Financial Center is only 35% leased for its projected 2 million square feet of office space. Pension funds usually shy away from such deals because of the additional risk involved, preferring more fully leased properties.

While some funds have gotten their feet wet in developmental projects, most do it by sharing the risk with other investors.

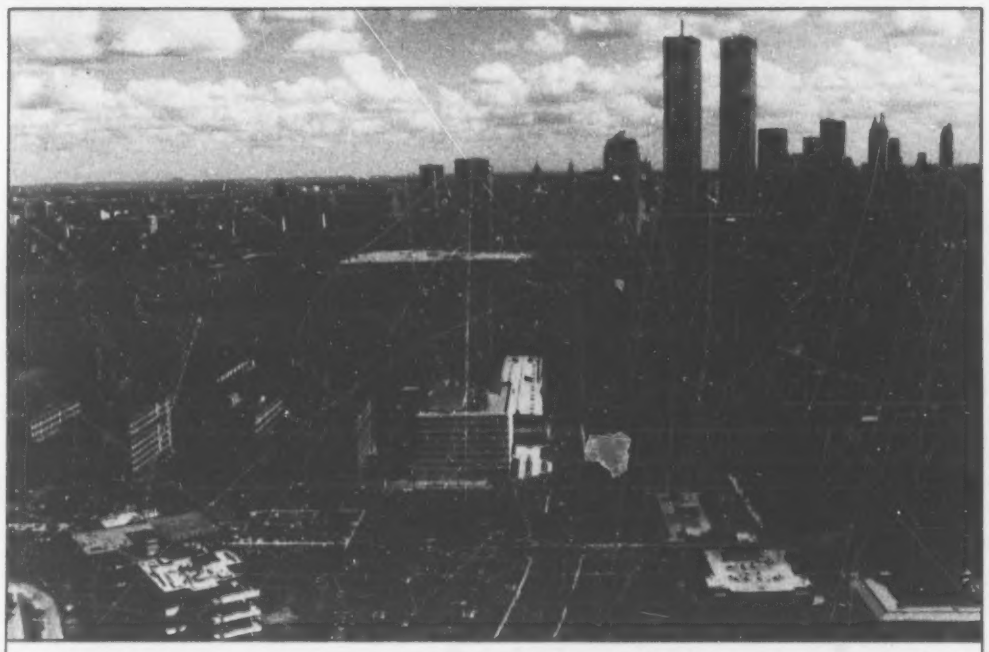
In this case, however, the Englewood, Colo.-based U S WEST pension fund is the sole equity investor in the 50-acre project designed to lure Wall Street back-office operations from Manhattan. In addition, the project will be leveraged through construction loans.

The fund should be able to double the value of its investment during the next four years, without taking on more risk than it would through a joint venture arrangement, said Stephen Furnary, a principal with Jones Lang Wootton Realty Advisors, New York, the pension fund's adviser on the project.

Mr. Furnary predicted average annual returns of between 17% and 23%.

The fees Jones Lang Wootton will receive for developing, managing and leasing the development will be about 5% to 10% higher than real estate investment advisement fees on typical projects.

This is because the fund will get the entire return and won't have to split it with a developer, said John A. Weisz, principal and chief investment officer of Jones Lang Wootton.



*Harborside Financial Center (the complex along the river in the left foreground of the photo) is a developmental real estate deal for U S WEST Inc. The pension fund is the sole equity investor in this project in Jersey City, N.J., which is across the Hudson River from Manhattan.*

U S WEST put up $60 million in cash and assumed a $60 million construction loan. In addition, $120 million — two-thirds of it in loans — will be invested by U S WEST in the project's renovation during the next 24 months.

Harborside is a former railroad freight warehouse, which a partnership has been converting into office space since 1982. Some 700,000 square feet has been converted thus far by the partners, Michael W. Sonnenfeldt and David M. Fromer. The project also includes 50 acres of waterfront land and two piers directly across from Manhattan's World Trade Center.

Plans by Jones Lang Wootton and the U S WEST fund call for renovating the entire warehouse property into back-office and re-

# U.S. widens bid for surplus

## NASA, Energy Department seek piece of pension pie

By Barry B. Burr

WASHINGTON — The National Aeronautics and Space Administration and the Department of Energy want a share of the surplus assets from pension plans terminated by their contractors and credits or refunds for contributions to fully funded plans.

The agencies' moves come on the heels of similar action by the Department of Defense. They are a sign that the effort to recover overpayments of pension contributions in contracts is sweeping throughout government departments.

"You are dealing with a hot issue right now," said John J. Edmondson, the Department of Energy's director of employee compensation benefits who oversees contractors' pension expense.

Speaking of contractors with plans at the full-funded status, Robert Lynch, NASA price analyst said, "We have a good reason to believe it's a pervasive problem." Mr. Lynch sits on two government committees that oversee cost and accounting principles for contractors.

The effort originated with the Department of Defense a few months ago. The department has shared in, or is seeking to share in, several reversions from the termination of overfunded pension plans. The department also has received credits for contributions made to so-called fully funded plans (*Pensions & Investment Age*, Nov. 10 and Nov. 24).

In a separate matter, the General Accounting Office issued a report critical of the timing of contractors' funding of pension costs.

The report, sent to Secretary of Defense Caspar W. Weinberger, found contractors often defer funding of their pension plans, even though the costs already have been allocated to the Pentagon.

# *Soft-dollar use still a puzzle*

By Chuck Paustian

Pension funds and their money managers still are attempting to understand the implications of statements by the Department of Labor and the Securities and Exchange Commission that could drastically affect the use of soft dollars to pay for investment services.

More than six months after the two statements were released, many pension executives remain unaware of them, and money managers and consultants disagree over their interpretation and their likely impact.

While the statements didn't outlaw the use of directed brokerage commissions, the guidelines regulating their use were tightened.

Both agencies stipulated directed brokerage arrangements are permissible only if best price and best execution are obtained: The burden of proof of best execution resides with the pension executive and the investment manager.

The Department of Labor's technical bulletin states soft dollars can't be used to pay for services, such as performance measurement, unless the pension plan's assets would have been used to pay those services.

The SEC's interpretive release said investment managers can't aggregate managed accounts in

# Venture, LBO funds attract 4 investors

By Trudy Ring

The U S WEST Inc. pension fund, the Massachusetts Pension Reserves Investment Trust, the Minneapolis Employees' Retirement Fund and the Ryder System Inc. pension fund have made commitments to venture capital or leveraged buy-out partnerships.

The commitments total $25.5 million without U S WEST's; officials there wouldn't reveal the amount they allocated.

Commitments by the first three funds are part of ongoing venture capital or leveraged buy-out programs; Ryder System's commitments apparently are its first, although company officials were not available to confirm this.

The $6.5 billion U S WEST fund, Englewood, Colo., and the $1.7 billion Massachusetts PRIT, Boston, both committed to Boston-based TA Associates' Media Communications Limited Partnership.

TA officials said the U S WEST fund is one of the larger investors. Dan Kelly, PRIT director of program development, said his fund committed $10 million.

U S WEST has made commitments to several venture capital partnerships, but its exact allocation was not available. PRIT has less than 1% of its assets in venture capital and leveraged buy-outs.

The media partnership will acquire companies in the cable and broadcast television, radio, outdoor advertising, paging, cellular telephone, specialty publishing and security monitoring industries, Mr. Kelly said. He characterized the partnership's investments as being closer to leveraged buy-outs than venture capital. But David Braman, U S WEST manager-trust investment management, described them as venture-oriented, with the general partners taking an active role in the companies acquired.

David Croll, managing general partner of the media fund, said the partnership actually is a hybrid, using some of the management techniques of venture capital and some of the financial structure of leveraged buy-outs.

The partnership will concentrate on developing companies, he said: "We do not buy mature properties and leverage the dickens out of them."

The fund had an initial closing Nov. 26 with $200 million in commitments, more than half of that from tax-exempt institutions, Mr. Croll said. Besides the U S WEST and Massachusetts funds, these investors include several universities and money managers investing on behalf of pension funds. The partnership will take commitments for another 90 days, with a maximum of $50 million in additional funds to be accepted, he said.

Mr. Kelly added PRIT officials were impressed with the partners' track record. Wilshire Associates, Santa Monica, Calif., helped screen the fund for PRIT.

U S WEST also made a commitment of undisclosed size to Davis Venture Partners, Tulsa, Okla., which will provide expansion capital for companies, primarily in the Southwest. Davis also was one of three funds receiving commitments from Ryder System.

The $750 million Minneapolis employees' fund committed $3 million to Superior Ventures and $2 million to Minnesota Seed Fund II, both of Minneapolis, said John Chenoweth, executive director. Both are venture capital funds focusing on investments in Minnesota.

Other tax-exempt investors in Superior Ventures, managed by IAI Venture Capital Group, Minneapolis, are the Control Data Corp. and Pillsbury Co. pension funds, both of Minneapolis; and

*"For those that have that capability (for direct venture capital investments), there is a very attractive payback."*
— John Chenoweth, director, Minneapolis Employees' fund

the Minnesota State Board of Investment, Bush Foundation and University of Minnesota endowment fund, all of St. Paul (*Pensions & Investment Age*, Sept. 29). The Control Data fund also is an investor in Minnesota Seed Fund II (*P&I Age*, Nov. 24).

The Minneapolis employees' fund also committed $6 million to the Regent Corp. Partnership, Denver, which Mr. Chenoweth described as a hybrid venture capital-leveraged buy-out fund. It will provide capital for acquisition of security monitoring systems.

The retirement fund put another $1.5 million into direct venture capital investments. The fund has made direct placements with high-technology companies around the nation, Mr. Chenoweth said.

The fund usually makes direct investments in companies in which one of its limited partnerships also is an investor, he said. Direct venture capital investing, rare among pension funds, is not for everyone, he said.

"It requires appropriate internal staffing to do that," he said. "For those that have that capability, there is a very attractive payback. It also strengthens the partnership if some of the partners have the capability to do that."

The Minneapolis fund has about 3% of its assets in venture capital and leveraged buy-outs. About three-fourths of that is in limited partnerships, the remainder in direct placements.

The $122 million Ryder System pension trust, Miami, committed $1 million to each of three venture capital partnerships earlier this year, according to a fact sheet provided by the company. The three are Lawrence Venture Associates, New York and Nashville, Tenn.; Venture Capital Fund of New England II, Boston; and Davis Venture Partners.

These appear to be the fund's first venture capital commitments, but company officials weren't available to elaborate on the fact sheet.

The Lawrence fund focuses on health care and electronics and the New England fund on high-technology companies in that region. All have attracted numerous tax-exempt investors. ■

# Harvard taps oil and gas

## Endowment commits $20 million to Harken deal

By Fred Williams

CAMBRIDGE, Mass. — The $3.5 billion Harvard University endowment is pumping up to $20 million into acquiring oil and gas reserves in its first direct investment in oil and gas.

Michael Eisenson, partner with Harvard Management Co., Cambridge, which manages the endowment, said the money will be invested over the next two years with Harken Oil & Gas Inc., Dallas, in separately negotiated acquisitions of oil and gas reserves and, secondarily, in energy-related companies.

The deal could be considered "bottom fishing" to a certain extent, said Mr. Eisenson, given the current depressed state of the petroleum industry throughout the nation, and particularly in Texas.

"We think over the next five to 10 years, today's prices will look like a relative minimum. We may not be at an all-time bottom, but gas prices are relatively inexpensive right now," he said.

The $20 million commitment by Harvard to oil and gas is centered on natural gas acquisitions, he said, "but we'll be open to a range of things from production to exploration."

Tax-exempt institutions have stayed away from direct investments during the free-fall in oil prices. Asked why Harvard is interested, Mr. Eisenson said the investment is long term, and he expects prices to increase and demand for natural gas to grow.

"I think, fundamentally, we're convinced that natural gas prices can't remain below replacement costs. Prices have to rise and will have to rise significantly if the United States is to maintain its reserve base. The reserve base is declining fairly rapidly, and it's a reasonably high level of importance to the United States that it have energy assets.

"So we think it's cheap now. Properties valued at or near today's prices for natural gas will provide a nice return for those willing to wait five or 10 years to realize those returns.

"It is the nature of this fund that allows us to take that longer term approach," said Mr. Eisenson.

In another development, Harken officials said an agreement has been reached to sell 1,351,351 newly issued shares of Harken restricted common stock for $2 million cash in a private placement to Aeneas Venture Corp.

Aeneas is an investment affiliate of Harvard University, associated with Harvard Management, dedicated to non-public market investing, such as direct investments or private placements.

Donald Beane, also a partner with Harvard Management, has been appointed to the Harken board of directors. Harken is a publicly held independent oil and gas company.

# Staff altered tax bill wording

By Richard Gillespie

TAX REFORM

WASHINGTON — Congressional staff members made unauthorized changes in critical wording affecting pension plans after the House-Senate conference committee had approved the 1986 Tax Reform Act but before it became law, employee benefit experts charge.

If not reversed, the change could increase administrative costs, and even the cost of plan funding, for many companies.

It also could create inequities among plans, depending on how various companies respond.

In the final act, wording in the section on the integration of plans with Social Security was changed, substituting "compensation" for "Social Security benefit," which in effect alters the formula for integrated plans.

Integrated plans are pension plans that coordinate a payout with Social Security to provide a final benefit.

In particular, the change most affects offset plans, which now give a formula for a final benefit, then express an offset as a percentage of the Social Security benefit.

A significant number of salary-based pension plans are offset-type plans, according to Myron Hochheiser, a benefits consultant with Buck Consultants Inc., New York.

One analyst estimated the number of offset plans to be between 40% and 60% of all salary-based plans.

"The surprise change could have a significant impact on employers and necessitate a major revamping of their (offset) plans," according to a statement put out by Buck Consultants, which first noticed the change.

An offset plan might, for example, specify a pension benefit of 1.5% of compensation per year of service, from which is deducted a percentage of the Social Security benefit.

Under the new law, which goes into effect for plan years beginning 1989, a formula limits the offset to three-quarters (or less) of a percentage point of final average three-year pay up to a maximum of the Social Security wage base for each year of service (with a maximum of 35 years).

The original wording stated the limit as a percentage of Social Security benefit rather than final pay.

If there were a consistent relationship between average compensation and Social Security benefit, the change would have been simply a different way of stating the same concept.

No such relationship exists, so distortions must occur, said Mr. Hochheiser.

At the time of the change, conference committee staff members were drafting the bill into statutory wording in what is supposed to be a purely mechanical process. Experts with the Internal Revenue Service were known to be helping the staff members because the area is so technically complex.

"As far as we can tell, it was a job given to staff and the conference committee's instructions to

## Opinion

# Pension facts vs. mythology

MYTHS DIE HARD. Facts are the only weapon that can be used against myths, and even facts very often cannot slay them, merely wound them.

One myth that has survived for more than a decade in the face of contrary evidence is that the nation's pension funds were buying an ever-increasing share of the nation's companies. This would lead inevitably to pension fund socialism, the analysts declared.

But as Sportin' Life cautioned in "Porgy and Bess," "It ain't necessarily so."

The latest figures on the assets and holdings of the nation's pension funds suggest they own about 18% of all equities in the U.S. economy — a slight decline from the 20% estimated a decade ago.

The figures were compiled by the Employee Benefit Research Institute in conjunction with the Trust Universe Comparison System and the Federal Reserve System.

The figures show there is no danger of pension funds devouring America's corporations.

To be sure, pension funds as a group own substantial positions in some of the nation's largest companies. For example, institutions, including pension funds through their investment managers, own 60% of CBS Inc., 78% of CIGNA Corp., 51% of CPC International, 52% of Emhart Corp., 53% of GTE Corp. and 66% of Manufacturers Hanover Corp.

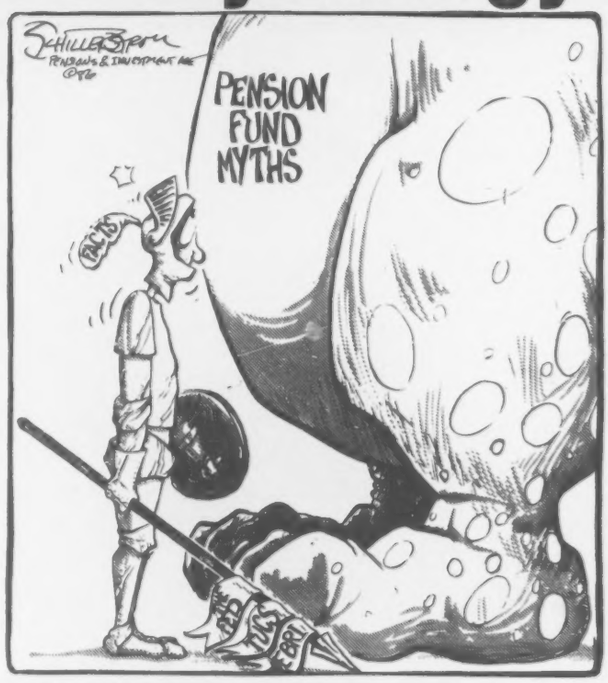
But there is no great tidal wave of pension fund ownership of corporations sweeping over the economy.

The figures also showed that, contrary to another myth, companies were not stashing billions of unneeded dollars in their pension funds. Benefit payments from private pension funds exceeded contributions by $81.5 billion in the two-year period ended June 1986.

Some of the provisions of the recent tax reform law, and other laws before it, seem to suggest Congress believes companies are building giant slush funds in their pension plans.

This impression has no doubt been fostered in part by the termination of overfunded pension plans by a smattering of companies seeking to recover the surplus assets.

If Congress had had the new figures on pension fund assets and growth trends when drawing up the tax law, the pension provisions of the new law might be different.



Unfortunately, although Congress mandated the gathering and dissemination of statistics from the 5500 Form filed by each pension plan each year, it never provided the Labor Department with funding for the project.

As a result, it has flailed in the dark, unarmed against the myths, possibly damaging the nation's non-federal retirement system in the process.

The facts that should be produced by EBRI, TUCS and the Federal Reserve System should help minimize damage in the future.

# Quick action needed in Boesky case

THE SECURITIES AND EXCHANGE Commission must expedite its investigation of insider trading violations revealed in the Ivan Boesky case.

Drexel Burnham Lambert Inc. and a number of Wall Street executives, none of whom have yet been charged with wrongdoing, have been put under a cloud of suspicion by rumors of subpoenas and taped conversations.

Indeed, at times it seems the SEC is conducting its investigation by using rumor to flush its quarry into the open as hunters use dogs to flush quail.

Unfortunately, the rumors also are flushing investors from the markets, particularly the junk bond market. The junk market, although it has been used by raiders to acquire companies to the dismay and disapproval of some, serves a useful purpose.

Many of those takeovers have paid off handsomely to shareholders. And junk bonds have made it possible for entrepreneurial executives to buy a piece of a conglomerate in an attempt to run it more efficiently. When the dust clears, academics may find junk bond financing has helped U.S. industry become more efficient and competitive.

It would be unfortunate if Drexel Burnham and the executives who pioneered junk bond financing were innocent of any wrongdoing and yet were severely wounded by the SEC investigation because it was allowed to drag on too long.

At the very least, it can curb the rumors.

## Letters to the editor

### Chart data wrong

To the Editor: The International Directory published Aug. 4 incorrectly listed Bessemer Trust as having $507 million in U.S. tax-exempt assets under management for international accounts in one of the charts.

The chart that appeared on page 16 should have listed Bessemer as managing $101 million in international assets for ERISA clients.

The $507 million shown are the total assets under management for ERISA clients.

Bessemer's entry in the directory on page 18 is stated correctly.

### On Wyatt study

To the Editor: Regarding your Oct. 13 article, "Industrial firms increase pension benefits," regarding the Wyatt study.

First, I want to thank you for all the good information you provide to us practitioners.

The comment that I have to make regarding that article is twofold.

- For those of us whose pensions are related to "final average salary" and who might want to compare ourselves to the leaders, it would have been beneficial to understand exactly what the $39,600 final average salary is.

Is it the last year's pay, or is it the average of a certain number of prior years' pay?

Based on the later reference ". . . , $30,566, which will replace 77.2% of final pay . . . ," it would seem that it was the last year's pay.

- It would have been valuable, I think, if the article had distinguished between "retirement income" and "pension benefits."

Many companies, including those listed, provide "pension benefits" under defined benefit pension plans, and provide additional benefits (considered retirement benefits) under a variety of defined contribution plans (such as profit-sharing plans, 401(k) plans, thrift plans, etc.).

Employers and employees look at the total picture.

I believe your article should have clarified whether or not it was looking at the total picture.

I suspect it was not.

Sorry for the negative comments.

You are ordinarily such a beneficial resource about what is going on in my business.

Keep up the good work.

# Defined contribution plans

# Defined contribution to survive tax reform

By Chuck Paustian

Corporations will continue to establish defined contribution plans despite some provisions of the Tax Reform Act of 1986, but defined benefit plans will remain the primary retirement vehicle used by corporations, benefit experts predict.

The tax legislation might slow the growth of defined contribution plans because of the restrictions and limitations placed on these plans under the new law.

But many employee benefit consultants said one area of continued growth of defined contribution plans will be among small- to medium-size companies.

Large corporations, the consultants said, will use defined contribution plans mostly to supplement their existing defined benefit plans.

The benefit experts also said the role of defined contribution plans will change to one of retirement savings from one of short-term capital accumulation.

Statistics compiled by the Employee Benefit Research Institute, Washington, show the growth of the number of defined contribution plans has slowed, but remains steady at about 2% to 3% annually.

At the end of 1985, the number of defined contribution plans had increased about 3% to roughly 574,000, from the 557,000 plans as of Dec. 31, 1984. The 1984 figure marked a 3% increase from the 540,000 plans as of the end of 1983.

The growth in the number of defined benefit plans has progressed at a similar rate.

At the end of 1985, the number of defined benefit plans had increased to about 243,000, up 2% from 238,000 as of Dec. 31, 1984. The 1984 figure was a 1% increase from the 235,000 plans as of the end of 1983.

The EBRI data also showed the growth of defined contribution assets continues to outpace the growth in defined benefit assets.

*Park Davidson of Burlington Industries applies portfolio insurance to the firm's fund. Halliburton, at which Nathaniel Duffield is head of profit sharing, is considering using dynamic hedging.*

# Portfolio insurance is gaining exposure

By Trudy Ring

While pension fund executives have applied dynamic hedging primarily to defined benefit plan funds, their interest in using it for defined contribution plans is increasing.

Burlington Industries Inc., Greensboro, N.C., for example, is applying the strategy to the roughly $20 million equity exposure of the $105 million defined contribution plan.

In dynamic hedging, also known as portfolio insurance, a manager adjusts a portfolio's market exposure, usually through the short sale of futures, when the portfolio's value declines. The goal is to provide a minimum rate of return while permitting capture of as much upside gain as possible and to do so without forecasting. It can be applied to bond portfolios, but most commonly has been used for equity accounts.

Tax-exempt assets totaling $45 billion are hedged in this manner; those in the industry said most of this is for defined benefit plans, but an exact breakdown was not available.

Burlington Industries officials decided to try portfolio insurance on the defined contribution plan because the plan is one of two that provide retirement benefits for its hourly workers, said Park Davidson, assistant vice president-finance. The other is a defined benefit plan, with the company bearing the investment risk, but because benefits from the profit-sharing plan depend on investment performance, the company decided to try dynamic hedging on it.

"We felt that was an appropriate portfolio to start with," he said.

J.P. Morgan Investment Management Inc., New York, is providing the hedging; Alliance Capital Management Corp., New York, manages the equity allocation in an index fund. The hedging program aims for a minimum return of −5% over a year.

Burlington Industries hasn't used dynamic hedging in its defined benefit plans, but might do so, depending on how this program goes, Mr. Davidson said. "We'll let time do the deciding for us," he said.

A fund that has used dynamic hedging for defined contribution plans for some time is Trans World Airlines Inc., New York.

TWA has used the strategy since August 1984 to protect the equity portion — $634 million — of a $900 million defined contribution plan. It is not TWA's primary retirement plan, but because benefits from the plan depend on investment performance, the company uses portfolio insurance to reduce volatility.

Leland O'Brien Rubinstein Associates Inc., Los Angeles, is TWA's dynamic hedging manager.

Pension officials at Halliburton Co., Duncan, Okla., are considering using portfolio insurance. The company's three major retirement plans, with assets of $1.8 billion, are all defined contribution plans.

"If portfolio insurance really works, there could be a place for it in defined contribution plans," said Nathaniel Duffield, chairman of the profit-sharing committee.

Halliburton likely would use the strategy only for employer contributions, which amount to slightly more than $1.1 billion, Mr. Duffield said. The employee contributions, which are in a 401(k) plan and in voluntary after-tax contributions to other plans, are largely in guaranteed investment contracts.

The committee probably will not make a decision on portfolio insurance for a few months, Mr. Duffield said. "We've been looking at it since about early July," he said. "We're just not convinced at this time that it's exactly what we want to do. I'm sure there are some pros and cons."

John Steinbach, assistant treasurer and investment manager at K mart Corp., Troy, Mich., is looking at offering an equity fund hedged with portfolio insurance as an investment option for the company's $500 million savings plan. He hasn't decided whether to recommend it to the pension committee, though.

Explaining the strategy to employees could be a problem, he said. "I think that's part of where our hangup may be," he said.

# Well-versed in the alternatives

## Profit sharing main plan at American Greetings

By Fred Williams

CLEVELAND — Employee benefit specialists at American Greetings Corp. feel the company has developed an unusual marriage between the traditional defined benefit pension plan and the more contemporary defined contribution plan.

At American Greetings, the approximately $135 million profit-sharing plan is the primary retirement plan and the approximately $8.5 million defined benefit plan is the supplemental, or floor, plan. At most other companies, the situation is reversed.

Tim Strauch, manager of retirement and stock administration at American Greetings, said the company's interesting approach protects its more than 7,400 employees from down years for the greeting card company.

"The profit-sharing plan is the primary retirement fund, but the defined benefit plan (known as the Retirement Income Guarantee Plan) provides a floor protec-

*Continued on page 30*

# Contribution . . .

*Continued from page 25*

Defined contribution assets increased 26% to $307.6 billion as of Dec. 31, up from $244.5 billion at the end of 1984. Defined benefit assets grew 18% to $534.9 billion at the end of 1985, up from $453 billion as of Dec. 31, 1984.

Despite the gains made by defined contribution plans, benefit experts contacted by *Pensions & Investment Age* agreed defined benefit plans will remain the primary retirement vehicle among larger corporations.

"Defined benefit plans can accomplish things for a company and an employee that a defined contribution plan can't," said Frederick Rumack, director of tax and legal services at Buck Consultants Inc., New York, referring to the guaranteed retirement benefits and the ability of the employer to withdraw surplus assets.

Melvin W. Borleis, vice president and director of benefit consulting at A.S. Hansen Inc., Deerfield, Ill., added, "The most efficient way to provide retirement income is through defined benefit plans.

"It's still the cornerstone for the retirement programs for most companies," he said.

In fact, some of the provisions of the new tax law might slow some of the growth of defined contribution plans, especially 401(k) plans.

"I see the value of 401(k) plans can diminish in the future," said Gary A. Pines, an actuary with Towers, Perrin, Forster & Crosby, Chicago. "That's through the 10% excise tax, the lower tax brackets and after-tax contributions."

Congress placed a 10% excise tax on most early withdrawals from defined contribution plan accounts. In addition, the lower personal tax brackets give employees less of an incentive to defer taxes on a portion of their income.

Congress further reduced the attractiveness of employee contributions to a defined contribution plan by changing the way after-tax contributions are used in calculations to determine the maximum amount allocated to the employee's account in any year.

Previously, the lesser of one-half of total after-tax contributions or contributions in excess of 6% of W-2 pay was used to calculate the maximum amount allowable, which is the lesser of 25% of W-2 pay or $30,000.

"Now every dollar of after-tax contribution counts as an annual addition," said Mr. Rumack.

"You'll probably have less money going into these plans than you have had in the past because of these restrictions and limitations," he said.

While the star of defined contribution plans might be dimmed, it has not been extinguished.

"When you talk about smaller companies, I think defined contribution is still the way to go," said Mr. Pines.

Arthur Tepfer, director in the Chicago office of REBC Associates, an actuarial and benefit consulting division of Laventhol & Horwath, said smaller companies are re-examining the advantages of defined contribution plans.

"The general philosophy in the smaller, closely held companies is to focus on the tax benefit aspects of retirement plans in general, rather than the employee benefit aspects," said Mr. Tepfer.

"The plans are designed along those lines to 'shelter' income that otherwise would be taxed," he said.

The new tax law removes some of the tax advantages of defined benefit plans, he said. The reduction of the maximum benefit allowable from a defined benefit plan, for example, could put some funds in a fully funded status and remove the deductibility of the sponsor's contributions.

Though defined contribution plans will gain popularity among smaller companies, Mr. Tepfer emphasized defined benefit plans will not disappear.

"I'm not trying to indicate that defined benefit plans are dead. I'm trying to say that defined contribution plans will be more closely scrutinized for their wealth accumulation prospects and because there are no liability problems," he said.

The growth of defined contribution plans also should be bolstered by large corporations looking to supplement their defined benefit plans.

"I think what you'll be seeing in the future is companies basically offering a combination of both defined benefit plans and defined contribution plans," Mr. Rumack said.

A number of large companies — Allied-Signal Inc., Morristown, N.J.; Texas Instruments Inc., Dallas; and Owens-Illinois, Toledo, Ohio — already use defined contribution plans to supplement or improve the retirement income from their defined benefit plans.

"Our feeling has been that the defined benefit plan offers more security to the employees. They can really count on the amount of money that they're going to be getting," said Irene Leary, manager-employee benefit fund investments at Texas Instruments.

"As long as there is the incentive and the need for personal savings, and I think there always will be, then they (defined contribution plans) will remain important," added Ronald C. Boller, director-benefit finance at Owens-Illinois.

Benefit consultants agreed the key to the survival of defined contribution plans is a shift to viewing the plans as a retirement vehicle and away from viewing them as a short-term savings account.

"The Congress was deliberate in a couple things. One thing was to take the tax code out of the financial and investment decisions," said Mr. Pines.

"Two, they'll only give tax incentives for retirement savings, not short-term savings. Almost everything revolves around those two policies," he said. ■

# New network shuns brokers, cuts costs

**By Chuck Paustian and Brian Lehrer**

Seven institutional investors participated in the initial testing of a computerized trading network that bypasses brokerage houses and allows investors to reduce their commission costs to 1 cent per share or less.

The Deere & Co. pension fund, Moline, Ill.; Chase Investors Management Corp., New York; American National Bank & Trust Co. of Chicago; and The Northern Trust Co., Chicago, were among the traders in the initial electronic crossing Dec. 12, *Pensions & Investment Age* has learned.

A public pension fund and two other money managers were the other players.

The crossing system, developed by Instinet Corp., New York, electronically matches buyers and sellers of stocks through a central computer. Transactions occur after the market has closed at the price of the day's last sale, thus eliminating any market impact.

"Pre-crossing" computer matches, taking a matter of minutes, are used to line up both sides of the trade. The actual crossing takes less than one second.

Another 32 institutional investors have indicated their interest in the electronic trading network, said Edward C. Story, a partner in Plexus Group, Santa Monica, Calif., which is marketing the network.

Batterymarch Financial Management, Boston, and Aronson & Fogler, Philadelphia, have signed up to participate. The Teacher Retirement System of Texas, Austin, and the New York State Teachers Retirement System, Albany, are considering joining.

"Eventually, if this thing takes off the way we expect it to, it will make a major dent in the function in life of the brokerage houses," said Mr. Story.

The concept behind electronic crossing has been discussed by pension fund executives, consultants and money managers for several years.

BARRA, a consulting firm in Berkeley, Calif., and Jefferies & Co. Inc., Los Angeles, also have introduced an electronic matching network.

Instinet's network is designed to accommodate investors executing "informationless trades" such as for index funds. Such trades result from computer analysis or investment style.

Electronic crossing is similar to program trading and block trading, except share prices and commissions are not negotiated and the names of the stocks are known.

Mr. Story said the seven institutional participants were divided into passive and semi-passive investors. Passive investors — mainly index fund managers and those going through a major liquidation of holdings — "are operating on the least amount of information," he said.

The semi-passive group is composed of highly quantitative managers and internally managed corporate and public pension funds.

"Eventually, there will be two other groups involved," one for active managers and one for market functionaries, such as specialists and brokerage firms, Mr. Story said.

One of the attractions of the electronic matching system is the lower transaction costs possible

# 2 corporate plans shuffle $2 billion

**By Barry B. Burr**

Executives at American Information Technologies Corp. and Standard Oil Co. are shifting a total of about $2 billion in a restructuring of their pension funds' investments.

The $9.28 billion Ameritech fund in Chicago is pulling $1 billion from domestic equity managers to begin its first major in-house management and $500 million from those managers to place in its first bond index fund.

That's part of a strategic move to reduce its equity allocation to give fixed income a slight edge over equity in asset allocation.

Meanwhile, the $1.022 billion Standard Oil fund in Cleveland is moving into indexing for the first time, dismantling a $300 million bond portfolio and selling guaranteed investment contracts before their maturity in the "secondary market."

According to Jeffrey S. Molitor, Standard's manager-pension investments, Frank Russell Co., Tacoma, Wash., its regular consultant, is helping devise a long-term investment strategy.

Glenn A. Dever, supervisor-investment analysis at Ameritech, said fund officials so far have taken $500 million in-house as part of a planned $1 billion Standard & Poor's 500 stock index portfolio. He expects the other $500 million for the stock index fund to be turned over to Ameritech from the managers "very soon."

Mr. Dever said Ameritech will retain its 13 domestic equity managers, albeit with reduced assignments.

He said the fund is still withdrawing the money from the equity managers for the in-house management.

Once the other $500 million is turned over for the internal stock index fund, Ameritech will manage internally 11% of its total assets and 23% of its equity assets.

"It's conceivable" Ameritech could take more money in-house and run it actively, not just passively, Mr. Dever said.

"I don't think we'll do it in 1987," he said. "But maybe in 1988, 1989 we might."

National Investment Services of America Inc., Milwaukee, is overseeing Ameritech's bond index fund temporarily. Mr. Dever said Ameritech is planning to transfer the bond index assets to Lincoln Capital Management Co., Chicago.

Lincoln already runs equities for the fund. NISA oversees Ameritech's dedicated bond portfolio, which has grown to $3

Directors at Morton Thiokol, fearing the company's $310 million in surplus pension assets might attract a hostile takeover bid, adopted a plan that would prevent the company from terminating its $558 million pension fund for the purpose of withdrawing any surplus for a five-year period in the event of a hostile takeover.

This differs from more common pension parachute amendments that stipulate at least part of the surplus assets would enhance participants' benefits.

If an individual or group acquires more than 20% of the company's stock, the Morton Thiokol board would have up

*Continued on page 47*

# Raytheon getting out of real estate

**By John Covaleski**

LEXINGTON, Mass. — The $1.84 billion Raytheon Co. pension fund is liquidating its $60 million real estate portfolio and terminating its real estate investment managers.

Raytheon had about 4% of its $1.5 billion in defined benefit assets invested in real estate as of Sept. 30. About $40 million already has been returned to the fund. Some of the money has been allocated to equities; the rest is parked temporarily in cash reserves.

W. Bruce Livingston, manager-employee benefits for Raytheon, said he wanted out of real estate because the fund's allocation had been too small to be considered diversification.

Mr. Livingston said the fund reached — but never exceeded — the 4% level in real estate in 1980, despite plans to be to up to 5% by now and 10% later.

Asked why the fund did not increase its real estate holdings, Mr. Livingston replied, "The real estate industry has had its difficulties." He added the fund might invest in real estate again in the future.

He said the board of trustees decided to pull out of real estate because of poor returns, severe problems in the office market and concerns about liquidity.

In September, when Raytheon officials decided to pull out of real estate, office vacancy rates nationwide were averaging 16% and, in some cities, 30% or more.

"At the moment, our thinking is that real estate isn't a fit in our strategy," Mr. Livingston said.

The pension fund had assets in four open-end funds and one closed-end fund, all primarily investing in non-leveraged office, research-development and retail projects.

The open-end funds are run by Aetna Realty Advisors, Hartford, Conn.; the Real Estate Group of the Bank of Boston, Boston; J.P. Morgan Investment Management, New York. and John Hancock Life Insurance Co., Boston. Aetna also manages the Closed-End Real Estate Separate Account in which Raytheon invested.

Hancock and Morgan have returned the money to the pension fund.

An Aetna spokesman declined to speculate when assets would be returned from CERESA beyond saying it may take time to find a buyer. (Closed-end funds are more difficult to withdraw from than open-end funds because another buyer must be found for the withdrawing investor's portion.)

Bank of Boston officials have begun a year-long process of withdrawing Raytheon's money from the bank's fund.

Executives of other corporate pension funds contacted said their counterparts at Raytheon made an unwise move.

"In my opinion, this is not the right thing to do, not wise at all," said Alwyn E. Wolfarth, manager of the more than $3 billion Monsanto Co. fund in St. Louis.

Edward T. Tokar Jr., vice president-investments for the more than $4 billion Allied-Signal Inc. fund in Morristown, N.J., conceded real estate is not doing well now, but it will improve should inflation increase.

He said fund executives and real estate managers generally agree investors should

# Christmas cards may reveal more than firms realize

**By Chuck Paustian**

A picture may be worth a thousand words, but in the investment business, a Christmas card tells a lot about the firm sending the holiday greeting.

"The cards these firms select, and their behavior in general, is a function of their attitudes, beliefs and previous relationships," said Napoleon C. Pozulp II, clinical psychologist with Associated Certified Psychologists, Chicago.

The use of color, for example, usually represents emotions, with different colors projecting different emotions. The colors used, and how they are used, could reveal how that institution deals with emotions, he said.

Mr. Pozulp was asked to analyze a random sampling of the Christmas cards received by the editorial staff of *Pensions & Investment Age*. Prior to the interview, Mr. Pozulp had no knowledge of any of the money management or consulting firms or the nature of their business.

Here are thumbnail sketches of the psychologist's analysis, preceded by descriptions of the cards:

• **Renaissance Investment Management Inc.**, Cincinnati, sent a white card with a black sketch of a large house being decorated for the holidays. The cover also includes small patches of red.

"It's interesting that this is essentially a colorless card, except for the red," said Mr. Pozulp. "It may point to the way they deal with emotions.

"There's certainly room for feelings and emotions, but they need to be put into compartments," he said, adding the card projects an acceptance of emotion, as long as it is kept in perspective so as not to interfere with the work at hand.

"I can't help but feel that someone wanted to project the impression that this is a firm that deals with tangibles."

• **D.L. Eager Associates**, Louisville, Ky., sent a card with a 1-inch green border around the cover. In the middle of the cover,

# 1 fund diversifies, 1 hedges

**By Steve Hemmerick**

LOS ANGELES — The Los Angeles County Employees' Retirement Association is on the verge of pumping $900 million into international equities, evenly split between and passive and active management, while the Los Angeles Fire & Police Pension System expects to hire three managers to hedge its $1.35 billion stock portfolio with options.

The county fund will give Chase Investors Management Corp., New York, $450 million for passive international management if an agreement on fees can be reached. That would be more than five times the $80 million Chase has under passive international management now.

County trustees also decided, subject to fee negotiation, to give an estimated $90 million each to five active international equity managers: Nomura Capital Management Inc., New York; Brown Brothers Harriman & Co., New York; Capital Guardian Trust Co., Los Angeles; Morgan Grenfell Investment Services Ltd., New York; and Warburg Investment Management International Ltd., New York.

The option writing firms to be hired by the fire and police fund are MCQ Inc., Torrance, Calif.; Balch, Hardy & Scheinman Inc., New York; and Oppenheimer Capital Corp., New York. All will write covered call options on individual stocks and stock indexes.

At the county fund, it appears Chase won out over State Street Bank & Trust Co., Boston, which has $2.5 billion under passive international management. They were the only two firms in the running.

Most of the county's trustees expressed disappointment in State Street's presentation, saying they didn't believe it was targeted for them and State Street didn't present its investment approach well.

In addition, trustees said State Street management fees were significantly higher than those of Chase, although they noted State Street might be open to negotiation.

Trustees at first considered splitting the county's passive allocation between State Street and Chase because of concern about the relatively small amount of in-

*Continued on page 50*

# *2 pension execs retire, 2 others join sell side*

Two leading Southwest pension executives will end long careers with their respective firms in January through retirement.

Meanwhile, two other pension fund executives have made the switch to money management, working for insurance companies.

J.L. Neill, director-trusteed benefit funds at Manville Corp., Denver, will retire Jan. 1 after 36 years with the company. Martin Rodman, assistant controller-insurance at the Army & Air Force Exchange Service, Dallas, is scheduled to retire Jan. 23 after 30 years with AAFES.

Moving to the sell side are Robert Angelica, director of pension investments at the $27 billion American Telephone & Telegraph Co. master pension trust, and Gyanendra K. Joshi, who left Warner-Lambert Co., Morris Plains, N.J., as head of its $1 billion in employee benefit assets.

Mr. Angelica has become managing director of the pension asset management group at Prudential Affiliated Investors, Newark, N.J. Mr. Joshi will become managing director for equities of Connecticut Mutual Life Insurance Co.'s new Pratt, Goodwin and Phelps Inc. investment management subsidiary, Hartford.

Neither Mr. Neill nor Mr. Rodman has definite plans following retirement, although Mr. Neill said he probably will take a marketing position with an investment management firm to be formed in Denver in 1987.

Mr. Rodman said he is pondering possibilities and will continue teaching a class at Southern Methodist University, offered in conjunction with the International Foundation of Employee Benefit Plans and leading to the designation of certified employee benefit specialist.

*J.L. Neill, director of trusteed benefits, is retiring from Manville Corp. after 36 years with the Denver-based company.*

Looking back, Mr. Neill said the Manville fund had only one outside manager in 1967 when he started working with the fund. "Then, in 1973-'74 we got caught with the 'nifty 50' stocks and experienced severe losses in that

## The road ahead

THE ROAD FINANCIAL EXECUTIVES and professionals will travel in 1987 seems littered with many of the same opportunities — and a few of the problems — they first encountered in 1986.

In corporate finance, for example, the surge in mergers, acquisitions and corporate restructurings will continue, although a lull is expected at the beginning of the year.

In cash management, corporate executives will pay close attention to how General Motors Corp. implements its electronic funds and data transfer program, knowing they soon could be following GM's lead.

Pension executives will pump even more money into portfolio insurance, index funds and international investments in 1987, while more consciously matching liabilities with assets.

The 100th Congress, meanwhile, will be grappling with issues of keen interest to many financial leaders, including post-retirement health care, terminations and reversions and the Pension Benefit Guaranty Corp.'s deteriorating finances.

These and other important and thorny issues are explored in this Review & Outlook section, a team effort of the editorial staff of *Pensions & Investment Age*. This is just a sneak preview; the editors and reporters will provide up-to-the-minute coverage of these and other subjects as they develop.

# 1986's hot investments will still simmer in 1987

Portfolio insurance, index funds and international stocks and bonds — the hottest investments of 1986 — will continue to attract pension dollars next year, but not at the same feverish pace.

Use of other derivative strategies also will grow, while pension fund interest in real estate and venture capital will hold steady in 1987, interviews with corporate pension executives and investment professionals show.

Concern about pension fund volatility showing up on corporate bottom lines is making pension fund executives more conscious of matching fund liabilities with assets. Some predict this might cause pension funds to adopt a more conservative stance in their investment strategies, possibly at the risk of increasing long-term costs to the corporation.

"There seems to be a growing trend toward volatility management and a concern with the down side," said Don Gingery, director-investment management research, William M. Mercer-Meidinger Inc., Louisville, Ky.

Investment experts are not predicting any radical changes in investment strategies next year, but a period of reassessment now that pension funds have scored huge gains from recent bull markets.

However, 1986 might have been a watershed year in the development of passive investment vehicles, particularly in dynamic hedging and indexed funds.

Dynamic hedging grew to an astonishing $45 billion in assets covered by the defensive strategy from roughly $6 billion at the year's beginning.

Investments in various types of index funds also soared, to perhaps as much as $150 billion from nearly $80 billion at the end of 1985. The jump is still huge even after market appreciation is taken into consideration.

While unlikely to repeat this year's 650% increase in assets under management, portfolio insurance's popularity will continue to rise, predicted Eugene Brody, director of options management at Oppenheimer Capital Corp., New York.

"I think it will get a larger and larger share of the pension market," he said.

How much the share grows might depend on stock market performance. If the market rises or falls dramatically, interest in dynamic hedging likely will increase, said Gerald W. Bialka, assistant treasurer of Mead Corp., Dayton, Ohio. In a roaring bull market, pension officers will want to protect gains; in a bearish one, they will want to avoid the bottom.

A highly volatile market won't bode well for portfolio insurance, Mr. Bialka said. "To the extent that the market just trades within a range, the cost (of portfolio insurance) will look too high."

In a waffling market, dynamically hedged funds that sold futures when portfolio values declined will have to buy them back when values rise again, thus increasing costs.

Irene Leary, manager-employee benefit fund investments at Texas Instruments Inc., Dallas, said interest in dynamic hedging also might dissipate in a bull market that is based on corporate earnings growth and, therefore, perceived as a stronger rally than

# Economists see modest prospects for new year

NEW YORK — Leading Wall Street economists look for only modest growth in the economy next year, and most say there is a 25% to 33% chance of a recession.

Overall, they expect continued low inflation and low interest rates and modest improvements in the federal deficit and the trade deficit.

Economists from 12 companies were interviewed; their prognosis for the economy follows.

### Growth and recession

The economists surveyed expect slower gross national product growth in the first half of 1987 — a median of 1.8% — than in the second half — 3%.

Among the dissenters are Ken Safian, president of Safian Investment Research, and Deborah Johnson, senior economist at Prudential-Bache Securities.

Mr. Safian anticipates no growth in the first half, slipping to a decline of 2% in the second: "We're in a transition period in the economy, and I think recessions usually take place in transition periods."

He pointed to such potentially recessionary events as tax reform, the new Democratic-controlled Senate combined with President Reagan's difficulties, and attempts to get the trade deficit under control, which will mean reducing imports.

Ms. Johnson expects the GNP to decline at an annual rate of 2% in the first quarter and 1% in the second. She said, however, it will pick up to 2% in the third quarter and 2.7% in the fourth.

"There will be a weakening in every sector — weak consumer spending, no contribution from the business end . . . modest inventory building, if any," Ms. Johnson said. "We'll go from a slump to a muddle in the second half of the year.

"Recession means two down quarters and we'll have that in 1987. But in 1988, after the downturn, the economy will muddle along at somewhere below 3% growth."

John Paulus, managing director and chief economist for Morgan Stanley & Co. Inc., New York, looks for GNP growth of 0.8% in the first half and 2.9% in the second half. "We're in the pessimistic camp . . . because we see trade producing less of a stimulus in 1987," he said.

David Levine, chief economist at Sanford C. Bernstein & Co., New York, on the other hand, expects a boom in the first half of 1987, with GNP growth at a 7.5% annual rate, slipping to 5.3% in the second half.

The boom began in November, Mr. Levine said, and the first two quarters of 1987 will benefit from a fourth quarter 1986 in which demand increased, but inventories dwindled.

Others generally based their

# Economists . . .

*Continued from page 3*

more moderate predictions on weak capital spending, modest consumer spending and a falloff in residential investment.

Chuck Clough, director of investment policy for Cowen & Co., New York, said capital spending is flat now and will fall in the short term, meaning there will be no demand to push up durables.

The three durables — cars, houses and business capital — are weak enough to "keep the economy in its current funk," he said.

Donald H. Straszheim, president and chief economist at Merrill Lynch Economics Inc., New York, said, "Consumer spending will be slow in the aftermath of tax bill and auto incentives of late 1986. Nonresidential investment spending will be weak because there is a lot of excess capacity that will take years to work off . . . We see inventory accumulation as being modest, though a bit stronger in 1987 than in 1986. Housing will be weaker in the first part of 1987 than late 1986, gradually improving in the second half, but not at the boom levels of 1986."

Frank Schott, chief economist at the Equitable Life Assurance Society of the United States, New York, believes the consumer is the wild card in a year in which he predicts modest economic growth and a 25% chance of a recession if the consumer "goes into the tank." He noted consumer confidence has been eroding.

Georges Rocourt, chief economist at Mercantile Safe Deposit and Trust Co., Baltimore, sees only modest growth in the GNP, but said that might be a plus, because slow growth could accomplish much of what a recession accomplishes and, hence, make a recession unnecessary.

All but Mr. Levine believe there is some chance of a recession next year, with most putting it in the 25% to 33% range. But Mickey Levy, senior vice president and chief economist at the Fidelity Bank in Philadelphia, put the chance of a recession at less than 10%, and Bernstein's Mr. Levine, 1%.

"A lot of people think we're headed for negative growth; they're wrong," Mr. Levine said.

Mr. Clough of Cowen & Co. believes a recession is on the horizon — in late 1987 at the earliest — because business spending is "not going anywhere." The government is in a period of "fiscal retrenchment," and personal spending will rise at a slower pace than in 1986.

Mr. Paulus said there's a 25% chance of a recession occurring in 1987. "The reason for not expecting a recession is that the one thing that has been responsible for producing post-World War II recessions is inflation reaching unacceptably high levels . . . and that's not going to happen," he said.

### Interest rates and inflation

The economists expected 90-day Treasury bill rates to fall to about 4.75% by midyear from about 5.5% when they were interviewed, and long-term rates to drop to about 7% from about 7.7%.

Again Mr. Levine was the contrarian, projecting short-term rates of 7.25% by midyear and long-term rates of 9.5%.

None of the economists is expecting a major outbreak of inflation, although Mr. Levine puts it at 4.8% by midyear. Most of the others put it in the 3.5% to 4% range, with Pru-Bache's Ms. Johnson projecting only a 2% rate.

Goldman, Sachs is using an inflation rate of 3% to 4% for 1987. "We are just about to start seeing that," said Jason Benderly, vice president and co-director of economics research at Goldman, Sachs & Co., New York. "The (Consumer Price Index) is about to start running in that range."

Robert Giordono, partner and co-director of economic research at Goldman, expects to see Treasury bills at 4.75% by June.

"We think interest rates will fall because of a declining budget deficit, the financial dynamics of slow economic growth and a significant reduction in the corporate sector's borrowing requirements," he said. "Federal Reserve policy will become more accommodative mainly because it hasn't been very stimulative despite rapid money supply growth."

### Deficit dimensions

The economists see tax reform as helping to ease the federal deficit, with the median deficit prediction being $190 billion. Mr. Levine again was a loner, expecting a $70 billion slash in the budget deficit, to $150 billion. None of those surveyed expects a deficit of more than $200 billion.

Merrill Lynch expects the improvement in the budget deficit to be "very slow and labored," Mr. Straszheim said, falling to $193 billion in fiscal 1987 from $220.7 billion in fiscal 1986, far off the mark of the Gramm-Rudman-Hollings target of $144 billion.

Mr. Paulus based his more optimistic prediction of $180 billion on tax reform, deep cuts in defense spending and reduced grants to local governments.

Mr. Clough also is among those seeing some hope for the budget deficit. "People will be surprised at how much it will go down," he said, without offering just how much it might be reduced.

Albert Sommers, senior fellow and former chief economist of The Conference Board, a leading nonprofit business research group in New York, looks for a $35 billion reduction in the federal budget deficit in fiscal 1987 from fiscal 1986, and a $30 billion cut in the trade deficit for the year.

"They work in opposite directions so that if the declines in the budget and trade deficits are comparable, the net effect is not significant. They offset each other," he said.

Several of the economists were buoyed by the trade deficit's prospects, expecting a median of $120 billion, an improvement of about $30 billion.

The outsiders here were Mr. Levine, predicting a trade deficit of $150 billion to $170 billion, and Mr. Rocourt, predicting $105 billion.

Mr. Straszheim said the gradual improvement on the trade side is the most important indicator.

"The worst is over for trade. There will be a gradual, but steady and distinct, improvement in the trade account over the course of 1987 and into 1988," he said.

"Net exports have been hurting the economy during the entire decade of the '80s. That's over. They will begin helping now."

The trade deficit also was a bright spot for Goldman, Sachs, which expects it to drop $24 billion.

"What's causing the modest rebound is not tax reform but the improved trade deficit and the growth of disposable income," Mr. Benderly said.

Pru-Bache's Ms. Johnson agrees the picture is a bit rosier for the trade deficit, which she says will narrow some because of an increase in consumer spending.

Mr. Paulus, however, doesn't see the nominal trade deficit narrowing in 1987 even though in real terms it will narrow slightly.

And Mr. Clough was not very hopeful about reducing the figure: "Even if the dollar went to zero yen, we wouldn't make VCRs here." ■

It's performance that counts.
So while few managers handle more convertible securities than AmeriTrust, it's our track record we want to talk about. It's outstanding in the industry. That's because we've got the skill as well as the size to manage effectively in this specialized field.

MANAGING $500 MILLION IN CONVERTIBLES IS EASY TO BRAG ABOUT, BUT...

Let us show you how AmeriTrust can work for you. Call Gary W. Queen, Senior Vice President, at (216) 687-4089.

AmeriTrust.
THE STRONG MONEY MANAGERS

# 14.1% of managers use passive bond approach

About 14.1%, or 78, of 552 investment managers surveyed by *Pensions & Investment Age* list passive fixed-income approaches as part of their investment strategies.

Passive approaches to fixed-income management include bond index funds, cash-matched dedicated portfolios and immunized portfolios.

Bond index funds attempt to match the return of an appropriate index by structuring the portfolio to resemble the index. No attempt is made to outperform the index.

A cash-matched dedicated portfolio is structured so the cash flows from maturing bonds and coupon payments closely match a stream of liabilities. This approach avoids interest-rate risk.

An immunized portfolio also is structured to avoid interest-rate risk; this is achieved by constantly adjusting the duration of the portfolio to the duration of the liabilities. The duration is the time it takes to recapture half of the present value of the cash flows of the portfolio.

Fifteen of these managers have more than $1 billion under management.

What follows is a list of those managers. Information was compiled from questionnaires submitted by the managers for *P&I Age*'s May 19 special issue on the nation's leading investment advisers.

**Managers using passive approach to fixed-income***

## *Atlanta 1st pick as business site*

Atlanta is considered the best place to locate a business, but New York is where the most new office space will be acquired in the next year, according to a survey of chief executive officers and corporate real estate officers.

The survey, made by Louis Harris and Associates on behalf of the Cushman & Wakefield real estate company, both in New York, posed questions about the nation's 12 largest commercial real estate markets. Surveyed were 400 chief executive officers and 201 senior corporate real estate officers at companies nationwide with revenue of at least $100 million.

Louis Harris, chairman of the research firm, said the survey, "The Cushman & Wakefield Business America Real Estate Monitor," was created "to tap the thinking of business executives." Rating criteria included quality of life for employees, cost and availability of labor, local and state government climate and proximity to markets and raw materials.

In rating the best places to locate a business today, the chief executive officers chose markets in the following order: Atlanta; Boston; San Francisco; Los Angeles; Seattle; Washington, D.C.; New York; Dallas; St. Louis; Miami; and Houston.

The real estate executives differed only slightly in their preferences, listing, in order: Atlanta; Boston; Los Angeles/Chicago (tied); San Francisco; New York; Seattle; Dallas; Washington; St. Louis; Houston; and Miami.

Other major findings include:

- The Los Angeles area is the most preferred place for real estate executives who plan to acquire new manufacturing, warehouse and distribution facilities in the next year.
- Chicago ranked first for proximity to markets and proximity to raw materials, but overall was ranked in the middle among all the market areas.
- Dallas and Houston ranked low for their current conditions, but respondents believe economies there have bottomed out and will improve within 12 months.
- Boston was ranked second to Atlanta as the preferred location as it scored high in quality of life, and proximity to markets, customers and clients.
- New York City scored well because of its proximity to markets, but was ranked low for its quality of life and the business climate provided by government.
- Atlanta, in addition to being rated the best location today, is also considered the area where business conditions will improve the most in the next 12 months. ■

# Fed addresses ACH fraud

DALLAS — The Federal Reserve System is serious in its plans to address concerns of possible fraud in the Automated Clearing House network.

Increasing concern by users of the ACH about possible credit and fraud risks associated with using the system has prompted the Fed to take a closer look at the problem, said Florence Young, adviser to the Division of Bank Operations at the Board of Governors of the Federal Reserve System.

Some large companies or those with high-dollar transactions have questioned the security and control features of the ACH system in protecting corporate users from fraud by preventing unauthorized entry to the system and possible alteration of figures or transactions.

The Fed has issued for public comment several proposals that would limit risk in the ACH system.

Among the measures proposed by the Fed are for receiving banks to encourage automated deposits and delivery of ACH transactions. "This in itself prevents much of the potential for fraud," Ms. Young said, addressing a Dallas cash management seminar.

Another step under consideration is the encoding of all data communications links between depository institutions and the Fed.

She said the Fed also is "checking the feasibility" of some sort of authentication process to be applied to all data transmissions between the various links in the ACH system.

The Fed proposes to limit the risk in the ACH system through modification of the current after-the-fact monitoring system as well as expanding the real-time monitoring procedures and expanding the self-assessment procedures for depository institutions.

The comment period for the proposals will end in mid-March.

Ms. Young said final policies are expected to be approved by the end of 1987.

The authentication process is being tested by "a couple" of financial institutions in the Cleveland Federal Reserve District, said Ms. Young. ■

# Money movers

*Continued from page 41*

lected because they were both in the top 5% of consultant SEI Funds Evaluation Services' universe and because they were willing to negotiate fees.

The city pension system first hired the State of Wisconsin Investment Fund earlier this year, Mr. Bottoni said, because the state agency has very low fees that are netted directly from the system's money.

In a separate development, the system has received its preliminary reports from Becker Burke Associates, Chicago, on its South Africa divestiture study.

The consultant's final report was presented to the City Council in recent weeks, Mr. Bottoni said, and the recommendations will be made by the end of the year.

### *Sunkist Growers Inc.*

SHERMAN OAKS, Calif. — The $125 million Sunkist Growers Inc. pension fund adopted dynamic hedging for about $115 million of its assets, said David Newsom, manager-financial analysis and investments.

The hedging, also called portfolio insurance, will be applied to all investments except real estate, which amounts to about $10 million, Mr. Newsom said.

Dynamic hedging seeks to assure a minimum rate of return, while allowing capture of most upside gains, through use of the futures markets.

Sunkist hired Morgan Stanley Asset Management, New York, to provide the hedging.

Collins Associates, Newport Beach, Calif., was consultant in the manager search.

Mr. Newsom said fund officials became interested in dynamic hedging as a means to protect the surplus, about $20 million, of the pension fund, and to allow for an increase in equity exposure to 75% from 65%.

A search is on for additional equity managers.

The fund chose Morgan Stanley for its team approach to hedging, using both futures and options investment professionals and actuaries, Mr. Newsom added.

### *West Hartford Town*

WEST HARTFORD, Conn. — The West Hartford Town Pension Fund has hired Delaware Investment Advisers, Philadelphia, to manage its $50 million equity portfolio.

Previously, Fiduciary Trust Co. of New York was the fund's balanced manager and managed all of its almost $90 million portfolio.

Fiduciary will continue to manage the fixed-income portfolio for the fund, according to Peter Krzyzek, administrator.

Mr. Krzyzek said the pension board believed the fund "could have better equity performance if we got an equity manager.

"We're just breaking off the equity portion."

Delaware bases its equity approach on low price-earnings, sector rotation and income.

Mr. Krzyzek said value-oriented Delaware's "strong performance history" was a factor in the decision to hire the firm.

He said the $50 million Delaware will manage represents the entire equity portion of the fund's portfolio under Fiduciary's management. No additional funds were added.

The asset mix isn't expected to change. The equity portion of the fund's portfolio is about 60%.

The rest is in bonds and cash equivalents.

### *CBS Inc.*

NEW YORK — The $600 million CBS Inc. pension fund has hired Bankers Trust — Investment Management Group, New York, to run an immunized bond portfolio of undisclosed size, said Richard Meckler, director of pension investments.

The assets came from a "buy-and-hold" account.

In addition, CBS has begun in-house management of a short-term portfolio, he said.

The listing of new issues of corporate securities, which usually appears in the corporate finance section of *Pensions & Investment Age*, has been moved for this issue. It will return to its usual spot in subsequent issues.

# Market timing used

About 14.1%, or 94, of 663 investment managers surveyed by *Pensions & Investment Age* list market timing as part of their investment approach.

Equity managers using this approach decide when to buy stocks in the light of economic factors such as the strength of the economy and the direction of interest rates, or technical indications such as the directions of stock prices and the volume of trading.

Twelve of these managers have more than $1 billion under management.

What follows is a list of managers using market timing.

Information was compiled from questionnaires submitted by the managers for *P&I Age*'s May 19 special issue on the nation's leading investment advisers.

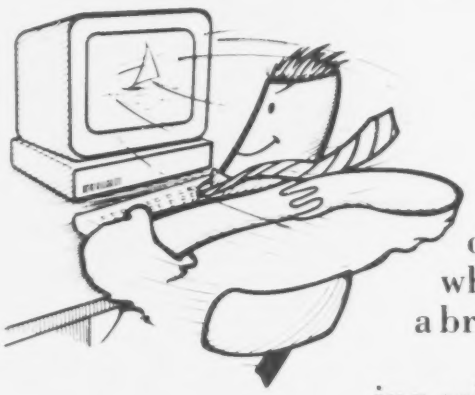
Our entry point windows make custom plan administration a breeze.

When pension administration systems don't automatically process custom plans, most vendors provide you with a choice of ways to tailor your system. You can specify the changes required, then wait 6-8 weeks while your vendor makes them. Or you can hire expensive programmers to write new routines for you.

Some choice.



But that won't happen to you with ACTI. Because our systems for defined contribution and defined benefit plans feature our exclusive entry point windows, which make processing unique plans a breeze, regardless of their complexity.

We've been providing hard-working solutions to employee benefit problems since 1968. And our DCVAL and DBVAL systems have given hundreds of pension administrators a productivity edge. And the ability to serve their clients better.

What's more, our systems are designed and kept up-to-date by employee benefit professionals. So you'll find that our standards are every bit as exacting as yours.

To find out more about ACTI and how our systems can help, just call or write for more information or a demonstration. And we'll show you how our entry point windows could change your outlook on custom plan administration. Call 1-800-DNA-ACTI (in Texas, 214/891-0900).

I'm interested. Please send details of ____ defined contribution ____ defined benefit systems.

# Stock indexing slows to a trickle in late '86

By Trudy Ring and Brian Lehrer

Stock index fund growth stopped abruptly and dramatically in the latter part of 1986, fueling speculation that the popularity of stock indexing has peaked, and that specialized index products may be necessary to attract clients.

Bond index funds continued growing, albeit at a slower rate than in the first half of the year, and managers looked for further gains in the bond and international index areas.

Stock index funds grew just 0.85%, to $102.3 billion, in the five months ended Nov. 30. Adjusting for market appreciation, indexed equity assets remained flat, as the benchmark Standard & Poor's 500 stock index gained 0.79% in that period.

Ralph Webster, vice president of Mercantile Trust Co., St. Louis, said indexing has run out of players. "Most of the money that is going to be indexed has been indexed now," he said.

In the six months ended June 30 — the previous period for which *Pensions & Investment Age* surveyed index fund managers — stock index funds had gross growth of 51.9%. The S&P 500 was up 20.84% in that period, making the net growth about 31%.

Bond index funds grew 54.7%, to $30.3 billion, in the five months ended Nov. 30. The market gain in that period, as measured by the Shearson Lehman Government/ Corporate bond index, was 4.76%, making the net gain about 50%.

In the six months ended June 30, bond index funds had a gross gain of 66% and a net gain of about 56%, as the Shearson Lehman index gained 9.94% in that period.

International index funds, almost exclusively in equities, were not accounted for separately in the previous survey. As of Nov. 30, $3.2 billion was invested in international index funds. Because the international funds were not measured separately previously, it is impossible to see how much they gained. The Morgan Stanley Capital International Europe Australia Far East index was up 14.04% in that period.

Overall, without adjusting for market appreciation, indexed assets grew 22.1%, to $152.6 billion, in the five months ended Nov. 30. In the six months ended June 30, they had grown 59%. Indexed assets not accounted for as equity, bond or international are in various futures or asset allocation strategies.

"There could indeed be a tapering off of the pure plain vanilla-type index funds," said Tom Stevens, chief investment officer of Wilshire Associates' asset management operation, Santa Monica, Calif. But traditional index funds likely will be replaced with customized ones, he said.

Indexing exploded in the past couple of years, as the majority of

# Drexel's record year eases scandal's pain

By Marci Baker

NEW YORK — Drexel Burnham Lambert Inc. raised $6.8 billion for clients in public and private markets in the final six weeks of 1986, brushing aside any uncertainty caused by the Ivan Boesky insider trading scandal.

The surge in financings, which accounted for 15% of Drexel's volume for the year, came as rivals on Wall Street and others questioned whether the firm would be able to finance the deals to which it had committed.

And it capped what was for Drexel the best of years and the worst of years.

At the same time Drexel senior executives fought to dispel fears that its close ties with Mr. Boesky had drawn the firm and its junk bond business deeply into the Securities and Exchange Commission's probe, they were racking up a record year for revenue and profits.

Although junk bonds continued as a key contributor to the bottom line, the firm gained force in other businesses, ones that developed outside the glare of controversy and that also turned in exceptional performances.

Indeed, every one of Drexel's 22 businesses ended the year in the black, its executives claim — an unusual feat for any Wall Street firm.

"It's amazing," said Frederick Joseph, chief executive officer, clearly tickled. "Most of the time, you have some businesses that aren't performing — a technicality, bad management or sometimes a trading mistake. But the surprise this past year was that we seemed to be hitting on all cylinders, which is extraordinary."

Photo by Al Stephenson

*Frederick Joseph claims Drexel "seemed to be hitting on all cylinders" last year.*

Total revenue for the year climbed to an estimated $4 billion from the record $2.25 billion

# *Navistar contributes stock*

By Barry B. Burr

CHICAGO — Navistar International Corp. was the only company to make a non-cash contribution to its defined benefit plan in 1986, according to a survey of the 200 largest pension plans by *Pensions & Investment Age*.

Robert C. Lannert, vice president and treasurer, said Navistar elected to contribute $104.5 million worth — or 22 million shares — of its common stock in December, even though it was able to contribute cash.

The contributed stock represents the second non-cash contribution Navistar has made to its pension plan in the past 12 months. In December 1985, the company contributed $25 million worth of bonds, which since have been sold.

The stock contribution piggybacked a public offering of an additional 104 million shares by the company Dec. 29. The contributed stock was priced at the same $4.75 a share for which the offering sold in the market.

The company turned the stock over to two of its pension investment managers to run without restrictions.

Jennison Associates Capital Corp. and J.P. Morgan Investment Management Corp., both of New York, still held the stock as of Jan. 5, according to Mr. Lannert. The stock closed that day at 5¼.

*Judy Mares, left, Greta Marshall, second from left, and Marci Avrin, second from right, stand with two of their companions on an expedition through Nepal's mountains, including the peak shown below. The three made it through the trip without discussing their jobs.*

# Mountain trek gives trio a new outlook

**By Marcia Parker**

Judy Mares recalls the times when "the sky looked like someone had thrown glitter into it. There's no light."

Greta Marshall brought home "a fresh perspective on life."

Marci Avrin wants to holds on to the feeling of being humbled by the earth's overwhelming natural beauty and the insignificance of humanity. "You really realize that we all take ourselves too seriously," she said.

Ms. Mares, assistant treasurer of General Mills Corp., Minneapolis, and Ms. Marshall, investment manager for the California Public Employees' Retirement System, Sacramento, are back at work after a 10-day hiking trek in Nepal's Himalaya Mountains.

Ms. Avrin, a pension fund consultant in San Francisco, is in transition; she spent more than two months racking up other high adventures in the Far East after her colleagues departed for home.

"I have a confession to make," said Ms. Mares. "We never once — with the exception of a couple momentary slips — talked about our jobs. That was the ground rule."

That wasn't easy for Ms. Mares, who had just been promoted to assistant treasurer at General Mills after a long career with the company on the pension fund side of the business.

Ms. Marshall also carried some guilt along with her mountain-climbing gear. "I committed myself way in advance, way before I knew how much (work) there would be to do," she said.

For Ms. Avrin, it was a dream come true — one she'd planned in advance with the idea she'd be away for a long, long time.

"I'd been wanting to do this for years," said Ms. Avrin, who masterminded the trip, persuading her colleagues to join her.

Although all three women run and are physically fit, none is a hiker or mountain climber.

"I just had to break in my hiking boots. At work the week before I shucked my high heels at lunch everyday and went for a walk in my hiking boots," Ms. Mares recalled.

They traveled in lush green valleys at 9,000 feet, past winding rivers and over suspension bridges to barren plateaus at 14,000 feet.

They saw Sherpa villages, home to the Tibetan Buddhists, magnificent views of Mount Everest and the revered Thyang Boche Monastery on top of a hill.

"Basically you sleep, eat and walk. The mountains and scenery are incredible and beautiful," Ms. Marshall said. "There were days when I wondered how I could have thought this was a vacation — one I was paying for."

On their last day in the mountains, everyone was wrapped up

in "their own private feelings about coming down the mountains."

"People were walking alone trying to take in the last hours of the majesty," Ms. Mares said.

"I went to get completely away, to divorce myself from urban life. We all have sedentary jobs and we wanted the physicalness, the exercise," she said. She said she came back with insight into a Third World country and an appreciation for her own country.

Ms. Avrin said the trip gave her a new view of life and work.

"You're only judged on if you can get up the mountain, not by who you are and what you do. It's humbling, and it puts everything into perspective. I hope it lasts. I want to hold on to it," she said.

For Ms. Marshall, the "fresh perspective" struck her after she set down on American soil.

"Things that seemed so important at home didn't after the trip," she said.

"I spent a lot of time thinking about how people live there. It is primitive with everything powered by human power in an underdeveloped country.

"I began to grasp the enormity of the economic gap between the United States and these countries." ■

# Electronic crossing system

## Lack of participants short-circuits second effort

**By Chuck Paustian**

The belief of some institutional investors that the ultimate success of electronic crossing networks depends on their ability to attract participants and develop liquidity was proven true last week.

On Jan. 7, officials of Instinet Corp., New York, and Plexus Group, Santa Monica, Calif., attempted a second crossing of trades on their system among four institutional investors. None of the trades crossed, although the initial crossing (Dec. 12) among seven participants was more successful.

"It's sort of an illustration of the conundrum . . . in the sense that when there's that few, the system does not work very well," said Edward C. Story, a partner at Plexus.

Nevertheless, Wall Street's inability to accommodate the growth of non-specific stock trading by institutional investors is the driving force behind the development of crossing networks.

Institutional investors have shifted their philosophical approach to the equity market, viewing equities more as a commodity than as a specific investment in an individual company.

This shift, documented by the growth of stock index funds and highly quantitative strategies, means institutional investors want to trade portfolios that represent the equity market or a particular segment of the market, rather than individual stocks.

"In other words, we're trading the stock market, not individual stocks. We're treating them more as a genuine commodity," said Robert E. Shultz, director of U.S. retirement funds at IBM Corp., based in Armonk, N.Y., in a speech before the New York Society of Security Analysts.

"Obviously as we have less focus on stocks, more on factors and more informationless trades, that implies sponsors need a different method of transacting in the marketplace," said Mr. Shultz, who oversees more than $18.19 billion in retirement assets.

Standard brokerage arrangements (with the possible exception of program trading) still deal with individual stocks and assume that these trades contain valuable information.

"All I'm suggesting is that more and more of the volume that crosses the floor (of the exchanges) every day is not specific based information trading of individual stocks," Mr. Shultz said.

Electronic crossing networks allow investors to trade entire portfolios in a matter of minutes, at a fraction of the commission cost and without market impact.

Besides the Instinet network, Jefferies & Co., Los Angeles, working with BARRA, Berkeley, Calif., have developed a computer crossing system (*Pensions & Investment Age*, Dec. 22). Chase Manhattan Bank, New York, is working on an electronic crossing network project.

Pension funds increasingly have shifted their view of equity investments toward more passive and quantitative strategies.

Assets invested in stock index funds have grown to about $102.34 billion as of Nov. 30. Seven of the 10 investment managers identified by *P&I Age* as up-and-coming investment firms employ quantitative strategies.

"Part of that (growth) is disillusionment with active management and recognition that there are additional costs associated with active management," said Edward Baker, director of BARRA.

Mr. Baker said the additional costs of active management include fees for monitoring services and higher transaction costs.

A recent survey of institutional equity brokerage commissions conducted by SEI Corp., Wayne, Pa., shows investment managers pay an average of 7.2 cents per share, compared with 7.3 cents per share for stock trades the previous year.

But active management will not disappear. "We will see more kinds of active management that have a portfolio-oriented concept rather than a stock picking-oriented concept," Mr. Baker said.

Wall Street traders are not ade-

*Continued on page 38*

# *Tax reform top story of '86*

**By Nancy K. Webman**

Passage of tax reform was the most significant event affecting the capital markets in 1986, a survey of *Pensions & Investment Age*'s readers shows.

The survey questionnaire, published in the Nov. 24 issue of *P&I Age*, invited readers to rank order — among 22 choices — the five most important financial news events of last year.

Tax reform will eliminate the deductibility of many individual retirement accounts, reduce the scope of 401(k) salary reduction plans and require five-year vesting in pension plans. More than 86% of respondents picked tax reform as one of the top five stories.

The collapse of Ivan F. Boesky's arbitrage empire the second most significant news event of 1986, appearing in the rankings of more than 62% of the respondents.

Mr. Boesky is the central figure in the Securities and Exchange Commission's widening probe into insider trading. He was fined $50 million and had to return $50 million in illegal profits.

The dramatically increased use of program trading was the third most significant story.

Program trades take advantage of the spreads between the prices of stocks and stock index futures and options, and have been blamed for the stock market's increased volatility. More than 62% of respondents chose program trading as one of the five most important stories of the year.

The sharp drop in interest rates was the fourth most significant story, appearing on more than 59% of respondents' lists.

A fourfold increase in the use of portfolio insurance was chosen as the fifth-ranked news event, but only 30% of respondents listed portfolio insurance among the five most significant stories.

Two other news events received many votes: The crisis in fiduciary liability insurance was ranked sixth, even though it appeared on only one-quarter of the respondents' lists; and the effect on the Pension Benefit Guaranty Corp. of The LTV Corp.'s estimated $650 unfunded pension liability was ranked seventh, appearing on 35% of respondents' lists.

Survey responses were tabulated by awarding five points to the reader's top-ranked story; four points to the second-ranked one; three points to the third; two points to the fourth; and one point to the fifth. ■

# Mergers' effect assessed

## Changes seen for cash management, trust units

By Fred Williams
and Marcia Parker

The merger of Dallas banks RepublicBank Corp. and InterFirst Corp., and the acquisition of Texas Commerce Bancshares, Houston, by Chemical New York Corp., will produce two dominant cash management banks and reshape their trust and investment services.

In fact, one cash management consultant predicts the Republic/InterFirst merger will create the nation's largest cash management bank.

The picture is hazier in the trust area. Republic and TCB run their assets in the trust departments, while InterFirst and Chemical have investment management subsidiaries.

Although immediate effects likely will be minimal, bank officials concede overlapping services eventually will be eliminated and operations consolidated.

Analysts predict there will be cost cutting, but no price reductions for corporate customers.

One outcome of the mergers already is evident: The two bank holding companies will become dominant in the bank cash management services business, said Anthony Carfang, principal with Treasury Strategies Inc., a Chicago cash management consulting firm whose clients include Chemical, Republic and InterFirst.

"In the longer run, the Republic/InterFirst merger will see some consolidation, which will result in higher-quality services . . . Basically what you will get is the largest cash management bank in the United States and with incredible economies of scale," he said.

The combination of TCB and Chemical will "create an interesting combination . . . TCB will have access to Chemical's nationwide collection and cash disbursement network. By the same token, Chemical can add some Texas points to its controlled disbursement network and take advantage of some other geographic considerations," he said.

Jerry Boynton, senior vice president-cash management at TCB, said officials of TCB and Chemical still are examining each other's operations. "There is a sense of autonomy here and we believe it is for real. But it is foolish to believe there won't be some cross-fertilization in people and in facilities," he said.

In the trust area, the Texas banks share clients. Southwestern Bell Corp., St. Louis, for example, uses all three to manage a portion of its pension assets.

R.W. Wohlert, assistant treasurer-corporate finance at Southwestern Bell, said he doesn't anticipate any major changes as a result of the mergers.

"Republic-InterFirst will be an even stronger organization combined. But we will have to wait and see how they consolidate and what they eliminate," he said.

"With TCB, I'm not so sure Chemical will be any major influence on the trust side. We don't really have any big concerns."

In the trust area, the merger with InterFirst will bring Republic access to dozens of regional and national clients now investing with InterFirst through its subsidiary, InterFirst Investment Management Inc.

InterFirst Investment has about $6.5 billion under management, $3 billion of it tax exempt, according to the *Pensions & Investment Age* May 19 listing of the largest money managers. RepublicBank has about $7.5 billion total under management, with $5.5 billion of it tax exempt.

TCB's trust department has $9 billion under management with about $5 billion in tax-exempt assets, officials there said. And according to a 1985 American Bankers Association survey, Chemical had $16.3 billion in discretionary trust assets.

Republic and InterFirst officials are considering combining assets, but the investment styles differ. InterFirst Investment Management is a low price-earnings ratio, growth manager; Republic tends to be more value oriented.

"I'm not sure how they will reconcile it," said Southwestern Bell's Mr. Wohlert. "My understanding is that they will run things the same as in the past and have no immediate plans to do away with either style. We will have the same portfolio managers and will maintain the same styles."

David J. Pittman, senior vice president and director-trust corporate services marketing at Republic, said the issue is "something that we will have to look at."

H. Edward Anderson, Republic's chief investment officer, is expected to assume overall responsibility for investments whatever the final setup. Mr. Pittman is expected to assume overall corporate marketing responsibilities.

"On the investment side, our performance has been better (than InterFirst) recently. They lost Dan Forrestal (as president of InterFirst's subsidiary) and we have some duplication. Both have research teams and there probably is no need for two research departments," said Mr. Pittman.

"Republic does international and they don't. The InterFirst real estate portfolio is larger and both are strong in property management. We manage our own short-term assets and they use AIM (Management in Houston). On the commingled side, it is likely that there will be some merging sometime in the future. It doesn't make sense to run separate commingled funds."

Mr. Pittman said the annual revenue expected to be generated by the combined trust operation is about $100 million.

In the master trust/custody area, InterFirst handles $8 billion and RepublicBank, $29.8 billion. Republic has built a national reputation in this area and Mr. Pittman said while both banks offer record-keeping capabilities any changes in this area would be "longer term in nature."

At TCB, William Wagner, trust vice president, said: "It's going to be steady as you go for us, only faster," he said. "There will be no changes for at least five years and each bank is going to operate autonomously."

TCB's small but profitable trust division is one nugget that made the acquisition of the Houston bank attractive to Chemical.

There also is speculation Chemical may use the TCB master trust operation to get back into a business the big money center bank left several years ago, although Chemical officials declined to discuss that possibility.

Said Mr. Wagner: "The trust department has been the focus of business development plans at Texas Commerce for the last five years. We are starting to get some new products such as securities lending and on-line services . . . We will be able to learn from each other."

Carole Berger, vice president and bank analyst at Cyrus J. Lawrence Inc., New York, expects Chemical to leave TCB's trust operation alone.

"If it isn't broken, don't fix it," she said. "It's important as far as the market there. Having a trust operation in Texas is valuable. It hasn't been a profit center for Chemical. Money center banks haven't done it well. But that's not the case for some of the smaller banks."

Bank officials declined to comment on whether the trust area would be spun off into an independent money management firm as has been speculated. Chemical spun off its $8 billion trust and investment division into Favia Hill & Associates, New York, in 1983.

TCB's trust department underwent some reorganization last year. One of the biggest blows was the resignation of its highly regarded equity investment manager William Lee.

Earlier, Russ Schulze II, senior vice president and trust officer, resigned after a policy disagreement. Now with National Actuarial Pension Services in Houston, Mr. Schulze said the merger with Chemical should help TCB in the investment side but, "I'm not sure it will do anything in the trust area." ■

## Corrections & clarifications

• **Lehndorff & Babson Real Estate Counsel**, Dallas, does not buy property nor sell it to its clients, as was stated in a Nov. 10 article.

• **NWQ Investment Management Co.**, Los Angeles, was hired by the Monroe (Mich.) Retirement System to run a $7.6 million portfolio. The money manager was identified incorrectly in the Nov. 10 issue.

• The proxy research firm for State of Connecticut Trust Funds was reported incorrectly Nov. 24. The firm is **The New England Asset Management Co.**, Hartford, Conn.

• **Morton Thiokol Inc.** had $454 million in defined benefit plan assets as of Sept. 30. The assets were given incorrectly in the Dec. 22 issue.

• An article in the Dec. 22 issue omitted **Prudential Asset Management Group**, Newark, N.J, as a passive fixed-income manager. As of Jan. 1, 1986, the firm had $4.627 billion in such assets under management.

**Super performers...** Mobil Oil's **super high-detergent gasoline**, which helped boost nine-month U.S. motor fuel sales 10%, is now working its magic worldwide. This premium product, with our special additive for cleaning up port fuel injectors, is bolstering volumes from France to New Zealand. Mobil Oil is also getting a leg up on the competition in Europe and Asia with a **new high-detergent diesel fuel.** Another marketing innovation: an advanced-formula, race-proven **synthetic package** of transmission fluid, gear lubes and universal grease for motorists demanding the best. Says Mobil Marketing & Refining President Eugene A. Renna: "Superior products, plus aggressive marketing, add up to **quality earnings.**"

**Winning cards...** Mobil's **retail debit-card system**, already America's largest, is getting even bigger. The Chase Manhattan Bank, with over 600,000 ATM cardholders, has joined the Mobil network, which also includes Citibank, the CashStream® network and others. In addition, new agreements now permit the holders of some 25 million American Express and Discover cards to charge their purchases at Mobil stations.

**Manufacturing gains...** Our Torrance, Calif., refinery is getting a major upgrade that will enable it to **increase premium product yields** and meet or exceed California's stringent regulations for sulfur emissions. Improvements at our Jurong, Singapore, refinery, along with increased processing for third-party users, have resulted in substantially larger crude runs . . . and **much better earnings per barrel** since 1984.

**Good news at Wards...** In a further effort to attract new customers, **Montgomery Ward** is developing small shopping centers, called Side Trips, in many of its locations. And it has recently signed rental or lease agreements with Dunkin' Donuts and more than 40 other retailers. "It's all part of our strategy for turning Wards into a **solid and consistent moneymaker,**" says Bernard F. Brennan, its chief executive. And that's part of Mobil's strategy of becoming the best at whatever we do.

**It's a fact:** By the end of 1987, more than 3,500 Mobil stations will be able to handle debit cards as part of our nationwide electronic payment network.

# Firms scrambled for their share of '86 issues flood

By Marci Baker

NEW YORK — Low interest rates, an ebullient stock market, hectic merger activity and pending tax laws sent issuers into the domestic markets in droves last year, creating the biggest year ever for new-issue financings.

Perennial front-runners in the scramble for market share mostly retained their positions, but in several market segments (straight debt, mortgage-backed securities and junk bonds) they did so by narrower margins.

Overall domestic financing climbed to a record $285 billion, up 106.5% from the $138 billion raised by issuers in 1985, according to IDD Information Services, New York.

The number of issues increased 69.5% to 3,767, from 2,222 in 1985.

Salomon Brothers Inc. was the leader, raising $51 billion for 450 deals. Even though Salomon's dollar and transaction volumes increased from 1985, its domestic financing market share dipped to 17.9% from 22.3%.

Morgan Stanley & Co. Inc. was the biggest gainer, managing $31.8 billion in 275 deals, up from $10 billion and 104 issues in 1985. The increase gave the firm an 11.2% market share vs. 7.3% in 1985. That was enough to move the firm into third place from sixth, according to IDD.

The First Boston Corp., meanwhile, retained its No. 2 spot and 15.5% market share, managing $44.1 billion in 406 issues last year.

Moving up a notch into fourth place was Drexel Burnham Lambert Inc., with $30.7 billion in 266 deals, a 10.8% market share. Merrill Lynch Capital Markets, which ranked fourth in 1985, dropped to fifth in 1986, with $30.5 billion in 313 deals, a 10.7% market share.

Salomon's lead in straight debt financing also narrowed, while Morgan Stanley's increased market share vaulted the firm into third place (from sixth in 1985) behind First Boston.

Straight debt volume more than doubled in 1986 to reach $218 billion. Salomon underwrote $44 billion, up significantly from the $26 billion it helped raise in 1985, but its market share declined to 20.2% from 26.6% in 1985.

Morgan Stanley managed $27 billion of total straight debt, up 286% from the $7 billion it financed in 1985. First Boston, managing almost $40 billion, saw dollar volume credited to the firm climb from $18 billion in 1985 with only a slight drop in market share — 18.3% in 1986 vs. 18.7% in 1985.

Morgan Stanley upped its standings in convertible debt financing as well, increasing its market share to 6.3% from 2.8% in 1985 and, moving into fourth place from 12th.

Drexel ran away with the lead in convertible debt, raising $3.2 billion of the $10 billion in convertible securities issued in 1986 and doubling its market share to 32%.

First Boston ranked second, managing $1.1 billion, although its market share dipped modestly to 10.8% from 11.4% in 1985. Merrill Lynch, which fell to third from first in 1985, saw its market share fall to 9.2% from 18.7%.

Drexel also climbed the initial public offering rankings, moving to second in 1986 from sixth in 1985, managing $2 billion or an 8.5% market share.

IPO volume overall surged to a record $22.5 billion, shattering 1983's record volume by 80% and 1985 volume by 161%.

Merrill Lynch, was first in the IPO rankings, managing $2.4 billion for a 10.8% market share. Although its volume increased $1.1 billion in the 12-month period, Merrill's market share dipped from 15%.

Goldman, Sachs & Co., 1985's IPO leader, fell to third place in 1986, with its market share dropping to 8% from 20%.

Unusually large deals fueled other big moves in the IPO rankings for a number of firms.

Prudential-Bache Securities Inc. rose to fourth place from 13th largely because of its role in two mutual fund IPOs — the $750 million First Australia Prime Income Fund and the $570 million Global Yield Fund.

Lazard Freres climbed to sixth from ninth, thanks to its role in The Henley Group's $1.2 billion new equity offering — the largest stock deal of the year.

Allen & Co. jumped to eighth from 26th after underwriting Coca-Cola Enterprises' $1 billion IPO.

IPO activity also figured largely in the 72% climb in common stock issuance in 1986. Common stock volume closed the year at $43 million, up from just less than $25 million in 1985, with IPOs accounting for roughly one-half of that.

Retaining their first-, second- and third-

*Continued on page 8*

# Firms scrambled for share . . .

*Continued from page 7*

place spots, respectively, were Goldman, Merrill and Salomon. Goldman managed almost $4.9 billion, or 11.3% of total volume in common stock issues; Merrill, $4.4 billion or 10.1% market share; and Salomon, $4.1 billion, 9.5%.

The steady flow of domestic financings also fueled an impressive increase in U.S. issuer volume worldwide. U.S. issuers raised $327 billion at home and abroad — an 85% increase from 1985 — through 4,124 issues (a 60% increase).

Among underwriters for U.S. issuers worldwide, Salomon was first, capturing $55 billion of the total volume; First Boston was second, with $49 billion; and Morgan Stanley was third, with almost $35 billion.

Credit Suisse First Boston, continued to lead other firms in worldwide financings for U.S. and overseas issuers, while Salomon remained closely behind.

CSFB managed $63.9 billion of the $486 billion raised by all issuers in 1986, capturing 13.1% of the market. Salomon acted as lead underwriter on $59 billion, or 12.2%. Both firms' market share dropped slightly, though.

Morgan Stanley's market share increased to 8.4% in 1986 from 5.8% in 1985; Morgan moved into third place last year from fifth previously.

Perennial mortgage-related debt leaders Salomon and First Boston continued to dominate, although by smaller margins.

Total mortgage-related debt dollar volume increased 190% in 1986 to $57.1 billion from $19.7 billion, but both firms suffered drops in their market shares — seven percentage points for Salomon and nine for First Boston. Merrill captured much of what they lost, more than doubling its market share.

IDD credited $17 billion of 1986's mortgage-related debt deals to Salomon for 30% of the market; First Boston, $12 billion and 21% share; and Merrill, $7.6 billion and a 13.3% share.

Almost half of Merrill's total came from four deals that ranked among last year's 20 largest debt deals. Two were $1 billion collateralized mortgage obligations, one with floating-rate securities. Shearson Lehman Brothers Inc., which was the first to launch CMO floaters, placed fourth, with $4.1 billion or a 7.2% market share.

In straight preferred, Salomon moved into first place, managing $2.1 billion for a 23% piece of dollar volume generated in 1986. Overall, straight preferred dollar volume climbed 44% last year to $9.1 billion from $6.3 billion in 1985.

Salomon's move up from second place stemmed largely from the firm's growing dominance in the auction-rate preferred stock, which quickly became the most popular form of straight preferred following its debut in mid-1983.

Shearson Lehman, which through the creation of dutch auction-rate preferred captured 31.5% of the straight preferred volume in 1985, fell to fifth place last year. It managed just more than $1 billion for an 11.2% market share.

Drexel, which managed $1.5 billion or 16.5% of the total, moved into the No. 2 slot from sixth in 1985.

Convertible preferred offerings increased 113% to $4.9 billion from $2.3 billion for 1985. Drexel was the leader, managing $1.47 billion of the total for 30% of market volume, largely because of its role as sole manager in the February offering of $1.1 billion in exchangeable preferred securities for Rupert Murdoch's Fox Television — the second largest equity deal of the year.

Kidder, Peabody & Co. came in second for the year, managing $775 million for a 15.8% market share, followed by Salomon, managing $83.7 million for a 10.8% market share.

U.S. issuers' focus on the domestic debt markets for financing led to a largely uneventful year for Eurobond financing. Volume closed the year at $38.3 billion, up only 6.4% from the $36 billion raised in that market for 1985.

One key highlight was Nomura Securities' rise to third from eighth place in 1985, largely by taking market share away from the Eurobond market's typical leaders, Credit Suisse First Boston and Salomon.

CSFB took first place, with 12.3% of total dollar volume, or $4.71 billion, vs. 14.3% in 1985. Salomon followed with 10.2%, or $3.9 billion, down from 15.5% in the previous year.

Nomura edged up behind Salomon by increasing its market share to 10.1%, or $3.86 billion, from 4.2% in 1985. The Japanese firm's number of Eurobond deals more than doubled as well, to 28 in 1986, the same number CSFB and Salomon managed.

Receivable-backed securities came into their own in 1986, with First Boston effectively cornering that market. It issued virtually all of the $10 billion in asset-backed offerings, a 713% increase from 1985 levels. Deals included a $4 billion offering of securities backed by automobile loans purchased from General Motors Acceptance Corp. and issued through a special-purpose First Boston subsidiary. It ranked as the largest domestic debt offering ever brought to the market, while the CMO-type structure employed was the first of its kind. ■

# *Missouri fund chief quits post*

JEFFERSON CITY, Mo. — Mary Jean Hackwood has resigned as executive director of the $989 million Missouri State Employees' Retirement System, reportedly because of disagreements with some board members.

"She resigned because she and a majority of the board couldn't get along," said board member Pat Parker, who added she had no problems with Ms. Hackwood.

"We didn't agree on everything — no two people agree on everything," Ms. Parker said. "But she did a lot of good things for the system and I hated to see her go."

Ms. Parker said the problems were more personality clashes than anything else. She said she did not believe they were related to investment strategy.

"When our fund grows from $200 million to nearly $1 billion in the five years and three months she's been there, you couldn't complain about investment strategy," Ms. Parker said.

"During (Ms. Hackwood's) tenure we have seen quite a diversification and quite a more active investment program," said another board member, Lee Capps.

The fund was largely in bonds before Ms. Hackwood came on as executive director, Mr. Capps said. It now has a mix of investments, including equities and real estate.

There had been problems with administration of the state employees' health benefits, but Ms. Hackwood was able to straighten those out and they were not related to her resignation, Ms. Parker said.

Ms. Hackwood's resignation is effective Feb. 28. Rosemary Eppenaur, assistant executive director of the fund, will cover Ms. Hackwood's duties while the nine-member board looks for a replacement, Ms. Parker said. Ms. Eppenaur is not interested in the executive director's job, Ms. Parker said.

Ms. Hackwood could not be reached for comment. She is exploring other job opportunities, Ms. Parker and Mr. Capps said. ■

# Junk bonds set record

**By Marci Baker**

NEW YORK — Mergers and corporate restructuring activities helped push junk bond financing to record levels in 1986, while Wall Street firms appeared to make some headway in their efforts to wrest market share from Drexel Burnham Lambert Inc.

According to IDD Information Services, New York, issuers raised more than $32 billion in straight high-yield debt last year, more than double the $14.8 billion raised in 1985.

Drexel continued to dominate, managing $14.6 billion of the total. At 45%, however, Drexel's market share declined from the 56% and 68% it won in 1985 and 1984, respectively.

Merrill Lynch Capital Markets, which ranked eighth in 1985, moved up to second place in 1986, underwriting $3.2 billion, or just less than 10%, of junk bond volume. Salomon Brothers Inc. placed third, with $2.4 billion or 7.5% of the market; Morgan Stanley & Co. was fourth, managing $2.3 billion or 7.1%; and Shearson Lehman Brothers Inc. was fifth, with $2 billion or 6.2%.

For many, inroads into the high-yield market were tied to efforts to raise financing for management buy-outs and other leveraged acquisition deals. Merrill Lynch, for example, raised about $430 million in junk bonds as part of financing arranged for the management buy-out of Jack Eckerd Corp.

Goldman, Sachs & Co., meanwhile, completed its first major junk bond sale with the buy-out of R.H. Macy & Co. by General Electric Credit Corp.

Goldman initially placed $950 million of Macy bonds, although the deal wasn't included in IDD's rankings because it wasn't firmly underwritten. Shortly thereafter, Goldman and Kidder, Peabody & Co. were co-underwriters on the sale of $400 million in Macy bonds purchased just prior to completion of the buy-out.

Although the dominance of larger transactions sent dollar volume soaring, the number of issues for the year rose by a much smaller percentage.

IDD counted 227 issues launched during 1986, up only 25% from the 182 reported in 1985. Drexel managed 77 of those issues; Merrill, 24; Salomon 15; and Morgan Stanley and Shearson 12 each.

Still, other firms were unable to match Drexel's ability to finance the megadeals. Five of the Top 10 debt financings for 1986 were acquisition-related deals done by Drexel, and accounted for $8.4 billion of newly issued high-yield debt.

Among them were the $2.5 billion leveraged buy-out of Beatrice Cos., the $1 billion buy-out of Safeway Stores — both engineered by Kohlberg Kravis & Roberts — and Turner Broadcasting System's $1.2 billion financing for the purchase of MGM/UA Entertainment.

In addition to straight debt, high-yield issuers raised another $8.8 billion in convertible bonds in 1986, bringing the total for below-investment-grade debt issues to $41 billion. Volume for straight and convertible high-yield debt in 1985 totaled $19 billion.

Including convertibles, Drexel managed $17.8 billion of the $41 billion total, for a market share of 43%.

Merrill raised $3.7 billion, for a 9% share; Morgan Stanley, $2.8 billion, 6.9%; Salomon Brothers, $2.7 billion, 6.5%; Shearson, $2.2 billion, 5.3%; and First Boston Corp., $2.1 billion, 5.2%.

# PBGC selects 5 for equity farm team

**By Richard Gillespie**

WASHINGTON — In a move to streamline its manager selection process, the Pension Benefit Guaranty Corp. selected five managers to run $5 million equity accounts on a trial basis.

They are J.P. Morgan Investment Management Inc., New York; Disciplined Investment Advisors, Evanston, Ill.; Nelson, Benson & Zellmer Inc., Denver; Furman Selz Capital Management Inc., New York; and Loomis, Sayles & Co. Inc., Pasadena, Calif.

The PBGC also hired Manufacturers Hanover Trust Co., New York, as custodian of the so-called "prospect fund." State Street Bank and Trust Co., Boston, is custodian of its principal trust fund assets.

The pension fund insurer, which has about $1.4 billion in assets, was scouting for rising stars to inherit the PBGC's burgeoning equity portfolios.

Julie Shriver, senior investment adviser with the PBGC's fund, interviewed 105 managers in a year, at one point eliminating managers with less than $100 million in total assets.

Apart from that, the major criterion was good investment performance for at least two years with the same management team in place.

The approach is aimed at providing smoother management transfer as new money is brought into the program, and at eliminating delays in the selection process.

Anticipating a large influx of assets in the near future (in part from the termination of some of The LTV Corp.'s pension plans), the PBGC needs a manager network to handle the volume, she said.

Generally, the PBGC has suffered from the unpredictable nature of its cash flows: Plans can terminate at any time, and the agency needs to have its managers already in place.

With the farm team in place, existing managers can absorb the surplus almost immediately.

The PBGC doesn't like to be the largest client of any of its managers, nor does it want any of its individual accounts to be greater than $200 million.

The agency now uses five non-farm team equity managers, running PBGC accounts ranging from $50 million to $200 million.

All the new managers are compensated using the PBGC's performance-based fee scale; not all its principal managers are so rewarded.

While the initial account size for a farm team manager is small, a manager that demonstrates superior capabilities will be awarded a $50 million account and moved up to the roster of principal managers.

In fact, Ms. Shriver said she thought two of the five new managers would be awarded a full-size $50 million account as early as summer, primarily as a result of anticipated cash flows.

Generally, the new managers can expect to be on the farm team one to two years, she said. After that, they will either be moved up or out.

The PBGC conducted the manager searches in-house.

According to John F. Hotchkis, chairman of the investment subcommittee of the PBGC's advisory committee, and a partner with the investment management firm, Hotchkis and Wiley, Los Angeles, the selection process was "comprehensive and thorough."

"Much of the emphasis of this farm team approach has been to look for new ideas, untried firms," said Ms. Shriver, who undertook the search.

Not all of the new hires are untried firms. J.P. Morgan, for example, has more than $40 billion under management.

Ms. Shriver said, however, the firm was not selected for its mainstream equity products, but rather for its new "core equity product," which matches the Standard & Poor's 500 stock index by sector weighting, with discretion to fill out each sector with its own selection of stocks.

Disciplined Investment Advisers' style is quantitative and essentially value oriented, but it complements this with an earnings momentum overlay, essentially providing a combination of value and growth, she said.

Nelson, Benson & Zellmer is a growth stock manager with an "attractive track record," she said, operating in all segments of the market in terms of market capitalization.

"It was very difficult to find growth stock managers with a good track record over the past few years," Ms. Shriver said.

"One attraction was its size. It does not have many large institutional clients. I see them as an up-and-coming firm," she said.

Furman Selz was selected because "it hits areas the other managers do not" she said. The firm operates a large-capitalization approach with a growth overlay.

Loomis, Sayles is a large-cap, value investor with an excellent track record, she said.

"We are not trying to run a closet index fund here, but simply back up our current fit of five managers who represent various segments of the market," she said. ■

# Index . . .

*Continued from page 1*

active managers underperformed the financial markets, said Jim Gately, executive vice president of Prudential Affiliated Investors, Newark, N.J., the umbrella group for Prudential Asset Management's various operations. Whether the growth will continue at such a high rate is hard to predict, he said.

Besides the underperformance of active managers, passive investing is popular because of lower management fees and lower transaction costs than those of active management.

While domestic stock index funds have attracted huge amounts of money, many managers look to bond and international indexing as the future growth areas.

"I think it (bond indexing) will explode," said Ed Robie, managing director of Western Asset Management Co., Los Angeles. "Fixed-income indexing is where equity indexing was 10 years ago. I think that as plan sponsors begin to look at their multimanager universe, they will find ways to employ structured (customized) and fixed-income indexing portfolio management as a way to reduce fees and increase value."

On the international side, the EAFE index has been doing very well and active international managers have had trouble beating it, said Richard A. Crowell, managing director-structured investment products group at The Boston Co., Boston.

"Our clients and our marketing people report great interest" in international indexing, Mr. Crowell said.

To date, international index funds have been almost exclusively stocks, but there is growing interest in applying the strategy to foreign bonds.

"I think that in three to five years it will be an idea that is quite interesting to plan sponsors," Mr. Robie said.

Of the money managers offering only domestic stock index funds, several said they plan to start bond or international index funds during 1987.

Still, among the funds that have indexed, the S&P 500 stocks make up the most popular indexing strategy, attracting $56 billion in assets.

The Wilshire 5000 universe of stocks was the index tracked by $3.5 billion, while the remainder on the stock side was made up of various customized indexes.

Mellon Capital Management Corp., San Francisco, recently launched the first fund based on the Russell 1000 index; about $500 million is invested.

(In a few cases, managers declined to say how much of their assets tracked each index. Also, one major index fund manager, American National Bank and Trust Co. of Chicago, declined to provide current figures, so its June 30 figures are repeated in the Nov. 30 total. Information on which indexes its funds tracked also was not available.)

The unavailability of some information may have skewed the S&P total somewhat; as it stands, it is down from the $62.8 billion reported in S&P 500 funds June 30. That may indicate a lessening of interest in these funds and growth in attraction to customized funds.

The Shearson Lehman Government/Corporate bond index remained the most popular benchmark for fixed-income index funds. About $17.8 billion tracked this index, up from $13.4 billion five months earlier.

Slightly more than $1.3 billion tracked the Salomon Brothers Broad Investment Grade bond index, up from $437 million five months earlier, and $263 million was in various Merrill Lynch universes, compared with $140.5 million at the time of the previous survey. Other fixed-income universes were customized or tracked sectors of the various large indexes.

In international, almost all the $3.2 billion in assets tracked the EAFE. Some of the assets were in various country indexes, in stocks that are components of the EAFE.

Wells Fargo Investment Advisors, San Francisco, remained by far the largest index fund manager, with more than twice the indexed assets of its nearest competitor, Bankers Trust Co. — Investment Management Group, New York. ■

# Unisys prepares to hire advisers for $700 million

By Marcia Parker

DETROIT — Executives of Unisys Corp., the company born from the merger of Burroughs Corp. and Sperry Corp., are about to hire new managers for about $700 million in pension assets previously managed by Sperry's soon-to-be-defunct in-house money management group.

The decision, expected by the end of January, is the first priority for Unisys' pension executives as they combine the highly divergent Burroughs and Sperry funds.

Together, the Sperry and Burroughs employee benefit plans had $3.9 billion in assets as of Sept. 30.

The merger of the funds is expected to be completed by the end of 1987. David A. White, corporate director-capital management and trust investments, will be designing and implementing the merger, fashioning a new investment philosophy and strategy that will be quite different from those of the individual plans.

Mr. White, who was Burroughs' director-trust investments since 1983, was just appointed head of the combined funds. He is responsible for all the funded benefit plans of Unisys and all of its worldwide subsidiaries. Two people he had worked with have been retained and the rest of his staff is still being assembled.

Burroughs acquired Sperry last fall and the newly merged company adopted the name Unisys. For now, the funds are being run separately. The merger agreement doesn't preclude Unisys from terminating the pension plans, but the recaptured assets can only be used to pay benefits under the agreement.

Mr. White declined to discuss surplus assets, liabilities or termination value, saying the figures still are being calculated.

In the merger of the funds, he said, "What's most important is

UNISYS

the question of what kind of investment program will fit the new Unisys. That's what I'm looking at. Unisys is a very different company from Burroughs and Sperry separately."

Mr. White said he is in the early stages of drafting the "grand plan" for merging the two pension funds. Burroughs' investment consultant, Rogers, Casey & Barksdale Inc., Stamford, Conn., has been retained for the combined funds. The specific role of the firm hasn't been decided.

He said he had to deal immediately with the $1 billion that had been managed in-house by Sperry Capital Management Co., New York, because the group is being disbanded, more by default than executive order.

*David White, architect of Unisys' new plan, is looking to hire managers.*

Thomas V. Hirschberg, chairman of Sperry Capital Management, is retiring in February. The other two key professionals have taken new jobs -- Jim Price, who was chief trader at Sperry, now is vice president-regional institutional desk at Prudential-Bache Securities, New York; and Eric Leo, who was portfolio manager, now is a portfolio manager at Equitable Investment Management Corp., New York.

Of the $1 billion that Sperry ran in-house, $300 million was in an equity index fund with Mr. Hirschberg and Chase Manhattan Bank, New York, as co-trustees. That money has been allocated to Chase, at least for now.

But Mr. White stressed the money could be reallocated later when the new investment plan is implemented.

The other $700 million is still to be awarded. The money was invested mostly in stocks and bonds, with smaller amounts in short-term instruments and ven-

# Settlement off?

## A&P faces vesting for 40,000

By Richard Gillespie

PHILADELPHIA — A federal appeals court here has ordered the Great Atlantic & Pacific Tea Co. to reopen the 3-year-old settlement of its $315 million in surplus pension plan assets.

The opinion by the 3rd U.S. Circuit Court of Appeals raises the possibility A&P will have to vest as many as 40,000 former employees and pay benefits from a surplus it already booked on its balance sheet. As yet, there are no estimates on how much the ultimate cost could be.

The case will be opened again in U.S. District Court in Newark, N.J., where it first was heard.

The out-of-court settlement, which was approved by an appeals court in 1984, resolved the disposition of $315 million in surplus assets.

Under the settlement, retirees and former plan participants received $50 million in benefit increases while the company got $265 million.

Although it received the blessing of the court, the settlement did not account for claims lodged by a class representing about 47,000 former employees who were laid off as a result of the company closing its operations and shutting stores during the 1960s and 1970s.

In a 22-years beginning in 1962, membership of its pension plan shrank to just 7,700 from 57,000 through store closures and layoffs.

After the settlement was approved, seven former employees who never were vested filed a complaint as the "Epting class." That complaint's dismissal led to the appeal.

Under Section 411 of the Internal Revenue Code, a "partial plan termination" occurs where "a substantial percentage of plan participants are involuntarily separated from plan coverage." If a partial termination occurs and the plan assets are sufficient to fund such otherwise non-vested benefits, affected employees obtain vested rights to their accrued pension benefits.

As a general guideline, the IRS' states a partial termination occurs if a participant turnover of 20% occurs and the participants are not fully vested. "There is a strong possibility that a partial termination has occurred in any year in which participant turnover exceeds 50% prior to the date of termination," an IRS guide states.

The complaint brought against the parties to the settlement and the IRS by the Epting class alleged a "partial termination" had taken place.

As a result, the other 47,000 former employees of the supermarket chain who were members of the plan also were entitled to fully vested benefits, the group claimed.

But in such cases, according to the revenue code, the local IRS office is required to make a determination whether those employees should be vested under the partial termination rule.

According to lawyers for the Epting class, the partial termination occurred, but the local IRS office did not issue a determination.

The absence of such a determination generally is held to mean no partial termination has taken place. The U.S. District Court stayed approval of the settlement pending word from the IRS, but approval was granted when word was not received.

The Epting complaint also alleged breach of fiduciary duty by the A&P trustees.

During the appeal, the defendants sought a dismissal claiming no partial termination took place. But according to lawyers for the company, even if a partial termination had occurred, the defendants owed no fiduciary duty to the Epting class.

In sending the case back to District Court, the appellate court ruled U.S. District Judge Frederick B. Lacey failed to rule on key elements regarding the Epting class complaint. It said he also refused to order the IRS to issue a determination because a representative of the IRS had said the agency "stands ready to receive any information presented to it by the parties or their counsel."

The appellate court described the lower court opinion as "rather enigmatic . . . (It) appears that the district court did not intend to dismiss the (Epting class) complaint."

But even beyond the question of whether a termination took place for tax purposes, a termination may have taken place for purposes of the Employee Retirement Income Security Act, according to the opinion:

"(F)actors that remain undecided pending completion of the IRS investigation militate strongly in favor of the conclusion that the order is not final. We are . . . confirmed in our belief that the district court did not intend to end the Epting case.

"We believe . . . that the court did not intend the dismissal to take effect now, and therefore the dismissal is not a final order. The Epting case remains alive meanwhile."■

# Cash reserves hit '86 high

By Fred Williams

Cash reserves of equity money managers increased to 7.3% as of Dec. 31, the highest level of 1986, according to the INDATA investment analysis service, Southport, Conn.

The 7.3% equity cash position at the end of 1986 compares with 6.9% at the end of 1985 and 7.4% at the end of 1984. The cash position was 6.5% Sept. 30, 1986.

Of the nine money managers contacted by *Pensions & Investment Age*, three increased equity cash and four reduced cash while two managers remained at the same level for the quarter.

While equity cash as measured by the INDATA service was at its year high at the end of the fourth quarter, a strong equity market during the first half of January pulled more cash into the market.

The record high cash position measured by INDATA was 16.8% in August 1982; the low was 5.4% in September 1976.

No matter what their cash position, most of the managers interviewed believe the bull market will continue through 1987 after a correction sometime in the first half.

Cash reserves at Hibernia National Bank, New Orleans, stood at 10% at the end of the year, down from 10% to 15% at the end of the third quarter, said Robert Rust, vice president and trust investment officer. For Hibernia, that position is fully invested.

"We were waiting for the market to go down (because) there was a lot of bad economic news there in the third quarter. We just couldn't get the market down. That and our belief that interest rates wouldn't be much higher, we thought the market was telling us something and decided to ease in. Since then, though, we have become fully invested," said Mr. Rust.

"This market is overpowered by cash. There is more cash out there than people thought was there, or that people were letting on."

Hibernia has $750 million in tax-exempt equity assets under management.

Alliance Capital Management Corp., New York, maintained a

## Benefit payments top contributions

By Chuck Paustian

Benefits paid to retirees outpaced employer contributions almost two-to-one among large corporate pension funds in 1986, primarily the result of early retirement programs, accounting changes and strong investment performance.

Data collected by *Pensions & Investment Age* show benefit payments for 52 large corporate funds increased 23% to about $9.62 billion in 1986, from $7.81 billion the previous year. In contrast, employer contributions dropped 33% to about $5.3 billion in 1986, from $7.93 billion in 1985.

(The 52 funds provided payment and contribution data both years.)

Pension executives and actuarial consultants most often cited early retirement programs, usually used as part of a corporate streamlining of operations, as the reason for an increase in benefits paid to retirees.

Employer contributions, on the other hand, continued to decline as a result of accounting changes for pension funds and strong investment performance.

While benefit payments rose 23% in the aggregate, a number of companies reported much higher increases.

W. Allen Harrison, assistant treasurer at Exxon Corp., New York, said an early retirement program implemented as part of an operational restructuring during the summer was the reason behind its 161% increase in benefit payments during 1986. Exxon has $7.55 billion in employee benefit assets.

Many of Exxon's 7,000 domestic employees that opted for early retirement also chose to receive their settlement in a lump sum payment.

An executive of another oil company, who asked not to be identified, said two early retirement programs implemented in 1986 were responsible for benefit payments increasing 233% to $200 million.

Monsanto Co., St. Louis, with $3.28 billion in total employee benefit assets, showed a 66% increase in benefits paid to retirees in 1986, "essentially due to early retirement programs that were put into place last year," said William N. Searcy, manager-pension asset management.

Mr. Searcy said the early retirement programs were established in conjunction with a corporate restructuring of operations.

"This is all part of the downsizing of the layers of management within companies. You see this in some of the hourly areas as well," said Larry Wiltse, consulting actuary and director of forecasting and planning services at Buck Consultants Inc., New York.

"Based on my own experience, there has been an abnormally high number of special retirement programs," added Julie S. Gordon, an actuarial consultant at Hewitt Associates, Lincolnshire, Ill.

Other actuarial consultants said a maturing work force and the addition of retired lives in the plan through mergers and acquisitions also were responsible for increases in benefit payments.

But many of these same funds have seen employer contributions shrink dramatically.

Some companies were able to reduce contributions through the early adoption of the Financial

## Corporate funds drop off list

### Mergers, terminations change makeup of top 200

By Marcia Parker

The continuing wave of mergers and terminations of overfunded pension plans sweeping corporate America largely accounted for both the dropouts and the newcomers to *Pensions & Investment Age*'s ranking of the 200 largest U.S. employee benefit funds.

Also playing a large role in the positioning was the reduction in contributions by many overfunded corporate funds while public and union funds still were receiving large amounts of assets.

Twelve funds dropped out of the top 200, all of which were corporate. They were replaced by five corporate, four public and three union funds.

Three funds disappeared from the survey because of acquisitions: RCA Corp., New York, was purchased by General Electric Corp., Stamford, Conn; Sperry Corp., Blue Bell, Pa., was bought by Burroughs Corp., Detroit; and Getty Oil Co., Los Angeles, was acquired by Texaco Inc., White Plains, N.Y.

In Texaco's case, even though it remained among the top 200, it slipped to 114 from 103, despite the addition of Getty's assets. That's because the company completed a spinoff/termination of the Getty plan in January 1986, recapturing $350 million and purchasing $410 million in non-participating annuities.

(In a spinoff/termination, a company splits the fund in two: one for retirees and the other for active employees. The excess assets are placed in the fund for retirees, which is then terminated. Annuities are purchased to cover the retired lives and the company recoups the surplus.)

The company also offered a lump-sum retirement package, which many employees used. Those factors combined to reduce the amount of Texaco/Getty assets to $2.22 billion.

# Indexing skyrockets

## Used for 30.08% of stock, 4.86% of bond assets

By Brian Lehrer

About 15% of the $831.1 billion in defined benefit assets held by the nation's 200 largest pension funds is managed in stock and bond index funds, statistics from *Pensions & Investment Age* reveal.

Of the approximately $362 billion allocated to stocks by the top 200, 30.08% is indexed; of the approximately $284 billion allocated to bonds by those pension funds, 4.86% is indexed.

During the year ended Sept. 30, the use of stock and bond indexing among the nation's 200 largest pension funds soared, as pension fund executives welcomed opportunities to match the markets' returns and to lay foundations for portfolio cores.

Stock indexing rose 44% during the 12 months ended Sept. 30, to $108.9 billion from $75.62 billion, while bond indexing rose 33.9%, to $13.8 billion from $10.31 billion.

(Money managers, on the other hand, reported $102.34 billion in stock indexing in the Jan. 12 issue of *Pensions & Investment Age*. The top 200 pension funds have more assets indexed because some have internally managed index funds.)

The $19.36 billion California State Teachers' Retirement System, Sacramento, increased its equity indexing by 212%. The fund has $6.88 billion — or 72% of its equity assets — in indexed stocks, mostly tracking the Standard & Poor's 500 stock index. Wells Fargo Investment Advisors, San Francisco, is running the indexed assets.

"We made the decision last year to index," said Larry Kurmel, chief executive officer. "One reason is that active managers can't beat the markets. It's also cheaper."

Mr. Kurmel said the fund will probably enter the international stock index market by the third quarter.

The $22.9 billion General Electric Co. fund, Stamford, Conn., buoyed the amount in indexed equities by $1 billion, or 62.5%, during the 12 months ended Sept. 30. The $2.6 billion internally managed indexed fund comprises one-third of its stock investments.

"It forms the core of our equity portfolio that we're assured of getting the market return," said Eugene Bolton, vice president and portfolio manager. "Around that we can structure our active management."

Mr. Bolton said the fund hasn't considered customized (or enhanced) funds yet, but officials are looking at international indexing.

The $2.6 billion United Air Lines Inc. fund, Chicago, made its first foray into indexing this year by putting $700 million in an S&P 500 fund.

Dave Dykstra, director of pension assets, said there are no plans to venture into customized or international funds at this point.

Although stock indexing has been in vogue for years, and there are signs the traditional S&P 500 variety may have peaked (*P&I Age*, Jan. 12), bond indexing is just beginning to surge.

As of Sept. 30, 1985, only 18 of *P&I Age*'s largest 200 pension funds used bond indexing, vs. 32 as of Sept. 30, 1986.

One of the newcomers is the $7.55 billion Exxon Corp. fund, New York, which channeled its first $233 million into the Salomon Brothers Broad Investment Grade and the Shearson Lehman Aggregate bond indexes.

In addition, Exxon manages an in-house customized bond fund.

"We felt investment performances were not as good as we expected in certain cases," said W. Allen Harrison, assistant treasurer, explaining Exxon's move into indexing.

Mr. Harrison said fund officials will "play it by ear," but probably will put a "fair emphasis" on bond indexing in the coming year.

While indexing is touted, not all pension funds are so enamored.

"We just philosophically made the decision not to index," said one official at RJR Nabisco Inc., Winston-Salem, N.C., which terminated a $72 million stock portfolio.

In addition to RJR Nabisco, Unisys Corp., Detroit, and Philip Morris Inc., New York, got out of stock indexing. The Pennsylvania Public School Employes' Retirement System, Harrisburg, Pa., and Unisys got out of bond indexing during the 12 months ended Sept. 30.

Although indexing is burgeoning, pension fund executives have not forsaken their active managers.

"It's just another style that complements your active management," said Joseph C. Pellegrino, director of pension investments for the Aluminum Co. of America, Pittsburgh. The $2.5 billion fund has $130 million in the Shearson Lehman Government/Corporate bond index, he said.

California's Mr. Kurmel said the fund will use its managers to "cushion the downside market."

"We still have faith in our active managers," he said. ■

# Dedications fall with rates

By Joel Chernoff

Creation of new dedicated and immunized bond portfolios by the nation's top 200 pension funds slowed to a crawl in 1986 as lower interest rates made the portfolios less alluring.

What's more, pension fund executives are doubtful they'll be setting up new dedicated or immunized portfolios in the foreseeable future.

"Rates are just not as attractive," said Jack Miller, director-investments, of Indianapolis-based Eli Lilly & Co.'s $1.43 billion pension fund. The average yield-to-maturity dropped to 7.8% as of Sept. 30, 1986, from 10.1% the year before, according to the Shearson Lehman Government/Corporate bond index.

The value of previously existing portfolios climbed 22% to $28.1 billion as of Sept. 30, from $23 billion 12 months earlier, boosted by sharply declining interest rates. But the value of pension liabilities to which the assets were matched generally rise by a similar amount, pension fund executives said.

The 22% hike is net of payments to cover benefits for retirees, suggesting the gross return was significantly higher.

Dedicated and immunized portfolios gained popularity in the early 1980s because pension funds were able to lock in high interest rates.

Basically, a dedicated bond portfolio involves matching cash flows from bonds with those of a known set of liabilities, usually those for retirees. Immunization, a form of dedication, involves matching the duration of a bond portfolio (the time it takes to recover half the present value of a bond portfolio) against the duration of liabilities to protect against interest-rate fluctuations.

The locked-in high interest rates enabled pension funds to raise their interest rate assumptions, thus lowering pension expense and contributions.

Data drawn from *Pensions & Investment Age*'s annual survey of the top 200 pension funds gives a rough gauge of trends in the dedicated and immunized bond area.

(Certain inconsistencies in the data exist. Several funds, including North American Philips Corp., New York, and Eaton Corp., Cleveland, dropped from the list because they no longer were large enough to be included in the top 200, while others, such as Eli Lilly and National Intergroup Inc., Pittsburgh, were added because of their increased relative size.

(In addition, a few funds listed last year with dedicated or immunized portfolios were merged into other companies. Inconsistencies in data provided by some corporations also accounted for some problems in measuring year-to-year changes.)

While several pension executives said they would not be interested in establishing new dedicated or immunized portfolios in today's lower interest rate environment, they said their current portfolios did their job.

Southwestern Bell Corp.'s $6.2 billion pension fund started a $1.1 billion dedicated bond portfolio in summer of 1985 to lock in a 12.21% interest rate, said Roger Wohlert, assistant treasurer-corporate finance for the St. Louis-based company.

The bond portfolio was part of a larger effort to change the fund's actuarial assumptions, which taken together, reduced pension expense by more than $60 million a year, he said.

The portfolio, which was valued at $1.42 billion as of Sept. 30, has been rebalanced several times to prevent having callable issues, Mr. Wohlert explained.

Rebalancing has not caused a problem because the portfolio's managers — Jennison Associates Capital Corp., Boston, and Mercantile Trust Co., St. Louis — have sold off vulnerable issues far enough in advance of the market discounting their value, he said.

The fund with the largest amount of dedicated assets, the $7.57 billion Western Conference of Teamsters Pension Trust, Seattle, also caught interest rates before their recent decline, establishing the third in a series of dedicated portfolios between late 1985 and early 1986. The fund's first dedication was done in 1982.

The most recent dedication, plus strong market gains, boosted the amount of Teamsters assets invested in such portfolios to $4.5 billion, up 76.5% from $2.55 billion the year before.

By allowing actuarial assump-

# *Internal assets grow 21.4% during period*

By Fred Williams

Assets managed internally by the nation's largest pension funds grew 21.4% during the year ended Sept. 30, to $411.9 billion from $339.1 billion in 1985.

As of Sept. 30, 121 funds reported internally managed assets, compared with 117 last year.

Although precise breakouts weren't available, it appeared internal managers took advantage of the bull stock market, moving more assets into equities and holding steady on, or even decreasing, their internal fixed-income allocations.

As a percentage of the total employee benefit assets of the top 200, internally managed pension assets dropped to 40.7% from 41.7% a year earlier.

The Teachers Insurance and Annuity Association — College Retirement Equities Fund, New York, topped the list of funds with internal management, reporting all of its assets — $52.3 billion — under in-house control as of Sept. 30, up 30.8% from $40 billion a year earlier.

As in previous years, public pension funds dominated the list, taking eight of the top 10 spots.

The only corporate fund among the top 10 was General Electric Co., with $18.8 billion managed in-house. That amount makes up the Stamford, Conn., company's entire defined benefit plan.

Of the top 20, only three other corporate funds joined GE: E.I. du Pont de Nemours & Co. Inc., Wilmington, Del., with $9.97 billion of its total $12.218 billion in employee benefit assets managed in-house; USX Corp., Pittsburgh, with $9 billion internally, all of its defined benefit assets; and IBM, with $5.9 billion of its $16.64 billion defined benefit plan managed in-house.

Most of the funds on the list this year also were there last year, although rankings changed.

Newcomers include the Pension Reserves Investment Trust, Boston; U S WEST Inc., Englewood Calif.; and the Chicago Employees Annuity & Benefit Fund.

PRIT, which only received its first allocation in 1984 and was not included in previous surveys, ranked reported $54 million of its

# Growing 'baby Bells' follow separate paths

By Barry B. Burr

In asset size, growth and new investments, the seven Bell operating companies comprised the most prominent group of defined benefit pension funds last year.

In total assets for all employee benefit plans, the baby Bells had an aggregate $62.9 billion as of Sept. 30, up 27.5% from $49.34 billion a year earlier. In defined benefit assets alone, the seven had $54.88 billion as of Sept. 30, up 26.3% from the $43.47 billion a year earlier.

NYNEX Corp., New York, had the largest of the defined benefit funds among the Bells, with $10.09 billion, while Southwestern Bell Corp., St. Louis, had the smallest, with $5.47 billion, although its figures were of June 30, while the other funds reported Sept. 30 data.

San Francisco-based Pacific Telesis Group's defined benefit fund grew the fastest in the year ended Sept. 30, up 34.2% to $7.6 billion. Philadelphia-based Bell Atlantic Corp.'s fund grew the slowest, up 21.4% to $8.5 billion.

The baby Bells — all spun off in the divestiture of American Telephone & Telegraph Co., New York, several years ago — are hardly united in their pension fund investment approach. And they don't compare themselves to their sibling companies.

Said Roger Wohlert, Southwestern Bell's assistant treasurer-corporate finance: "We don't look at the other regionals . . . I don't have access to their figures. We are all moving in different directions. There are other large pension funds out there we could just as well compare ourselves to."

The year ended Sept. 30 was an active year for the seven Bell operating companies:

- American Information Technologies Corp., Chicago, and Pacific Telesis are moving into internal management. Ameritech plans to run $1 billion in-house, while PacTel is managing $280 million internally. The two are the only Bell funds to run assets in-house, except for some venture capital holdings by U S WEST Inc., Englewood, Colo.
- U S WEST increased its commitment to oil and gas to $50 million and hired a manager to run short-term investments, the only baby Bell with such a manager.
- NYNEX and Southwestern Bell both moved into international and equity real estate investments for the first time, joining at least four other Bell funds in both asset classes.

Some notable similarities and differences appear in strategy:

- Investing passively is a major theme of at least five Bell funds.
- Ameritech, alone among the Bells, devotes a larger share of its assets to fixed income than to equities. It has only 46% in stocks, compared with a range of 65% to 58% for other Bell companies.
- PacTel had the largest allocation to international investments — 15%, or $1.14 billion, of its total $7.6 billion pension fund, as of Sept 30. Ameritech had $950 million about evenly divided between equities and fixed income and U S West had $570 million, mostly in equities.

The Bells' pension funds undertook major investment initiatives during the year ended Sept. 30.

Ameritech, for example, swung its asset allocation to favor fixed income over equities, pulling $500 million from its stock managers to fund the program.

Ameritech officials placed a bond index fund temporarily with National Investment Services of America Inc., Milwaukee, although it plans to move it to Lincoln Capital Management Co., Chicago.

Ameritech also is setting up a $1 billion in-house Standard & Poor's 500 stock index fund. Ameritech had about $500 million in-house in December and expects to fund the other half of the stock index portfolio earlier this year. The money for the in-house fund also came from equity managers.

In another big change, Ameritech's international investments increased 121% in the year ended Sept. 30. Glenn A. Dever, Ameritech Supervisor-investment analysis, attributed the rise to performance rather than more funding. He said Ameritech has no plans to make any additional funding in international in 1987.

NYNEX moved into international investments for the first time, according to sources. In addition, NYNEX made its first move into real estate outside its Telephone Real Estate Equity Trust holdings, inherited in the breakup of American Telephone & Telegraph Co.'s pension fund.

Southwestern Bell made its first commitments to real estate equity outside its TREET holdings and to venture capital.

In addition, it began a securities lending program with Republic-Bank Dallas, its master trustee.

The new investment programs came after Southwestern Bell closed 1985 with two major initiatives — initial international investments and a dedicated bond portfolio.

U S WEST raised its international investments more than tenfold and increased its venture capital commitment more than 300%.

In addition, its real estate equity investments rose to $530 million from $215 million in the 15 months from Sept. 30, 1985. That increase includes a recent $240 million real estate development in Jersey City, N.J., in which U S WEST will provide $100 million in equity, assume a $60 million loan and seek $80 million in additional loans for the rest of the financing.

Also, U S WEST nearly doubled its dedicated bond portfolio to $2.026 billion from $1 billion in

*Continued on page 77*

## Southwestern ready for '87

By Barry B. Burr

ST. LOUIS — In 1987, Roger Wohlert, Southwestern Bell Corp.'s assistant treasurer-corporate finance, expects to look at commingled real estate funds for the $5.47 billion defined benefit pension fund.

In addition, he said the fund, which already has a third of its assets in indexed stocks, plans to look at other passive products, especially those index strategies targeted to capture particular segments of the market.

In another area, he said he has discussed performance fees with all managers, but hasn't adopted the compensation method yet, cautioning against undesired risks.

"We're cognizant of the dangers of setting up an incentive structure that might encourage managers to take excessive short-term risks," Mr. Wohlert said. "We haven't come up with a formula that works."

On the practice of paying for services by channeling stock trading commissions to specific brokers, he said, "We're using soft dollars to a small degree. It's on a voluntary basis with managers, and only with brokers the managers are dealing with anyway. We don't insist managers meet a quota. Best execution can be the only criterion for doing a transaction."

As long as execution isn't harmed, he said, "it can save the fund from paying a fee on services," from using "money that would be paid out of the fund."

Its consultant, Buck Pension Fund Services Inc., New York, is paid with soft dollars. In all, he said, less than 10% of the fund's fees are paid in soft dollars.

Also, the fund is considering lending securities in the international arena — an area sorely needing such services, he said.

## Retirement Systems of Alabama

| | ($ millions) |
|---|---|
| Total assets | 5,454 |
| Defined benefit | 5,454 |
| Employer contributions | 246 |
| Benefit payments | 235 |

MONTGOMERY, Ala. — The Retirement Systems of Alabama sold its stock in the beleaguered Mission Insurance Group after it was speculated the fund would accept stock instead of cash for interest on the notes and debentures it held in the financially troubled company.

The system had filed suit in January to force Mission into involuntary Chapter 11 bankruptcy proceedings after it failed to make semiannual interest payment on the debentures. The suit was pending at year end.

The fund more than doubled its commitment to mortgages during the year ended Sept. 30 because of confidence in that sector. In addition, fund officials began to use stock options because they want to invest in stocks more aggressively because of a flat bond market.

Because of its increased commitment to mortgages, the fund cut back its allocation to mortgage-backed securities.

As of Sept. 30, the fund's book value grew 14.9% to $5.45 billion from $4.744 billion a year earlier.

The system is composed of the Teachers Retirement System, with $3.72 billion; the Employees Retirement System, $1.68 billion; and the Judicial Retirement Fund, $49.8 million.

Employer contributions dropped to about $246 million in 1986 from about $255 million the year before due to good investment returns.

The entire fund is managed in-house. As of Sept. 30, about $120 million was in stock index funds, a decrease of about $55 million from a year ago. Officials said they sold the profitable stock and took the money. Another $20 million was in GICs, $4.1 million in equity real estate, $422 million in mortgages and $909 million in mortgage-backed securities.

The asset mix as of Sept. 30 was 7.43% stocks, 52.23% bonds, 15.48% cash equivalents, 0.07% real estate equity, 0.37% GICs, 7.74% mortgages and 16.68% mortgage-backed securities.

Key investment personnel are David G. Bronner, chief executive officer; Hunter Reaves, director of fixed income; and Cheryl Duke, director of equities.

The money mover scorecard will be published Feb. 9.

## State of Alaska Retirement Systems

| | ($ millions) |
|---|---|
| Total assets* | 2,857 |
| Defined benefit | 2,857 |
| Employer contributions | 282 |
| Benefit payments | 118 |

*as of June 30, 1986

JUNEAU, Alaska — The State of Alaska Retirement Systems' assets jumped 30.8% to $2.857 billion as of June 30, compared with $2.185 billion as of Sept. 30, 1985. Officials said the rise was due to good stock and bond markets, especially in international equities.

Contributions for 1986 increased 43% to $282 million from $197 million, while benefit payments rose 37.2% to $118 million from $86 million.

The fund withdrew from the international bond markets, deciding to take profits and run from unstable exchange rates, officials said.

The retirement system took advantage of a strong market, increasing its allocation to stocks about 50%. Foreign equity more than doubled, to $181 million this year from about $81 million.

The fund had $161.1 million in real estate equity and $440.3 million in mortgages, about $69 million less than it had in mortgages last year. About $1.79 billion is run in-house, including $1.51 billion in fixed income and the remainder in short-term investments.

Fixed-income and stock-index futures are used.

As of June 30, the asset mix was 31.6% stocks, 37.5% bonds, 9.9% cash equivalents, 5.6% real estate equity and 15.4% mortgages.

The fund terminated real estate manager Prudential because of performance, and fund officials said the money was reallocated between bonds and domestic equity.

**Equity managers** (Domestic): Fred Alger; INVESCO; Lehman Management.

(International): Citibank; Morgan Guaranty.

**Real estate managers**: Aetna; John Hancock; Equitable; Security Capital; JMB; J.P. Morgan; Karsten.

First Pennsylvania Bank is master custodian.

Key investment officers are James R. Wilson, chief investment manager; Kenneth L. Shaffer, portfolio manager; and Martin Lentz, real estate officer.

## Allied-Signal

| | ($ millions) |
|---|---|
| Total assets | 6,600 |
| Defined benefit | 4,600 |
| Thrift or savings | 2,000 |
| Employer contributions | 140 |
| Benefit payments | 246 |

MORRISTOWN, N.J. — The pension funds of the old Allied and Signal companies were merged under a single master trustee after operating as separate entities once the two plan sponsors merged in 1985 to become Allied-Signal Inc.

Allied's master trustee, The Northern Trust Co., became master trustee for the entire plan. Chase Manhattan Bank had been the master trustee for the old Signal pension plan.

State Street Bank & Trust Co. became master trustee for all savings plan assets. Bank of America was master trustee for Signal's savings plan assets; State Street was master trustee for solely for Allied's savings plan.

In another development related to the companies' merger, the newly combined plan transferred about $150 million in pension assets to the Henley Group, 35 business units spun off from the company created by the merger.

Allied-Signal dropped four domestic equity managers: Batterymarch Financial Management, C-S Capital Advisors Inc., Thomas J. Herzfeld and Lynch and Mayer Inc. Batterymarch continues as an international manager for Allied-Signal.

No changes were reported in fixed-income and real estate investment managers.

The total assets of the Allied-Signal fund increased 10%, to $6.6 billion from $6 billion. Defined benefit assets were up 15%, to $4.6 billion from $4 billion. The remaining $2 billion is in a thrift or savings plan.

The employer contribution to the pension plan for 1986 was $140 million; an estimated $246 in benefits was paid out by the pension plan only.

The fund had $1 billion managed internally, an increase of 33.3% over the previous period's $750 million. About $500 million

*We don't react at the drop of an interest rate.*

Successful investing depends a lot more upon how well you react to market changes than upon how quickly.

This is not to say that we don't change as conditions change. We do. We just don't believe that something as important as your retirement fund portfolio should be altered by short term factors.

Our goal is to deliver long term growth through equity investments and prudent portfolio balance through sound fixed-income management. We believe we're uniquely qualified to meet these objectives.

Because at David L. Babson & Company, we have a very simple philosophy: the best way to achieve investment success is to start with the best people. And then give them the resources and the power to make decisions. Informed decisions.

How do we attract and keep the best people? By giving them the opportunity to literally be a part of the company. Our company is owned by the active members of the professional staff, none of whom own as much as 15% of the stock.

The result of having top-quality people is being able to create top-quality, low-risk, growth investments and fixed-income portfolios.

For example, we offer real estate investments that are an excellent way to diversify your retirement fund portfolio. Choose from a closed-end pooled fund or from separate investments. In either case, the goal is low-risk growth.

We also offer separately managed portfolios (similar to the Babson Enterprise Fund) of companies with small market capitalizations. These are companies that fill a niche in their particular industry. Companies in which management holds a large stake. Companies that we believe can help you meet your investment goals because we have thoroughly researched them in house.

So if you're looking for sound investments with limited risk for your retirement fund portfolio, consider David L. Babson. Because good performance depends on good planning. And you can't develop a plan without solid investment decisions.

For more information about what we can do for you, call Peter Thompson, President, at (617) 723-7540. Or write: David L. Babson & Company, Inc., One Boston Place, Boston, MA 02108.

**David L. Babson & Company, Inc.**

*The person you talk to owns the company.*

in fixed income, $400 million in equity and $100 in short term-instruments is managed in-house.

The asset mix as of Sept. 30 was 65% stocks, 28% bonds, 8% cash equivalents, 3% GICs and 6% real estate equity.

An indexed equity fund managed by Bankers Trust accounted for $440 million in assets, while guaranteed investment contracts made up $200 million of the total.

The Allied-Signal plan invested $330 million in foreign equities, $50 million in foreign bonds, $45 million in venture capital, $20 million in oil and gas, $45 million in LBOs and $230 million in real estate equity.

A $1 billion dedicated bond portfolio was sold to take advantage of rising bond prices.

**Equity managers:** Bankers Trust; BMI Capital; Baron Capital, Capital Guardian; Chesapeake Capital; Corinthian Capital; Delaware Investment; Johnson, Valiant & Broadfoot; KR Capital; Kurtz Capital; John A. Levin; Lieber; Lincoln Capital; Lord Abbett; Presidio Management; PRIMECAP; Donald Smith; Target Investors; Thomson, Horstmann & Bryant; Towneley; Verus Capital; Weiss, Peck & Greer; Westport Asset Management.

Key investment personnel are Edward T. Tokar, vice-president-investments.

Mark E. Smith is senior portfolio manager for fixed-income investments and Vincent Della Volpe, senior portfolio manager for equity investments.

## Aluminum Co. of America

| | ($ millions) |
|---|---|
| Total assets | 2,500 |
| Defined benefit | 2,200 |
| 401(k) | 300 |
| Employer contributions | 125 |
| Benefit payments | na |

PITTSBURGH — The Aluminum Co. of America added three money managers and dropped six during the year ended Sept. 30.

Matrix Capital Management and Mercator Asset Management were hired to run equities for the company's pension plan, while STW Fixed Income Management was brought in for fixed income.

Equity managers dropped were Fred Alger Management; Brundage, Story & Rose; Frontier Capital Management; Hathaway & Associates; and Stralem & Co. BEA Associates was dropped as a fixed-income manager.

Alcoa's total employee benefits assets rose 21.9% to $2.5 billion in the period. Defined benefit plan assets climbed 22.9% to $2.2 billion, from almost $1.8 billion a year earlier.

The company has $500 million in a stock index portfolio; $130 million was invested during the year in an indexed bond portfolio.

Alcoa's investments include $120 million in international investments, $80 million in equities and $40 million in fixed income; $50 million in venture capital pools; $25 million in leveraged buy-out situations; $105 million in equity real estate; and $22 million in mortgage-backed securities.

About $34 million in guaranteed investment contracts with Metropolitan Life Insurance Co. and The Travelers Cos. matured during the year and weren't replaced.

The fund uses stock and bond options and stock index and fixed-income futures. An undisclosed amount is protected through portfolio insurance.

The pension asset mix as of Sept. 30 was 62% stocks, 24% bonds, 9% cash equivalents, 5% equity real estate and 1% mortgage-backed securities.

**Equity managers** (Domestic): Franklin; Geewax, Terker; Matrix; Mercator; PRIMECAP; Rosenberg; State Street Bank; Wells Fargo.

(Global): Capital Guardian; J.P. Morgan.

**Fixed-income managers:** Fischer, Francis, Trees & Watts; Massachusetts Financial Services; Mellon Bank; J.P. Morgan; STW.

**Real estate managers:** Coldwell Banker; Equitable; John Hancock; RREEF.

**Venture capital managers:** Capital Management (Sequoia Funds); Charles River; Dillon Read (Concord Partners and Saratoga Fund); Ventech Partners.

**LBOs:** Kohlberg Kravis & Roberts.

Mellon Bank is the fund's master trustee.

Joseph C. Pellegrino is assistant treasurer, and Donna S. Barr, trust investment analyst.

## American Airlines

| | ($ millions) |

| Defined contribution | 1,133 |
| 401(k) | 86 |
| Other | 31 |
| Employer contributions | 85 |
| Benefit payments | 110 |

FORT WORTH, Texas — During 1986, American Airlines added two equity managers to its $1 billion Pilots Variable Pension Fund — Independence Investment Associates and Dreman & Embry Inc., for $50 million each.

Vilas Fischer Associates, which handled equity and balanced accounts for the fund, was terminated.

Total employer contributions to all American plans decreased 19% to $85 million from $105 million for the 12 months ended Sept. 30. The decrease was the result of changes in actuarial assumptions.

Benefit payments increased 57%, to $110 million as of Sept. 30 from $70 million a year earlier.

Total assets for the American Airlines plan increased 27.1% to $2.892 billion from $2.275 billion.

American manages $1.1 billion internally: $1.02 billion in fixed income; $70 million in equities; and $10 million in short-term assets.

The American pension fund has $1 billion in dedicated or immunized bonds, $45 million invested in guaranteed investment contracts, $70 million in foreign equity, $30 million in foreign fixed income and $10 million in other foreign investments.

About $300 million is invested in mortgage-backed securities.

The plan uses stock options.

The asset mix for pension assets as of Sept. 30 was 42% stocks, 35% bonds, 8% cash equivalents, 10% mortgage-backed securities and 5% in international.

**Balanced/equity managers:** Atlanta Capital; Barrow, Hanley; Brown Brothers Harriman; Capital Guardian; Citicorp; Dreman & Embry; Independence; Dewey Square; Hotchkis & Wiley; Penmark; RepublicBank Dallas; United Capital.

**Options manager:** Analytic Investments.

**International managers:** Morgan Grenfell; Rowe Price-Fleming; N.M. Rothschild.

Master trustee is RepublicBank Dallas.

Key personnel are William F. Quinn, assistant treasurer; Thomas Stawicki, director of trust investments; and Robert J. Chiore, investment analyst.

MOST MASTER TRUST TEAMS ARE CONNECTED BY TELEPHONE.
NOT OURS.

It's pretty obvious that a Master Trust team can only run at peak efficiency when everyone on the team knows what everyone else is doing.

However, of all major money center banks, only The Bank of New York seems to have figured out that the way to achieve this is not via telephone tag.

It's by having each Master Trust team work together–not just figuratively, but literally. Desk to desk. Terminal to terminal.

So your administrative officer can literally turn to your investment specialist or your accountant to get your questions answered and your requests acted upon immediately. For that matter, you can call any one of them directly.

What's just as important, The Bank of New York has committed its resources to supporting the teams with one of the most extensive and highly sophisticated "back office" complexes anywhere, featuring timely, accurate, audited reports, cash management services, advanced on-line technology and performance measurement.

To learn more about our team approach to Master Trust, call Robert S. Darbee, Vice President, at (212) 530-1351. Or write him at The Bank of New York, 19 Rector Street, New York, NY 10015.

CHICAGO — Ameritech is pulling $1.5 billion from its equity managers to create its first in-house portfolio and to increase its allocation to fixed income. The latter is a major, strategic asset allocation shift, resulting in Ameritech making fixed income its leading investment class.

Ameritech is funding the changes by reducing managers' allocations. It made no changes in its lineup of managers during 1986, and contemplates no changes in 1987.

By December, Ameritech had moved $500 million of the total planned for an internally managed $1 billion Standard & Poor's 500 stock index fund.

In addition, it placed $500 million in a bond income fund temporarily with National Investment Services of America; it plans to move the fund to Lincoln Capital Management.

The fund increased by 15% its venture capital commitments to $60 million as of Sept. 30 from $52 million a year earlier. In the same period, it reduced its real estate equity investments to $300 million from $315 million.

Also, its total international investments increased 121%. Its foreign equity portfolio rose to $400 million from $200 million, while its foreign fixed-income portfolio rose to $500 million from $227 million. The fund has no plans to make any additional funding in international in 1987.

As a result of the strategic asset shifting, its asset mix as of Sept. 30 was 48% stocks, 47% bonds, 3.5% real estate, 3% cash equivalents and 0.5% venture capital.

The core of its fixed-income holdings is a dedicated portfolio, which grew in the year ended Sept. 30 to $3 billion from $2.8 billion because of market gains.

Ameritech had nearly $10.48 billion in total employee benefit assets as of Sept. 30, up 20% from the $8.3 billion the year before. Its defined benefit assets rose 25.8% to nearly $9.3 billion from $7.4 billion. Its 401(k) plan assets rose 33% to $1.2 billion from $900 million. Ameritech attributed the increases in both funds to investment performance.

**Equity managers** (Domestic): AmeriTrust; Concord Capital; David J. Greene; Delaware Investment; First Wisconsin Trust; Jennison Associates; Lincoln Capital; Loomis, Sayles; Lovi Abbett; National City Bank; Rosenberg Capital; Sit Investment; Wells Fargo Investment.

(International): ABD International; Baring International; Capital Guardian Trust; IDS International.

**Bond managers** (Domestic): American Fletcher National; Indiana Investment Advisors; National Investment Services.

(Global): First Chicago Investment.

**Real estate managers:** JMB Institutional; LaSalle Partners; RREEF.

**401(k) plan managers:** Bankers Trust; DFI/EBCO.

Master trustee for Ameritech's pension fund is Harris Trust & Savings Bank and for its 401(k) fund, Northern Trust.

Callan Associates is consultant.

Donald W. Phillips, director investment management, oversees the assets.

## American Telephone & Telegraph Co.

| | ($ millions) |
|---|---|
| Total assets | 39,382 |
| Defined benefit | 25,376 |
| Thrift or savings | 4,369 |
| Employer contributions | 340 |
| Benefit payments | 850 |

NEW YORK — American Telephone & Telegraph Co. established a South Africa-free equity portfolio as an option for its $6.9 billion savings plan in 1986.

Employee benefit assets grew 23.8% to $39.38 billion in the 12 months ended Sept. 30 from $31.807 billion.

Only one manager was added in 1986, State Street Bank and Trust. None was terminated.

The plan is so overfunded that by switching to the new accounting standard for pensions, Financial Accounting Standards Board Statement 87, AT&T's 1986 earnings were boosted by an estimated $1 billion over 1985.

The earnings boost works out to 58 cents a share. If not for the pension fund and FASB 87, AT&T would have reported a net loss for the year.

In spring, the company did a thorough review of its funding status and subsequently altered some actuarial assumptions. The result was a 66.6% dramatic decline in contributions, to an estimated $340 million in 1986 compared to about $992 million in 1985.

At the same time, benefits paid out increased 17.3% to $850 million from $665 million in 1985.

The fund has $7.966 billion in indexed stocks, $3.671 billion in indexed bonds, $3.92 billion in foreign equity, $228 million in venture capital, $261 million in oil and gas, $92 million in leveraged buy-outs, and $3.673 billion in real estate equity.

The fund continues to manage some assets internally, although AT&T officials did not list them on this year's questionnaire, citing the difficulty of working out the figures.

The asset mix as of Sept. 30 was 51% equities, 31% bonds, 18% real estate equity and 4% in a combination of international, venture capital and oil and gas.

*$20 Min.

assistant treasurer-investments at Amoco Corp., retired July 1. His replacement has not been named.

During 1986, Amoco hired State Street Bank & Trust Co. as an international manager and terminated Ivory & Sime International Inc. It also terminated McKenzie, Walker Investment Management Inc. as an equity manager and moved the money in-house.

*Pensions & Investment Age* estimates that Amoco's employee benefit assets increased 18% to $4.179 billion in the 12 months ended Sept. 30. The estimate is based on Dec. 31, 1985 figures provided by Amoco. Defined benefit assets alone increased 31%.

Employer contributions decreased 24% to $173 million. Benefit payments increased 89% to $335 million, largely because of work force reductions, officials said.

The fund has about $474 million managed internally, estimated by *P&I Age* from the Dec. 31 figures. This includes $415 million in stocks, $23 million in bonds and $36 million in short-term investments.

It has $195 million in indexed stocks, $316 million in foreign investments (largely stocks), $103 million in real estate and $71 million in limited partnerships, *P&I Age* estimates. It uses fixed-income futures.

As of Sept. 30, the approximate pension asset mix was 62% stocks, 9% bonds, 11% cash equivalents, 5% real estate equity and 13% foreign accounts and limited partnerships.

**Equity managers:** Chase Manhattan; CMB Investment; Dimensional Fund Advisors; Fidelity Management; Forstmann-Leff; Franklin Portfolio; Fayez Sarofim; State Street Research.

## Arizona State Retirement System

| | ($ millions) |
|---|---|
| Total assets* | 5,507 |
| Defined benefit | 5,507 |
| Employer contributions | 124 |
| Benefit payments | 200 |

*as of June 30, 1986

PHOENIX, Ariz. — The Arizona State Retirement System reported dramatic increases in its indexed stock and bond holdings in 1986, with jumps of 108.8% and 157.6%, respectively.

As of Sept. 30, the system had $1.092 billion in indexed stocks and $492 million in indexed bonds.

Max Sullivan, director, said most of the increase came when balanced manager Gardner and Preston Moss was terminated in March and the bulk of its portfolio given to existing index fund manager, Wells Fargo Investment Advisors.

As of June 30, the fund reported defined benefit assets of $5.507 billion, an increase of 34.2% from the $4.103 billion reported a year earlier.

Its 1986 plan contribution was $124 million, a decrease of 6% from the previous year, and its benefit payouts were $200 million.

The fund runs $100 million internally, all in short-term instruments.

The Arizona system has $2.6 million in real estate equity; $225 million in mortgages; and $200 million in mortgage-backed securities.

As of June 30, the asset mix was 40% stocks, 40% bonds, 11% cash equivalents, 5% mortgages and 4% mortgage-backed securities.

**Balanced managers:** Criterion; Fiduciary Trust; INVESCO; Kemper Financial; and Wells Fargo.

**Equity manager:** Bernstein-Macaulay.

**Bond manager:** Duff & Phelps.

**Mortgage manager:** Valley National Bank.

The fund's master custodian is Mellon Bank. Its investment management consultants are Wilshire Associates and SEI.

Mr. Sullivan is the key investment officer.

## Atlantic Richfield Co.

| | ($ millions) |
|---|---|
| Total assets | 2,700 |
| Defined benefit | 2,034 |
| Thrift or savings | 357 |
| 401(k) | 166 |
| PAYSOP | 143 |
| Employer contributions | na |
| Benefit payments | na |

LOS ANGELES — Atlantic Richfield Co. liquidated assets from its defined benefit plan in 1986 to pay employees taking a lump-sum, early retirement option. The liquidation brought total employee benefit assets down 17%, to $2.7 billion as of Sept. 30 from $3.25 billion in 1985. The defined benefit plan decreased 7.5%, to $2.034 billion from $2.2 billion.

ARCO hired the Fox Group as an equity manager when Wells Fargo & Co. acquired Crocker National Corp. in February. Wells Fargo did not want to take over what Crocker had managed.

In late 1986, the total employer contribution for that year had not yet been determined, but a corporate official had said earlier that the contribution was about $111 million, approximately $11 million more than had been projected before the early retirement program was offered.

Internally managed pension assets totaled $1.068 billion: $830 million in equities; $185 million in fixed income, including private placements; $30 million in short-term instruments; and $23 million in real estate.

As of Sept. 30, ARCO had $478 million in foreign equities and $43 million in foreign bonds.

The fund has committed $44 million for venture capital and $8 million for oil and gas. Real estate equity totaled $186 million and mortgages, $27 million.

Stock options, stock index futures and fixed-income futures are used.

The approximate asset mix of the pension assets as of Sept. 30 was 57% stocks, 22% bonds, 3% cash, 9% real estate equity, 2% annuities, 1% mortgages and 6% venture capital, private placements and other investments.

**Equity managers:** G.T. Capital; Capital Guardian; Fidelity International; Fiduciary Trust; Fox Group; Rowe Price-Fleming; TCW; Warburg International.

**Bond managers:** Fiduciary Trust; MacKay-Shields; J.P. Morgan; Solomon Asset.

**Real estate managers:** Aldrich, Eastman & Waltch; Lehndorff & Babson.

**Mortgage manager:** Citicorp.

State Street Bank is master trustee.

E. Kent Damon Jr., vice president and investment officer, oversees the investment management of the fund.

*Pensions & Investment Age*'s directory of investment advisers will run May 25.

## Bethlehem Steel Corp.

| | ($ millions) |
|---|---|
| Total assets | 2,913 |
| Defined benefit | 2,913 |
| Employer contributions | 65 |
| Benefit payments | na |

BETHLEHEM, Pa. — Bethlehem Steel Corp. hired State Street Bank & Trust Co. as trustee and record keeper for a new defined contribution plan for salaried employees launched Jan. 1, 1986.

Assets for the plan, managed by Fidelity Management & Research and The Putnam Advisory Co. were about $25 million early in 1986, but no updated amount is available.

The company's defined benefit plan assets climbed 12% in the year ended Sept. 30, 1986, to $2.913 billion from $2.601 billion a year earlier. The bulk of the assets is in a dedicated bond portfolio.

The company made a $65 million employer contribution to the fund in 1986. An estimated $370 million of the plan's $2.9 billion in assets, however, constitutes a receivable for contributions owed the fund.

Bethlehem Steel runs virtually all of its assets internally. As of Sept. 30, $1.5 billion was invested in bonds, $918 million in equities and $74 million in short-term instruments.

Another $50 million is in GICs with Prudential Insurance Co.

The asset mix as of Sept. 30 was 31.5% stocks, 51.5% bonds, 2.6% cash equivalents and 1.7% GICs. The remaining 12.7% represents the receivable.

Bankers Trust Co. is custodian.

Walter W. Buckley Jr. is pension fund manager.

## Boeing Co.

SEATTLE — Boeing Co. employee benefit assets totaled $7.2 billion as of Sept. 30, an increase of almost 31% from the $5.509 billion reported the previous year.

The bulk of the growth was in the company's defined contribution plans, whose assets increased almost 52% to $3 billion as of Sept. 30 from $1.975 billion a year earlier. Defined benefit assets increased 18.8%, to $4.2 billion from $3.534 billion.

Boeing has $273 million invested in foreign markets; $75 million committed to venture capital; $150 million committed to leveraged buy-outs; and about $200 million each in mortgages and mortgage-backed securities.

It uses stock index and fixed-income futures.

As of Sept. 30, the asset mix for the pension plan was 45% stocks, 40% bonds, 5% cash equivalents, 5% mortgages and 5% mortgage-backed securities.

**Equity managers:** Alliance, Cabanne Smith; Capital Guardian; Cashman Farrell; Century Capital; Chase Investors; Citicorp; First Interstate Bank of Washington; IDS Advisory; INVESCO; Rosenberg Capital; Sit Investment; Sirach/Flynn Elvins.

**Bond managers:** Robert C. Brown; W.R. Huff; McKee Investment Management; Morgan Guaranty; PIMCO; Seattle First National Bank.

**Real estate managers:** Aetna; First Chicago; Prudential; Security Pacific.

Chase Manhattan Bank is the master trustee; Frank Russell Co. is the investment management consultant.

Key investment personnel are Gary Bland, director-trust investments and investor relations, and Elizabeth A. Marcoux, manager-trust investments.

## California Public Employees' Retirement System

| | ($ millions) |
|---|---|
| Total assets | 37,700 |
| Defined benefit | 37,700 |
| Employer contributions | 1,940 |
| Benefit payments | 1,600 |

SACRAMENTO, Calif. — The $37.7 billion California Public Employees' Retirement System is continuing to broaden its investment makeup since its adoption of the prudent person rule in 1984.

In 1986, the system's trustees added three external equity managers, moved at least $1 billion in equity money in-house, increased its equity exposure and added an investment advisory council.

Trustees also continued investing in real estate, and prepared to invest in timberland. The fund also began the process of seeking a new custodian, as it will no longer use the state treasurer's office for that purpose.

One of the three external equity managers hired by the system, Citicorp Investment Management Inc., had been the equity adviser to the system, making recommendations only. The two others hired were Batterymarch Financial Management and Rosenberg Capital Management.

Each of these managers will be given full discretion over the assets they manage, something the retirement system has not done before. Though it has had several advisers, final decisions were approved by the internal staff and trustees.

Citicorp has agreed to be paid on an incentive fee basis. The system also has a verbal agreement to add five new real estate advisers in the future, all of which the system expects to pay on an incentive fee basis.

The advisers are Richard Ellis; TCW Realty Advisors; Heitman Advisory Corp.; John Hancock Mutual Life Insurance Co., and Forest Investment Associates.

Hancock and Forest would be advisers for timber investments.

Each of the three external equity managers received $500 million, leaving $36.2 billion managed internally, including about $5.5 billion in an internal index fund.

The fund's total assets increased 29.3%, to $37.7 billion from $29.166 billion during the 12 months ended Sept. 30. Total employer contributions dropped to $1.94 billion from $2 billion. Benefit payments made during 1986 were $1.6 billion, up 23% from $1.3 billion.

The asset mix for the fund as of Sept. 30 was 32.8% stocks, 29.5% bonds, 2.4% cash equivalents, 5.4% real estate equity, 7.5% mortgages, 20.7% mortgage-backed securities and 0.7% pooled liquidity account.

**Equity managers:** Batterymarch; Citicorp; Rosenberg.

**Real estate advisers:** F.I.A. Associates; Equitable; LaSalle.

Key investment personnel are Greta Marshall, investment manager; Jim Smith, mortgage investment officer; Carl Wilberg, principal investment officer-equities; and Walt Williams, principal investment officer-fixed income.

Annual PIPER listings: Feb. 23.

# Before you commit to a Master Trust product, find out what it means to have a Master Trust service.

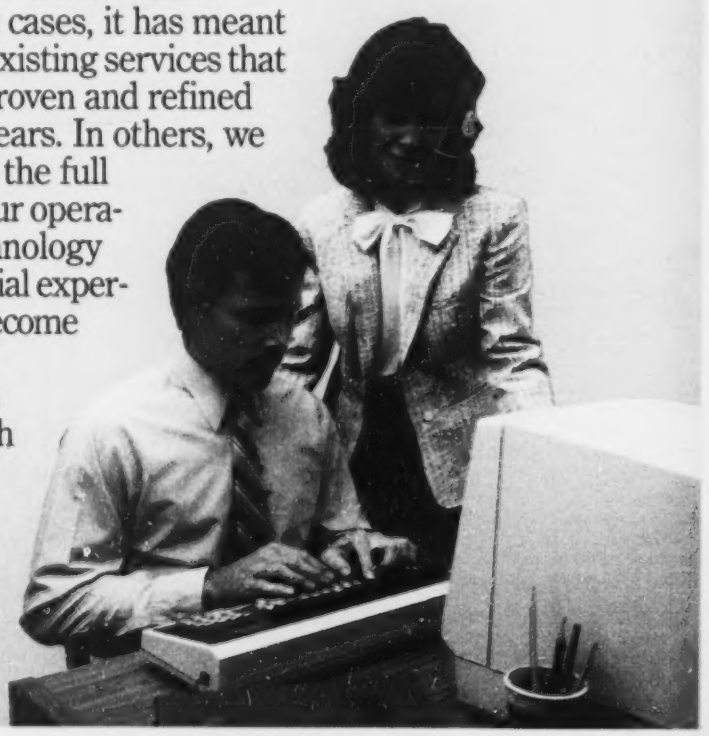
When Wachovia developed its first Master Trust service, it was designed to meet the specific and challenging needs of a major corporation. Today that concept of total flexibility continues to serve our clients' needs in a way that has made us a leader in the field.

Our people, through long experience in the Master Trust area, accurately assess the needs of each client. And rather than offer a prepackaged product with costly and needless frills, we mold services to the precise requirements for the optimum administration and management of the account.

In addition to these Master Trust services normally requested, we will custom design services to meet your individual needs.

- Securities Lending
- Global Custody
- Performance Analytics
- Trust Universe Comparison Service®
- Options/Futures Administration
- Plan Sponsor On-line
- Client Seminars
- 401(k) Administration
- Real Estate Management
- Venture Capital Management
- PAYSOP Administration
- Legal Administration

In some cases, it has meant applying existing services that we have proven and refined over the years. In others, we have used the full range of our operational technology and financial expertise to create new services that have become standard for the industry.



Our commitment for the future is to continue to provide our clients with the most innovative, personalized and cost-effective Master Trust service they can find anywhere.

## California State Teachers' Retirement System

| | ($ millions) |
|---|---|
| Total assets | 19,361 |
| Defined benefit | 19,361 |
| Employer contributions | 2,500 |
| Benefit payments | 1,000 |

SACRAMENTO, Calif. — In 1986, the California Teachers' Retirement System hired five equity managers: Provident Investment Counsel; Denver Investment Advisors; Wright Investors' Service; Pilgrim, Baxter, Hoyt & Greig; and Equitable Investment Management Corp.

Each manager was given an initial allocation of $100 million in assets as the system increased its equity exposure to 46% as of Sept. 30, from 31.1% a year earlier.

The bond allocation was cut to 24% from 57.3%, with about $1.5 billion being shifted to stocks.

System trustees also hired consultant Pension Real Estate Services Inc. as a first step in setting up a structured real estate investment program. In addition, trustees decided to develop their own mortgage pass-through certificates and invest about $400 million a year in single-family mortgages in California.

The fund also set up a program for divestiture of South Africa-related securities under state law. The system's officials said divestiture could involve divestment of 18.5% of its securities, and the program would begin Jan. 1, 1988.

Early in 1986, four staff members were added: Janice Hester, corporate affairs adviser; Elaine Lewter, equity monitor; Monty Lee, fixed-income portfolio manager; and Mal Kangas, mortgage loan officer.

As of Sept. 30, retirement assets for the pension fund totaled $19.361 billion, up 28% from the $15.1 billion reported a year earlier. Employer contributions for 1986 were $2.5 billion, with benefit payouts of $1 billion.

The system has $6.875 billion in indexed stocks, up 212.5%; $524 million in real estate equity, up 60%; $695 million in mortgages, a decrease of 13%; and $2.103 billion in mortgage-backed securities.

The asset mix as of Sept. 30 was 46% stocks, 24% bonds, 12% cash equivalents, 3% real estate equity, 4% mortgages and 11% mortgage-backed securities.

**Equity managers:** Barrow, Hanley, Mewhinney and Strauss; Denver Investment; Dimensional Fund; Equitable Investment; Pilgrim, Baxter, Hoyt & Greig; Provident Capital; Provident Investment; Trinity; Trust Company of the West; Wright Investors' Service; Wells Fargo Investment; and Wilmington Capital.

**Bond managers:** Loomis, Sayles; Manufacturers Hanover; Miller, Anderson & Sherrerd; Pacific Investment; Scudder, Stevens & Clark; Stein Roe & Farnham; T. Rowe Price.

**Real estate manager:** Eastdil.

The state treasurer serves as custodian; Wilshire Associates is the consultant.

Key personnel are Thomas Flanigan, chief investment officer; and Mr. Lee and Ms. Lewter.

## University of California

| | ($ millions) |
|---|---|
| Total assets | 8,378 |
| Defined benefit | 7,687 |
| 401(b) | 691 |
| Employer contributions | 284 |
| Benefit payments | 84 |

BERKELEY, Calif. — The University of California pension fund is preparing to divest itself of companies with operations in South Africa as a result of a state law passed in August.

Under the law, state pension funds must divest themselves of all South Africa-related stocks, between Jan. 1, 1988, and Jan. 1, 1991. New investments in companies operating there are banned as of Jan. 1, 1987.

Original estimates of the amount to be divested by the university ran as high as $3 billion, or about 36% of assets, but have declined through the recent withdrawals of some companies from South Africa.

The law also indemnifies trustees of all state funds so they cannot be held liable for losses that might result from divestiture.

In the past year, the internally managed pension fund took its first steps into international investing, placing $6.1 million in international equities.

The fund also hired Bankers Trust Co. as master custodian, replacing Bank of California.

During the year ended Sept. 30, the university's total employee benefit assets rose 47% to $8.378 billion from $5.7 billion; defined benefit plan assets rose 47.8%, to $7.687 billion; and 401(b) plan assets — similar to a corporate 401(k) — rose 38.2%, to $691 million.

Employer contributions for 1986 totaled $284 million and benefit payments, 84 million.

In addition to its international assets, the fund has $75 million in venture capital and $10 million in mortgages.

The asset mix as of Sept. 30 was 88% stocks, including venture capital, and 12% bonds, including mortgages.

Overseeing the fund are Herbert Gordon, treasurer, and Patricia Small, associate treasurer.

## Caterpillar Inc.

| | ($ millions) |
|---|---|
| Total assets | 3,617 |
| Defined benefit | 3,264 |
| Defined contribution | 268 |
| Profit-sharing | 2 |
| 401(k) | 56 |

| Employer contributions | na |
| Benefit payments | na |

PEORIA, Ill. — The employee benefit assets of Caterpillar Inc., formerly Caterpillar Tractor Co., increased 18.7% to $3.617 billion from $3.048 billion in the year ended Sept. 30. Defined benefit assets alone increased 20.9% to $3.264 billion from $2.699 billion.

During the year, Caterpillar added four equity managers — Delaware Investment Advisers, Mellon Capital Management Corp., PRIMECAP Management Co. and Trinity Investment Management Corp.

It also changed its relationship with affiliates of Equitable Life Assurance Society of the United States. It dropped Equitable Investment Management Corp. as an equity manager, but retained Equitable Real Estate Investment Management Inc. as a real estate manager.

The fund has $1.161 billion in dedicated or immunized bond portfolios, $223 million in real estate equity, $190 million in foreign equities and $24 million in oil and gas.

It uses stock options, stock index futures and fixed-income futures.

The fund applies dynamic hedging to $1.3 billion of its assets, with Aetna Life & Casualty Co. as manager.

As of Sept. 30, the approximate pension asset mix was 48% stocks, 34% bonds, 10% cash equivalents and 8% real estate equity.

**Equity managers** (Domestic): Chase Investors; Citicorp; Delaware; Institutional Capital; Jennison; Mellon Capital; J.P. Morgan; Oppenheimer; PRIMECAP; State Street Research; Thorndike, Doran, Paine & Lewis; Trinity. (Domestic): Baring International; Fidelity International.

**Bond managers:** Chase Investors; J.P. Morgan.

**Real estate managers:** Aetna; Equitable; First Chicago; LaSalle Street Fund; Travelers.

Northern Trust is master trustee. Frank Russell Co. is consultant.

Key investment personnel are Fred V. Dickinson, manager-risk management and employee benefit funds, and V.A. Kane, benefit funds coordinator.

## Chevron Corp.

| | ($ millions) |
|---|---|
| Total assets | 5,898 |
| Defined benefit | 3,862 |
| Defined contribution | 2,036 |
| Employer contributions | na |
| Benefit payments | na |

SAN FRANCISCO — The master trusts of Chevron Corp. and Gulf Oil Corp. merged into one plan July 1, 1986.

The new fund terminated 10 managers and added only one — Wells Fargo.

Equity managers dropped were Equitable Investment Management Corp., Provident Investment Counsel, Stralem & Co. Inc., Avatar Associates, Cambiar Investors Inc., Putnam Advisory Co. Inc., Rollert & Sullivan Inc. and Winchester Capital Management Co. Inc.

Terminated for fixed income were Degnan & Gillespie Fixed Income Management and Mellon Bank.

In addition, G.K. Carter, formerly comptroller, was named vice president-finance for Chevron USA, the operating company; D.G. Henderson, who previously held that position, became comptroller.

The fund has $240 million in indexed stocks and approximately $589 million in guaranteed investment contracts.

Fixed income futures are used.

Investment options of the defined contribution plan include purchasing of Chevron stock, GICs or shares in American Mutual funds.

**Equity managers:** Sanford Bernstein; Estabrook; Jennison Associates; Lynch & Mayer; Mellon Capital; Rosenberg Capital; Wells Fargo.

**Bond managers:** Pacific Investment; State Street Research; STW.

**Real estate managers:** Prudential Insurance; Rosenberg Real Estate; and Travelers.

Bankers Trust is the defined benefit plan's master trustee and custodian. Mellon Bank is master trustee and custodian for the defined contribution (profit-sharing and savings) plan.

In addition to Mr. Henderson, key personnel are Neil Darling, manager-investment analysis; Robert Williamson, deputy controller; and Sellers Stough, vice president-finance.

## Chrysler Corp.

| | ($ millions) |
|---|---|
| Total assets | 3,260 |
| Defined benefit | 2,824 |
| 401(k) | 436 |
| Employer contributions | 427 |
| Benefit payments | 410 |

DETROIT — Chrysler Corp.'s pension funds discovered the stock market during 1986 following an almost total withdrawal from the equities market in 1984.

In 1984, the automaker's pension management team liquidated all its equities and set up a $1.2 billion dedicated bond fund. The dedicated bond fund was worth $2.4 billion by Sept. 30, 1986.

Morgan Stanley Asset Management Inc. replaced Manufacturers Hanover Investment Corp. as a dedicated bond manager.

During the 12 months ended Sept. 30, Chrysler increased its equity exposure to 10% of total funds from less than 1%. In the process, it set up an in-house program to run $240 million in a portfolio replicating the Standard and Poor's 500 stock index, and funded a second equity manager, Ruggles & O'Neill, with $25 million for its high-capitalization equity approach.

All the new money came out of the pension plan's cash portfolios and cash flow.

Even with the boost in equity exposure, the pension fund's fixed-income percentage increased to 72% by Sept. 30 from 71% during the year.

Powered by its favorable investment returns, Chrysler Corp.'s employee benefit assets grew 30.5% during the 12 months ended Sept. 30 to $3.26 billion from $2.497 billion.

Over the same period, the automaker's defined benefit plan assets grew 20.4% to $2 824 billion from $2.346 billion, while 401(k)/savings plan assets almost tripled, to $436 million from $151 million.

Contributions to all plans dropped to $427 million from $570 million. Benefit payments for 1986 rose to $410 million from $369 million.

Chrysler manages $739 million of its pension assets in-house: $240 million in equities; $314 million in short-term assets; $149 million in fixed income; and $36 million in other assets.

Chrysler uses options and futures for both equity and fixed income.

Its asset mix as of Sept. 30 was 72% bonds, 14% cash equivalents, 10% stocks and 4% real estate equity.

**Equity managers:** Pacific Asset; Ruggles & O'Neill.

**Bond managers:** Bankers Trust; Irving Trust; J.P. Morgan Investment Management; Morgan Stanley; National Bank of Detroit; Trust Company of the West.

**Real estate managers:** Eastdil; JMB; Prudential Insurance; RREEF.

**401(k) managers:** Massachusetts Mutual Life (GICs); Merrill Lynch (equity and fixed income).

Bankers Trust is master trustee.

Key personnel are: Frederick W. Zuckerman, vice president and treasurer; Joseph Arpin, assistant treasurer-banking; Russell P. Flynn, manager-pension fund administration; and J.F. Kassen, manager, pension fund investment.

| 401(k) | 1 |
| Employer contributions | 274 |
| Benefit payments | 225 |

DENVER — Anticipating the new tax law, the Public Employees' Retirement Association of Colorado has more than doubled its investment in real estate from $100 million a year ago, investing in commercial and office buildings in San Diego, Chicago, Dallas, Los Angeles and San Francisco.

Employee benefit assets increased 25.8% in the year ended Sept. 30, to $6.322 billion from $5.024 billion a year earlier.

Employer contributions were $274 million; benefits paid out to retirees were $225 million.

The fund had $118 million in guaranteed investment contracts, $10 million in venture capital, $230 million in real estate equity and $678 million in mortgage-backed securities.

The fund uses stock options.

All of the assets are managed internally.

The asset mix as of Sept. 30 was 43.7% stocks, 25% bonds, 14.2% cash equivalents, 3.6% real estate equity, 1.8% GICs and 11.7% mortgage-backed securities.

Manufacturers Hanover is custodian of the fund. Bankers Trust and Provident National Bank serve as investment management consultants.

Norman Jaskol is deputy executive director of the fund and Norman Benedict is assistant director.

HARTFORD, Conn. — The State of Connecticut Trust Funds made its first move into indexing during the past year, hiring Bankers Trust — Investment Management Group to manage $291 million in indexed stocks.

---

Treasury management: Aug. 10

The system also hired four bond managers and one real estate manager during the year, and dropped two bond managers and one real estate manager.

The new bond managers are Pacific Investment Management; Standish, Ayer & Wood; State Street Research & Management; and STW Fixed Income Management. Scudder, Stevens & Clark and Lehman Management were terminated.

John Hancock Financial Services was hired as a real estate manager and The Travelers Cos. was terminated. The fund plans to add three more real estate managers soon: Copley Real Estate Advisors; Security Capital Real Estate; and Trust Co. of the West.

It also hired Wilshire Associates Asset Management Division to do a feasibility study on investing in international assets.

Total assets grew 30.9% in the year ended Aug. 31, to about $4.82 billion from about $3.68 billion.

The trust fund manages $1.397 billion in-house: $692 million in fixed income; $302 million in short-term securities; and $403 million in other investments, mostly in GICs and the state's Yankee Mac program, an in-state residential mortgage program.

As of Aug. 31, it had $556 million in real estate equity, an increase of more than $100 million from the previous year as the fund moves to reach its target of 15%; $327 million in mortgage-backed securities; and $73 million invested in guaranteed investment contracts.

The asset mix as of Aug. 31 was 43% stocks, 31% bonds, 6% cash equivalents, 11% real estate equity, 2% GICs and 7% mortgage-backed securities.

**Equity managers:** Aetna; Bankers Trust; Capital Guardian; Concord Capital; Connecticut National; Franklin; Glickenhaus; Oppenheimer; Phoenix Mutual; Provident Capital; Roanoke; Siebel; Wright Investors.

**Bond managers:** Bear Stearns; Loomis, Sayles; PIMCO; Standish, Ayer; State Street Research; STW.

**Real estate managers:** Aetna; Aldrich, Eastman & Waltch; CIGNA; Hancock; Heitman; JMB; Morgan Bank; McMahan; Phoenix Investment; Public Storage; State Street; RREEF.

Buck Pension Fund Consultants serves as the investment management consultant.

Key personnel are Frank McDermott, deputy treasurer-investments; Terry Helming, investment officer-fixed income; and Robert Staley, investment officer-real estate.

### Delta Air Lines Inc.

| | ($ millions) |
|---|---|
| Total assets | 2,550 |
| Defined benefit | 2,200 |
| Thrift or savings | 350 |
| Employer contributions | na |
| Benefit payments | na |

ATLANTA — During 1986, Delta Air Lines Inc. began in-house management of $170 million of its $2.2 billion pension fund. Of the $170 million, $50 million was in equities (including $30 million in indexed stocks) and $120 million was in fixed income (including $40 million in mortgage-backed securities). Assets for in-house management were derived from cash flow.

Employee benefit assets increased 13.3% to $2.55 billion as of Sept. 30 from $2.25 billion a year earlier. Defined benefit assets increased 10% to $2.2 billion from $2 billion, while thrift and savings plan assets were up 40% to $350 million from $250 million.

In addition to its $30 million in indexed stocks, the fund also has $90 million in GICs. Because of a healthy foreign market, foreign equities were up 33% to $120 million from $90 million in 1985.

Venture capital commitments remained at $35 million, and $65 million was committed to leveraged buy-outs. The fund also has $40 million in mortgage-backed securities.

The approximate asset mix of pension assets as of Sept. 30 was 55% stocks, 20% bonds, 20% cash equivalents, 3% guaranteed investment contracts and 2% mortgage-backed securities.

Delta uses about 30 money managers, but would confirm only that McKenzie, Walker manages its domestic equities and Morgan Grenfell and Globe Finlay manage international equities. Delta did confirm there have been some manager changes during the year.

Harris Trust is the master trustee.

Jim Taylor is assistant treasurer-investment management, and Jim Mathews is manager-investment management.

### Detroit Retirement Systems

| | ($ millions) |
|---|---|
| Total assets* | 2,742 |
| Defined benefit | 2,742 |
| Employer contributions | 161 |
| Benefit payments | 157 |

*as of June 30, 1986

DETROIT — The Detroit Retirement Systems, comprising the General Retirement System and the Police & Fire Retirement System, had assets, at book value, of $2.742 billion, an increase of 11% from $2.469 billion during the 12-month period ended June 30.

During 1986, the police and fire system made its first allocation to a stock index fund, placing $27.8 million with Bankers Trust Co. — Investment Management Group.

The Detroit Retirement Systems also significantly boosted the amount of assets invested in venture capital and certain real estate classes.

The systems had $35.7 million committed to venture capital as of June 30, up 441% from $6.6 million the previous year. The increase was attributed to the addition of several venture capital projects. Funding for the projects came from cash flow.

The systems also had $92 million in real estate equity, up 347% from $20.6 million; $367 million in mortgages, up 60% from $230 million; and $151.6 million in mortgage-backed securities, down 32% from about $222 million.

Del Berryhill, assistant executive secretary, said part of the increase in real estate equity was due to foreclosures on property, thus giving the systems an equity ownership position. The balance of the increase in real estate equity, as well as in mortgages, was due to additional allocations.

The decrease in mortgage-backed securities, he said, primarily was the result of a number of them reaching maturity.

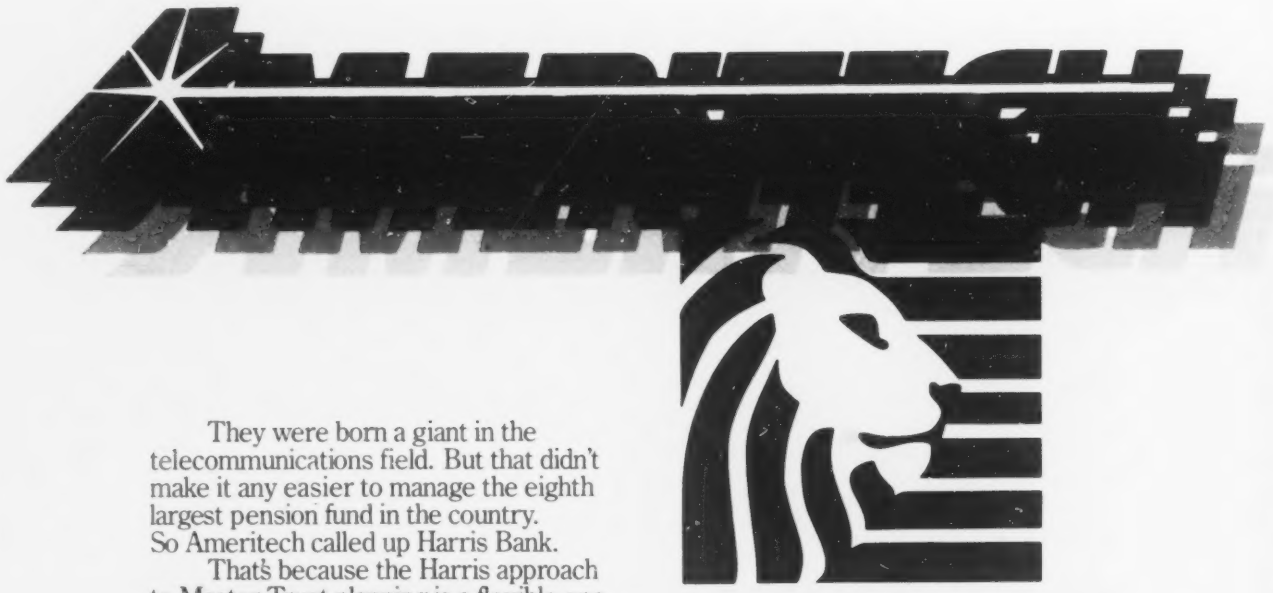
The systems manage $158.1 million internally (all in short-term instruments), up 11% from $142 million as of June 30, 1985.

Detroit also has $356 million in guaranteed investment contracts and $3 million in international fixed-income investments.

During 1986, it made pension contribution of $160.8 million and paid out $156.5 million in benefits.

The approximate asset mix of the fund as of June 30 was 25% stocks, 24% bonds, 12% cash equivalents, 3% real estate equity, 13% GICs, 14% mortgages, 6% mortgage-backed securities, 2% construction loans and 1% ven-

# When Ameritech needed a Master Trust who did they dial for information?



They were born a giant in the telecommunications field. But that didn't make it any easier to manage the eighth largest pension fund in the country. So Ameritech called up Harris Bank.

That's because the Harris approach to Master Trust planning is a flexible one. Rather than a preset service package, we offered Ameritech a custom-tailored plan to meet their specific needs. A plan that can be further adapted, as their needs grow and change.

This kind of cooperative planning means we do more than respond to requests. We initiate ideas. And offer expert help, not just from one source person, but from various levels of our Master Trust department.

For Ameritech, the Harris brand of flexible teamwork made the best Master Trust connection. See what we can do for you. Call our Marketing Representative, Mr. Walter J. Kowalczyk, at (312) 461-7625.

| Employer contributions | 126 |
| Benefit payments | 610 |

WILMINGTON, Del. — David F. Marvin, vice president of pension fund investment, left E.I. du Pont de Nemours & Co. to start his own investment management firm, Marvin and Palmer Associates in Wilmington last July.

He was replaced as vice president of pension fund investment by Keith E. Tucker, formerly head of fixed-income investment.

At the same time, Edward J. Basset, director of equity research, and Michael L. Schonberg, head of the equity index portfolio, were named co-heads of equity investment.

Also during the year, fund officials created a large foreign bond portfolio and made a foray into venture capital.

By Sept. 30, $1.172 billion was invested in foreign markets, an increase of 190% from the $404 million in 1985, all in foreign equities. In all, $484 million of the total was in equities, while $688 million was in fixed income as of Sept. 30.

The plan also made a $35 million commitment to venture capital, placed with Horsley Keogh.

Total du Pont employee benefit assets grew 26.4% to $12.218 billion as of Sept. 30, from $9.665 billion a year earlier.

Du Pont's defined benefit assets grew 27.3% to $9.985 billion from $7.841 billion a year earlier.

Fund officials manage almost all assets internally: $6.418 billion in equity; $3.538 billion in fixed income; and $23 million in other.

The internally run equity index portfolio was worth $2.04 billion as of Sept. 30. The portfolio was set up with a $1.22 billion investment Jan. 1, 1985. The fund also has $23 million in real estate equity and about $1.53 billion in mortgage-backed securities.

The fund uses stock index futures, fixed-income futures and bond options.

The asset mix as of Sept. 30 was 64.3% stocks, 20.2% bonds (including cash), 0.2% real estate equity and 15.3% mortgage-backed securities.

**Real estate manager:** Trammell Crow.

**Venture capital manager:** Horsley Keogh.

The custodian is Wilmington Trust Co.

Key personnel are Messrs. Tucker, Bassett and Schonberg, and Lawrence R. Starratt, head of fixed-income investment.

*P&I Age estimate

ROCHESTER, N.Y. — In 1986, the Eastman Kodak Co. pension fund invested in a leveraged buyout pool offered by Forstmann Little.

In addition, the fund hired The Boston Co. to provide active asset allocation services.

Earlier, two equity managers were added — Brignoli, Curley & Roberts and PRIMECAP Management Co. — as were two real estate managers — Lehndorff & Babson Real Estate Counsel and National Life Insurance Co. Discount Corp. of New York Advisers was hired to manage a cash portfolio.

*P&I Age* estimates Eastman Kodak had $5.309 billion in defined benefit assets and $1.322 billion in 401(k) plan assets as of Sept. 30.

Total assets were estimated at $6.631 billion, a jump of 18.8% from the previous year's estimate of $5.582 billion.

**Equity managers:** American National Bank; Analytic; Sanford C. Bernstein; Brigoli, Curley & Roberts; Fidelity Management Trust; McKenzie Walker; J.P. Morgan; Neuberger & Berman; T. Rowe Price; PRIMECAP; Rogers, Casey & Barksdale; State Street Research; Templeton; TCW; Value Line; and Waddell & Reed.

**Real estate managers:** Aetna; Equitable; Goldman, Sachs; JMB; Lehndorff & Babson; National Life Insurance; and RREEF.

**GIC managers:** John Hancock and Metropolitan.

**Venture capital manager:** Horsley, Keogh & Associates.

**Private investments:** Cawley, Gillespie & Associates.

**Cash manager:** Discount Corp.

Boston Safe Deposit is the fund's master trustee.

Key personnel are Russell L. Olson, director-pension investments, and A. Duff Lewis Jr., pension investment coordinator.

## Exxon Corp.

| | ($ millions) |
|---|---|
| Total assets | 7,550 |
| Defined benefit | 3,702 |
| Profit sharing/401(k) | 3,415 |
| ESOP | 433 |
| Employer contributions | 0 |
| Benefit payments | 785 |

NEW YORK — A spinoff/termination that recaptured $1 billion in excess pension assets was among the main news for Exxon's pension fund during 1986. As a result of the termination, assets decreased 5.7% to $7.55 billion from $8.008 billion. Defined benefit assets decreased almost 20% to $3.702 billion as of Sept. 30 from $4.627 a year earlier.

In December 1985, the fund terminated equity managers RepublicBank Dallas and First City National Bank of Houston and subsequently hired Trinity Investment Management Corp., Sanford C. Bernstein & Co. Inc. and Fidelity Management Trust.

Helen Fox O'Brien, senior financial analyst, said the change was made "to optimize our management process."

The excess assets and resulting spinoff/termination also meant the company made no employer contribution for the year, which compares to $113 million it contributed in 1985.

The amount of benefits paid to retirees in 1986 increased 44.3% to $433 million from $300 million a year earlier. A corporate operations restructuring in the summer of 1986 created a large number of early retirements among former employees, an official said.

Also in 1986, C.W. Williams, assistant treasurer, retired. He was replaced by W. Allen Harrison.

The fund's remaining asset mix consists of 58% stocks, 11% bonds, 5% cash equivalents, 3% mortgage-backed securities and 1% venture capital and oil and gas.

The total amount of assets managed internally as of Sept. 30 was $1.525 billion: $1.103 billion in equity, $189 million in short-term investments, and $233 million in fixed income.

The fund has $1.703 billion in indexed stocks, $233 in indexed bonds, $321 million invested in foreign equity, $58 million committed to venture capital, $35 million committed to oil and gas, $454 invested in real estate equity and $113 million in mortgage-backed securities.

The fund uses stock index futures.

**Equity managers** (as of Sept. 30): Sanford C. Bernstein; Citibank; Fidelity Management; Morgan Grenfell; State Street Bank; Trinity Investment; Wells Fargo Investors.

**Bond managers:** Scudder, Stevens & Clark; State Street Research.

**Real estate managers:** Aetna Life; Corporate Property Investors; Equitable Real Estate; Prudential Realty.

**Insured annuities:** Aetna; Equitable; Hancock; Prudential; Travelers.

Irving Trust is master trustee.

Key personnel are Mr. Harrison; James E. Bayne, manager of trusts and benefits finance; and Debra D. Drumheller, financial adviser.

## Florida State Board of Administration

| | ($ millions) |
|---|---|
| Total assets | 11,544 |
| Defined benefit | 11,544 |
| Employer contributions | 1,021 |
| Benefit payments | 474 |

TALLAHASSEE, Fla. — Total assets of the Florida State Board of Administration increased 29.5% to $11.544 billion as of Sept. 30 from $8.911 billion a year ago.

The board's contributions increased 14.6%, to $1.021 billion from $891 million. Benefit payments increased 13.9% to $474 million from $416 million.

Florida dropped two equity managers, Pioneering Management Corp. and Batterymarch Financial Management, while adding Ariel Capital Management; Barnett Banks Trust Co.; Bear Stearns Asset Management; Denver Investment Advisors; IDS Advisory Group; Sun Banks Inc. and Westwood Management Corp.

Also dropped were option managers Bear Stearns Asset Management and Balch Hardy & Scheinman Inc. and real estate manager, First National Bank of Boston.

Small- and medium-capitalization stocks received increasing emphasis with the hiring of Denver Investment and IDS, which each received $100 million.

System officials run $6.202 billion internally: $2.528 billion in equity, $3.168 billion in bonds and $506 million in short-term securities.

Among the fund's assets are $90 million in foreign denominated fixed income; $1.381 billion in a domestic stock-index fund; $582 million in real estate equity and $1.036 billion in mortgage-backed securities.

The fund uses stock options, stock index futures and fixed-income futures.

The asset mix as of Sept. 30 was 54.6% in stocks, 27% in bonds, 4.4% in cash equivalents, 5% in real estate equity and 9% in mortgage-backed securities.

**Equity managers**: Fred Alger; Alliance; Ariel; Barnett Banks; Barrow, Hanley, Mewhinney & Strauss; Bear Stearns; Delaware; Denver; Eagle; IDS; INVESCO; Lazard Freres; Prudential; Southeastern; Stein Roe & Farnham; Sun Banks; Wells Fargo; Westridge; Westwood.

**Bond managers**: Alliance; Thorndike, Doran.

**Real estate managers:** Aetna; Equitable; First Chicago Investment Advisors; Goldman, Sachs;

## Ford Motor Co.

| ($ millions) | |
|---|---|
| Total assets | 14,600 |
| Defined benefit | 12,200 |
| Thrift/savings/401(k) | 2,000 |
| Other | 400 |
| Employer contributions | 600 |
| Benefit payments | 800 |

DEARBORN, Mich. — Under a program started in 1986, the Ford Motor Co. pension fund separated its real estate assets from other assets run by its investment managers, said M.E. Maertens, manager-trust investments.

Previously, managers had the discretion to move in and out of asset classes, including real estate, oil and gas and international, as they deemed appropriate.

The fund also hired four real estate managers as part of the same program: Aetna Life & Casualty Co., CIGNA Corp., Security Capital Real Estate Corp. and LaSalle Advisors Inc.

During 1986, the pension fund hired Concord Capital Management, Dreman & Embry Inc. and Sanford C. Bernstein & Co. Inc., all for domestic equities. Sit Investment Associates Inc. was dropped as an equity manager.

As of Sept. 30, Ford had total employee benefit assets of $14.6 billion, up 32.7% from $11 billion the previous year. Of the total, $12.2 billion was in a defined benefit plan, $2 billion was in a combination savings/401(k) plan and $400 million was in a TRASOP/PAYSOP plan.

Mr. Maertens attributed the increase in assets to strong investment performance and appreciation of company stock, in which about half of the savings plan's assets are invested.

In 1986, Ford contributed $600 million to the defined benefit plan, down 7.7% from $650 million in 1985. The company paid out $800 million in benefits to retirees during 1986, up 14.3% from $700 million the previous year.

The fund manages $1.1 billion internally, of which $800 million is invested in fixed-income instruments and $300 million is in short-term vehicles. The fund moved the $300 million in short-term assets in-house during 1986 to meet benefit payments in 1987.

Ford's pension fund has $2 billion in a stock index fund, up 25% from $1.6 billion as of Sept. 30, 1985; $400 million in dedicated or immunized bond funds, up 33.3% from $300 million the previous year; and $1.1 billion in guaranteed investment contracts.

As of Sept. 30, the pension fund had $500 million in international equity, up 100% from the previous year; $200 million in international fixed income, up 150% from 1985; $50 million in venture capital, the same as the previous year; and $175 million in real estate equity, up 150% from 1985.

Mr. Maertens said those increases, and the elimination of oil and gas investments, were due to asset shifts by various investment managers.

Ford's pension fund uses stock index futures and fixed-income futures.

As of Sept. 30, the approximate asset mix of the pension assets was 61% stocks, 23% bonds, 5% cash equivalents, 2% real estate equity and 9% GICs.

**Equity managers:** Alliance Capital; Sanford C. Bernstein; Capital Guardian; Chase Investors; Concord; Dewey Square; Dreman & Embry; Fidelity Management Trust; Geo Capital; Hathaway; Manufacturers National Bank of Detroit; Mitchell Hutchins; J.P. Morgan; PRIMECAP; RepublicBank Dallas; Sarofim; Siebel; State Street Research.

**Bond managers:** Capital Guardian; Citicorp; Dewey Square; J.P. Morgan; T. Rowe Price; Sarofim; and State Street Research.

**Real estate managers:** Aetna; Bank of Boston; CIGNA; LaSalle Advisors; J.P. Morgan; RepublicBank Dallas; and Security Capital.

Manufacturers National Bank of Detroit is master trustee.

Key personnel are Mr. Maertens and K.C. Merrill, executive director of business development and trust investments.

A special section on leasing will be published June 15.

## General Dynamics Corp.

| ($ millions) | |
|---|---|
| Total assets | 3,900 |
| Defined benefit | 2,500 |
| Thrift or savings | 1,400 |
| Employer contributions | 110 |
| Benefit payments | 86 |

CLAYTON, Mo. — General Dynamics Corp. experienced an 18.2% growth in employee benefit assets in the 12 months ended Sept. 30, to $3.9 billion from $3.3 billion. Defined benefit assets increased 19%, to $2.5 billion as of Sept. 30 from $2.1 billion a year earlier.

The fund made several changes in its investment management lineup during the period, hiring six new equity managers and one new bond manager. Ten equity managers and three bond managers were terminated. All of the company's guaranteed investment contract carriers were retained.

A company spokesman said the changes reflect a more conservative investment management approach because of the pressure on defense contractors to hold down costs.

New equity managers are: Daniel Breen & Co.; First Manhattan Capital Management; J.P. Morgan Investment Management; Rosenberg Institutional Equity Management; Sasco Capital; and Trinity Investment Management.

Equity managers terminated were: Citibank; First Pacific Advisors Inc.; A.M. Kailing & Associates Ltd.; Frank Russell Investment Management; Hellman, Jordan Management Co. Inc.; Jundt/Capen Associates; Lindner Management Corp.; Neuberger & Berman Pension Management; Provident Capital Management and Seibel Capital Management.

On the fixed-income side, General Dynamics added Mercantile Trust Co. and dropped BA Investment Management Corp.; Bankers Trust Co.; and Chase Investors.

The company also runs $1.056 billion internally: $926 million in fixed income, a 54.3% jump from $600 million last year, and $130 million in equity.

It has $192 million invested in GICs.

Employer contributions for 1986 were $110 million, down 38.9% from $180 the previous 12 months; benefits to be paid out totaled $86 million, up 43.3% from $60 million.

**Equity managers:** Alliance; Anderson, Hoagland; Daniel Breen; Campbell Advisors; Delaware Investment; Equitable; First Manhattan; Lazard Freres; Lehman; Miller, Anderson & Sherrerd; J.P. Morgan Investment; Rosenberg; Sasco; Sit Investment,

## General Electric Co.

| | ($ millions) |
|---|---|
| Total assets | 22,691 |
| Defined benefit | 18,801 |
| Thrift, savings, 401(k) | 3,808 |
| ESOP | 282 |

STAMFORD, Conn. — The acquisition of RCA Corp. by General Electric Co. was consummated in 1986, and the assets of the RCA pension, savings and ESOP trusts are included with those of the GE trusts in the above aggregate data.

However, the two plans are separate. (GE adopted Financial Accounting Standards Board Statement 87 for pension accounting in 1986 for both plans.)

GE Investment Corp., an investment management affiliate of GE, has assumed lead management responsibility. GE uses outside investment managers in selected areas but declines to identify them. GE runs essentially all of its pension assets internally.

Total employee benefit assets increased 44.8% to $22.9 billion in the year ended Sept. 30, reflecting the inclusion of RCA. Defined benefit assets increased 46.1%, to $18.801 billion.

There is $2.602 billion of indexed equities, $833 million in foreign equities $261 million in foreign fixed income and $602 million in guaranteed investment contracts.

GE uses stock and bond options and stock index and fixed-income futures.

The pension asset mix as of Sept. 30 was 49.9% stocks, 28.5% bonds, 1.6% cash and 20% other, including real estate, venture capital, private placements and GICs.

The fund uses portfolio insurance, but would not say to how much of its portfolio the technique is applied.

Chase Manhattan Bank is GE's master custodian. Bankers Trust is RCA's master trustee.

F.X. Tansey left GEIC in May to join Dreyfus.

D.F. Frey, vice president-investments and treasurer at GE also serves as chairman of the board and president of GEIC. He oversees investments, along with A.S. Bahr, J.H. Myers and J.E. Bonhivert, GEIC senior vice presidents.

## General Foods Corp.

| | ($ millions) |

WHITE PLAINS, N.Y. — General Foods Corp.'s employee benefits assets climbed 34.8% for the year ended Sept. 30, to $2.5 billion from $1.855 billion a year earlier.

Defined benefit assets increased 31.1% to about $2 billion from the $1.526 billion reported the previous year.

The pension fund has $475 million in an indexed stock portfolio and $275 million in guaranteed investment contracts.

A small amount — $14 million — is invested in overseas equities. Venture capital commitments total $22 million, while equity real estate accounts for $80 million of fund assets.

General Foods also uses stock index futures.

As of Sept. 30, the pension fund's asset mix was 44% stocks, 26% bonds, 8% cash equivalents, 6% equity real estate and 16% GICs.

**Equity managers:** Alliance Capital; Batterymarch; BEA Associates; Chase Investors; Citibank; DLJ Capital; First Wisconsin National Bank of Madison; Jennison Associates; John Hancock; Northern Trust; Thorndike, Doran, Paine & Lewis; Trinity Investment.

**Fixed income:** Aetna Life; Bankers Trust; Citibank; Metropolitan Life; Northern Trust; Prudential Insurance.

**International:** J.P. Morgan and NM Rothschild.

**Real Estate:** JMB; J.P. Morgan; Rothschild; Prudential; Trust Company of the West.

**Venture Capital:** Rothschild and John Hancock.

Chase Manhattan Bank and Northern Trust are master trustees. Evaluation Associates is pension consultant.

Those overseeing investments are Susan C. Philbrick, manager-investments; John L. Hilty, manager-investment analysis; and Roger B. Hostetler, director-investments.

## General Motors Corp.

| | ($ millions) |

| Benefit payments | na |

NEW YORK — General Motors Corp. reportedly leased dynamic risk hedging software to use against about $10 billion in employee benefit assets last year.

The software was developed by Leland O'Brien Rubinstein Associates.

The fund also sold the plan's 50% interest in the Tysons Corner Center, McLean, Va., for slightly less than $100 million.

In addition, the company hired 14 new managers in the 12-month period ended Sept. 30.

Picked to run portfolios of undisclosed size or type were BEA Associates Inc.; Beekman Capital Management Ltd.; Delaware Investment Advisors; Endowment Management & Research Corp.; Franklin Portfolio Associates Inc.; Frontier Capital Management Co.; W.R. Huff Asset Management; Lehman Management Co.; MacKay-Shields Financial Corp.; Magten Asset Management Corp.; Morgan Stanley Asset Management Inc.; Provident Investment Counsel Inc.; Solomon Asset Management Inc.; and Value Line Asset Management.

As of Sept. 30, employee benefit assets had grown 25.1% from the year before, to $32.9 billion. Defined benefit plan assets had increased 25.3%, to $28.7 billion. Thrift or savings plan assets, which include 401(k) plan assets, stood at $3.8 billion, up 26.7% from $3 billion.

Other managers for the fund are:

ABD; Aetna Life; Aldrich Eastman & Waltch; American National Bank; AmeriTrust; Bank of America; Bankers Trust; Baring; Barrow, Hanley, Mewhinney & Strauss; Batterymarch; Boston Co. Energy; Boston Co. Real Estate; Capital Guardian; Chase Manhattan; Citibank; Daiwa; Delaware; Dimensional; Endowment; Fidelity International; Fidelity Management; FNB Boston; FNB Chicago; Franklin; Frontier; G.T. ATLANTA — The combined Employee Retirement System and Teachers' Retirement System shifted $160 million into indexed stocks in 1986, the only change in strategy during a year in which assets increased 38.5% to $8.38 billion as of Sept. 30 from $6.05 billion a year earlier.

Graham R. Lynch, director-division of investment services, attributed the increase to the strong performance of the bond market and the systems' heavy investments in bonds.

In addition to the $160 million in indexed equities, the system had $3 million in real estate equity, $35 million in mortgages and $120 million in mortgage-backed securities.

The assets are managed in-house, with five equity firms serving in an advisory capacity.

They are: Citizens & Southern Bank; FNB Atlanta; INVESCO; Trusco; and Thorndike, Doran, Paine & Lewis.

The asset mix as of Sept. 30 was 38% stocks, 58% bonds, 2% cash equivalents and 2% mortgage-backed securities. (Equity real estate and mortgages accounted for a negligible amount.)

The asset mix shifted slightly during the year ended Sept. 30, moving more heavily into stocks and bonds and taking some money out of cash and mortgage-backed securities.

Mr. Lynch said many of the system's Ginnie Maes matured during the year and were not replaced. Cash equivalents were transferred primarily into the new indexed stock account.

Citizens & Southern National Bank is custodian of the teachers' fund, and First National Bank of Atlanta is custodian of the employees' fund.

Key personnel in addition to Mr. Lynch are C.W. Cary, assistant director, and Nancie Boedy, bond portfolio manager.

## GTE Corp.

| | ($ millions) |
|---|---|
| Total assets | 8,962 |
| Defined benefit | 7,924 |
| Thrift or savings | 1,038 |
| Employer contributions | 274 |
| Benefit payments | 211 |

STAMFORD, Conn. — GTE Corp.'s employee benefits assets grew 33% in the year ended Sept. 30, largely because of strong performance in its U.S. and overseas stock and bond portfolios.

Employee benefits assets totaled $8.96 billion for the year, up from $6.7 billion a year earlier.

Defined benefit plan assets climbed 32% to $7.92 billion from $6 billion a year earlier.

Thrift and savings plan assets, which include a 401(k) component, increased 40% to $1.038 billion from $740 million previously.

GTE hired six managers and dropped two during the year, bringing the number of outside firms handling one or more accounts to 50.

Equity managers added were BDN Advisors, Sanford C. Bernstein & Co., Rosenberg Institutinal Equity Management, Donald Smith & Co. and Weiss, Peck & Greer. The fund also committed assets to a small-capitalization stock fund run by existing manager Frontier Capital Management.

In fixed income, GTE hired Security Capital Management.

Pioneering Management and Trustee & Investors, both equity managers, were dropped during the year.

GTE Investment Management Corp., GTE's subsidiary housing the employee benefits function, runs $1.39 billion of the company's pension assets, $172 million of which is invested in equities and $1.22 billion in fixed income.

Internally, the fund switched its fixed-income approach to passive from active by merging a nearly $1 billion active bond portfolio with an existing indexed bond portfolio. Indexed bonds now total $1.2 billion (the remaining $22 million in internal fixed-income assets represent reserve accounts).

In addition to indexed bonds, GTE has $577 million in indexed stock portfolios.

Foreign investments total more than $1 billion for equities, and $97 million for fixed income. Another $90 million is committed to venture capital; $145 million to oil and gas; $180 million to leveraged buy-out partnerships; and $65 million to equity real estate.

GTE also hedges through the use of stock options, stock index futures and fixed-income futures.

As of Sept. 30, the broad asset mix for the pension fund was 69% equity, 16% fixed income and 15% cash equivalents. No further breakout was given.

**Equity managers:** Bankers Trust; Baring International; BDN; Sanford Bernstein; BMI Capital; Cashman, Farrell; Concord Capital; Eagle Management & Trust; Fidelity International; First Manhattan; First Pacific Advisors; Franklin; Frontier Capital; Geewax, Terker; General American Advisers; Geocapital; Grantham, Mayo, Van Otterloo; G.T. Capital; Hellman, Jordan; Hotchkis & Wiley; Hutton Capital; Investment Reserves; Johnson, Valliant & Broadfoot; Morgan Grenfell; J.P. Morgan Investment Management; Oppenheimer & Co.; Pacific Financial Research; PRIMECAP; Provident Investment Counsel; Rosenberg; Rowe Price-Fleming; Schafer Capital Management; Donald Smith; Trust Co. of the West; Weiss Peck & Greer; Wertheim-Philippe; Winchester Capital.

**Fixed-income managers:** Beutel, Goodman International; Endowment Management & Research; Morgan Grenfell; PIMCO; Security Capital; Solomon Asset Management.

**Real estate managers:** Citibank; Manufacturers National Bank; J.P. Morgan; State Street Bank & Trust.

**Other** (includes venture capital, leveraged buy-outs and oil and gas): Bankers Trust; Chase Investors, Citibank; John Hancock Group Annuity; Fayez Sarofim; TCW; Kohlberg Kravis & Roberts; Forstmann Little & Co.

Bankers Trust is GTE's master trustee.

John Carroll, president of GTE Investment Management, and David Seidel, vice president-pension fund management of GTE Investment, are responsible for overseeing investment management for the fund.

## Employees' Retirement System, State of Hawaii

| | ($ millions) |
|---|---|
| Total assets | 3,009 |
| Defined benefit | 3,009 |
| Employer contributions | 165 |
| Benefit payments | 146 |

HONOLULU — The Employees' Retirement System, State of Hawaii hired two domestic equity managers and one international equity manager from a field of nine finalists during the past year.

The fund hired McCowan Associates Inc. and Hanson Investment Management Co., both for domestic equities, and Schroder Capital Management International, for an international equity portfolio. Each will run $20 million.

Also during 1986, the system dropped Loomis, Sayles & Co. Inc. and switched Bernstein-Macaulay Inc. to a fixed-income portfolio from a balanced account.

The Hawaii employees' fund

had total assets of $3.009 billion as of Sept. 30, up 26.7% from the $2.374 billion it reported as of June 30, 1985.

During 1986, it made pension contributions of $165.2 million and paid out benefits of $145.6 million.

The system manages $719 million internally — $400 million in mortgage loans to the fund's participants, $150 million in guaranteed investment contracts, $80 million in capital notes, $70 million in cash equivalents, $15 million in equity and $4 million in fixed income.

As of Sept. 30, the fund had $182 million in stock index funds, up 40% from $130 million as of June 30, 1985, and $121 million in GICs, down 15% from $142 million.

The fund allocated an additional $20 million, coming from cash flow, to its stock index fund manager, Mellon Capital Management Corp. The balance of the increase in stock index assets was due to market performance.

The decrease in GICs was due to the maturation of some of the insurance contracts.

The employees' system had $281 million invested in international equities as of Sept. 30, an increase of 125%. Stanley Siu, secretary of the fund, attributed the increase to strong investment performance.

The fund invests $105.3 million in real estate equity, up from $19 million or 454% during the 15-month period. The trustees of the fund had set a target of 5% of total assets allocated to real estate equity and allocated additional money to their real estate managers toward that goal.

The retirement system also has $445 million in mortgages.

As of Sept. 30, the approximate asset mix was 37% stocks, 40.9% bonds, 3.5% real estate equity, 4% GICs and 14.6% mortgages.

**Equity managers:** Alliance Capital; Atalanta/Sosnoff; Barrow, Hanley, Mewhinney and Strauss; Delaware Investment; Hanson; INVESCO; McCowan.

**Bond managers:** Bernstein-Macaulay; Lehman Management; PIMCO; Sarofim; Scudder, Stevens & Clark; Security Pacific.

**Real estate managers:** Aetna; Connecticut General; Metropolitan.

**International managers:** Daiwa; Nomura; Schroder.

**Index manager:** Mellon Capital.

Irving Trust Co. is the fund's master custodian. SEI Funds Evaluation Services and Callan Associates Inc. are its investment management consultants.

Key personnel overseeing the investment management of the fund's assets are Mr. Siu and David Shimabukuro, assistant secretary.

## Hughes Aircraft Co.

| | ($ millions) |
|---|---|
| Total assets | 4,300 |
| Defined benefit | 3,200 |
| 401(k) | 1,100 |
| Employer contributions | na |
| Benefit payments | na |

EL SEGUNDO, Calif. — Hughes Aircraft Co. increased its assets 43.3% to $4.3 billion from $3 billion during the 12 months ended Sept. 30. No information was available on whether the plan assets were modified as a result of the purchase of Hughes by General Motors Corp. in 1985.

Defined benefits assets were up 60% in the 12-month period, to $3.2 billion from $2 billion. The 401(k) assets grew slightly, 10%, to $1.1 billion from $1 billion.

Some $1.2 billion are managed by the subsidiary, Hughes Investment Management Co. There was $300 million in equity; $300 million in fixed income; and $600 million in short-term assets managed in-house.

In addition, $120 million is invested in foreign equity; $60 million in venture capital; $20 million in oil and gas; $50 million in leveraged buy-outs; and $120 million in real estate equity.

The fund uses stock options and stock index futures.

The asset mix for the retirement benefit assets as of Sept. 30 was 69% stocks, 18% bonds, 4% real estate equity, 4% annuities and 5% other investments.

**Managers** (from Money Market Directory): Alliance; BEA; Capital Guardian; Coldwell Banker Capital Management; Dillon, Read; Forstmann-Leff; G.T. Capital; Hagler, Mastrovita; Jennison; Kurtz; Leland O'Brien Rubinstein; MacKay-Shields; McKenzie Walker; Neuberger & Berman; T. Rowe Price; Rowe Price-Fleming; PRIMECAP; RCM Capital; Reich & Tang; RREEF; TCW.

Investment managers for the salaried and hourly savings plan with a 401(k) options: Alliance; Hagler Mastrovita; Jennison; McKenzie, Walker; RCM; Scudder, Stevens & Clark; TCW Asset.

Bankers Trust is master trustee.

W. Allen Reed is the key investment officer and president of Hughes Investment Management.

## IBM Corp.

| | ($ millions) |

| Benefit payments | 235 |

STAMFORD, Conn — IBM Corp. added Capital Guardian Trust Co. and Sasco Capital Inc. as equity managers during the past year and dropped State Street Research & Management Co.

The company's total employee benefit assets grew 30.5% for the year ended Sept. 30 to $18.191 billion from $13.939 billion.

The defined benefit assets increased 26.6% to $16.64 billion from $13.139 billion. The 401(k) plan saw growth of 93.9%, jumping to $1.551 billion from $800 million.

IBM officials manage $5.9 billion internally.

The fund invests in international, real estate, venture capital, stock and bond options and stock index and fixed-income futures.

**Equity managers:** Alliance; Bankers Trust; Citibank; Concord Capital; Capital Guardian; Cole, Yeager & Wood; Delaware Investment Advisors; Dimensional Fund Advisors; Fidelity International; Franklin Portfolio; G.T. Capital; John Hancock Venture Capital; Jennison; Lombard-Odier International; Morgan Guaranty; PM Portfolio Management; Rowe Price-Fleming International; Sasco Capital; Solomon Asset Management; State Street; TCW Asset; T. Rowe Price; Wellington Management.

**Bond managers:** Jennison; Fischer, Francis, Trees & Watts.

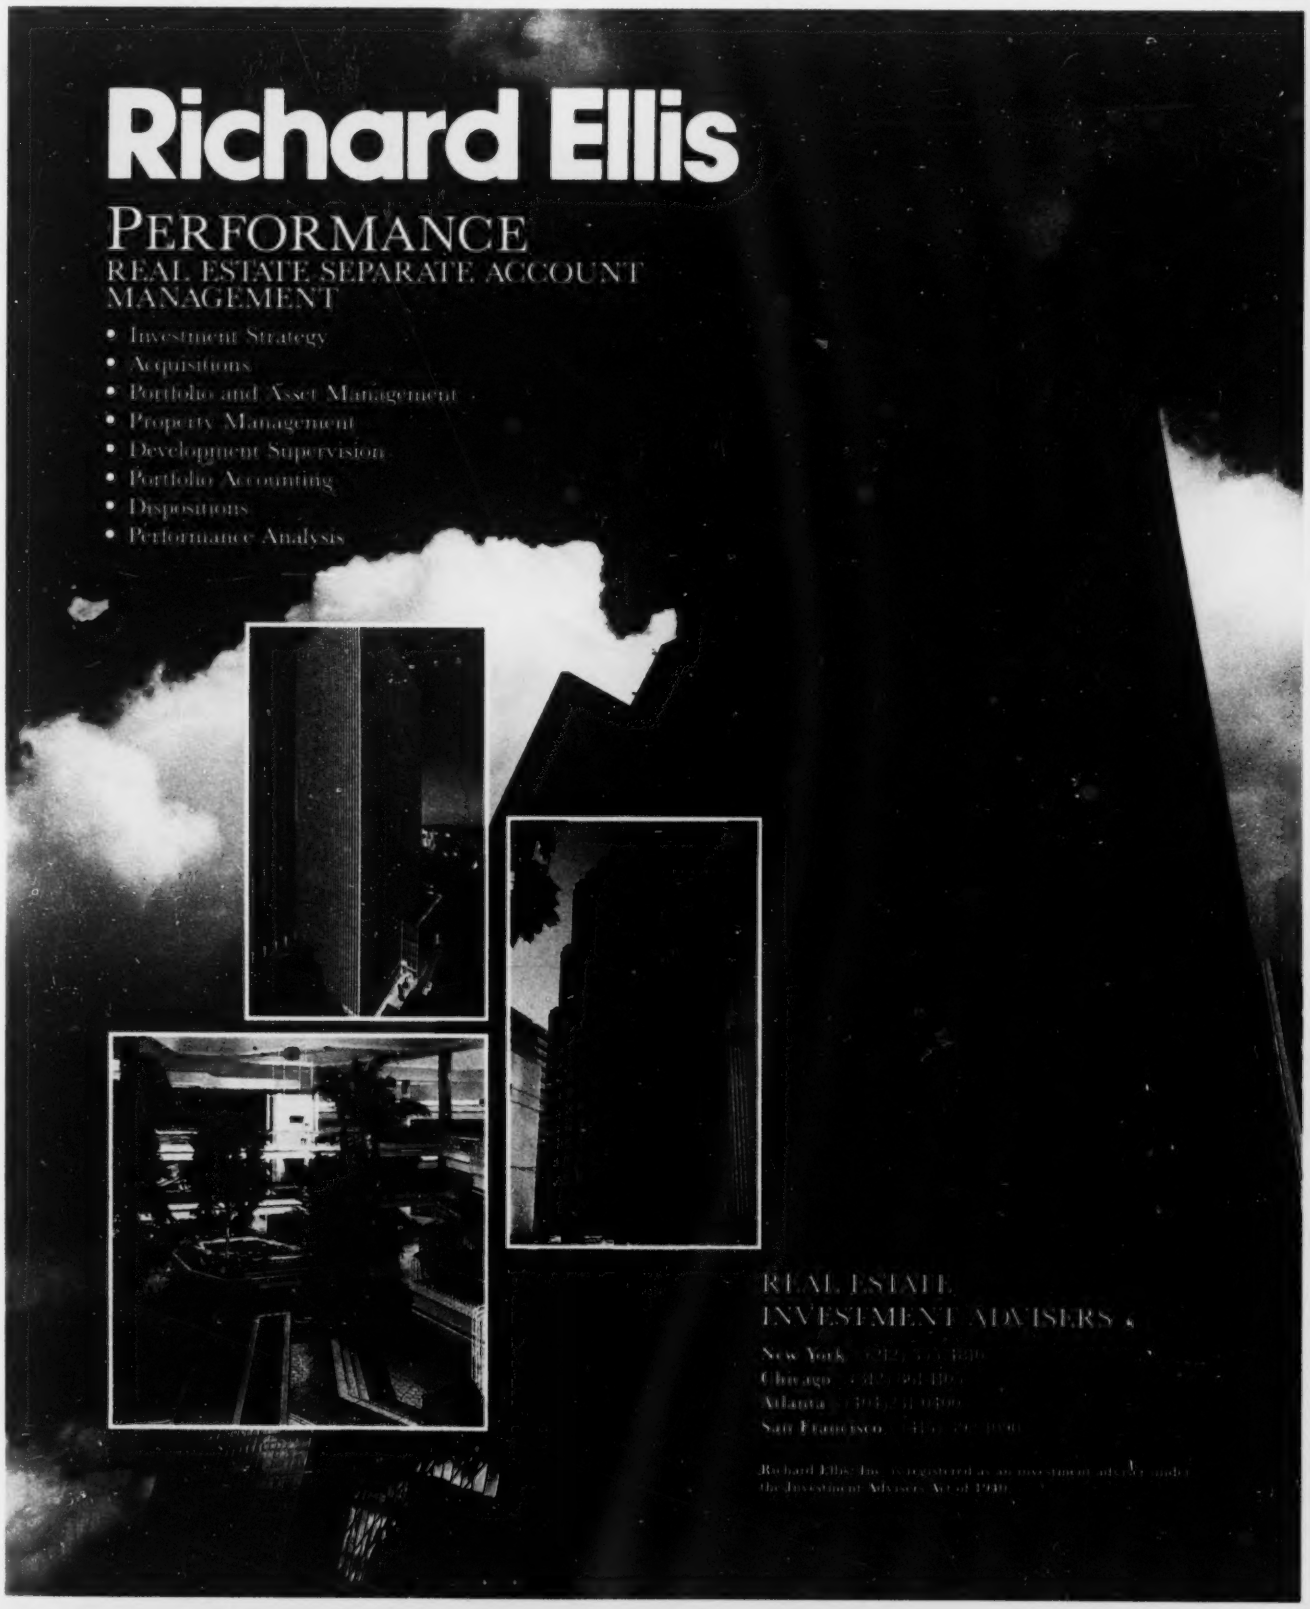
**Real estate managers:** Prudential; RREEF; Equitable.

Chase Manhattan Bank is master trustee.

The fund's investment management consulting firms are SEI Funds Evaluation, Frank Russell and Richards & Tierney.

Officials at the fund are J. Grills, assistant treasurer; W. Hoyt, director-investment strategy; and R.E. Shultz, director-U.S. retirement funds.

Master trust directory. Sept. 7.



## Illinois Municipal Retirement Fund

| | ($ millions) |
|---|---|
| Total assets | 2,980 |
| Defined benefit | 2,980 |
| Employer contributions | 130 |
| Benefit payments | 120 |

CHICAGO — The Illinois Municipal Retirement Fund made its first international investments during the past year, hiring Baring International Investment and Nomura Capital Management for a total of about $150 million.

In a separate move, the fund dropped Batterymarch Investment Management as an equity manager because of what Gerald Sebsta Jr., executive trustee of the fund, said was poor performance and the inability to improve.

The $212 million account that Batterymarch had managed was given to existing manager Dimensional Fund Advisors to run in an equity index fund. As a result, assets invested in stock index funds as of Sept. 30 increased to $334.6 million, up 236% from the $99.5 million a year earlier.

In 1986, the Illinois Municipal Retirement Fund also hired its first master trustee, Harris Trust and Savings Bank. Continental Illinois National Bank & Trust Co. of Chicago had been custodian.

Hiroshige Mori, assistant director and investment manager, said the growth in the number of managers working for the fund necessitated the hiring of a master trustee.

Illinois Municipal had $2.98 billion in assets as of Sept. 30, an increase of 28.4% from the $2.32 billion reported the previous year. Walter Koziol, assistant investment manager, attributed the increase to market performance.

The fund continued its implementation of an asset allocation policy approved in 1985. One result was the fund's internally managed, short-term portfolio increased 189% to $130 million as of Sept. 30, from $45 million the year before.

Foreign investments consist of $116.4 million in foreign equity and $34.2 million in cash equivalents.

The fund has $28 million committed to venture capital, of which about $8.9 million is invested, an increase of 287% from the $2.3 million the fund had invested the previous year.

Assets invested in real estate include $101.1 million in real estate equity and $427.9 million in mortgage-backed securities.

The asset mix as of Sept. 30 was 42.6% stocks, 26.04% bonds, 13.3% cash, 3.4% equity real estate, 14.36% mortgage-backed securities and 0.3% venture capital.

**Equity managers** (Domestic): American National Bank; Dillon, Read; Dimensional; Fidelity Management; MacKay-Shields.

(International): Baring; Nomura.

**Bond managers:** Criterion; Fidelity; Manufacturers Hanover; Neuberger & Berman; Payden & Rygel.

**Real estate managers:** First Chicago; LaSalle; Prudential; Security Capital; TCW.

**Venture capital managers:** Centennial Fund; First Chicago Venture; Oxford Venture.

A.S. Hansen is investment management consultant.

Key personnel are Robert L. Cusma, executive director, Mr. Mori and Mr. Koziol.

The money mover scorecard will be published Feb. 9.

## Teachers' Retirement System of the State of Illinois

| | ($ millions) |

| Total assets* | 5,952 |
| Defined benefit | 5,952 |
| Employer contributions | 238 |
| Benefit payments | 360 |

*as of June 30, 1986

SPRINGFIELD, Ill. — The Teachers' Retirement System of the State of Illinois made its first allocation to a bond index fund during the first quarter of 1986. The fund hired State Street Bank and Trust Co. to run $587 million.

The fund also made its first allocation to foreign fixed-income investments, placing $66 million with First Chicago Investment Advisors to run in an international dollar bond account and an international non-dollar bond account, said Charles F. Hofer, investment officer of the fund.

The teachers' system dramatically boosted its international equity exposure to $277 million from $22 million. The bulk of that increase came from a $220 million allocation to State Street to run in a Morgan Stanley Capital International Europe Australia Far East index fund.

During the fourth quarter of 1986, the fund hired Capital Supervisors Inc. to manage $150 million in equities, replacing Batterymarch Financial Management. The retirement system also allocated an undisclosed amount to First Chicago Investment Advisors to run in an equity account.

The teachers' system also hired Bennett and Kahnweiler Realty Advisors but had not allocated assets to the firm as of June 30.

Assets of the fund increased 33%, to $5.952 billion from $4.474 billion between Oct. 1, 1985 and June 30, 1986.

Employer contributions for 1986 were $238 million; benefits paid to retirees during 1986 were $360 million.

Besides the bond index fund, the retirement system has $1.516 billion invested in stock index funds, an increase of 74% from $870 million in 1985.

The teachers' fund also had $14 million invested in venture capital; $125 million invested in real estate equity; and $384 million in mortgage-backed securities.

The asset mix as of June 30 was 49% stocks, 36.6% bonds, 5.6% cash equivalents, 2.1% real estate equity, 6.5% mortgage-backed securities and 0.2% venture capital.

**Equity managers:** Alliance Capital; American National of Chicago; Ariel Capital; Cedar Hill; CMB Investment; Kemper.

**Bond managers:** Bear Stearns; Dreyfus Management; Marine Investment; PIMCO; State Street Bank; T. Rowe Price.

**Real estate managers:** Bennett and Kahnweiler; F.I.A. Associates; First Chicago Investment; JMB; TCW.

**International managers:** State Street Bank and First Chicago.

**Venture capital managers:** Frontenac.

Harris Trust is master trustee; Callan Associates Inc. is consultant.

Key personnel are Samuel W. Anderson, executive director, and Mr. Hofer.

## Illinois State Universities Retirement System

| | ($ millions) |
|---|---|
| Total assets | 2,483 |
| Defined benefit | 2,483 |
| Employer contributions | 94 |
| Benefit payments | 94 |

CHAMPAIGN, Ill. — The Illinois State Universities Retirement System underwent a major realignment in July, more than doubling its passive investments, making its first international commitment, increasing its real estate investments and adopting portfolio insurance, also called dynamic hedging.

Wells Fargo Investment Advisors was hired to manage about $657 million in a stock index fund tracking the Wilshire 5,000, $246 million tracking the Salomon Brothers Broad Investment Grade bond index and $118 million in an international stock index fund tracking the Morgan Stanley Capital International Europe Australia Far East index.

About $34 million also went to Wells Fargo as cash used in the portfolio insurance program. Of the total $2.483 billion, $2.146 billion is covered by portfolio insurance.

In real estate, the system committed $50 million to Aetna Life & Casualty's Real Estate Separate Account and $37 million to RREEF.

Four managers were terminated in the restructuring: American National Bank, which had managed $445 million in passive equities but is still handling money temporarily until the bank finds a like-kind fund to replace the universities' fund; Dimensional Fund Advisors, $51 million in passive equities; Lehman Management, $330 million in active bonds; and Criterion Investment Management, $42 million in a balanced account.

In addition, Charles M. Hundley left the retirement system in August to become a vice president with Northern Trust. He had been associate director since 1980. No replacement has been named yet.

As of Sept. 30, the fund grew 31.7%, to $2.483 billion from $1.886 billion the previous year. Contributions were up 13.3% to $94 million from $83 million. Benefits paid out to retirees were down 7.8% to $94 million from $102 million.

The fund had $787 million in indexed stocks, a 111% increase from the previous year's $373 million. That includes $144 million in foreign stock index funds.

There was $10 million in GICs, a drop of 37.5% from $16 million a year earlier. Real estate equity was up 124% to $193 million from $86 million. The fund also committed $87.4 million to mortgage-backed securities.

The fund uses stock and bond options and stock index and fixed-income futures.

The asset mix as of Sept. 30 was 54% stocks, 28.6% bonds, 6% cash equivalents, 7% real estate equity, 0.4% GICs and 4% mortgage-backed securities.

**Equity managers:** American National; Wells Fargo; Fayez Sarofim; and Batterymarch.

**Bond managers:** Wells Fargo and Pacific Investment.

**Real estate managers:** Aetna Life and RREEF.

The fund's custodian is Northern Trust; Ennis, Knupp & Associates is the investment consultant.

Overseeing the fund is Jeanne Valcik, pension and investment analyst.

## Iowa Public Employees Retirement System

| | ($ millions) |
|---|---|
| Total assets | 3,341 |
| Defined benefit | 3,341 |
| Employer contributions | 119 |
| Benefit payments | 120 |

DES MOINES, Iowa — The Iowa Public Employees Retirement System reduced its in-house short-term equity assets to $99 million in 1986 from $286 million to accumulate money to distribute to new managers.

Fund officials made their first commitments to venture capital, real estate and leveraged buy-outs during the past year; hired Mellon Capital Management early in 1986 to run a balanced account of about $200 million; and hired Prudential Asset Management Co., Rosenberg Capital Management, IDS/Advisory Group and Value Investors as new equity managers.

System officials increased equity exposure to 31% during the year ended Sept. 30, from 26% a year earlier; the target is 40%.

Assets increased 26.7% to $3.341 billion as of Sept. 30 from about $2.636 billion a year earlier. Officials attributed the rise to an influx of contributions and to market appreciation.

Indexed stocks and bonds make up $79 million and $53 million of the assets, respectively.

The fund has committed $19.5 million to venture capital, $75 million to leveraged buy-outs, $113 million to equity real estate and $282 million to mortgage-backed securities.

The asset mix as of Sept. 30 was 31% stocks, 55% bonds, 3% cash equivalents, 3% real estate equity and 8% mortgage-backed securities.

**Equity managers**: Batterymarch; Capital Guardian; IDS Advisory; Mellon Capital; Provident Capital; Prudential Asset; Rosenberg; Value Investors; Wellington Management.

**Bond managers**: Boston Co.; Criterion; Loomis, Sayles; Miller, Anderson & Sherrerd; J.P. Morgan.

**Real estate managers**: Copely; Heitman; JMB; Security Capital.

**Venture capital managers**: Cable Howse; Interven Partners; Invest America; Lawrence Venture Associates; Steinberg & Lyman.

NEW YORK — ITT Corp. hired three new equity managers and one fixed-income manager in 1986.

ITT's new domestic equity managers are Fred Alger Management Inc., Management Asset Corp., and GAMCO Investors Inc.

EdwinJ. Ehrlich, director of pension funds, said ITT hired Management Asset and GAMCO because he was looking for solid value managers and he was impressed by the strong track records of both firms.

One domestic equity manager, Crocker Investment Management Corp., was terminated.

On the fixed-income side, State Street Research & Management Co. was hired by ITT.

Mr. Ehrlich said that when Crocker National Bank sold its SIMCO subsidiary to Alger, ITT hired Alger. SIMCO had been a balanced manager for ITT, and he said he was pleased with the firm's performance. Mr. Ehrlich said when Alger was hired, the equity money that SIMCO was managing was left with Alger but the fixed-income funds were given to State Street Research.

The company had $2.482 billion in total assets as of Sept. 30, up 20.5% from $2.06 billion last year.

Defined benefit plan assets rose 20.9% to $1.633 billion from $1.351 billion last year.

ITT manages $426 million inhouse: $219 million invested in equities; $143 million in fixed income; $50 million in short term instruments; and $14 million in real estate.

The fund has $85 million invested in indexed stocks and $127 million in GICs.

In addition, as of Sept. 30 it had $123 million invested in international equities; $84 million in real estate equities; $6 million in oil and gas; and $11 million in leveraged buy-outs.

The fund uses stock index futures.

The asset mix is 65.2% stocks; 23.9% bonds; 4% cash equivalents; and 6.9% real estate equities.

The Northern Trust Co. is ITT's master trustee and custodian.

**Equity managers**: Alliance Capital; Alliance Capital International; Fred Alger; Barrow, Hanley, Mewhinney & Strauss; Capital Guardian; First Manhattan; GAMCO; G.T. Capital; Jennison; Lazard Freres; Management Asset; Manufacturers Hanover; Northern Trust; Verus Capital.

**Real estate managers:** Coldwell Banker; Corporate Property Investors; Equitable Real Estate; Metropolitan Life; RREEF.

**Fixed-income managers**: Morgan Guaranty; State Street Research & Management.

Edwin J. Ehrlich is director of the ITT pension fund trust. Eileen Leahy is manager of the pension fund trust.

*Pensions & Investment Age*'s directory of investment advisers will run May 25.

## Kansas Public Employees' Retirement System

| | ($ millions) |
|---|---|
| Total assets | 2,773 |
| Defined benefit | 2,773 |
| Employer contributions | 100 |
| Benefit payments | 125 |

TOPEKA, Kan. — During the year, the Kansas Public Employees' Retirement System put up $1.2 million as financing for investors to buy limited partnership units in Capital Research Management Group Ltd., which will invest in high-technology companies, particularly those within the state.

The system's assets totaled $2.773 billion as of Sept. 30, a 25.1% increase from the $2.216 billion reported a year earlier.

Employer contributions increased 7.5%, to $100 million from $93 million, while benefit payments rose 14.7%, to $125 million from $109 million.

During the year, Kansas Employees added a bond manager — Bank IV — in November of 1985 assigning it $50 million.

Of the $211.2 million run inhouse, $110.9 million is in fixed income and $100.3 million is in a mortgage pass-through program.

The fund has $51.4 million in real estate equity and $90.3 million in mortgage-backed securities.

The fund uses stock and bond options and stock index and fixed-income futures.

As of Sept. 30, the asset mix was 38% stocks, 43% bonds, 14% cash equivalents, 2% real estate equity and 3% mortgage-backed securities.

**Equity managers**: Capital Supervisors; Investment and Capital Management; Market Research and Management; Pilgrim, Baxter, Hoyt & Greig; Provident Investment; Reimer & Koger.

**Bond managers**: Bank IV; Robert C. Brown; Investment Management Group; Pacific Investment Management.

**Real estate manager**: J.W. O'Connor.

**Cash manager**: Payden & Rygel.

**Securities lending**: Marine Midland Bank.

The custodian is Commerce Bank and Trust, Topeka. Its investment management consultant is Callan Associates.

Key personnel are Michael K. Russell, chairman of the board of trustees, and Marshall Crowther, executive secretary.

The cash management survey will be published Nov. 2.

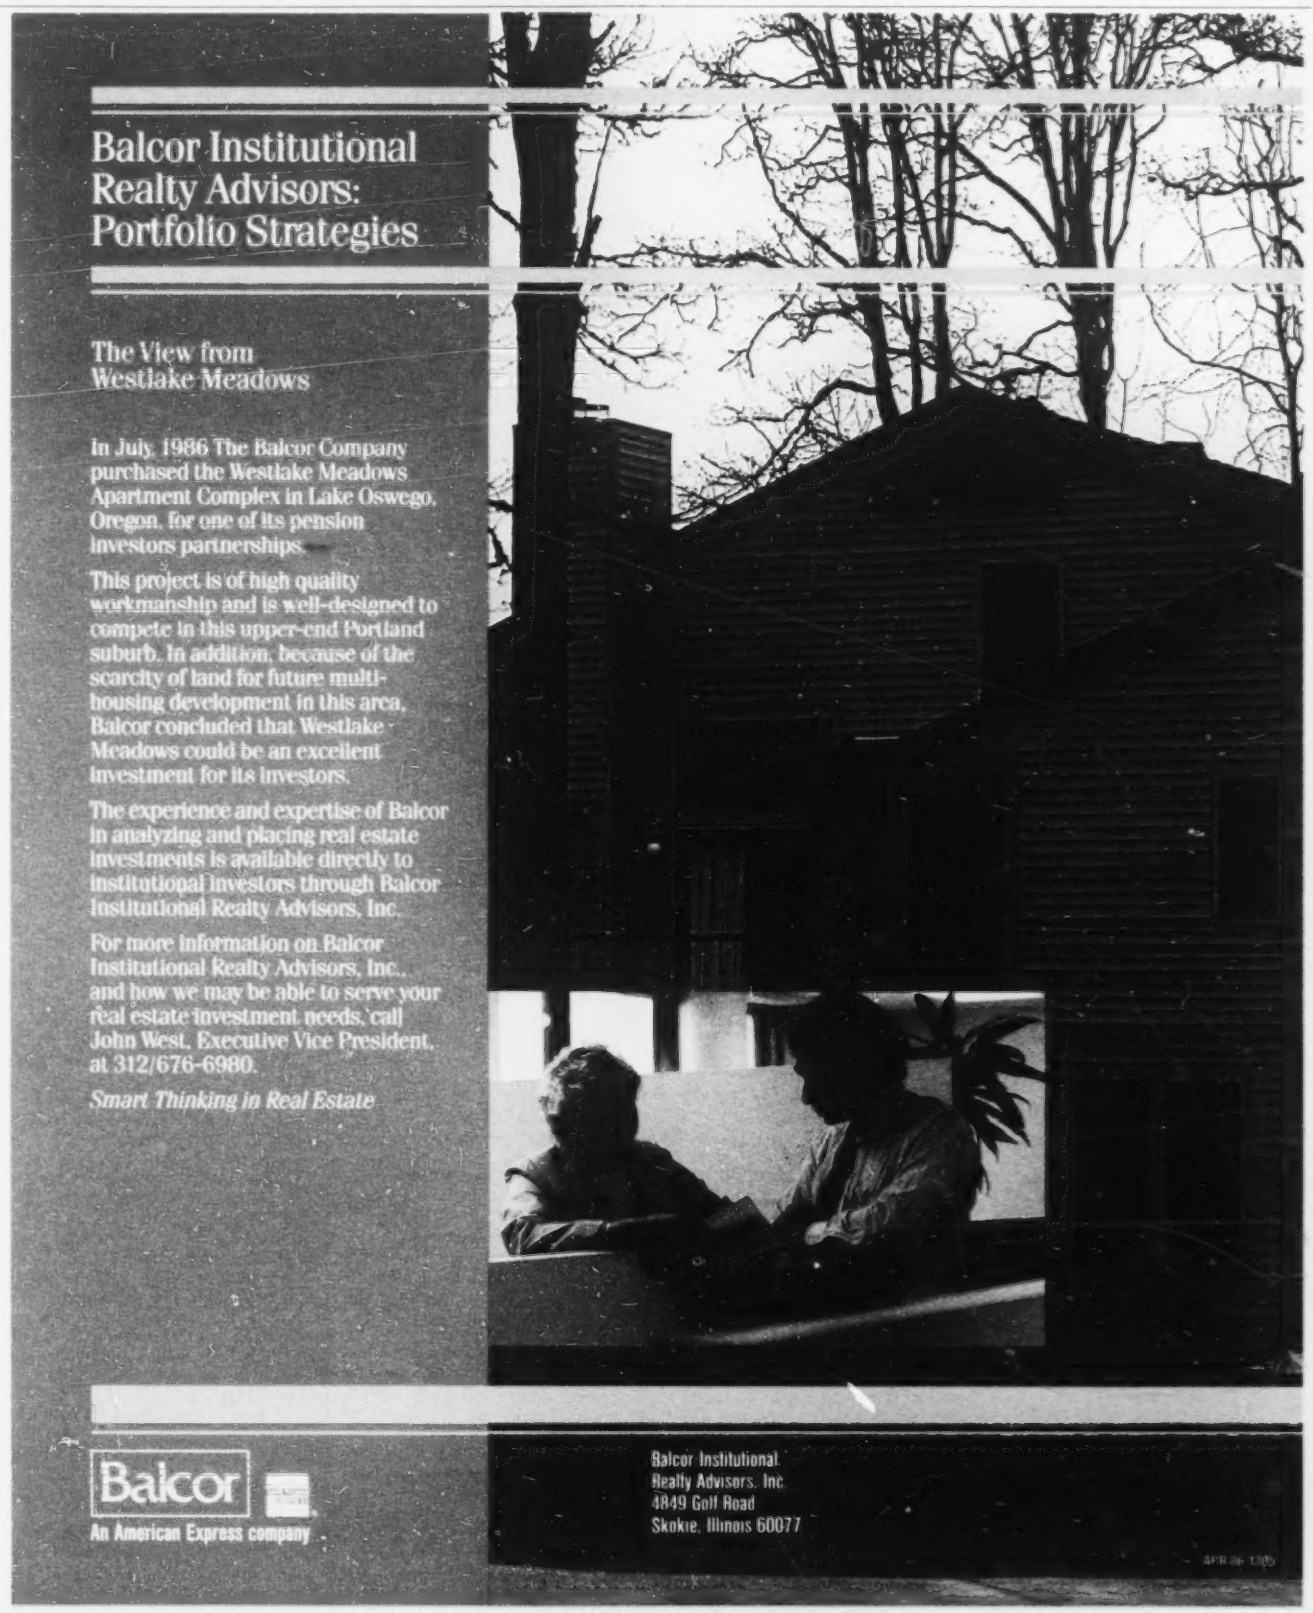
*P&I Age estimate*

CALABASAS, Calif. — Lockheed Corp. added Pacific Financial Research as an equity manager for its defined contribution plan in early 1986, replacing Wertheim Asset Management Services Inc., a balanced manager.

In October, Lockheed took over the management of $299 million in employee benefit assets for Sanders Associates Inc., a defense



electronics firm. The $153.5 million in defined benefit assets and the $145.5 million in defined contribution plan assets for Sanders is being kept administratively separate.

As a result of the addition of Sanders' benefit plan assets, one new manager was added to the Lockheed stable of managers, Wright Investors' Service.

Total employee benefit assets (excluding the Sanders plans) increased 39% to $6.085 billion from $4.373 billion between Dec. 31, 1984, and Sept. 30, 1986, according to a *Pensions & Investment Age* estimate.

**Defined benefit plan managers:** Alliance Capital; Anhalt/O'Connell; Bankers Trust; Batterymarch; Capital Guardian; Century Capital; Chase Investors; Citicorp; Delaware; First Interstate Bank of Washington; Forstmann-Leff; Karsten; Lombard Odier; Mellon Bank; J.P. Morgan; Royal Trust; Security Pacific; Smith Barney; TCW; and Western Asset.

**Defined contribution managers:** Bankers Trust; Delaware; Forstman-Leff; Manufacturers Hanover; Pacific Financial; Sarofim; and TCW.

Bankers Trust is the master trustee and is used for performance measurement of plan assets. Geroge C. Weintz, investment counsel, oversees assets.

| Defined contribution | 208 |
| Thrift or savings | 5 |
| 401(k) | 25 |
| Employer contributions | 345 |
| Benefit payments | 327 |

as of June 30, 1986

LOS ANGELES — The Los Angeles County Employees' Retirement Association made its first venture capital investments in the third quarter of 1986, allocating $50 million to Warburg Pincus Capital Co. limited partnership, offered by E.M. Warburg Pincus & Co., New York, and about $30 million to Copley Partners I and Copley Partners II, offered by Copley Venture Partners, Boston.

Late in 1986, the county retirement board was in the process of allocating about $900 million to international investments. About half of the amount would be managed passively.

Earlier in 1986, the trustees continued their real estate investing by committing $10 million to an opportunity real estate investment fund, Trammell Crow Equity Partners, Dallas.

Also, Charles Spencer was appointed fund administrator. Previously, Richard B. Dixon, former treasurer and tax collector and recently named chief administrative officer for the county, had been responsible for investment management.

Assets for the retirement system increased about 27% to $7.293 billion as of June 30, from $5.747 billion a year earlier. Total employer contributions for 1986 were $345 million and benefits paid out, $327 million.

The fund manages $1.101 billion internally: $352 million in short-term instruments; $501 million in fixed income; and $248 million in mortgages.

Its alternative investments are: $80 million committed for venture capital; $121 million in real estate equity; $248 million in mortgages; and $1.122 billion in mortgage-backed securities.

As of June 30, the asset mix was 33% stocks, 27.9% bonds, 16% cash equivalents, 1.7% real estate equity, 3.5% mortgages, 15.9% mortgage-backed securities and 2% in fixed account receivables.

**Equity managers:** Capital Guardian; Loomis, Sayles; Massachusetts Financial Services; Security Pacific Investment Managers; Stein Roe Farnham.

**Bond managers:** Brown Brothers Harriman; Capital Guardian; CMB Investment; Criterion Investment; Massachusetts Financial; J.P. Morgan.

**Real estate managers:** Heitman; Goldman, Sachs; John McMahan; Prudential Asset; Security Capital; Equitable; TCW; Trammell Crow; Karsten.

**Venture Capital:** E.M. Warburg Pincus; Copley Venture.

Security Pacific National Bank, Los Angeles, is the master custodian; Callan Associates, San Francisco, is the consultant.

Mr. Spencer oversees the investment management.

## Teachers' Retirement System of Louisiana

| ($ millions) | |
|---|---|
| Total assets | 2,609 |
| Defined benefit | 2,609 |
| Employer contributions | 185 |
| Benefit payments | 275 |

BATON ROUGE, La. — In a move toward specialty management effective Jan. 1, the Teachers' Retirement System of Louisiana redeployed its existing money managers, terminated one and hired five others.

Massachusetts Financial Services; Scudder, Stevens & Clark; and Hibernia National Bank, formerly balanced managers, will oversee bond portfolios. Massachusetts Financial and Scudder were allocated $450 million each, and Hibernia was tapped for $200 million.

Citicorp Investment Management, also a former balanced manager, was given $150 million for equities.

M.D. Sass Investors Services, which managed $25 million in equities, was terminated because of performance.

The system hired Criterion Investment Management and Centerre Trust to each manage $450 million bond portfolios. The fund also hired three equity managers: The Boston Co. for a $250 million account; INVESCO Capital Management for a $175 million portfolio; and Eagle Asset Management for $75 million.

The fund retained SEI Funds Evaluation Services in June after SEI purchased Merrill Lynch Consulting Corp., formerly the system's consultant.

In-house short-term investments decreased $50 million to $300 million because the system was more "fully invested," said Jennifer Netterville, investment portfolio specialist. The fund also does the trading for all of its assets.

It invests $290 million in mortgage-backed securities.

The fund's assets increased 23.6% to $2.609 billion as of Sept. 30 from $2.11 billion the previous year.

The asset mix as of Sept. 30 was 16% stocks, 62% bonds, 11% cash equivalents and 11% mortgage-backed securities.

**Equity managers**: Boston Co.; INVESCO; Eagle Asset; Citicorp.

**Bond managers**: Massachusetts Financial; Scudder, Stevens & Clark; Hibernia; Criterion; Centerre.

City National Bank, Baton Rouge, is the custodian.

Key investment personnel are Ms. Netterville and Carleton C. Page, secretary-treasurer.

The cash management survey will be published in the Nov. 2 issue of *Pensions & Investment Age*.

## Maryland State Retirement and Pension Systems

| ($ millions) | |
|---|---|
| Total assets* | 6,778 |
| Defined benefit | 6,778 |
| Employer contributions | 514 |
| Benefit payments | 401 |

*as of June 30, 1986

BALTIMORE — The Maryland State Retirement and Pension Systems experienced rapid growth in internally run portfolios as of June 30.

Total assets run in-house grew 62%, to $4.1 billion June 30 from $2.5 billion Sept. 30, 1985. An equity index fund, which replicates the Standard & Poor's 500 stock index, grew 47% to $2.69 billion from $1.83 billion, outperforming all the fund's active equity managers, according to Enos Throop Jr., director-equity programs.

The amount managed internally in fixed income more than doubled, to almost $1.4 billion from $687 million.

The pension fund grew 35% during the nine months, to $6.778 billion as of June 30 from $5.02 billion, primarily because of favorable investment returns but also because of positive cash flow.

The fund appears not to have suffered from the imposition of a two-year moratorium on new investments in securities of companies that have not signed the Sullivan Principles, which deal with apartheid in South Africa, according to Mr. Throop.

During the period, the fund released one equity manager — Johnson, Valliant & Broadfoot.

The fund has $67 million in mortgages and $933 million in mortgage-backed securities.

As of June 30, the asset mix was 58% equities, 25% bonds, 3% cash equivalents, 1% in mortgages and 13% in mortgage-backed securities.

**Equity managers:** Alliance Capital; Atlanta Capital; Capital Guardian; Dimensional Fund Advisors; Eaton Vance; Hagler, Mastrovita & Hewitt; Investment Advisers; Investment Counselors of Maryland; MacKay-Shields; Scudder, Stevens & Clark; State Street Management & Research; Wellington Trust.

**Bond managers:** Investment Counselors of Maryland; Mercantile Safe Deposit & Trust; Miller, Anderson & Sherrerd; Morgan Stanley; PIMCO; Standish, Ayer & Wood.

The custodian is First National Bank of Maryland.

Key personnel are Howard J. France, executive director-investments; Mr. Throop; and Arthur M. Lynch Jr., director-fixed-income programs.

## Massachusetts State Employees & State Teachers Annuity Funds

| ($ millions) | |
|---|---|
| Total assets | 3,475 |
| Defined benefit | 3,475 |
| Employer contributions | 300 |
| Benefit payments | na |

BOSTON — Total assets in the Massachusetts State Employees & State Teachers Annuity Funds grew 19.1% to $3.475 billion as of Sept. 30, from $2.917 billion a year earlier.

During 1986, the fund followed through on its plan to increase the proportion of assets invested in stocks. Alan R. West, chief investment officer, said that as of Sept. 30, about $900 million, or about 26% of total assets, was invested in stocks, compared with 12.1% a year earlier.

The boost in equities included the fund's first move into international equities, with an allocation of $25 million. No new managers were hired as a result of the increase in equities.

The fund in 1986 also began investing in real estate equity, with $12 million, about 0.5% of total assets, invested in a real estate fund Mr. West did not identify. A year earlier the fund reported no investments in real state equity.

Mr. West said fund trustees had wanted to invest even more in real estate during 1986, but representatives of its investment management consulting firm, Massachusetts Fiduciary Advisors Inc., advised against it because of poor performance in real estate.

About $1.8 billion was managed internally in fixed income, including mortgage-backed securities. This represents a drop of $764 million from the previous year, accounted for by the increased equities.

In addition to its international and equity real estate investments, the fund had $100 million in indexed stocks, $50 million in foreign fixed income and $1 million in venture capital.

The fund's asset mix Sept. 30 was 26% stocks, 51% bonds, 2.5% cash equivalents, 0.5% in real estate equity and 20% mortgage-backed securities.

**Equity managers:** Colonial Advisory Service; Eaton, Vance Management; Gardner and Preston Moss; Hagler, Mastrovita & Hewitt; Independence Investment Associates; One Federal Asset Management; Rampart Investment Management; Ruggles & Crysdale; Standish, Ayer & Wood; State Street Research; Thorndike, Doran, Paine & Lewis.

**Bond managers:** Endowment Management & Research; Fiduciary Management Trust; Gardner and Preston Moss; Miller, Anderson & Sherrerd; Pacific Investment Management; Standish, Ayer & Wood; State Street Research.

**Real estate managers:** First Chicago Investment; Copley Real Estate.

State Street Bank & Trust is the master trustee and custodian.

In addition to Mr. West, key personnel are Robert Q. Crane, treasurer and chairman; and Paul Bullman, commissioner of the State Banking Department.

## McDonnell Douglas Corp.

| ($ millions) | |

| Total assets* | 5,735 |
| Defined benefit | 4,407 |
| 401(k) | 1,328 |
| Employer contributions | 349 |

*as of June 30, 1986

ST. LOUIS — According to the 1987 Money Market Directory, McDonnell Douglas has $5.735 billion in employee benefit assets as of June 1986, up 16.7% from $4.914 billion a year earlier.

Employer contributions to all benefit plans for 1986 increased 12.9% to $349 million from $309 million in 1985, according to Money Market Directory.

According to Money Market Directory, the fund dropped Concord Capital, Dimensional Fund Advisors and Nomura Capital during 1986.

The company's asset mix was unavailable.

**Managers:** Aetna Capital; Aetna Life; Bankers Trust; Centerre Trust; LaSalle Advisors; RREEF; TCW Realty.

The master trustee for the pension fund is Bankers Trust.

Key personnel are David Hammerstein, director-retirement funds management; Sheryl Kwiatek, senior investment analyst; Kenneth Velten, plan administrator; and James Tisius, director-financial planning.

## Metropolitan Life Insurance Co.

| ($ millions) | |
|---|---|
| Total assets | 2,828 |
| Defined benefit | 2,150 |
| Thrift or savings | 570 |
| 401(k) | 50 |
| Other | 58 |
| Employer contributions | 69 |
| Benefit payments | 126 |

NEW YORK — Metropolitan Life Insurance Co.'s total employee benefit assets climbed 12% during the year ended Sept. 30, to $2.8 billion from $2.5 billion a year earlier.

The greatest increases came from its thrift and savings plan assets, including its 401(k) option. Thrift and savings plan assets increased 9.6% for the period to $570 million from $520 previously. The 401(k) option doubled in assets to $50 million, bringing total thrift assets for the insurer to $620 million at the end of September.

Defined benefit plan assets rose to $2.15 billion, an 8.6% increase from $1.98 billion reported a year earlier.

Employer contributions to all plans in 1986 were expected to total $69 million, while benefits payments to retirees were $126

million.

Met Life runs all its own pension plan assets internally. It has about $100 million invested in guaranteed investment contracts and $215 million in real estate equity.

As of Sept. 30, the asset mix was 25% equities, 60% fixed income, 10% real estate equity and 5% GICs.

The insurer's corporate management office oversees the investment management. J.L. Rubsam, administrator, has day-to-day responsibility.

*as of Aug. 31, 1986

LANSING, Mich. — Assets of the Michigan State Employees' Retirement Systems increased 29.1% to $13.58 billion in the 11 months ended Aug. 31.

Employer contributions increased 5.4% to $834 million, while benefit payments increased 14.5% to $639 million.

The fund continued its activity in real estate and venture capital during 1986. It committed $50 million to the Trammell Crow Equity Partners real estate opportunity fund and $6 million to Interven Partners, a venture capital partnership. It also made several direct investments in venture-backed companies.

Late in the year, it also committed $40 million to Warburg, Pincus Capital Corp.'s venture capital fund and $20 million to Berkshire Partners' leveraged buy-out fund.

The fund has $130 million in venture capital, $65 million in leveraged buy-outs, $103 million in real estate equity, $1.46 billion in mortgages and $980 million in mortgage-backed securities.

The entire fund is managed internally. As of Aug. 31, the approximate asset mix was 44% stocks, 23% bonds, 13% cash equivalents, 11% mortgages, 7% mortgage-backed securities, 1% real estate equity and 1% venture capital.

The funds are composed of the State Employees' Retirement System; Public School Employees' Retirement System; State Police Pension, Accident Disability Fund; Judges' Retirement System; and Probate Judges' Retirement System.

The state treasurer acts as master custodian.

Key investment personnel are W.A. Amerman, director; and G.H. Linsday, Barry L. Stevens and Michael J. Finn, assistant directors.

| Benefit payments | na |

*as of June 30, 1986

ST. PAUL, Minn. — The Minnesota board put 10 of its active equity managers on incentive fees, effective July 1.

Firms that agreed to the incentive fee plan were Alliance Capital Management Corp.; IDS Advisory Group; Investment Advisers Inc.; Norwest Bank; BMI Capital Corp.; Hellman, Jordan Management Co. Inc.; and Waddell & Reed Inc. It was unknown which of the remaining managers — Fred Alger Management Inc.; Beutel Goodman Capital Management Inc.; Forstmann-Leff Associates Inc. and Lieber & Co. — were also put on incentive fees.

The managers would receive a fee as high as 1% of assets managed if performance exceeded the normal portfolio return by 1,000 basis points. No fee would be paid for underperformance by 600 basis points or more; the objective was to beat the normal portfolio by 200 basis points and get a base fee of 50 basis points, or one-half of a percentage point.

In late September, the board added Superior Ventures to its lineup of venture capital firms, giving it $6 million.

In May, Beth Lehman replaced Teresa Myers as assistant to the director.

Total employee benefit assets grew 27.3% during the year ended June 30 to $8.658 billion from $6.8 billion. The defined benefit assets grew 20.9% to $8.222 billion from $6.8 billion. There was $435.6 million in other benefits plans, mostly in a 457 plan.

The fund manages $3.356 million internally: $2.475 million in fixed income and $881 million in equities. The internal assets increased 24.3% from $2.7 billion.

The Minnesota board has $1.994 billion in indexed stocks and $2.286 billion in a dedicated bond portfolio. It recently received approval to use stock index futures.

There is $143.5 million committed for venture capital, including leveraged buy-outs. An additional $67.5 million is allocated to oil and gas investments.

The fund has $325 million invested in real estate equity; the amounts allocated for mortgages and mortgage-backed securities were not available.

The approximate asset mix as of June 30 was 45.5% stocks, 41.1% bonds, 8.4% cash equivalents, 3.6% real estate equity and 1.4% venture capital and oil and gas.

**Equity managers:** Alger; Alliance Capital; Beutel Goodman; BMI; Forstmann-Leff; Hellman, Jordan; IDS; Investment Advisers; Lieber; Norwest Bank (or Peregrine Capital); Waddell & Reed; Wilshire (passive).

**Bond managers:** Investment Advisers; Lehman; Miller, Anderson & Sherrerd; Morgan Stanley; Peregrine; Western Asset.

**Real estate managers:** Aetna Life; Equitable; Heitman; Prudential; RREEF; State Street Bank; TCW.

**Venture capital and leveraged buy-out managers:** Allied Capital; DSV; Inman & Bowman; Investment Advisers; KKR; Matrix; Norwest Venture Capital; Smith Barney Venture; Summit Ventures; Superior.

**Oil and gas managers:** AmGO; Apache.

State Street Bank and Trust is

master trustee; Richards & Tierney became the fund's consultant July 1.

Key personnel are Howard Bicker, executive director; Jeff Bailey, assistant executive director; and Roger Henry, equity and fixed-income manager.

## Public Employees' Retirement System of Mississippi

| | ($ millions) |
|---|---|
| Total assets | 2,716 |
| Defined benefit | 2,637 |
| Other | 79 |
| Employer contributions | 165 |
| Benefit payments | 132 |

JACKSON, Miss. — The Public Employees' System of Mississippi terminated four money managers in a move to index 50% of its equity and fixed-income assets.

Scudder, Stevens & Clark and Eaton Vance Management were terminated as equity managers, and Wentworth Hauser & Violich and MacKay-Shields Financial were terminated as fixed-income managers.

The fund hired Wells Fargo Investment Advisors to manage $300 million in a fixed-income indexed fund, and allotted $160 million to Lehman Management to track a customized bond index.

The fund had $250 million in indexed stocks and $620 million in indexed bonds as of Sept. 30.

The Mississippi system also increased its stock holdings to 22% from the previous year's 16.9% following passage of a state law that increased the ceiling on equity holdings to 35% from 20%.

In a personnel change, Eddie Vandiver became deputy director of investments in March after Charles D. Wilkinson left to pursue personal business interests.

Mr. Vandiver previously had been the investment manager at a casualty insurance company in Jackson, Miss.

Fund assets increased 10.2% to $2.716 billion as of Sept. 30 from $2.465 billion a year earlier. The bulk of the money is in a defined benefit plan, although there is $79 million in a deferred compensation plan.

The fund invests $506 million in mortgage-backed securities.

The asset mix as of Sept. 30 was 22% stocks, 50.4% bonds, 9% cash equivalents and 18.6% mortgage-backed securities.

**Equity managers**: INVESCO; Fayez Sarofim; Bankers Trust.

**Bond managers**: Dreyfus; Criterion Investment; Lehman; Manufacturers Hanover; PIMCO; Wells Fargo.

Trustmark National Bank is the master custodian; SEI is the consultant.

Key personnel are Mr. Vandiver; Ronald D. Logan, investment manager; and Anne D. Middleton, investment technician.

## Public School Retirement System of Missouri

| | ($ millions) |

| Total assets* | 3,274 |
| Defined benefit | 3,274 |
| Employer contributions | 140 |
| Benefit payments | 129 |

*as of June 30, 1986

JEFFERSON CITY, Mo. — Assets of the Public School Retirement System of Missouri rose 10.8% to about $3.27 billion as of June 30, from about $2.95 billion a year earlier.

Employer contributions increased 18.6% to $140 million for 1986, while benefit payments increased 12.1% to $129 million.

The fund has $10 million in mortgages and $774 million in mortgage-backed securities.

As of June 30, the approximate asset mix was 10% stocks, 59% bonds, 7% cash equivalents and 24% mortgage-backed securities.

Fund officials had considered diversifying the investment manager lineup, but to date Boatmen's National Bank remains the sole manager. It also is the fund's master custodian. David W. Mustoe, executive secretary, said he could not comment further on possible management changes.

Mr. Mustoe is the fund's key investment staffer.

## Mobil Oil Corp.

| | ($ millions) |
|---|---|
| Total assets | 3,930 |
| Defined benefit | 2,180 |
| Defined contribution | 1,610 |
| Other | 140 |
| Employer contributions | na |
| Benefit payments | na |

NEW YORK — The $3.93 billion in pension fund assets reported by Mobil Oil Corp. relate to the pension plan for the company's 38,095 domestic employees as of Sept. 30.

A year earlier, the company reported total assets of $4.553 billion in pension fund assets for 69,500 employees, the work force for the company's domestic and overseas operations and its subsidiaries. Those subsidiaries included Montgomery Ward & Co. Inc., Chicago; Container Corp. of America, Chicago, which Mobil sold in 1986; and W.F. Hall Printing, Chicago, which was sold in November 1985.

During 1986, industry sources reported the corporation hired a "farm team" of two minority-owned money management firms and a firm headed by a woman, which were being groomed to manage assets for the pension fund. Ariel Capital Management Inc., Chicago; Brown Capital Management Inc., Baltimore; and Westwood Management Corp., New York, each was allocated $1 million of corporate assets.

As of Sept. 30, those three were not among pension fund managers listed by the company.

Also during 1986, R.B. Hahnen, who had been Mobil's internal manager of money markets and foreign exchange investments, was named manager of corporate benefits-finance, the key position in the pension fund. He replaced Charles Clune, who was expected to retire at the end of 1986.

The fund reported $420 million in dedicated or immunized bonds; $70 million in GICs; and $120 million in mortgage-backed securities as of Sept. 30.

The asset mix as of the same date was 49% in equity accounts and 51% in fixed-income accounts and insurance, including mortgage-backed securities.

## Monsanto Co.

| | ($ millions) |
|---|---|
| Total assets | 3,280 |
| Defined benefit | 2,520 |
| Thrift or savings/401(k) | 660 |
| Other | 100 |
| Employer contributions | 30 |
| Benefit payments | 200 |

ST. LOUIS — In June, Monsanto Co. hired William Searcy as manager-pension assets to replace Richard McGahan, who joined Fred Alger Management. Mr. Searcy had been director-benefits investment management at ENSERCH Corp., Dallas.

Although the asset mix remained relatively unchanged from a year earlier, the pension fund did make some drastic changes within categories during the 12 months ended Sept. 30.

Its international equity investments more than doubled during the period, to $311 million from $150 million, an increase fund officials attributed mostly to market appreciation.

Its allocation to guaranteed investment contracts dropped 96.7%, to $10 million from $300 million, when maturing contracts were used to meet benefit payments.

Total assets of the Monsanto Co. plan grew 13.1% during the 12 months ended Sept. 30, to $3.28 billion from $2.9 billion. Defined benefit plan assets grew 9.6%, to $2.52 billion from $2.3 billion. The company also had thrift plan assets of $660 million and an IRA/PAYSOP with $100 million in assets; those plans increased 26.7% from a combined $600 million a year earlier.

Monsanto made employer contributions of $30 million in 1986, a drop of 75% caused by the company's implementation of the Financial Accounting Standards Board Statement 87. Its benefit payments were $200 million, an increase of 66.7%.

In addition to its $311 million in international equity, the fund has $30 million in international fixed income, $10 million in oil and gas, $205 million in real estate equity and $10 million in mortgages.

Its asset mix as of Sept. 30 was 64% stocks, 18% bonds, 10% cash and 8% real estate equity.

The fund uses stock and bond options, and stock index and fixed-income futures.

Although Monsanto officials would not identify pension fund managers, following is a list of firms believed to be managing fund assets.

**Managers:** Centerre Trust; Citicorp Investment; Delaware Investment; Equitable; Fischer, Francis Trees & Watts; Hotchkis & Wiley; Jennison Associates; LaSalle Advisors; Lincoln Capital; J.P. Morgan; T. Rowe Price; Rowe Price-Fleming; State Street Research.

Northern Trust is master trustee; Frank Russell is investment management consultant.

A.E. Wolfarth, assistant treasurer, oversees investment of the assets with Mr. Searcy.

## New Jersey Division of Investment

| | ($ millions) |
|---|---|
| Total assets* | 16,901 |
| Defined benefit | 16,673 |
| Thrift or savings | 228 |
| Employer contributions | 760 |
| Benefit payments | 920 |

*as of June 30, 1986

TRENTON, N.J. — Buoyed by strong market gains, The New Jersey Division of Investment's equity allocation rose to 47% for the year ended June 30, up from 31% the year before.

Equity returns of 40%, nearly 400 basis points better than the Standard & Poor's 500 stock index, helped boost the fund's stock allocation, explained Roland M. Machold, director.

The value of employee benefit assets increased 35.2% from the year before, to $16.901 billion from $12.494 billion.

Deferred compensation and supplemental annuity collective trust assets rose to $228 million from $127 million the year before.

Meanwhile, the investment division embarked upon a state-mandated program of divesting South Africa-related securities. A division report said the program had increased state funding requirements, reduced diversification and quality of stock holdings and generated additional transaction costs.

In addition, a bill affecting holdings in companies that do business in Northern Ireland passed the state Senate and awaits action by the Assembly. The legislation would require disclosure about company compliance with the fair employment MacBride Principles.

The fund has $1.3 billion invested in mortgages and $425 million in mortgage-backed securities.

The fund uses stock options.

The asset mix as of June 30 was 46% stocks, 40% bonds, 3% cash equivalents, 8% mortgages, and 3% mortgage-backed securities.

A group of 12 banks serves as custodian.

Overseeing the pension fund are Mr. Machold; William P. Mooney, deputy director; and Stephen Kornrumpf, assistant director.

## New York City Retirement Systems

| | ($ millions) |
|---|---|
| Total assets | 30,839 |
| Defined benefit | 29,767 |
| Defined contribution | 1,072 |
| Employer contributions | 2,470 |
| Benefit payments | 2,508 |

NEW YORK — Four funds of the $30.839 billion New York City

Retirement Systems dramatically reshuffled fixed-income assets in 1986, adding and terminating a number of managers.

The $12.5 billion New York City Employees' Retirement System, the $1.64 billion New York City Fire Department Pension Fund, the $4.6 billion New York City Police Department Pension Fund and the $11.7 billion New York City Teachers' Retirement System redistributed fixed-income assets among corporate, government, mortgage-backed and foreign sectors.

The New York City Retirement Systems' $30.839 billion in assets comprises $26.550 billion overseen by City Comptroller Harrison J. Goldin and $4.289 billion in variable annuity program assets overseen by the trustees of the teachers' system.

Mr. Goldin's office makes all investments for three of the five New York City funds — the employees, the police and the fire funds. In addition, the office oversees fixed-income investments for the two other funds — the more than $500 million Board of Education Retirement System and the teachers' funds.

During 1986, the New York City Systems initiated a program in which small, minority-owned financial firms with limited pension fund exposure will work with larger, established firms to manage money for the fund.

The employees' fund successfully filed suit in a U.S. District Court to compel American Brands Inc., New York, to place before shareholders a proxy resolution that requires the company to adhere to the MacBride Principles, a standard aimed at companies doing business in Northern Ireland to evaluate fair employment practices.

The New York City systems also approved divestiture of $156 million of stocks of companies doing business in South Africa.

Employee benefit assets of the fund increased 23.2% to $30.839 billion as of Sept. 30, from $25.063 billion the previous year.

Of the $26.55 billion in assets managed by the comptroller's office, internally managed fixed income was reduced because of maturing New York City securities in the plan. Those assets were transferred to an internally managed cash account.

In restructurings involving $13.1 billion in fixed-income assets and $4 billion in transfers to fixed income from cash, officials of the New York City fire and employees' funds chose 20 managers overall, 17 new ones and three existing ones, each handling portions of one or more of the funds.

In its restructuring, the police fund selected 10 new managers, reassigned another and terminated two firms.

Allocations came from the reduction of Fiduciary Trust's account and from terminated accounts handled by Citibank and Lehman Management Co.

In December 1986, the police fund terminated Alliance Capital, reallocating the assets to Dimensional Fund Advisors, an existing manager.

Because of the restructurings, Citicorp, which had managed $10.2 billion for the city funds in June, lost all but $290 million, which it manages for the Board of Education fund.

The $4.289 billion in assets overseen by teachers' plan trustees includes $3.217 in defined benefit assets and $1.072 billion in defined contribution assets.

Employer contributions totaled $510 million as of Sept. 30 and benefit payments to retirees were $384 million.

The New York City Teachers' Retirement System's variable annuity programs include a tax-deferred annuity, variable fund A, which is invested in equities, and variable fund B, which is invested in guaranteed investment contracts.

The teachers' fund includes $7.437 billion in fixed income managed by the New York City Comptroller's office.

During the year, Variable Fund A terminated Geo Capital Corp., giving the $26.5 million the firm had managed to a passive equity account with Wells Fargo. It also reassigned $15 million from Management Asset Corp. to Wells Fargo.

Fund A also hired Great American Core Investors to manage a $25 million passive account of American depository receipts replicating the Morgan Stanley Capital International Europe Australia Far East index.

Variable Fund B hired the Bank of America to manage $106.9 million in a Federal Deposit Insurance Co.-insured time-deposit account, and New York Life Insurance to manage $224.9 million in GICs.

In December, the fund moved $100 million from Bankers Trust's indexed stock portfolio to a dynamically hedged portfolio managed by the firm.

The teacher's variable annuity programs had $2.114 billion invested in indexed stocks as of Sept. 30.

The asset mix as of the same date was approximately 79% equity and 21% GICs.

The New York City system's asset mix, excluding the teachers' fund, was 24% stocks; 44% bonds; 19% cash equivalents; 1% mortgages; 12% mortgage-backed securities.

**NYC retirement equity managers:** Alliance Capital; Bankers Trust; Batterymarch; BEA Associates; Dimensional Fund Advisors; Lazard Freres; Oppenheimer; Provident Capital; Stein Roe & Farnham.

**Teachers' equity managers:** Alliance; Axe; Bankers Trust; Concord Capital; John A. Levin; Management Asset; McConnell, Miller; Mellon Bank; Prudential; Scudder, Stevens & Clark; Donald Smith; Trinity Investment; Valuequest; Wells Fargo; Westwood.

**NYC retirement fixed-income managers:** Bankers Trust; BEA Associates; Bear Stearns Asset; Chase Investors; Citicorp; Fiduciary Trust; Fisher Francis, Trees & Watts; Investment Advisers; Kennedy Associates; Lincoln Capital; Lehman Management; Manufacturers Hanover; Mellon Bank; Miller, Anderson & Sherrerd; Pacific Investment; T. Rowe Price; Putnam Advisory; Rosenberg Capital; Smith Barney, Harris Upham; State Street Bank; Weiss, Peck & Greer; Wells Fargo Investment.

**Teachers' fixed-income managers:** Bankers Trust; Chase Investors; Fiduciary Trust; Fischer, Francis; Lehman; Mellon Bank; Miller, Anderson & Sherrerd; Pacific Investment; T. Rowe Price; Putnam Advisory; Rosenberg Capital; Smith Barney; Weiss, Peck & Greer; Wells Fargo.

**Teachers' GIC managers:** Bank of America; Metropolitan; Prudential; New York Life.

NYC's custodian is Citibank. The teachers' fund's master trustee is Irving Trust; the consultant is Rogers, Casey, Barksdale.

At the NYC fund, Marvin L. Damsma, third deputy comptroller; Robert T.C. Wilson, bureau chief; John J. Burns, senior fixed-income analyst; and Lisa M. Malanchuk, senior equity analyst, oversee investments.

At the teachers' fund, key personnel are: Wallace Sullivan, executive director; Patrick Kiernan, assistant executive director; and Diane Sisenwein, portfolio administrator.

## New York State Common Retirement Fund

| ($ millions) | |
|---|---|
| Total assets | 31,533 |
| Defined benefit | 31,533 |
| Employer contributions | 1,600 |
| Benefit payments | 1,100 |

ALBANY, N.Y. — In 1986, the New York State Common Retirement Fund hired United Mutual Life Insurance Co., a black-owned New York firm, to jointly manage a $100 million equity portfolio previously solely run by Equitable Investment Management Corp.

In addition, a new state law requires the fund to monitor companies in which it invests for compliance with the MacBride Principles. Those principles govern fair employment by U.S. firms in Northern Ireland. The law encourages the fund to invest in companies that make advancements in fighting job bias in Northern Ireland and to sell off stocks of recalcitrant companies.

The fund also filed shareholder resolutions with 121 companies to ask them to withdraw from South Africa unless apartheid is dismantled by May 1987.

The fund allowed the state to skip two annual contributions totaling $1.4 billion to the fund, but ended a practice of paying contributions two years late. The skipped contributions will be amortized over 17 years, with 8% interest paid on the amount.

In mid-1986, the fund committed to a venture capital partnership run by Bridge Capital, and also invested in Corporate Property Investors, a real estate investment trust.

Also during 1986, the fund committed more than $300 million into leveraged buy-outs, bringing the total in LBOs to $380 million.

In late 1985, the fund hired Wells Fargo, Miller, Anderson & Sherrerd and Delaware Investment Advisers as equity managers, and terminated Bank of New York.

Total assets of the fund grew 21.3% in the 12 months ended Sept. 30, to $31.53 billion from about $26 billion.

Employer contributions for 1986 were expected to total $1.6 billion; benefit payments were expected to be $1.1 billion.

About $26.9 billion is managed internally: $9.92 billion in equity; $13.15 billion in fixed income; $1.09 billion in short-term instruments; and $2.7 billion in mortgages.

The internally managed stock index fund rose 42%, to $9.92 billion, primarily driven by stock market gains.

The fund has $90 million committed to venture capital, $59 million in real estate equity, $2.71 billion in mortgages and $2.7 billion in mortgage-backed securities.

As of Sept. 30, the fund's asset mix was 45.5% stocks, 33.1% bonds, 3.4% cash equivalents, 0.2% real estate equity, 8.6% mortgages, 8.6% mortgage-backed securities and 0.6% venture capital and LBOs.

**Equity managers:** Alliance Capital; Capital Guardian; Delaware; Equitable; Lazard Freres; Lord Abbett; Miller, Anderson & Sherrerd; Oppenheimer Capital; J&W Seligman; Shearson American Express; Wells Fargo.

**Real estate managers:** Corporate Property Investors; Eastdil; Goldman, Sachs.

**Venture capital:** Bridge Capital; Crossroads; Excelsior; Montgomery Bridge; New York State Business Venture Partnership; Peregrine Ventures; U.S. Ventures.

**Leveraged buy-outs:** Kohlberg Kravis Roberts; Forstmann Little.

Chase Manhattan is the master trustee; Wilshire Associates was hired as consultant during 1986.

John E. Hull is director of investments and cash management; John J. O'Connor is chief investment officer; and William M. Barrett is director of equities and fixed-income investments.

## New York State Teachers' Retirement System

| ($ millions) | |
|---|---|
| Total assets | 20,235 |
| Defined benefit | 20,235 |
| Employer contributions | 951 |
| Benefit payments | 632 |

ALBANY, N.Y. — The New York State Teachers' Retirement System grew by 32.2% to $20.235 billion as of Sept. 30, from $15.303 billion as of June 30, 1985, largely because of good equity performance.

The fund recently began using stock index futures and uses stock options internally as they see fit.

Employer contributions to the pension plan were $951 million; benefit payments were up 18.8% to $632 million.

The fund manages $16.056 billion internally: $6.2 billion in equity; $7.433 billion in fixed income; $343 million in short-term investments; and $2.080 billion in mortgages.

Short-term investments plunged by nearly $600 million when the fund added three managers — General American Advisors; Glickenhaus & Co.; and Pilgrim, Baxter, Hoyt and Greig — in October 1985.

The fund has $5.977 billion in indexed stocks; $304 million invested in real estate equity; $2.08 billion in mortgages; $865 million in mortgage-backed securities; and $50 million protected by portfolio insurance.

The asset mix as of Sept. 30 was 42.5% stocks, 37.9% bonds, 1.5% cash equivalents, 1.5% real estate equity, 10.3% mortgages; 4.3% in mortgage-backed securities and 2% in member loans.

**Equity managers:** BEA Associates; Sanford C. Bernstein; Beutel, Goodman; General American; Glickenhaus; Lehman Management; Manufacturers Hanover Investment; Oppenheimer; and Pilgrim, Baxter, Hoyt and Greig.

**Bond manager:** Sanford C. Bernstein.

**Real estate managers:** Aetna; Equitable; Goldman, Sachs; Prudential.

**Venture capital managers:** Excelsior 2; Mesirow Capital Partners II; New York State Business Venture; Norstar Venture Partnership.

Bankers Trust is custodian.

Key personnel are Harold N. Langlitz, executive director; Edward J. Reno Jr., securities investment officer; Lowell A. Blom, mortgage officer.

## North Carolina Retirement Systems

| ($ millions) | |
|---|---|
| Total assets* | 10,003 |
| Defined benefit | 10,003 |
| Employer contributions | 744 |
| Benefit payments | 463 |

*as of June 30, 1986

RALEIGH, N.C. — The assets of the North Carolina Retirement Systems increased 14.5% over 12 months to $10.003 billion (book value) by June 30.

The system is in the process of installing a computer system that will enable its assets to be priced at market value.

In 1986, the fund hired a new real estate equity manager, Security Capital Real Estate Corp., for an undisclosed amount.

The 1986 contribution of $744 million is from the state and from employees.

All but $101 million is managed in-house: $2.114 billion in equities; $7.763 billion in fixed income; and $25 million in short-term assets. Outside equity and bond managers act in advisory roles, only.

There is $125 million invested in real estate equity and $65 million in mortgages.

The fund uses stock options.

The asset mix as of June 30 was 14.5% equities; 74.7% bonds; 3.3% cash equivalents; 1% real estate equity; and 6.5% mortgages.

**Equity advisers:** Alliance Capital; First Citizens Bank; First Union Capital; NCNB; Thorndike Doran/Wellington; Wachovia Bank.

**Bond adviser:** Duff & Phelps (credit analysis only).

**Real estate managers:** Aetna Life; CIGNA Capital; Goldman, Sachs; Security Capital.

Bank of New York is custodian.

C. Douglas Chappell is deputy treasurer and director of the investment and banking division.

## Northrop Corp.

| ($ millions) | |
|---|---|
| Total assets | 2,702 |
| Defined benefit | 1,988 |
| Defined contribution | 714 |
| Employer contributions | 120 |
| Benefit payments | 40 |

LOS ANGELES — Northrop Corp. employee benefit assets increased 26.1% to $2.702 billion as of Sept. 30 from $2.142 billion a year earlier.

The $714 million defined contribution plan assets include a profit-sharing plan and 401(k) assets.

Employer contributions decreased 7.7% to $120 million; benefit payments increased 11.1% to $40 million.

The asset mix as of Sept. 30 was 68% stocks, 24% bonds and 8% cash.

**Equity managers:** Capital Guardian; Forstmann-Leff; Jennison Associates; Putnam Advisory; Rosenberg Capital; State Street Research.

**Bond managers:** Fischer, Francis, Trees & Watts; Jennison Associates.

Bankers Trust is master trustee.

Richard B. Lohrer, treasurer, oversees employee benefit assets.

## NYNEX Corp.

| ($ millions) | |
|---|---|
| Total assets | 11,962 |
| Defined benefit | 10,089 |
| Defined contribution | 1,589 |
| ESOP | 284 |
| Employer contributions | na |
| Benefit payments | na |

NEW YORK — NYNEX Corp.'s defined benefit fund made its first move into real estate, outside its inherited TREET holdings, and international investments.

But the core of its investment strategy remains passive, with 49%, or $4.9 billion, of its nearly $10.1 billion pension fund in stock index and bond index funds as of Sept. 30.

In real estate, the fund split $70 million among Aldrich, Eastman & Waltch; Corporate Property Investors; Heitman Advisory; and John McMahan Associates. It left undisturbed its $621 million in the Telephone Real Estate Equity Trust, set up by American Telephone & Telegraph Co.

In international, it hired ABD International Management Corp. and Mellon-Pictet International Management Ltd., giving each between $20 million and $50 million, although NYNEX would not confirm the hirings.

In other manager changes in 1986, the fund hired Trinity Investment Management and Fidelity Management Trust, both for

domestic equities, while it released United States Trust Co. in domestic fixed income.

In the largest chunk of its passive core, NYNEX had $3.855 billion in equity index funds as of Sept. 30 with American National Bank, Wells Fargo Investment Advisors and Dimensional Funds Advisors. The latter two managers were hired in fall 1985. The amount in equity indexing was up 35.3% from $2.85 billion a year earlier.

Also, it had $1.068 billion in indexed bonds, down 11% from the $1.2 billion the previous year.

NYNEX's total employee benefit assets rose 26.6% in the year ended Sept. 30 to $11.962 billion from $9.447 billion.

The employee stock ownership plan alone rose 53.5% to $284 million.

The fund has $4.38 million in venture capital and $691 million in real estate equities.

Its asset mix as of Sept. 30 was 59% stocks, 33% bonds, 1% cash equivalents and 7% real estate equity.

**Equity managers** (Domestic): American National Bank (Chicago); Batterymarch; Dimensional Fund Advisors; Fidelity Management Trust; Manufacturers Hanover; McCowan Associates; Trinity; TCW; Wertheim.

(International): ABD; Mellon-Pictet.

**Bond managers:** Boston Co.; Brown Brothers Harriman; Hancock; Jennison; Lincoln Capital; Manufacturers Hanover; Massachusetts Financial Services; Miller, Anderson & Sherrerd; Standish, Ayer & Wood; State Street Research.

**Real estate managers:** Aldrich, Eastman & Waltch; Corporate Property Investors; Heitman; John McMahan; TREET.

**Venture capital manager:** Manufacturers Hanover.

Mellon Bank is master trustee.

Overseeing the fund are L.R. Smart, corporate director-finance, and J.E. Clines, director-investment management.

## Ohio Public Employees' Retirement System

| ($ millions) | |
|---|---|
| Total assets | 13,567 |
| Defined benefit | 13,567 |
| Employer contributions | 630 |
| Benefit payments | 640 |

COLUMBUS, Ohio — The Ohio Public Employees' Retirement System added Wells Fargo Realty Advisors and Rothschild Inc. as real estate managers in 1986 and terminated Aetna Life & Casualty Co. as a manager in that category.

Assets of the system increased 26% to $13.567 billion as of Sept. 30, from $10.76 billion a year earlier. Employer contributions in 1986 were $630 million, the same as in 1985, while benefit payments rose 12.3% to $640 million.

All assets but real estate are managed internally. The fund uses Value Line as an equity consultant.

Within the fixed-income category, the system reduced its long bond exposure and went heavily into mortgage-backed securities because of market conditions earlier this year. As of Sept. 30, the bond allocation was roughly half of what it was 12 months earlier and the mortgage-backed allocation roughly doubled.

The fund has $33 million committed to venture capital, $163 million invested in real estate equity and $4.9 billion in mortgage-backed securities.

As of Sept. 30, the approximate asset mix was 22.5% stocks, 22.4% bonds, 17.1% cash equivalents, 1.2% real estate equity and 36.8% mortgage-backed securities.

**Real estate managers:** CIGNA; NCNB; Rothschild; Security Capital; Wells Fargo.

The state treasurer is master custodian.

Robert A. McLaughlin is the fund's investment officer.

## Ohio Teachers' Retirement System

| ($ millions) | |
|---|---|
| Total assets | 12,484 |
| Defined benefit | 12,484 |
| Employer contributions | 575 |
| Benefit payments | 625 |

COLUMBUS, Ohio — Assets of the State Teachers Retirement System of Ohio increased about 22.7% to $12.48 billion as of Sept. 30, from $10.18 billion a year earlier.

Employer contributions increased 11.7% to $575 million in 1986 and benefit payments increased 10.6% to $625 million.

The fund is managed internally. It uses Thorndike, Doran, Paine & Lewis as equity and bond consultant and Thomas Karsten Associates as real estate consultant.

It has $155 million in dedicated or immunized bond funds, $16 million in venture capital, $1.4 billion in real estate equity, $933 million in mortgages and $1.2 billion in mortgage-backed securities.

It uses stock options and fixed-income futures.

As of Sept. 30, the approximate asset mix was 29% stocks, 28% bonds, 10% cash equivalents, 13% real estate equity, 11% mortgage-backed securities and 9% mortgages.

The state treasurer is master custodian.

C. James Grothaus is executive director; Stephen A. Mitchell is assistant executive director-investments; and Daniel M. Szente, assistant director-investments.

## Oregon Public Employes Retirement System

| ($ millions) | |
|---|---|
| Total assets | 6,522 |
| Defined benefit | 6,522 |
| Employer contributions | 415 |
| Benefit payments | 226 |

SALEM, Ore. — The Oregon Public Employes Retirement System made several changes in its manager lineup during 1986.

In the first quarter, it dropped Glickenhaus & Co., moving the assets to six domestic managers and one international manager.

The new managers are: Atalanta/Sosnoff Capital Corp.; Olympic Capital Management; Pinnacle Associates; George B. Springman Inc.; Cutler & Co. Inc.; Thompson/Rubinstein Investment Management; and Nomura Capital Management Inc.

Separately, it also added Cursitor-Eaton as an international equity manager as part of an increase in overseas exposure.

In June, it hired Chase Manhattan Bank as master custodian for fixed income, replacing Manufacturers Hanover Trust.

In July, it boosted its venture capital commitment by allocating $5 million to Interven Partners for early stage financing in high-technology companies.

The fund also diversified its real estate portfolio by investing $26 million in real estate investment trusts and other publicly traded real estate securities, and making its first major moves into mortgage-backed securities.

The fund reported defined benefit assets of $6.522 billion as of Sept. 30, an increase of 27.9% from the $5.1 billion reported a year earlier.

Employer and employee contributions to the fund totaled $415

million, up 1.2%, and benefit payments were $226 million, up 13%.

The fund manages $2.8 billion internally, all in fixed income.

It has $445.1 million invested in overseas equities, an increase of 130.6% from the $193 million reported for 1985. James C. George, investment manager, attributed the increase to the fund's steadily building up what he called a "very successful sector" and to market appreciation.

It also has $90 million in venture capital; $400 million in leveraged buy-outs; $350 million in real estate equity; $360 million in mortgages; and $140 million in mortgage-backed securities.

The fund uses stock options and stock index futures.

As of Sept. 30, the asset mix of the pension fund was 57% stocks, including most of the leveraged buy-out and venture capital assets; 32% bonds, including mortgage-backed securities; 5.4% real estate equity; and 5.6% mortgages.

**Equity managers** (Domestic): Atalanta/Sosnoff; Batterymarch; BEA Associates; Columbia; Cutler; Froley-Revy; General American; Harris Associates; Hotchkis & Wiley; Olympic; Pinnacle; Quest; Rosenberg; Fayez Sarofim; George B. Springman; Thompson-Rubinstein; and William D. Witter.

(International): ABD; Cursitor-Eaton; Daiwa; Globe-Finlay; Nomura; Rowe Price-Fleming; and Wertheim Phillipe.

**Real estate manager:** Alex. Brown Realty.

**LBO manager:** Kohlberg, Kravis, Roberts.

Chase is the master custodian for bonds; First Interstate Bank of Oregon is master trustee for stocks. Its investment management consultants are Frank Russell Co. and Wilshire Associates.

## Pacific Gas & Electric Co.

| | ($ millions) |
|---|---|
| Total assets | 3,275 |
| Defined benefit | 2,075 |
| Defined contribution | 1,200 |
| Employer contributions | 130 |
| Benefit payments | 90 |

SAN FRANCISCO — Pacific Gas & Electric Co.'s pension fund made its first move into international during 1986, allocating $73 million for international equities among Arnhold & S. Bleichroeder International; Capital Guardian Trust; and Putnam International Advisors.

The company also made a change in its fixed-income and real estate asset management, hiring bond manager Sanford C. Bernstein in place of T. Rowe Price Associates and moving an undisclosed amount from PRISA I, Prudential Realty Group's broad-based open-end real estate fund, into PRISA II, a large-property account.

The real estate shift was made as part of the fund's efforts to develop a real estate program that has a high return but doesn't take a lot of staff time. It currently has $146 million in real estate equity and $70 million in mortgage-backed securities.

Also during the year, Sunny Oberoi was named director-pension fund management, replacing Janice Murphy, and Gordon Smith, vice president-finance and treasurer, became chairman of the investment committee, replacing Stan Skinner.

As of Sept. 30, employee benefit assets at PG&E totaled $3.275 billion, a 32% increase from a year earlier. The defined benefit assets totaled $2.075 billion, up 25.4%, and the defined contribution assets, including the 401(k) plan, totaled $1.2 billion, up 45.1%.

Employer contributions to the plan in 1986 were expected to total $130 million, compared with 1985's $122.4 million. Benefit payments were estimated at $90 million, compared with $77.8 million a year earlier.

In addition to its international and real estate investments, the PG&E fund has $135 million in indexed stocks, $114 million in general account contracts and $21 million in guaranteed investment contracts.

The asset mix as of Sept. 30 was 65% stocks, 28% bonds (including cash, mortgage-backed securities, GICs and GACs) and 7% in real estate equity.

**Equity managers** (Domestic): Barrow Hanley Mewhinney & Strauss; Beutel Goodman; Cashman Farrell; Chase; Dodge & Cox; Endowment Management; Frontier; Jundt/Capen; McCowan; Miller, Anderson & Sherrerd; Olympic; Rosenberg Capital; State Street Bank.

(International): Capital Guardian; Bleichroeder; Putnam.

**Bond managers:** Bernstein; Fischer Francis Trees & Watts; Miller Anderson & Sherrerd.

**Real estate managers:** Corporate Property Investors; Prudential; Metropolitan Life; RREEF; TCW.

**GICs:** Metropolitan (defined benefit plan); Hancock, Hartford; New York Life (defined contribution plan.

**GACs:** Metropolitan; Prudential.

Master trustee is State Street Bank; Frank Russell is consultant.

Overseeing investment management are Mr. Oberoi and Peter K. Corippo, senior analyst.

## Pacific Telesis Group

| Total assets | 8,500 |
| Defined benefit | 7,600 |
| Defined contribution | 900 |
| Employer contributions | na |
| Benefit payments | na |

SAN FRANCISCO — Pacific Telesis Group's defined benefit fund increased its allocation to international investments to 15% of total defined benefit assets from 10% a year earlier.

Total employee benefit assets were at $8.5 billion as of Sept. 30, up 34.6% from the $6.316 billion reported a year earlier. Its defined benefit assets totaled $7.6 billion, up 33.3%, compared to $5.703 billion in the same period. Its defined contribution assets totaled $900 million, up 46.8% from the $613 million of a year earlier. Fund officials attributed the rise to investment performance.

In the only manager change in 1986, it dropped Chase Investors Management.

Pacific Telesis runs in-house $195 million in equities and $85 million in fixed income.

The asset mix as of Sept. 30 was 50% stocks, 15% international equity, 23% bonds, 5% cash and 7% real estate equity.

**Equity managers** (domestic): Delphi; Dodge & Cox; Hotchkis & Wiley; IDS Advisory; Jundt/Capen; Lord Abbett; Mellon Capital; Morgan Grenfell; Pilgrim Baxter Hoyt & Greig; Rosenberg Capital; Sit Investment; State Street Research; Thompson Siegel & Walmsley; United Capital; Wellington; Wells Fargo Investment.

(International): ABD; Capital Guardian; Fidelity International; Morgan Grenfell; NM Rothschild.

## Pennsylvania Public School Employes' Retirement System

($ millions)

| | |
|---|---|
| Total assets* | 10,078 |
| Defined benefit | 10,078 |
| Employer contributions | 821 |
| Benefit payments | 706 |

*as of June 30, 1986

HARRISBURG, Pa. — Last spring, the Pennsylvania Public School Employes' Retirement System trustees adopted a restrictive investment policy that eventually could result in complete divestment of South Africa-related securities.

Fund officials also initiated a $200 million hedged index fund, to be managed by J.P. Morgan, and a new portfolio of $250 million in mortgage-backed securities to be managed internally.

The moves, which had been planned for some time, were funded from short-term investments.

Earlier in the year, the fund hired Dreman & Embry to manage $100 million in equities and Trivest to manage $15 million in venture capital.

For options, the fund replaced Bankers Trust with Webster Management when the fund's portfolio manager at Bankers moved to Webster. Oppenheimer Option Management was retained.

For fixed income, trustees plan to allocate $250 million each to Criterion Investment Management and Pacific Investment Management and $150 million to the Putnam Advisory Co. Another $150 million will be placed in an equity fund with Evaluation Associates, the fund's consultant.

Allocations of $20 million to Foston and $2 million to Genesis Seed are expected to be made soon in venture capital.

As of June 30, fund assets grew to $10.078 billion, up 28.8% from almost $7.825 billion as of Sept. 30, 1985.

Employer contributions rose 7.6% to $821 million from $763 million as of Sept. 30, 1985, and benefits paid out rose 32% to $706 million from $535 million.

The fund manages $1.35 billion internally in short-term investments.

The fund has $668 million invested in real estate equity; $270 million in mortgages; $576 million in mortgage-backed securities; and $10.5 million in venture capital as of June 30.

The asset mix as of June 30 was 33.8% stocks, 37.8% bonds, 13.3% cash equivalents, 6.6% real estate equity, 2.7% mortgages, 5.7% mortgage-backed securities and 0.1% venture capital.

**Equity managers:** Bankers Trust; Cashman & Farrell; Delaware; Dreman & Embry; Mellon Bank; Miller Anderson & Sherrerd; Oppenheimer; Provident.

**Bond managers:** Glenmede Trust; Loomis Sayles; Mellon Bank; Miller, Anderson & Sherrerd; Pittsburgh National Bank.

**Real estate managers:** Fidelity Bank; Jones Lang Wootton.

**Options managers:** Oppenheimer; Webster.

**Venture capital:** Century IV; NEPA.

First Pennsylvania is the master custodian.

## Pennsylvania State Employes' Retirement System

($ millions)

| | |
|---|---|
| Total assets | 6,730 |
| Defined benefit | 6,730 |
| Employer contributions | 370 |
| Benefit payments | 535 |

HARRISBURG, Pa. — The Pennsylvania State Employes' Retirement System hired four equity managers for greater exposure to small- and medium-capitalization stocks.

New managers and allocations are: Geewax, Terker & Co., $50 million; Pilgrim, Baxter, Hoyt & Greig, $100 million; First Pennsylvania Bank, $25 million; and McGlinn Capital Management, $50 million.

Mellon Bank was allocated an additional $50 million, bringing the bank's small-cap fund to $164.3 million by Sept. 30.

In addition, the state hired two high-yield bond managers — Delaware Investment Advisers and W.R. Huff Asset Management — for $50 million each. About 1.5% of the system's assets are invested in high-yield bonds.

Pennsylvania dropped Philadelphia Savings Fund Society as manager of a mortgage portfolio of $465.8 million, replacing it with Latimer & Buck Inc.

The commitment to venture capital is expected to increase. Five agreements yet to win final approval would add $37 million to the state's venture capital exposure.

Total assets of the system increased 24.2% to $6.73 billion as of Sept. 30 from $5.418 billion a year earlier.

Contributions decreased 17.8% to $370 million from $450 million a year earlier. Benefit payments rose 20.2% to $535 million from $445 million.

Investment in indexed stocks increased to $1.264 billion from $998 million a year before. Indexed bonds jumped to $633 million from $525 million.

The fund has $379.1 million in real estate equity; $437.6 million in mortgages; $565.8 million in mortgage-backed securities and $66 million in venture capital.

The asset mix as of Sept. 30 was 41.6% in stocks, 30.9% in bonds, 6.7% in cash equivalents, 5.6% in real estate equity, 6.5% in mortgages, 8.4% in mortgage-backed securities and 0.3% in venture capital.

**Equity managers:** Fred Alger; Alliance; Barrow, Hanley, Mewhinney & Strauss, First Pennsylvania Bank; Geewax, Terker; Glickenhaus; McGlinn Capital; Mellon Bank; Pilgrim, Baxter, Hoyt & Greig; Trinity; Wells Fargo.

**Bond managers:** Delaware; W.R. Huff; Miller, Anderson & Sherrerd; Payden & Rygel; Latimer & Buck.

**Real Estate managers:** Aetna; Corporate Property Investors; F.I.A.; Hancock; JMB; Prudential; Security Capital.

Wilshire Associates is consultant.

Kenneth G. Mertz II is chief investment officer. David D. Burnett and Karen Nicely are investment analysts.

# At NCNB, We Follow The Philosophy Of The Pharaohs.

They knew two things were critical to solid real estate investments. Quality construction and teamwork. Given the enduring results of that way of thinking, NCNB insists on it too.

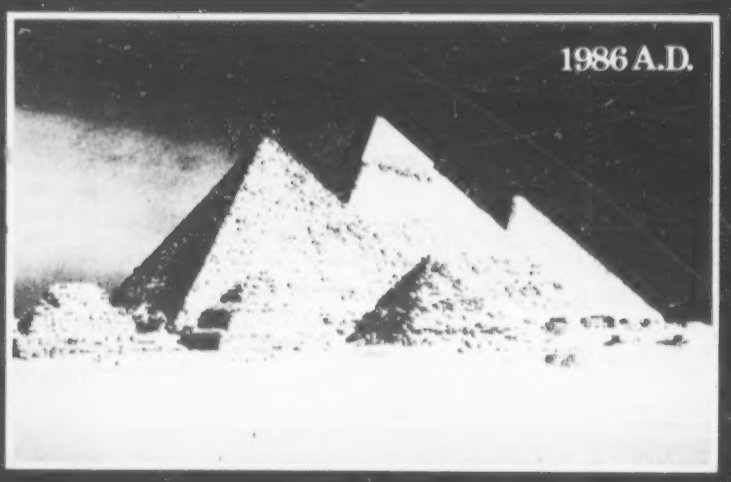
Our experienced team of development, architectural, construction, and property management specialists work exclusively with high-quality properties, located primarily in the Southeast. And our dedication to quality and teamwork has paid substantial dividends.

With consistently high returns, the NCNB Real Estate Fund has climbed to the peak of the industry in recent years. We've cemented our place at the top of the open-end fund universe with an average annual return of 16.4%* over the last five years. Our ten-year average is just as impressive.

Many real estate investments may look good in the short run, but The NCNB Real Estate Fund has passed the ultimate test...the test of time. Call Mark Coltrin, NCNB Trust Group Vice-President for details at (704) 374-8405.

*As reported by CDA Investment Technologies, Inc. for the period ending 12/31/85.

NCNB



NCNB REAL ESTATE FUND

Gamble Co.'s total employee benefit assets were up 40.6% in the year ended June 30, to $2.984 billion from $2.123 billion.

Its profit-sharing fund, P&G's principal retirement vehicle, rose 31.8% to $2.761 billion from $2.095 billion. The company attributed the rise mainly to the gains in the Procter & Gamble common stock the fund holds. About 64.4% of the profit-sharing fund is in P&G stock, and for the year ended June 30 the stock rose 42% to 80¼ from 56¼.

In the same period, its defined benefit fund rose 443% to $152 million from $28 million. P&G attributed the rise to the acquisition of Richardson-Vicks, whose defined benefit assets total about $125 million. The $28 million reported last year represented its Norwich unit's defined benefit assets.

In addition, both Richardson-Vicks and Norwich have 401(k) plans, whose assets total $71 million.

P&G's contribution to all its plans in 1986 was $175 million up 9.4% from $160 million the year before, while benefits paid were $196 million, up 28.1% from $153 million.

P&G runs its $2.76 billion in profit-sharing assets in-house. The internally run portfolio was split with $1.777 billion in equities (all P&G stock), $170 million in cash equivalents and $814 million in GICs, bought from Aetna. Through the 401(k) plans, P&G holds another $50 million in GICs.

The profit-sharing trust allows employees 55 and older to put money in a retirement distribution trust of mutual funds run by T. Rowe Price Associates, which has about $1 million. The P&G shares are the only P&G securities the profit-sharing fund holds.

Griffin Group runs Norwich's fund, while the other managers reported below run Richardson-Vicks' assets.

Norwich's defined benefit fund's asset mix as of June 30 was 55% equities, 37% bonds, 8% cash, while Richardson-Vicks's defined benefit fund's allocation was 59% equities, 32% bonds and 9% cash. The combined defined benefit funds' asset mix is 58% stocks, 33% bonds and 9% cash.

P&G's profit-sharing fund had an asset mix as of June 30 of 64.4% stock, 29.4% GICs and 6.2% cash equivalents.

**Equity managers:** Atlanta Capital; Dimensional Fund; Glickenhaus; Griffin Group; IDS Advisory.

**Bond managers:** Atlanta; Griffin; Western Asset.

**Profit-sharing retirement trust mutual funds:** T. Rowe Price.

SEI is consultant.

Norwich's master trustee is Northern Trust, while Richardson-Vicks' master trustee is Bank of New York. P&G's profit-sharing fund has internal trustees.

Overseeing the assets are E.H. Eaton, vice president-treasurer; C.P. Slater, assistant treasurer; and J.R. Smith, manager-pension plan coordination.

## Prudential Insurance Company of America

| ($ millions) | |

## RJR Nabisco Inc.

| ($ millions) | |
|---|---|
| Total assets | 3,164 |
| Defined benefit | 2,346 |
| Thrift or savings | 817 |
| Employer contributions | 75 |
| Benefit payments | 96 |

WINSTON-SALEM, N.C. — RJR Nabisco Inc.'s employee benefit assets increased by 34% during the year ended Sept. 30.

Continuing a program of consolidation of investment managers that began after R.J. Reynolds acquired Nabisco Brands Inc. in 1985, the company terminated 10 managers and hired five new managers, according to Paul Tyner, manager, funds administration.

Managers terminated in the defined benefit plan were Bankers Trust Co., Forstmann-Leff Associates Inc., MacKay-Shields Financial Corp. and McKenzie, Walker Investment Management. Newly hired were Campbell Advisors, C.J. Lawrence Management, Cooke & Bieler Inc. and Schafer Capital Management Inc. RJR Investment Management Co. also began managing some of the equity funds.

The equity 401(k)/thrift managers terminated were Alliance Capital Management and Bernstein-Macaulay Inc. Spears-Benzac was added.

Fischer, Francis, Trees & Watts was dropped as a bond manager and RJR Investment Management, formed last year, started managing the in-house dedicated bonds and some real estate funds.

NBW Venture Partners was terminated as a venture capital manager.

Mr. Tyner said RJR Nabisco is no longer using stock options or stock index futures, but still uses fixed-income futures. It terminated options managers Bear, Stearns Asset Management and The Travelers.

Gwain Gillespie, formerly executive vice president and chief financial officer and John Dowdle, formerly senior vice president-financial services, retired from RJR Nabisco. Gene Hoots, formerly president of RJR Investment, took a position with Reich & Tang.

RJR Investment Management had $736 million in Reynolds pension assets under management as of Sept. 30, up from $402 million the previous year. Of the $736 million, $592 million is in dedicated bond funds and $144 million is in equity.

For 1986, its employer contribution to the benefit plan was $75 million. Benefit payments totaled $96 million.

The fund also reported $20.2 million in foreign equities, $18 million in venture capital and $125 million in real estate equity.

**Equity managers** (defined benefit): Batterymarch; Campbell Advisors; Capital Guardian; Cooke-Bieler; Delaware Investment; C.J. Lawrence; Lieber; Reich & Tang; Schafer Capital; Warburg Pincus.

(401(k)/thrift): Spears-Benzac; Vanguard; Wilkens & Nanovic.

**Bond managers** (defined benefit): PIMCO; Scudder, Stevens.

(401(k)/thrift): Wachovia Bank.

**Real estate managers:** Copley; Mellon Capital; Prudential; Wachovia.

**International manager:** Globe Finlay.

**Venture capital managers:** Advent; Concord Partners; DeMuth, Folger & Terrune; Fairfield Venture Partners; Plant Resources.

The approximate asset mix as of Sept. 30 was 56% stocks, 30% bonds, 8% cash equivalents, 5% real estate equity and 1% venture capital.

Master trustee is Wachovia and consultant is Hamilton, Johnston.

Key investment personnel include: A. Ed Robinson, chief financial officer; Mac Baines, senior vice president and treasurer; and Robert Bennett, president, RJR Investment Management.

*P&I Age estimate

PITTSBURGH, Pa. — The Rockwell International defined benefit plan grew to $5.986 billion as of Sept. 30, *Pensions & Investment Age* estimates.

That represents a rise of 14.7% from an estimated $5.218 billion a year earlier.

The savings plan had $2.136 billion as of Sept. 30, according to a document filed with the Securities and Exchange Commission.

According to the company's 1986 annual report, pension costs shrank to $77 million in 1986 from $178 million the year before. The decrease was principally due to an increase in the interest rate assumption to 9% from 8%, a change in the salary increase assumption to 5% from 6%, and investment performance.

Of the $2.136 billion in the savings plan, 74%, or $1.591 billion, is in Rockwell stock. Another $142.5 million is in common stocks (excluding Rockwell stock) and $232 million is in group annuity contracts. Most of the remainder is in short-term investments.

**Equity managers (savings plan):** Capital Guardian; First Interstate of California; Hotchkis & Wiley; National Bank of Detroit; Fayez Sarofim.

**Bond manager (savings plan):** First Interstate.

Custodians for the savings plan are First Interstate and National Bank of Detroit.

**Defined benefit plan managers** (according to Money Market Directory): Beutel, Goodman; Boston Co. Real Estate Counsel; Cashman, Farrell; Chase Investors; CIGNA Asset Advisers; First Pacific; Guardian Life; InterFirst Bank Dallas; InterFirst Investment Management; Manufacturers Bank; Mellon Bank; Metropolitan Life; J.P. Morgan; Morgan Stanley; PRIMECAP; Scudder, Stevens & Clark; Seafirst Bank; Security Pacific Investment; Security Pacific Bank; Siphron & Meyers; Stralem; Tower Capital; Transamerica; Travelers Insurance; Travelers Investment; Vanguard; Waite & Correnti; Western Asset.

Mellon Bank is master trustee.

Key personnel overseeing the fund are: E. William Altstaetter, vice president-insurance and benefits administration; Lee H. Cramer, treasurer; and Susan Leathers, director-pension assets management.

## City & County of San Francisco Employees Retirement System

| ($ millions) | |
|---|---|
| Total assets | 2,723 |
| Defined benefit | 2,723 |
| Employer contributions | 240 |
| Benefit payments | 160 |

SAN FRANCISCO — The City & County of San Francisco Employees Retirement System signed management contracts with three international equity and two international bond managers in 1986 and allocated $200 million to investment in international securities.

The three international equity managers signed and given an initial allocation of $33.3 million each were: Capital Guardian Trust Co.; Morgan Grenfell Investment Services Ltd.; and Oechsle International Advisors.

Signed for international bond management were: First Chicago Investment Advisors and Warburg Investment Management International. The international bond managers were allocated $50 million each.

Trustees for the retirement system also decided to allocate up to $50 million for venture capital, but the venture capital managers have not been selected.

Equity managers hired during the 12 months ended Sept. 30 were: Furman Selz Capital Management; Hanson Investment Management Co.; McCullough, Andrews & Cappiello Inc.; Nicholas-Applegate Capital Management and Hahn Holland & Grossman. Fred Alger Management Inc., which bought Crocker Investment Management, was retained.

For the 12 months ended Sept. 30, total assets for the retirement system increased 26.2% to $2.723 billion from $2.157 billion.

The system manages $1.188 billion internally, $80 million in equity and $1.108 billion in fixed income.

San Francisco has $146 million in an equity index fund, $109 million in real estate equity, $19 million in mortgages and $255 million in mortgage-backed securities.

The asset mix as of Sept. 30 was 32% stocks, 49% bonds, 5% cash equivalents, 4% real estate equity, 9% mortgage-backed securities and 1% mortgages.

**Equity managers:** (Domestic) Fred Alger; Axe Core Investors; Furman Selz; Hahn Holland & Grossman; Hanson; Loomis,

| Employer contributions | na |
| Benefit payments | na |

CHICAGO — The employee benefit assets of Sears, Roebuck & Co. increased 23.8% to $6.784 billion as of Sept. 30 from $5.481 billion a year earlier. Defined benefit assets increased 30.1% to $2.492 billion from $1.915 billion.

During the year, Sears terminated an account run by Putnam International Advisors Inc. and pulled the money in-house, at least temporarily. The move was prompted by the departure of 11 Putnam International professionals who started their own firm, Oechsle International Advisors.

Sears manages $2.2 billion in-house through Sears Investment Management Co. Of this, $1.096 billion is in equities, $810 million in fixed income, $181 million in short-term investments and $148 million in other investments, including venture capital, private placements and preferred stock.

The fund has $618 million in indexed stocks; $250 million in foreign equities; $64 million in venture capital; and $65 million in real estate equity. It uses stock options and stock index futures.

As of Sept. 30, the approximate asset mix was 43% domestic stocks, 33% bonds, 7% cash equivalents, 3% real estate equity and 14% venture capital, foreign and miscellaneous investments.

**Real estate manager:** Aldrich, Eastman and Waltch.

**International managers:** Capital Guardian, Fidelity International.

Continental Illinois is the fund's master trustee.

Key personnel of Sears Investment Management are David V. Dootson, president, and David H. Williams and Michael F. Norton, vice presidents.

## Shell Oil Co.

| ($ millions) | |
|---|---|
| Total assets | 5,811 |
| Defined benefit | 2,751 |
| Profit-sharing | 409 |
| Thrift or savings | 2,502 |
| 401(k) | 149 |
| Employer contributions | 300 |
| Benefit payments | 400 |

HOUSTON -- Leonard Chaikind was named administrator of the Shell employee benefit funds in February, replacing Robert MacIntire, who retired after more than 20 years.

Total assets of the employee benefit funds at Shell increased 16.7% for the year ended Sept. 30, to $5.811 billion from $4.979 billion.

Shell officials were reviewing the plan's real estate posture in 1986 and are considering the types and asset allocation to real estate.

The employer contribution to all plans was $300 million.

Benefits paid to employees in 1986 were $400 million, up 23% from $325 previously.

Approximately $1.2 billion of Shell's assets are managed internally, $189 million in equities, $973 million in fixed income and $38 million in short-term investments.

Shell has $566 million in indexed stocks; $73 million in guaranteed investment contracts; $4 million in international fixed income; $307 million in real estate equity; and $188 million in mortgage-backed securities.

The asset mix of the pension fund as of Sept. 30 was 51% stocks, 26% bonds, 2% cash equivalents, 11% real estate equity, 3% GICs and 7% mortgage-backed securities.

**Equity managers:** Criterion; Dodge & Cox; Equitable; First City; Kemper; Mellon; Fayez Sarofim; Wells Fargo.

**Bond manager:** Texas Commerce.

**Real estate managers:** Aetna; Equitable; Hancock; Prudential.

**GIC managers:** Aetna; Equitable, Hancock; Metropolitan; New York Life; Prudential; Travelers.

Frank Russell is the fund's investment management consultant.

Key personnel are Mr. Chaikind and J.B. Kloehr, deputy administrator.

*as of June 30, 1986

COLUMBIA, S.C. — The South Carolina Retirement System increased its exposure in bonds about 8% during the 12 months ended June 30, and decreased its commitment to mortgage-backed securities about 41%.

The market value of the defined benefit assets was $4.996 billion.

The employer contribution was $220.4 million; the fund will pay out $180.9 million in benefits.

As of June 30, the fund had $613 million in mortgage-backed securities.

The asset mix, based on par, as of June 30 was 82% bonds, 8% cash equivalents and 10% mortgage-backed securities.

The custodian for the fund is Morgan Guaranty Trust. Its investment management consultant is Jamison, Eaton & Wood.

Key personnel are Grady L. Patterson Jr., state treasurer; Sandy A. Gee, deputy treasurer; and Michael L. Windham, senior assistant.

## Southwestern Bell Corp.

*as of June 30, 1986

ST. LOUIS — Southwestern Bell Corp.'s pension fund in 1986 made its first commitments to real estate equity (outside its inherited TREET real estate fund from American Telephone & Telegraph Co.) and venture capital.

In real estate, it hired John McMahan Associates for $50 million, Heitman Advisory Corp. for $100 million and Boston Co. Real Estate Counsel for $75 million.

In venture capital, the fund committed $60 million to First Chicago and $40 million to Crossroads Management Partners.

In international, it released Putnam International Advisors after its principals left to start their own firm. The fund split Putnam's $30 million between IDS International and Nomura Capital Management, both hired in December 1985 as its first in

To broaden your ability to meet your clients' needs, call 1-800-222-2725, Ext. 186.

NE The New England
Your Financial Partner

ternational managers along with Fidelity International and Putnam.

It also released equity manager First City Bank of Houston, its only other manager change.

With RepublicBank Dallas, its master trustee, it began a domestic securities lending program.

Larry A. Kohn left as district manager-pension fund to become a vice president in New York of the pension service department of Goldman, Sachs & Co.

His replacement, Charles Weaver, had been Southwestern Bell's manager of investor relations.

The company's total employee benefit assets were $6.209 billion as of June 30, its latest reporting date. They were up 34.9% from the $4.616 billion reported nine months earlier. In the same period, its defined benefits assets rose 28.6% to $5.466 billion, up from $4.25 billion. And its combined savings and 401(k) assets more than doubled to $742 million from $366 million in the nine months.

The company attributed the rise to market growth.

Total employer contributions fell 72% to a company estimated $61 million in 1986 from $217 million the year before.

Benefit payments rose 12.4% in 1986 to a company estimated $217 million from $193 million in 1985.

A dedicated bond portfolio set up in October 1985 and now worth $1.42 billion was the main reason for the contribution decline, company officials reported.

The pension fund has a conservative core, despite moving into new investment areas. In all, 60%, or $3.265 billion, of its defined benefit assets were in indexed stocks and dedicated or immunized bond portfolios as of June 30.

The amount in stock funds tracking the Standard & Poor's 500 stock index and the Wilshire 3000 increased by 36% to $1.845 billion from $1.358 billion as of Sept. 30, 1985. With the increase, the indexed stocks amounted to 55% of its equities and 33% of its total pension assets. The $1.420 billion in dedicated portfolios amounted to 84% of its bond investments and 26% of its total fund.

As of June 30, its pension fund had $169 million in international investments, $282 million invested in real estate, $50 million committed to oil and gas and $100 million committed to venture capital.

The asset mix as of June 30 was 62.1% stocks, 31% bonds 5.3% real estate equity, 0.6% oil and gas, and 1% other.

## Teachers Insurance and Annuity Association — College Retirement Equities Fund

| | ($ millions) |
|---|---|
| Total assets | 52,300 |
| Defined contribution | 52,300 |
| Employer contributions | 2,700 |
| Benefit payments | 760 |

NEW YORK — In November, TIAA-CREF, the nation's largest pension fund, filed resolutions with 10 companies in which it is invested to rescind their poison pill plans and submit future such plans to a shareholder vote.

In July, the fund called on U.S. corporations to withdraw from South Africa as soon as possible, a break from its past policy of seeking those companies to be a positive force for change there.

The fund submitted 28 shareholder resolutions to companies in which it held stock in the first part of its effort to persuade 160 portfolio corporations to withdraw from South Africa.

During 1986, the giant fund averted loss of its tax-exempt status, as was proposed under the House of Representatives' tax reform bill.

The fund also weathered continued criticism from outside groups on the restrictions placed on participant access to assets, among other issues.

In October, Clifton R. Wharton, formerly chancellor of the State University of New York, was named the organization's chairman and chief executive officer. He begins his new job Feb. 1.

During the year ended Sept. 30, the fund grew 30.8% to $52.3 billion from $40 billion. The assets are managed internally.

The fund has $15 billion in indexed stocks. It also increased its commitment to international equities 79%, to $3.4 billion as of Sept. 30 from $1.9 billion a year earlier, due to a combination of market appreciation and increased investments. International fixed income declined 32%, to $100 million from $147 million.

By Sept. 30, real estate equity had grown to $1.28 billion from $1.12 billion the year before, while mortgages climbed to $11.2 billion from $8.92 billion. The fund also has $800 million invested in mortgage-backed securities.

Investments in leveraged buyouts totaled $130 million, but fund officials declined to reveal in which limited partnerships it had invested.

The overall asset mix was 49.3% stocks, 22.9% bonds, 1.9% cash, 2.5% real estate equity, 21.4% mortgages, 1.5% mortgage-backed securities and 0.5% in other investments.

Morgan Guaranty and Citibank are the custodians for TIAA; Bankers Trust and Chase Manhattan are custodians for CREF.

Key personnel for TIAA are J. Daniel Lee Jr., executive vice president, TIAA investments; David B. Bullett, senior vice president, TIAA securities; and John A. Somers, senior vice president, TIAA mortgage and real estate.

Key CREF personnel are James S. Martin, executive vice president, CREF investments; Henry A. Frantzen, senior vice president, CREF international; and C. Oscar Morong, senior vice president, CREF security research.

A special section on leasing will be published June 15.

## Teamsters, Central States, Southeast and Southwest Areas Pension Fund

| | ($ millions) |
|---|---|
| Total assets | 7,070 |
| Defined benefit | 7,070 |
| Employer contributions | 685 |
| Benefit payments | 739 |

CHICAGO — The Teamsters, Central States, Southeast and Southwest Areas Pension Fund added four managers and switched its custodian in the last quarter of 1986.

It hired American National Bank of Chicago and Wells Fargo Investment Advisors to run equity index funds, INVESCO Capital Management Inc. to run an active equity portfolio and MacKay-Shields Financial Corp. to manage fixed income.

In addition, it dropped State Street Bank and Trust Co. as custodian, replacing it with Mellon Bank.

No investment managers were released in the year.

The fund's assets grew 22.4% in the year ended Sept. 30, to $7.07 billion from nearly $5.775 billion.

The fund was still involved in two matters arising from unauthorized use of its property for toxic wastes disposal. The Labor Department sued Equitable Life Assurance Society of the United States on the fund's behalf over the former use of property it owns in Alabama for toxic wastes disposal. Equitable had been manager of the property for the fund.

In the other case, the fund was still trying to reach an agreement with Equitable, a group of nuns and the state of New Jersey over the cleanup of chemical wastes on property the fund sold to the nuns. Equitable was the fund's manager of the New Jersey property.

PepsiCo, after losing a court ruling, paid the Central States $26.1 million in withdrawal liability.

The fund sold the last of its casino investments, the Aladdin Hotel in Las Vegas. At its peak in 1976, the fund had $249 million in Nevada gaming properties.

Also during the year, the fund began using stock index futures.

George Lehr, executive director of the fund, was appointed to the federal government's ERISA Advisory Council and bipartisan task force.

Robert W. Haack, former New York Stock Exchange president and former chief executive of Lockheed, replaced George D. Gould, chairman of Madison Resource, as the Central States Teamsters' asset monitor adviser. Mr. Gould had been designated an undersecretary of the treasury.

Terrence S. Moloznik, the fund's director-asset monitoring, left to join the staff of the International Brotherhood of Teamsters pension fund, based in Washington. His duties were assigned to others now on staff at Central States.

Among the fund's investments as of Sept. 30 were $2.45 billion in indexed stocks, $207 million in indexed bonds and $1.14 billion in dedicated and immunized bonds. A decision made in 1986 to scrap the dedicated and immunized portfolio was never carried out, although the fund now plans to unwind the portfolio.

The fund also was running $38 million in cash equivalents in-house.

The asset mix as of Sept. 30 was 46.5% stocks, 27% bonds, 6.5% cash equivalents, 0.2% real estate equity, 0.1% guaranteed investment contracts, 1.6% mortgages and 18.1% mortgage-backed securities.

**Equity managers:** American National Bank; Bankers Trust; BEA Associates; Equitable; INVESCO; Mellon Capital; Wells Fargo.

**Bond managers:** Fiduciary Trust; Lincoln Income Group; MacKay-Shields; Miller Anderson

*as of Aug. 31

SEATTLE — The Western Conference of Teamsters Pension Trust added two managers in 1986, ending Prudential Insurance Co.'s position as sole manager, even though the insurer still runs the bulk of the assets.

The fund assigned $180 million to Wells Fargo Investment Advisors to run in an equity index fund and $22 million to Fidelity Management Trust to run in active equities. At year end, the fund reported the accounts stood at $240 million and $42 million, respectively. Prudential retains about $7.38 billion in fixed income and real estate.

Also, the fund hired Boston Safe Deposit as its first custodian.

Alan D. Biller & Associates was hired as investment consultant, indicating further management changes may be in the offing in 1987.

The fund's employee benefit assets, all in a defined benefit plan, totaled $7.571 billion as of Aug. 31, an increase of 27.7% from the $5.929 billion reported 11 months earlier.

In addition to the stock index fund with Wells Fargo, the fund had $112 million in a bond index fund, run by Prudential, as of Aug. 31; $6.44 billion in a dedicated portfolio, which includes $1.94 billion in what the sponsor calls a fixed dollar general insurance account, all with Prudential; $663 million in real estate equity; and $152 million in mortgages. The fund holds some mortgage-backed securities in its bond index fund, but a breakdown of the securities was not available.

The asset mix as of Aug. 31 was 2.7% stocks, 60.9% bonds, 8.8% real estate equity, 2% mortgages and 25.6% fixed dollar general insurance account.

**Equity managers:** Fidelity; Wells Fargo.

**Bond manager:** Prudential.

**Real estate manager:** Prudential.

## Tennessee Consolidated Retirement System

| ($ millions) | |
|---|---|
| Total assets | 5,340 |
| Defined benefit | 5,340 |
| Employer contributions | 293 |
| Benefit payments | 168 |

NASHVILLE, Tenn. — Tennessee Consolidated Retirement System increased its commitment to international by 340% to $176 million as of Sept. 30 from $40 million a year earlier because of a new state law allowing the fund to invest up to 11% of assets in foreign securities. The previous lid on foreign investment was 1% of assets.

The fund has $94 million in international equities and $82 million in international fixed income.

The fund put $100 million into mortgage-backed securities because officials said the sector was more attractive than in previous years.

Assets of the fund jumped 25.7% to $5.34 billion as of Sept. 30 from $4.249 billion the previous year.

All of the fund's assets are managed in-house. As of Sept. 30, the fund's asset mix was 35% stocks, 31.5% bonds, 10% cash equivalents, 20.5% mortgage-backed securities and 3% international equities. The fund uses stock options.

Chase Manhattan is custodian.

Dewey Collins Jr. is chief investment officer.

## Employees Retirement System of Texas

| ($ millions) | |
|---|---|
| Total assets* | 4,310 |
| Defined benefit | 4,310 |
| Employer contributions | 158 |
| Benefit payments | 171 |

*as of Aug. 31, 1986

AUSTIN, Texas — The Employees Retirement System of Texas increased its commitment to mortgage-backed securities by five percentage points during the 12 months ended Aug. 31 to $534 million to take advantage of favorable yields and the widening spreads with U.S. Treasury securities.

Total assets of the fund increased 30.6% to $4.31 billion as of Aug. 31 from $3.3 billion on Sept. 30, 1985.

All of the system's assets are managed internally. INVESCO Capital Management is the system's equity adviser. Duff & Phelps is as fixed-income adviser. Wilshire Associates is consultant.

The asset mix as of Aug. 31, 1986 was 17% stocks, 67% bonds, 2% cash equivalents and 14% mortgaged-backed securities.

Clayton T. Garrison is executive director; Nancy G. Goerdel is director of investments; Stephen P. Arnold is assistant director of investments.

## Teacher Retirement System of Texas

| Total assets* | 13,198 |
| Defined benefit | 13,198 |
| Employer contributions | 676 |
| Benefit payments | 729 |

*as of Aug. 31, 1986

AUSTIN, Texas — Clark Manning, deputy executive secretary of the Teacher Retirement System of Texas, announced in October he was leaving to become head of a new Lomas & Nettleton Co. investment management subsidiary in Dallas. Mr. Manning had served nearly 14 years with the system. He was replaced by Joe Perrone, assistant investment officer-real estate.

In addition Bob Davis, the system's assistant investment officer-fixed income, announced his intention to retire.

Early in the year, the Texas state auditor issued a report clearing the system of any wrongdoing in connection with a $172 million bond swap in 1984. The special audit was prompted by a complaint from a former fund employee.

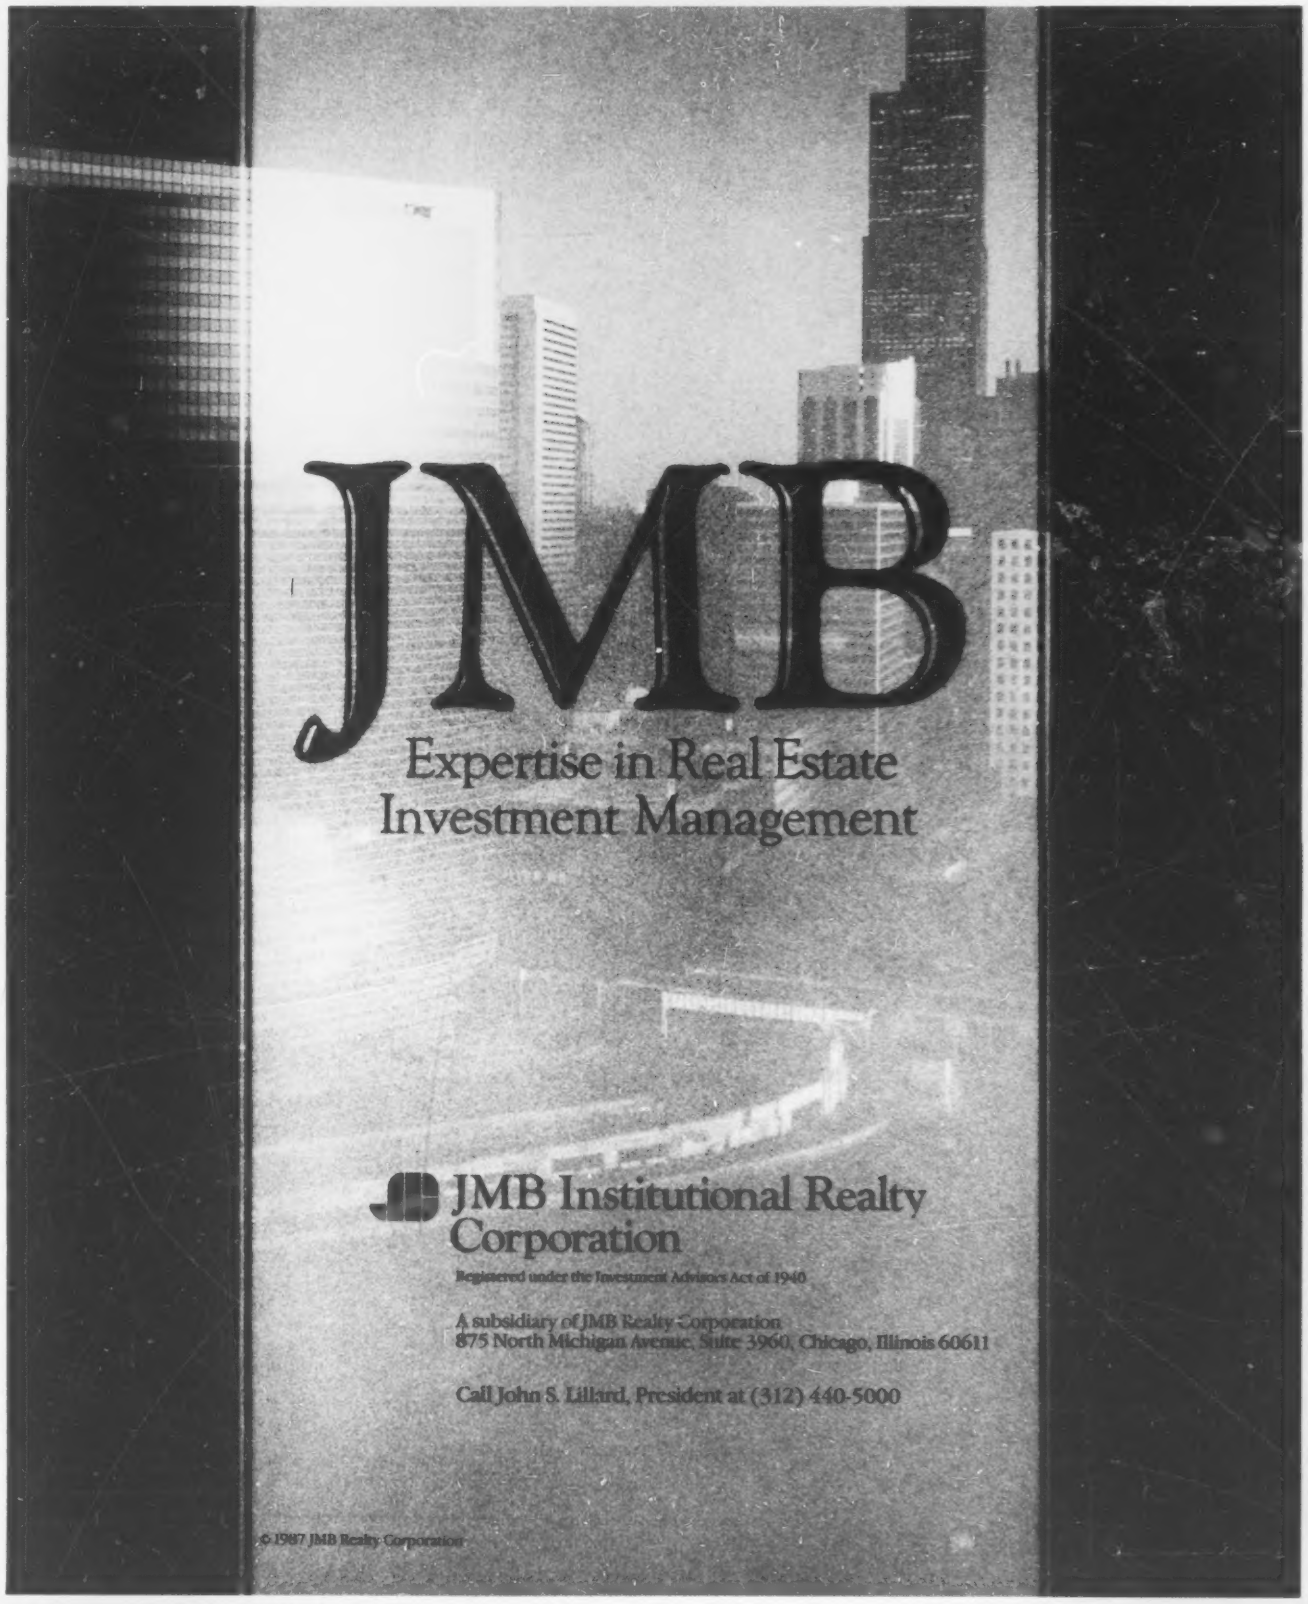
Texas Teachers closed a more than $116 million mortgage investment in two major hotel properties and funded a $58 million commitment to mortgages by the third quarter of 1986. In the four years since the fund started its program, it has invested approximately $1.6 billion.

Total assets increased 18% to $13.198 billion as of Aug. 31, from $11.188 billion as of Sept. 30, 1985.

All the system's assets are managed internally. Thorndike, Doran, Paine & Lewis serves as investment management adviser.

The system had $1.057 billion invested in mortgages and $2.446 billion in mortgage-backed securities.

The asset mix as of Aug. 31 was



30% stocks, 42.2% bonds, 2.4% cash equivalents, 6.9% mortgages and 18.5% mortgage-backed securities.

Bruce Hineman is executive secretary.

## Textron Inc.

| | ($ millions) |
|---|---|
| Total assets | 2,502 |
| Defined benefit | 1,930 |
| Profit-sharing | 131 |
| Thrift or savings | 441 |
| Benefit payments | 95 |

PROVIDENCE, R.I. — Textron Inc.'s employee benefit assets totaled $2.502 billion as of Sept. 30. That included $1.93 billion in defined benefit assets; $131 million in profit-sharing assets; and $441 in thrift, savings and 401(k) assets. The latter was as of Aug. 31.

Benefit payments for 1986 were $95 million.

A total of $1.177 billion is managed internally: $350 million in equity, $490 million in fixed income, $195 million in short-term, and $142 million in other.

The fund has $15 million in oil and gas; $70 million in leveraged buy-outs; $20 million invested in real estate equity; and $60 million in mortgages.

The approximate asset mix of pension assets as of Sept. 30 was 41.7% stocks, 36.3% bonds, 11.9% cash, 1% real estate, 6.2% mortgages and 2.9% other.

**Equity managers:** Alliance; Batterymarch; Sanford Bernstein; Continental Illinois; Delaware Advisers; Harris Trust; HT Investors; Manufacturers National Bank of Detroit; Thorndike, Doran; Trinity.

**Bond managers:** Alliance; Continental Illinois; Harris Trust; HT Investors; NBD Detroit.

**Real estate:** Prudential.

Bankers Trust is master trustee.

Richard Watson, vice president-pension investments, oversees the fund.

## Union Carbide Corp.

| | ($ millions) |
|---|---|
| Total assets | 3,200 |
| Defined benefit | 2,880 |
| Thrift or savings | 300 |
| Other | 20 |
| Employer contributions | 30 |
| Benefit payments | 200 |

DANBURY, Conn. — Total assets for the Union Carbide Corp. pension fund increased 11% in the year ended Sept. 30, to $3.2 billion from $2.88 billion.

Union Carbide terminated its defined benefit plan, recapturing $500 million of an $800 million surplus and putting $300 million in a continuing plan.

Fund executives during the period also created a thrift or savings plan, which had $300 million as of Sept. 30.

As part of the termination, Carbide negotiated a new form of annuity contract under which Prudential Asset Management Co. guarantees payment of the annuities to vested participants, but Carbide retains full discretion over the investment management of the assets. Under this arrangement, Carbide benefits from investment returns above those required to provide the annuities.

Also, James A. O'Connell retired as director of pension fund investment and was replaced by M.F. Hoben, who had been manager-trust investments at Exxon Corp.

As of Sept. 30, most of the assets were managed internally — $2 billion in fixed income, $400 million in equities, $100 million in short-term instruments and $90 million in real estate.

Union Carbide has $90 million in real estate equity. The fund uses stock options and stock index futures.

The asset mix as of Sept. 30 was 17% stocks, 77% bonds, 3% real estate equity, 1% cash equivalents and 2% annuities.

Manufacturers Hanover is master trustee.

Key personnel are Mr. Hoben; R.B. Burstein, bond manager; and L.R. Fuller, equity manager.

## Unisys Corp.

| | ($ millions) |
|---|---|
| Total assets | 3,880 |
| Defined benefit | 2,440 |
| Thrift or savings | 241 |
| 401(k) | 1,199 |
| Employer contributions | 123 |
| Benefit payments | 166 |

DETROIT, Mich. — The Unisys Corp. pension fund is a new entry to *Pensions & Investment Age's* listing of the nation's largest pension funds.

Unisys was formed from the acquisition last year by Burroughs Corp. of Sperry Corp.

Although company officials had not yet decided exactly how the two plans were going to be merged, *P&I Age* combined the assets for this listing at the request of Unisys officials.

During the past year, one equity manager — Metropolitan Life Insurance — was terminated by Sperry when it phased out handling of separate accounts. The company hired two equity managers — State Street Research & Management and Chase Manhattan Bank, which is using stock index futures to hedge Sperry's $326 million in indexed stocks.

The combined employee benefit assets totaled $3.88 billion as of Sept. 30, a 17.8% increase from the $3.295 Sperry and Burroughs had combined a year ago.

Sperry's employee benefit assets climbed 12.4% for the year through Sept. 30, to $2.81 billion from $2.5 billion. Of the $2.81 billion, $1.61 billion was in a defined benefit plan and $1.2 billion was in a 401 (k) plan.

Sperry's employer contribution was $77 million, and its benefit payments, $126 million.

Sperry manages $1.028 billion in house: $592 million in equities; $323 million in fixed income; $100 million in short-term instruments; and $13 million in other investments, mainly venture capital.

Some $326 million of its assets are in indexed stocks, $217 million in dedicated or immunized bond funds, $891 million in guaranteed investment contracts, $112 million in international equities, $15 million in international bonds, $3 million in other international investments, $10 million in venture capital and $5 million in mortgage-backed securities.

The asset mix as of Sept. 30 was 41% stocks, 19% bonds, 8% cash equivalents and 32% GICs.

Burroughs' employee benefit assets increased 34.8% to $1.072 billion in the year ended Aug. 31, from $795 million. Of the total, $831 million is in defined benefit plans and $241 million in thrift or savings plans.

Employer contributions were $46 million and benefit payments, $40 million.

Burroughs hired one fixed-income manager, M.D. Sass Investors, during the year.

The Burroughs fund has $252 million in indexed stocks; $84 million in dedicated or immunized bond funds; $12 million in GICs; $19 million in venture capital; $78 million in real estate equity; and $68 million in mortgage-backed securities.

The asset mix as of Aug. 31 was 70% stocks, 13% bonds, 6% cash equivalents, 9% real estate equity, and 2% venture capital. Fund officials divide mortgage-backed

## UAL Inc.

| ($ millions) | |
|---|---|
| Total assets | 2,600 |
| Defined benefit | 1,600 |
| Defined contribution | 1,000 |
| Employer conirbutions | 86 |
| Benefit payments | 110 |

CHICAGO — UAL Inc. switched to a mutual fund-like investment management approach for the then-$925 million United Air Lines Pilot Variable plan. As part of the switch, developed with Frank Russell Co., United hired nine new managers, retained four and dropped six.

The managers hired, and their portfolios, were: Frank Russell Trust Co., government fixed income; Boston Safe Deposit & Trust Co., Standard & Poor's 500 stock index fund; BEA Associates Inc. and Sanford C. Bernstein Inc., intermediate fixed income; Barrow Hanley Mewhinney & Strauss, income- and value-oriented equities; Jundt/Capen Associates, growth-oriented equities; Geo Capital Corp., Verus Capital and Jundt/Capen, aggressive special equities; Mercator Asset Management, international equities; and Boston Safe, money market fund.

The managers retained, and their portfolios, were: Thorndike Doran Paine & Lewis, domestic growth equities; Capital Guardian Trust Co., international equities; Discount Corp. of New York, short-term securities; and Trinity Investment Management Corp., income- and value-oriented equities.

The managers dropped, and their portfolios, were: Batterymarch Financial Management, Jennison Associates Capital Corp. and Lincoln Capital Management Co., all in domestic equities; G.T. Capital Management Inc., international equities; Wells Fargo Investment Advisors, S&P 500 stock index fund; and Harris Trust and Savings Bank, government fixed income.

The variable plan also hired Frank Russell Trust as master trustee, replacing National Bank of Detroit, and Boston Safe for record keeping, previously handled internally.

UAL postponed indefinitely the termination of two defined benefit plans covering pilots and flight attendants.

Lawsuits filed by the two employee groups delayed the terminations. Eventually, the drop in interest rates, increasing the present value of accrued liabilities, meant termination was no longer an attractive alternative for the airline.

The company did complete the termination of three other plans during 1985, recapturing $136.8 million.

UAL officials had announced in 1985 they intended to recapture $962 million through the termination of five plans then with $2.6 billion total assets.

During 1986, the company hired David J. Dykstra, formerly manager of insurance and pensions of Midcon Corp., to replace Robert J. Gillette as director-pension assets.

Mr. Gillette left to join Frank Russell Co. as a vice president-client executive and senior investment consultant.

As of Sept. 30, UAL had employee benefit assets totaling $2.6 billion, down 23.8% from the $3.411 billion as of June 30, 1985. Mr. Dykstra attributed the decline to the three plan terminations.

Defined benefit assets declined 43.8% because of the terminations, while defined contribution assets increased 76.7%. Mr. Dykstra attributed the increase in defined contribution assets to strong investment performance and increased contributions.

Employer contributions were $86 million and benefit payments, $110 million.

UAL manages $700 million in defined benefit assets internally, all in fixed income. The defined benefit plan also has $700 million invested in a stock index fund and $200 million in real estate equity.

As of Sept. 30, the approximate asset mix of defined benefit assets was 44% stocks, 44% bonds and 12% real estate equity.

**Equity manager:** Wells Fargo.

**Real estate managers:** LaSalle Partners; PM Realty; RREEF.

National Bank of Detroit is the master trustee for the defined benefit plan. Frank Russell is the fund's consultant.

Mr. Dykstra oversees the investment management of the employee benefit assets.

## United Mine Workers of America Health & Retirement Funds

| ($ millions) | |
|---|---|
| Total assets | 4,223 |
| Defined benefit | 4,223 |
| Employer contributions | 500 |
| Benefit payments | 400 |

WASHINGTON — The United Mine Workers of America Health & Retirement Funds underwent a major restructuring during 1986, terminating 10 investment managers and hiring nine.

Five equity managers were dropped: Batterymarch Financial Management; Torray Clark; Pioneering Management; Thompson, Siegel & Walmsley; and Tower Capital Management.

Those five were replaced with eight: Barrow, Hanley, Mewhinney & Strauss; Brignoli, Curley & Roberts; Concord Capital Management; Dreman & Embry; Lazard Freres Asset Management; Loomis, Sayles; The Windsor Fund; and Wells Fargo Investment Advisors.

In fixed income, two managers were dropped: Lehman Management and T. Rowe Price Associates.

The fund also dropped Bankers Trust as cash manager, an act that may have been prompted by cash-flow considerations.

The multiemployer fund grew 24.3% during the 12 months ended Sept. 30, to $4.223 billion from $3.398 billion. Growth was impeded somewhat when a separate plan for construction workers was established with $80 million of its assets.

Employer contributions during 1986 totaled $500 million and

benefit payments, $400 million.

The plan runs about $550 million internally, $500 million in a bond indexing program and $50 million in short-term assets.

It also has $300 million in indexed stocks; $1.6 billion in dedicated or immunized bonds; $230 million in real estate equity; and $100 million in mortgage-backed securities.

It uses fixed-income futures and applies dynamic hedging on $500 million of its equity assets.

The asset mix as of Sept. 30 was 37% stocks, 49% bonds, 7% cash equivalents, 5% real estate equity and 2% mortgage-backed securities.

**Equity managers:** Argus Investors; Barrow, Hanley, Mewhinney & Strauss; Brignoli, Curley & Roberts; Concord Capital; Denver Investment; Dreman & Embry; Lazard Freres; Loomis, Sayles; Warburg, Pincus; Wells Fargo; Windsor Fund.

**Bond managers:** Criterion Investment; Loomis, Sayles; J.P. Morgan; STW Fixed Income.

**Real estate managers:** Equitable; Goldman, Sachs; Metropolitan Life; Prudential; RREEF; State Street; TCW Realty.

The fund uses Boston Safe Deposit & Trust Co. as custodian.

Key personnel are Jerry N. Clark, executive director, and Charles S. Stephens, director of investments and treasurer.

## United Nations Joint Staff Pension Fund

| | ($ millions) |
|---|---|
| Total assets | 5,884 |
| Defined benefit | 5,884 |
| Employer contributions | 340 |
| Benefit payments | 350 |

UNITED NATIONS — Pierre Henchoz replaced Timothy P. Prince as chief of the investment management section at the United Nations Joint Staff Pension Fund. Mr. Henchoz previously was with Banque Cantonal Vaudoise, Lausanne, Switzerland.

Assets for the fund increased 35.1% in the year ended Sept. 30, to $5.884 billion from $4.354 billion a year earlier.

Both employer contributions and benefit payments were lower in 1986: contributions were down 8.8% to $340 million and benefits payments were down 4.4% to $350 million.

The fund is internally managed except for $580 million in real estate assets. Names of its real estate advisers were not available.

Of the internally managed assets, $3 billion is in equity; $1.77 billion in fixed income and $534 million in short-term assets.

Fiduciary Trust Co. of New York provides investment advice and is the fund's custodian.

The fund had nearly half of its assets invested overseas: $1.48 billion in equities, $1.1 billion in fixed income; and $175 million in short-term and real estate investments. This represents an 85% increase from the previous year, which fund officials attributed to market appreciation and an increased allocation.

As of Sept. 30, the fund's asset mix was 50% stocks, 30% bonds, 9% cash equivalents, and 11% real estate equity.

In addition to Mr. Henchoz, key personnel are J. Richard Foran, controller, and Henry Ouma, deputy chief, investment management section.

## United Technologies Corp.

| | ($ millions) |
|---|---|
| Total assets | 6,108 |
| Defined benefit | 4,758 |
| Thrift or savings | 1,350 |
| Employer contributions | 360 |
| Benefit payments | 195 |

HARTFORD, Conn. — United Technologies Corp. in November agreed to provide credits of $90 million to the Department of Defense because two of its pension plans reached the full-funded limitation status.

In October, the fund cut back international equity because it was 70% overweighted with respect to its target of 20%.

Employee benefit assets at United Technologies increased 18.6% to about $6.1 billion as of Sept. 30 from $5.15 billion a year earlier.

Defined benefit assets increased 17.5% to about $4.8 billion as of Sept. 30 from about $4 billion a year ago.

Managers terminated during the year include five for equity, Connecticut National Bank, CIGNA, HLM, Management Asset and Olympic Capital Management; one for fixed income, Miller Anderson Sherrerd; two for international equity managers, Putnam International Advisors and Batterymarch Financial Management; and two for real estate, Citibank and InterFirst Investment Management.

The fund hired its first international fixed-income managers, four additional venture capital managers, two domestic fixed-income managers and two real estate managers.

It has $265 million in real estate equity; $30 million in mortgage-backed securities; $291 million in indexed stocks; $33 million in a dedicated or immunized bond portfolio; $576 million in international equities; $132 million in international fixed income; $26 million in venture capital; $10 million in oil and gas; and $70 million in leveraged buy-outs.

The fund uses stock options and stock index futures. Portfolio insurance or dynamic hedging is used on a nominal amount of the assets.

The asset mix as of Sept. 30 was 35% equities, 29% annuities, 11% fixed income, 2% cash equivalents, 12% international equities, 6% real estate equity, 3% international fixed income and 2% venture capital and leveraged buy-outs.

("Nominal" investments in mortgage-backed securities, oil and gas, and GICs were not accounted for in the asset mix.)

**Equity managers** (Domestic): Bankers Trust; Brignoli, Curley & Roberts; Citibank; Fidelity; Hellman Jordan; Jennison Associates; Lehman Management; Nicholas-Applegate; Sanford Bernstein; Trinity Investment; TCW; Value Line; Wertheim; Wright Investors.

(International): A&S Bleichroeder; ABD; Prudential; Swiss Bank PMI; Schroder Capital; State Street.

**Fixed-income managers** (Domestic): CIGNA; Delaware; Jennison; Loomis Sayles; Morgan Stanley; MacKay-Shields; Neuberger & Berman; Scudder Stevens; TCW; Travelers; W.R. Huff.

(International): First Chicago; N.M. Rothschild.

**Real estate managers:** Aetna; Babson; CIGNA; Eastdil; Equitable; Prudential; Public Storage; Security Capital.

**Venture capital managers:** Abacus; Advanced Technology; Bridge Capital; Charles River; Crossroads; HLM Partners; Jafco Japan-U.S. Venture; Morgan Holland; Narragansett; Sprout; TCW; Venture Lending; Venturtech II.

**Cash:** Payden & Rygel; Aetna GIC.

Citibank is custodian and Frank Russell Co. is investment management consultant.

Key investment personnel are Beverly L. Hamilton, vice president pension investments; and Frances M. Crimbly, Edgar O. Cheney and Carl W. Strayer, directors-pension investments.

## U S WEST Inc.

| | ($ millions) |
|---|---|
| Total assets | 7,350 |
| Defined benefit | 6,350 |
| Defined contribution | 1,000 |
| Employer contributions | 150 |
| Benefit payments | 300 |

ENGLEWOOD, Colo. — U S WEST Inc. sharply increased its alternative investments in the year ended Sept. 30.

Its international investments rose more than tenfold. Its venture capital commitment leaped more than 300%. And with the hiring of Trust Co. of the West, it raised its commitment to oil and gas to about $50 million, up from just $1 million it had with Citibank as a result of the Bell system breakup.

In addition, its real estate equity investments rose 35% to $290 million from $215 million for the year ended Sept. 30. That increase excludes a more recent $240 million real estate development in Jersey City, N.J., in which U S WEST will provide $100 million in equity, assume a $60 million loan and seek $80 million in additional loans for the rest of the financing. The latest development will boost U S WEST's real estate investments to a total of $530 million, giving the fund a 146% increase since Sept. 30, 1985.

Also, U S WEST added nearly $1 billion to a dedicated bond portfolio, nearly doubling its size to $2.026 billion in the year ended Sept. 30.

In international, it hired Boston Co. to run a $100 million international stock index fund. Also, it moved an international equity portfolio to Oechsle Advisors from Putnam International. As of Sept. 30, its international investments totaled $570 million: $500 million in equities and $70 million in fixed income. That's up from $53 million, all in equities, a year earlier.

U S West's venture capital commitments were at $200 million as of Sept. 30, up from $47 million in the prior year, although they haven't all been funded yet.

In other manager changes, it hired Payden & Rygel to run short-term cash and Moran Asset Management to run equities, while it released First Interstate and United Capital Management, respectively, fixed-income and equity managers.

In the year ended Sept. 30, U S WEST's employee benefit assets rose 29.5% to $7.35 billion from $5.675 billion. Its defined benefit assets grew 28% to $6.35 billion from $4.964 billion, while its combined defined contribution and profit-sharing assets increased 40.6% to $1 billion from $711 million. U S WEST officials attributed the increases in both funds to market performance.

Contributions dropped 26% to $150 million in 1986 from $204 million in 1985. In the same period, its benefit payments rose 48.5% to $300 million from $202 million.

Among its other investments, U S WEST runs $30 million of its pension assets in-house in venture capital. Also, it has $1 billion in indexed stocks and uses stock-index futures.

The asset mix as of Sept. 30 was 50% domestic stocks, 33% domestic bonds, 1% cash equivalents, 5% real estate equity, 10% international and 1% venture capital.

**Equity managers** (domestic): Brignoli, Curley & Roberts; Capital Guardian; Concord; Denver Investment Advisors; First Manhattan; David J. Green; Mellon Capital; Moran; PRIMECAP; Sarofim; Trinity; Wells Fargo.

(International): Boston Co.; First Chicago; Oechsle.

**Bond managers:** Jennison; National Investment Services of America.

**Real estate managers:** Copley; Equitable; Jones Lang Wootton; LaSalle; Security Capital; TCW.

**Short-term investment manager:** Payden & Rygel.

**Oil and gas managers:** Citibank; TCW.

Boston Safe Deposit & Trust is master trustee.

Key investment staff members are J.R. Belquist and M.B. Gorrell, both managers-trust investments, and James J. Biundo, director-trust investments.

## USX Corp.

| | ($ millions) |
|---|---|
| Total assets | 9,400 |
| Defined benefit | 9,000 |
| Thrift or savings | 400 |
| Employer contributions | 0 |
| Benefit payments | na |

PITTSBURGH — The internal managers of the U.S. Steel and Carnegie Pension Fund assumed control of the $600 million pension fund for employees of Marathon Oil Co., which was acquired by USX Corp (formerly U.S. Steel Corp.) four years ago.

Marathon's managers, released when the internal team assumed control, were: The Boston Co. Institutional Investors; IDS Advisory Group; Jennison Associates; Lord Abbett & Co.; and The Vanguard Group.

Although the Marathon fund will remain a separate entity, its assets are included in the totals above.

USX's employee benefit assets grew 17.5% to $9.4 billion as of Sept. 30 from $8 billion a year earlier. Defined benefit assets increased 20% to $9 billion from $7.5 billion a year earlier while thrift or savings plan assets declined 20% to $400 million from $500 million.

The fund has $135 million in international equities, $20 million in oil and gas, $60 million in mortgages and $500 million in mortgage-backed securities. It uses stock options and stock index and fixed-income futures.

The asset mix as of Sept. 30 was 60% stocks, 30% bonds and 10% cash equivalents. Mortgages and mortgage-backed securities are included in bonds.

The fund's master custodians are Morgan Bank, U.S. Trust Co. and Chase Manhattan.

Gary A. Glynn is the president of the U.S. Steel and Carnegie Pension Fund; John G. Van Deu-

The agonizing account of the pension investments officer who had a whole stack of reasons for not meeting with an international investment manager.

So he never learned why Henderson has become one of the largest investment managers in the world. And, with over 50 years of international investment experience, one of the oldest.

He never discovered that Henderson has a consistently above-average track record of investment performance. Not just in one particular year or area. But consistently over time and in key money markets around the world.

And he never found out how Henderson, with a new U.S. office, is uniquely qualified to help funds invest worldwide. For profits—and for invaluable protection against the fluctuations of national economies and currencies.

Yet all it would have taken is 30 minutes of his time. (For Henderson respects the value of managers' time, as well as the value of their funds.)

Had he taken the time, perhaps he wouldn't have made the investment decisions he did. A possibility that would have spared him the experience of watching the value of several investments collapse.

Of course, there's still time for you.

We'll call to set up an appointment.

For knowing what we can do for you just might prove to be an ace up your sleeve.

## Utah State Retirement Board

| | ($ millions) |
|---|---|
| Total assets | 2,688 |
| Defined benefit | 2,688 |
| Employer contributions | 160 |
| Benefit payments | 60 |

SALT LAKE CITY — The Utah State Retirement Board increased the amount it has in indexed equities by 54% during the year ended Sept. 30. Indexed stocks totaled $400 million, up from $260 million the previous year.

Indexed stocks are managed internally by the board as a core portfolio.

The board also boosted its commitment to venture capital by $5 million to a total of $20 million.

Its equity real estate holdings were increased to $187 million from $139 million the previous year.

Total assets of the fund increased 24% to $2.688 billion in the year ended Sept. 30, from $2.16 billion.

Internally managed assets total $1.969 billion, of which $492 million is in equities, $1.056 billion in fixed income, $346 million in short-term investments and $75 million in other investments.

The fund also has $23 million in mortgages and $109 million in mortgage-backed securities.

It uses stock options.

The asset mix of the fund as of Sept. 30 was 41% stocks, 35% bonds, 12% cash equivalents, 7% real estate equity, 1% mortgages and 4% mortgage-backed securities.

**Equity advisers:** Atalanta/Sosnoff; Capital Consultants; Smoot, Miller & Cheney; Value Line; Wasatch Advisors.

**Real estate adviser:** F.I.A. Associates.

Chemical Bank is the fund's custodian.

W. Dan Smith is the investment officer; Richard Cherry is assistant investment officer; and Bert D. Hunsaker is executive director.

## Virginia Supplemental Retirement System

| | ($ millions) |
|---|---|
| Total assets | 6,296 |
| Defined benefit | 6,296 |
| Employer contributions | 650 |
| Benefit payments | 325 |

RICHMOND, Va. — In 1986, executives of the Virginia Supplemental Retirement System continued an investment management overhaul operation begun in 1985. The fund farmed out a significant amount of its in-house assets, dropping the total managed internally to $450 million in equity from $1.822 billion in equity, fixed income and short-term assets.

The fund started out 1986 hiring four new real estate managers, which brought its roster of real estate managers to eight.

The new realty hirings are: Eastdil Realty Inc., J.P. Morgan Investments Management; New England Mutual Life Insurance Co.; and Phoenix Mutual Life Insurance Co. The fund also gave a fifth new account to existing manager, Equitable Real Estate Investment Management.

Early in the year, the fund hired Sovran Bank as a fixed-income manager. In November, another five fixed-income managers were hired: Sanford C. Bernstein & Co. Inc.; Lehman Management Co. Inc.; McKay-Shields Financial Corp.; Merganser Capital Management Corp.; and Security Capital Management.

Last July, the fund also added Rosenberg Institutional Equity Management as an equity manager, and, in an unconnected move, terminated an equity account run by Putnam Advisory Co. Inc.

The fund grew 40% during the 12 months ended Sept. 30 to $6.296 billion from $4.509 billion the same time in 1985. The growth, helped by a $320 million positive cash flow, was primarily the result of a favorable investment experience, according to a fund official.

Employer contributions for 1986 remained unchanged from 1985 at $650 million. Benefits paid out to retirees were down slightly, 7.1%, to $325 million from $350 in 1985.

The fund has $1.408 billion in indexed stocks, an increase over the previous 12 months of 58%; $276.7 million in real estate equity; $33.2 million in mortgages; and $200 million in mortgage-backed securities.

It uses stock index futures and fixed-income futures.

Depite all the manager changes, the total asset mix of the fund changed little over the 12-month period. On Sept. 30, the asset mix was 57.1% equities; 28.1% bonds; 6.7% cash equivalents; 4.4% real estate equity; 0.5% mortgages and 3.2% mortgage-backed securities.

Sovran Bank is the custodian.

The fund uses Wilshire Associates and Rogers, Casey & Barksdale as investment consultants.

**Equity managers:** Batterymarch; Brignoli, Curley & Roberts; Concord; Corinthian; Delaware; GAMCO; Hellman, Jordan; Jundt/Capen; IDS Advisory; Lincoln Capital; McKenzie Walker; Mellon; Nicholas-Applegate; Pacific Financial; Rosenberg; Schafer Capital; Donald Smith & Co.; Wells Fargo Investment Advisors; TCW.

**Fixed-income managers:** Sanford C. Bernstein; Lehman; Massachusetts Financial Services; McKay-Shields; Merganser; Security Capital; Sovran Bank.

**Real estate managers:** Eastdil; Equitable; LaSalle; J.P. Morgan; New England Life; Phoenix Mutual; Prudential; RREEF.

Key personnel are: Timothy R. Barron, director of investments; Gary Allen, director of internal asset management; and Tim Hassard, real estate officer.

## Washington State Investment Board

| | ($ millions) |
|---|---|
| Total assets | 8,100 |
| Defined benefit | 8,100 |
| Employer contributions | 370 |
| Benefit payments | 470 |

OLYMPIA, Wash. — As of Sept. 30, the Washington State Investment Board reported $8.1 billion in defined benefit assets, an increase of 20% from the previous year.

Contributions to the plan for 1986 were $370 million; benefit payments totaled $470 million.

The board manages $3.647 billion internally: $660 million in equity; $2.65 billion; and $337 million in short-term instruments.

It has $2.1 billion in indexed stocks and $505 million in indexed bonds; $190 million in venture capital; $560 million in leveraged buy-outs; $226 million in real estate equity; $523 million in mortgages; and $612 million in mortgage-backed securities.

The fund uses stock options, stock index futures, bond options and fixed-income futures.

The asset mix as of Sept. 30 was 45% stocks, 27% bonds, 4% cash equivalents, 3% real estate equity, 6% mortgages, 7% mortgage-backed securities and 8% venture capital and leveraged buy-outs.

During the year, the fund dropped Batterymarch Financial Management and Torray Clark & Co. as equity managers.

**Equity managers:** Columbia; Hotchkis & Wiley; Mellon Capital (passive); Schafer; Donald Smith; United; Wells Fargo (passive).

**Real estate managers:** Copley; Equitable; Pacific Mutual; RREEF; Smith Barney.

| Benefit payments | 365 |

PITTSBURGH — Thomas G. Scannell was appointed director-pension investments at Westinghouse Electric Corp., replacing T.A. Gudiness, who retired.

Total employee benefit assets increased 13% to $4.8 billion as of Sept. 30, up from $4.25 billion a year earlier.

During the year, the fund increased its equity and fixed-income exposures, taking money from cash equivalents. The fund's asset mix as of Sept. 30 was 28% stocks, 48% bonds, 6% cash, 14% real estate equity and 4% mortgage-backed securities.

Much of the fund is managed internally, by Westinghouse Pension Investments, but Mr. Scannell would not disclose the amount.

The fund uses stock options and stock index futures, and has $1.25 billion invested in dedicated or immunized bond funds, $560 million in real estate equity, $125 million in mortgages and $30 million in venture capital. Portfolio insurance is used to protect about $140 million.

**Equity managers:** Brignoli, Curley & Roberts; Manufacturers Hanover; Pittsburgh National Bank, Provident Capital; Stralem.

**Bonds:** Equitable; MacKay-Shields; Pioneering; Putnam.

**Real Estate:** Citibank; Equitable; First Chicago; Mellon.

Mellon Bank is custodian; Wilshire Associates is the investment management consultant.

Mr. Scannell is the key investment officer.

## State of Wisconsin Investment Board

| | ($ millions) |
|---|---|

| Defined benefit | 11,400 |
| Defined contribution | 2,100 |
| Employer contributions | 305 |
| Benefit payments | 360 |

MADISON, Wis. — The Wisconsin State Board of Investment re-entered the venture capital arena in June, committing $11.5 million through three firms.

Bridge Capital Investors II received $6 million; Davis Venture Partners, $1.5 million; and Olympic Venture Partners II, $4 million.

The fund also increased its commitment to Madison Capital Corp., which had been given $400,000 initially and will receive up to $5 million during the next few years.

The fund, which is internally managed and therefore lists no managers, is involved in seven other venture capital partnerships for a total commitment of $60 million.

During the year, the fund also participated in Farm Credit investments — short-term securities with maturities of six months to five years. It invested "several hundred million" in the securities.

A study on the cost of divesting South Africa-related stocks was completed by SEI Funds Evaluation Service in February and the state Assembly and Senate later received legislation on a shareholder bill, which would have required the fund as a shareholder to encourage companies to get out of South Africa.

The bill passed the state Assembly but died weeks later in the Senate.

The total assets of the retirement system increased 25% to $13.5 billion for the 12 months ended Sept. 30 from $10.8 billion. Defined benefit assets increased 23.9% to $11.4 billion from $9.2 billion and defined contribution assets were up 31.3% to $2.1 billion from $1.6 billion.

The employer contribution was $305 million, up 32.6% from $230 million; benefits paid out during 1986 were $360 million, up 30.9% from $275 million.

In addition to its $60 million venture capital commitment, the fund has $50 million invested in Canadian fixed income; $200 million in leveraged buy-outs; $350 million in real estate equity; $150 million in mortgages and $500 million in mortgage-backed securities.

The investment board uses fixed-income futures.

The asset mix as of Sept. 30 was 31% stocks, 51% bonds, 15% cash equivalents and 3% real estate equity. Mortgage-backed securities are included in bonds and venture capital, in equities.

Morgan Guaranty is custodian.

Kenneth E. Codlin is executive director; Pat Lipton is executive assistant.

# Touchdown!

The Super Bowl winner has made it to the top with consistent performance over a long, tough season.

Axe has shown the same persistence and professionalism in meeting client objectives for more than 50 years.

The players have hung up their cleats. But at Axe, our money managers keep scoring touchdowns all year 'round.

# Announcing a major change in corporate and investment real estate.

Merrill Lynch Commercial Real Estate is now L. J. Hooker International

Introducing L. J. Hooker International, a new and powerful combination of professionals, expert in serving corporate, institutional and private investor real estate needs, backed by a parent firm with proven international real estate capabilities.

We're part of Hooker Corporation, Australia's largest real estate company with 58 years of experience in all aspects of commercial and residential real estate.

We also have ties to Hooker/Barnes USA, the commercial and residential real estate development subsidiary.

As the newest member of this worldwide family, L. J. Hooker International provides effective corporate and investment real estate services, consulting, real estate finance services and more–with international capabilities and resources to generate maximum results.

So when you're looking for an experienced corporate and investment real estate firm, look to L. J. Hooker International. Our name may be new, but it's built on a solid foundation.

RETIREMENT FUND MANAGERS:

HOW WILL TAX REFORM AFFECT YOUR PLAN AND ITS PARTICIPANTS?

Turn to The Hartford for fast, accurate, no-obligation answers to your questions about tax reform.

You can rely on our reputation for aggressively and successfully solving the toughest pension problems. We were among the first to simplify the complicated and confusing 401(k). And our innovative Investment Module has taken the mystery out of asset allocation.

Now The Hartford is helping retirement fund managers answer tax reform questions. You can write for a free 64-page booklet that highlights key provisions of the 1986 Tax Reform Act. To receive your copy, simply fill out and mail the coupon below to The Hartford's office nearest you. Or, you can call us and speak directly to a Hartford pensions expert. We'll gladly answer all your questions—and rush you your free 1986 tax booklet. Don't delay—only a limited number are available.

# One reason we're $3 billion strong.

Managing investments for endowed chairs and other university funds is something we do extremely well. It's one of the reasons why Trusco Capital Management now manages more than $3 billion in assets for a diversity of clients. Not only educational institutions, but corporate pension and profit-sharing plans, foundations and insurance companies as well.

As a core investment manager, we meet our clients' equity, fixed income, or balanced portfolio needs through our disciplined investment process. And we offer continuity. Our senior investment professionals have worked together for an average of 18 years.

Add up these qualifications, and you'll be quick to see why we manage money for a lot of chairmen. Write for our brochure or call Bob Farmer, Vice President, at 404-581-1757.

# Corporate funds dropped . . .

*Continued from page 15*

One other fund, Marathon Oil Co., Findlay, Ohio, disappeared because its assets are now reflected in the total of USX Corp., which assumed internal investment management of the fund in July.

Two of the remaining eight funds that dropped in rankings — Phillips Petroleum Co., Bartlesville, Okla., and Dresser Industries Inc., Dallas — terminated pension plans during the year ended Sept. 30.

Phillips recaptured more than $400 million before taxes through a spinoff/termination of a more than $1 billion plan. Dresser terminated a $580 million salaried plan and four small plans during the year, recouping $124 million.

The remaining six funds that dropped from the top 200 are: John Hancock Mutual Life Insurance Co., Boston; American Can Co., Greenwich, Conn.; Eaton Corp., Cleveland; Texas Instruments Inc., Dallas; North American Philips Corp., New York; and Kaiser Permanente Medical Care Program, Oakland, Calif.

Page Palmer, director of corporate finance at John Hancock, said the fund had been overfunded for several years and no contributions have been made. John Hancock, which last year was ranked at 192 with $948 million, slipped to 213 and $1.058 billion.

American Can fell to 214 from 183, with $1.05 billion, mainly because of the sale of a packaging subsidiary and the subsequent transfer of pension assets to the purchaser.

North American Philips slipped to 216 from 198; Kaiser Permanente, to 236 from 200; Texas Instruments, to 250 from 194; and Eaton, to 254 from 191.

While lower contributions account for several dropouts, large contributions and conservative actuarial assumptions pushed up many public and union funds.

Of the 12 funds new to the top 200, four were public — Pension Reserves Investment Trust, Boston; Delaware State Employees Retirement System, Dover; Wyoming Retirement System, Cheyenne; and Idaho Public Employee Retirement System, Boise — and three were union — National Pension Fund for Hospital and Health Care Employees, New York; Teamsters New England Trucking, Boston; and Southern California Food/Commercial Workers, Cypress.

The corporate funds that moved up were Abbott Laboratories, Abbott Park, Ill.; Hewlett-Packard, Palo Alto, Calif.; National Intergroup Inc., Pittsburgh; and GenCorp Inc., Akron, Ohio.

One corporate fund that is new to the top 200 and "new" to *P&I Age*'s survey, is that of newly created Unisys Corp.

The largest fund absorbed as a result of a corporate merger was RCA, which was ranked 75 as of Sept. 30, 1985, with $2.7 billion in employee benefit assets. When GE acquired RCA, GE retained its seventh-place ranking on the new list, and its total assets climbed to $22.9 billion from $15.8 billion a year ago.

Unisys Corp., the company that was born of Burroughs' acquisition of Sperry, took 70th place with $3.9 billion. A year ago, Burroughs was ranked 234 and Sperry, 80.

Chicago-based Navistar International Corp., then named International Harvester Co., was ranked 180 with $1.047 billion in the previous survey. Now it ranks 145 with $1.655 billion.

James Lovett, assistant to the treasurer at Navistar, attributed the higher ranking to the company's contribution of $104.5 million worth of its common stock in December 1986 to its plan and the strong returns achieved on the plan's heavy fixed-income investments.

One fund — the Pension Reserves Investment Trust of Massachusetts — is new to *P&I Age*'s survey. The $1.646 billion fund is a trust that invests the retirement assets of several Massachusetts communities and is part of the Massachusetts State Employees & Teachers Retirement System. It was established in 1983 and got its first allocation in 1984, part of an effort to curb unfunded liabilities statewide.

Executive Director Paul Quirk attributes the fund's high ranking to fast growth, strong returns and stepped-up funding by the Legislature.

Mr. Quirk said the fund now has four purchasing systems, which are communities that buy shares in PRIT, and 12 participating systems, which are towns that turn over all their assets for management and receive a share of the annual state appropriation.

The Hospital and Health Care Employees ranked 150 with $1.6 billion in assets in the current survey, up from 257 with $726 million. Frank Williams, director of finance and administration, attributed it to strong returns.

"We have had excellent performance backed by our aggressive managers, and we are growing very fast," he said.

At GenCorp, Rick Nelson, vice president-general investment funds, said growth and solid investment returns propelled the fund into the top 200. GenCorp was ranked 156, with $1.525 billion in assets as of Sept. 30, from 201 with $900 million a year earlier. ■

# Dedications fall . . .

*Continued from page 16*

tions to be raised, the dedicated portfolios have enabled the fund to wipe out its unfunded liabilities for purposes of the 1980 Multiemployer Pension Plan Amendments Act, said Alan D. Biller, the fund's consultant and president of Alan D. Biller & Associates, Palo Alto, Calif.

That law caused employers leaving an underfunded plan to pay a portion of the funded liabilities, considered a severe disadvantage for multiemployer funds in attracting new contributing employers.

One of the few portfolios created by a top 200 fund last year was a $100 million contingent immunized portfolios established by the $2.05 billion Nevada Public Employees' Retirement System, Carson City.

A contingent immunized strategy combines active management with an minimum absolute rate of return over a set period.

An unusual dedication involved a plan awaiting regulatory approval for a spinoff/termination. In December 1985, Chicago-based FMC Corp. set up a $400 million portfolio based on Treasury bond futures contracts to lock in a 9½% rate for annuities to cover accrued benefits in the plan. The contracts insured a good price for the annuities, said William H. Schumann, director-investments for FMC's $1.64 billion in pension assets.

The $7.07 billion Teamsters Central States, Southeast and Southwest Areas Pension Fund implemented a $1.14 billion portfolio sometime during 1986, but fund officials were unable to provide additional details. Officials at Morgan Stanley Inc., New York, the fund's named fiduciary, declined to discuss the fund's investments.

Assets of several bond portfolios shrank, as assets were drawn off to pay benefits. At Armco Inc., Middletown, Ohio, its immunized bond portfolio declined to $381 million as of Sept. 30, from $394 million the year before.

"Our assets did decline, and that's by design," explained Dennis Furey, general management-investment management. The internally managed portfolio was created in July 1984 with $350 million in assets.

While Armco locked in a high interest rate at that time, immunization is less attractive now, Mr. Furey said.

A few portfolios were unwound during 1986. For example, Chevron Corp., San Francisco, unwound two dedicated portfolios valued at $593 million Sept. 30, 1985, that it had inherited from the Gulf Corp. pension fund after Chevron acquired Gulf.

Chevron "never intended" to keep the portfolios, said R.L. Norman, manager-financial analysis.

Similarly, Allied-Signal Inc., Morris Township, N.J., sold off a $1 billion dedicated bond portfolio inherited from the Signal Co. pension plan, which was merged into the $6.6 billion Allied master trust.

Despite the lack of interest on the part of pension executives in setting up new portfolios, several money managers said they hope the Financial Accounting Standards Board's new pension accounting rules would generate new interest in the products as a way to tame fund volatility.

The new accounting rules have caused many pension executives to focus on protecting the "surplus" in their funds, to avoid having liabilities pop up on the bottom line.

Pension executives seeking to avoid wide swings in the value of their funds may seek to put a portion of the assets in a dedicated or immunized portfolio, said Len Santoro, vice president of Prudential Fixed Income Advisors, Newark, N.J.

Pension executives "may want to match liabilities with assets," such as long-term bonds, in the future, noted Samuel "Spike" Thorn, managing director at Scudder, Stevens & Clark, New York. "That ain't happening now," he added. ■

## The P&I Age methodology

The information on employee benefit funds contained in this issue was developed in several stages.

Questionnaires were sent to the more than 1,500 funds in *Pensions & Investment Age*'s data base. From the completed questionnaires and follow-up telephone calls, the top 200 and top 1,000 funds were identified.

The more detailed information contained in the profiles of the 200 largest funds (*beginning on page 28*) was obtained from the completed questionnaires, interviews with fund officials and articles published in *P&I Age*.

In most cases, the information reflects fund operations as of Sept. 30, 1986.

Where no information was available from the fund, statistics were taken from the 1987 Money Market Directory of Pension Funds and Their Investment Managers.

In the tables accompanying the profiles, NA (not available) was applied to funds that had less than $1 million allocated to the particular investment as well as to funds that could not provide a breakout of assets but are known to invest in those areas. Dollar amounts in all charts were rounded to the nearest million.

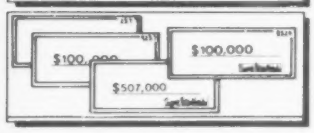
# Cash Management

## Account monitoring aided



JACKSONVILLE, Fla. — Alliance Mortgage Co. recently decided to use a microcomputer-based product to monitor the daily activity in 12 key accounts, said Marcus Turko, assistant vice president and manager of treasury operations at Alliance.

Mr. Turko said Alliance chose the product, offered by Florida National Bank, Jacksonville, to facilitate treasury operations.

"We, in order to manage our daily borrowings and our daily activity, need to see the activity in these key accounts," he said.

The 12 accounts — in New York, Jacksonville and Charlotte, N.C. — were selected because of their size and as a means of controlling cost.

"It would be too cost prohibitive to put every account on there," said Mr. Turko. "We're just talking about the big ones with a lot of activity."

He declined to release the total number of bank accounts or figures on the company's borrowing activity.

Mr. Turko also said the product, called Florida MicroLink, enables him to initiate wire transfers and credits via the automated clearing house network without having to make a separate call to the bank.

### *Dividend capture set*

CINCINNATI — Seeking higher yields over money-market instruments, Eagle-Picher Industries Inc. hired three managers to run dividend capture programs for $30 million in idle corporate cash, said Joshua Adams, assistant treasurer.

Hired were Conner Capital Corp., Summit, N.J.; Gateway Investment Advisers Inc., Cincinnati; and Paramount Capital Group Inc., New York. Each will run separate accounts of $10 million each, he said.

Mr. Adams said the money is coming from Eagle-Picher's account with Schroder Capital Management International, New York. Schroder will still retain about $15 million to run in Eagle-Picher's corporate cash, he added. Schroder has run the company's corporate cash "off and on for three years," he said. Most of Schroder's investments are in money market instruments.

In addition, Mr. Adams said Eagle-Picher runs about $5 million in corporate cash in-house in a portfolio of repurchase agreements.

## Disbursement disagreement

### 2% cost hike doesn't hit cash managers' estimate

**By Chuck Paustian**

The cost of controlled disbursement accounts has increased far less than generally perceived by corporate cash managers, a recent study shows.

Statistics collected by Phoenix-Hecht Inc. researchers in Research Triangle Park, N.C., show the cost of a standard package of controlled disbursement services increased slightly more than 2% during 1986.

That increase differs significantly from the findings of an earlier Phoenix-Hecht survey of corporate cash managers, which revealed the executives believed banks had increased their prices between 12% and 15% last year.

The Phoenix-Hecht research also showed money center banks tend to charge more for their controlled disbursement accounts than both major regional banks and smaller banks.

The research, based on a universe of 200 banks representing 205 sites, asked banks to price a standard package of services that disbursed 5,000 checks per month.

The data showed the median price for disbursements increased 2.1% to $1,090 per month during 1986.

Forrest Johnson, senior vice president of Phoenix-Hecht, said the increase primarily was because of inflationary increases in the costs incurred by banks to provide controlled disbursement capability.

According to the Phoenix-Hecht data, the largest component of bank pricing is the per item charge for checks paid. This charge represents 57% of total cost for an account disbursing 5,000 checks per month.

The data showed this charge remained virtually unchanged during 1986. The median per item charge remained at 14 cents, while the mean charge increased to 14.2 cents per item from 13.9 cents per item.

The controlled disbursement maintenance charge also remained about the same during 1986. The median maintenance charge, $112.50, increased 2% from the previous year while the mean maintenance charge, $131.77, remained unchanged.

Mr. Johnson said the faulty perception on the part of cash managers is the result of their focus on increases or decreases in compensating balances rather than specific bank fees.

"If interest rates drop 10%, then the compensating balances are going to go up 10% even if the bank's prices remain the same.

"(Cash managers) don't get a bill as to what the fees actually are, they get a bill as to what type of balances they need to keep," Mr. Johnson said.

He said one way to eliminate this confusion would be to pay for bank services on a fee basis.

"A lot of things would be clearer if companies switched to fees from compensating balances, but there's no real move in that direction," said Mr. Johnson.

The research data also showed money center banks tended to charge more for their controlled disbursement services.

The data showed money center banks charged 116% of the national mean for controlled disbursement accounts. Major regional banks, however, charged 112% of the national mean while small and regional banks charged 92% of the national mean for controlled disbursement services.

## *Dollar expected to make slight gain in '87*

CLAREMONT, Calif. — Despite the recent sharp rise of the deustche mark and yen against the dollar, Claremont Economics Institute is sticking by its forecast that the dollar will rise against the major currencies in 1987.

The Claremont forecast, compiled at the end of December and released in mid-January, predicts that by the end of 1987, the deustche mark will fall to 2.25 marks per dollar from 2.01 marks last Dec. 30. But in recent days, the mark has moved up sharply, strengthening to 1.83 marks per dollar as of Jan. 20.

The forecast also predicts a fall in the yen to 190 yen per dollar by year end from 163 yen at the end of last December. But recently the yen has jumped, rising to 152.7 yen per dollar as of Jan. 20.

John Hekman, senior economist, suggested the dollar's recent fall was set off by a rise in oil prices and by administration hopes that the dollar has to fall to improve the trade deficit.

"We think that is a short-run view and the dollar will improve," he said.

He said Claremont holds that "exchange rates are set more by capital flows than trade flows, and the United States is the best place to invest."

The recently released Claremont forecast charts 19 currencies against the dollar.

Claremont notes the biggest risk to its outlook is the U.S. entering a recession early this year. Such news could drop the dollar 10% or so against the deutsche mark and Swiss franc. A recession would pose little "risk for the dollar against the yen because of the Japanese recession."

Among other currencies, Claremont predicts that by December:

- **Canadian dollar** will remain virtually unchanged, rising slightly to $1.37 Canadian per U.S. dollar from $1.38 Canadian last December.
- **French franc** will fall to 7.65 francs per dollar from a recent 6.59 francs.
- **Pound sterling** will fall to $1.25 per pound from a recent $1.43 per pound.
- **Swiss franc** will fall to 1.98 francs per dollar from a recent 1.69 francs.
- **Dutch guilder** will fall to 2.60 guilders per dollar from a recent 2.28 guilders.
- **Italian lira** will fall to 1,644 lire per dollar from a recent 1,395 lire.

## Credit raters see upswing in downgrades

By Brad Rudin

Credit downgrades outnumbered upgrades at all five rating agencies last year, a development linked to corporate restructurings, low oil prices and weakness in real estate and agriculture.

Both Standard & Poor's Corp. and Moody's Investors Service, both in New York, reported the number of downgrades were a record for their agencies.

The avalanche of downgrades left questions about corporate America's ability to service its debt when the economy moves onto the downward slope of the business cycle.

"There will be severe borrower problems during the next recession," said Francis H. Schott, chief economist at The Equitable Life Assurance Society of the United States, New York. "In that sense there will be a day of reckoning. I'm absolutely convinced of that."

Of all the rating actions taken by Standard & Poor's in 1986, 71% were downgrades compared with 69% the year before. Downgrades accounted for 63% of the corporate rating changes at Moody's in 1986, while the figure for 1985 stood at 55%.

At Duff & Phelps Inc., Chicago, downgrades made up 59% of the agency's rating actions in 1986, down from 69% the preceding year. Lowered ratings accounted for 62% of the total number of rating actions taken by McCarthy, Crisanti & Maffei Inc., New York, in 1986, up from 45% in 1985.

Fitch Investors Service Inc., New York, reported the lowest proportion of downgrades to total actions in 1986, 51%. In 1985, downgrades accounted for 58% of total actions at Fitch.

The difference between the Fitch rating numbers and the data reported by the other agencies can be explained by looking at Fitch's client base, said Jack Vogel, rating committee chairman. "The companies that are Fitch clients are, in our view, better companies."

Experts differed in their evaluation of the 1986 credit rating changes, views that were colored by their economic outlook for 1987.

"We believe that we have at least two solid years of economic expansion ahead of us and that corporate earnings will continue to improve in 1987 and 1988," said Lawrence A. Kudlow, chief economist at Bear, Stearns & Co., New York.

"Debt leveraging risks will turn out to be prudent in most cases rather than imprudent," Mr. Kudlow continued. "Future returns are what these managers are betting on. I think they have good reason to make that bet."

Solomon B. Samson, a senior vice president at Standard & Poor's, offered a less optimistic view of the increased leverage taken on by U.S. corporations. "Clearly, what we're in store for is more defaults than what we've had. Clearly, that's reflected in the rating activity."

Debt taken on at this stage of the business cycle is a source of concern, said M. Cary Leahey, senior economist at Shearson Lehman Brothers Inc., New York. "Obviously when you're in the fifth year of an economic expansion, you have to say to yourself that not too many expansions have lasted longer and clearly lower rated credit is more of a risk."

Even a continuation of the current modest rate of growth poses problems for some of the weaker credits, said James M. Griffin, corporate economist at Aetna Life and Casualty Co., Hartford, Conn.

Only an upturn in the economy can insulate the more vulnerable companies from default, he said.

"It's difficult to understand some of the projections that apparently underlie some of the deals in the junk-bond market," Mr. Griffin said. "You're really counting on a high tide to float all boats."

Improvements in the economy and reductions in the cost structure of many corpora-

# Credit . . .

*Continued from page 83*

tions suggest a brighter future for corporate credit, said Samuel Gordon, a senior vice president at Moody's. The deterioration of credit quality has just about reached its end, he said. "I don't think we're going to break another record."

Moody's said the greatest number of downgrades came in the industrial sector, where the agency lowered the ratings of 128 companies. The lowered ratings affected $65.2 billion of outstanding debt, according to a statement announcing Moody's 1986 credit data.

Mergers, acquisitions, leveraged buy-outs, treasury stock buybacks and "other actions of corporate management generally unrelated to fundamentals" affected about half the dollar amount of the debt, Moody's said.

"Corporate restructurings, plunging energy prices and eroding business fundamentals in some basic industries were primarily responsible for 221 industrial ratings being reduced," Standard & Poor's announced in a statement.

Duff & Phelps said it expected "a mixed bag of rating changes this year, with some major surprises. The wild card will be the extent of merger mania." ■

**Corporate credit rating changes**

# U.K. is seeking

**By Marci Baker**

GREENWICH, Conn. — The United Kingdom, following the path of the U.S. corporate financing marketplace, will continue to grow more sophisticated in the months ahead as British companies, led by multinationals, show increasing demand for more competitive and esoteric financial advice and products.

While traditional corporate finance products and services continue to garner the greatest demand, U.K. corporations increasingly are seeking newer, more technical types of products and services.

According to Greenwich Associates' 1986 U.K. corporate finance report, the greatest overall demand will be for merger, acquisition or divestiture advice and interest rate swap services.

Forty-four percent of U.K. companies expect to tap merchant banks for swaps and mergers during 1987, but new demand — companies that plan to start using these services — is much greater for swaps.

The Greenwich report is based on interviews with executives at 431 U.K. companies.

Among companies that expect to seek mergers and acquisition or divestiture advice, the vast majority use the services now and/or expect to use them more in the future.

Among those needing swap services, about half of the demand will come from those that are planning to start using interest rate swaps.

Greenwich also projected a doubling of demand for interest rate futures contracts, and a tripling for interest rate caps or collars, Eurocommercial paper and Euronote issues.

But John Colon, a Greenwich associate, cautioned, "On absolute levels, demand is still relatively small," he said.

According to the report, overall demand for swaps and mergers will be greatest.

For interest rate caps or collars, 28% of companies will continue or begin using them in the months ahead; 23% expect to tap interest rate futures. Total demand for Eurocommercial paper and Euronote issues was 17% and 13%, respectively, according to the report.

The least total demand — 7% each — exists for leveraged buy-out and U.S. commercial paper services.

Mr. Colon suggested the demand for more esoteric financing instruments may stem from the relative thinness of the corporate debt market in the United Kingdom. "There's not a high volume of sterling issues in the U.K. Companies may be looking abroad for hedges," he said.

Demand for the range of merchant banking services by existing and new users will be strongest among multinationals or the largest companies in terms of sales.

Nearly two-thirds of multinationals are expected to be users of merger and acquisition services and about one-fifth expect to use them more this year.

At the same time, more than half the companies with annual sales in excess of $1.49 billion expect to tap mergers and acquisition services, with about 20% of companies expecting to use those services more.

The greatest new demand should come from companies with sales between $149 million and $372.5 million where 6% responded that they planned to seek merger advice.

Multinationals will remain the most active users of interest rate swaps as well — 57% said they are existing or potentially new users of swaps.

Total demand for interest rate swaps is expected to range from one-quarter of the smallest companies to more than two-thirds of the largest.

Overall, about 20% of respondents said they plan to begin using interest rate swaps this year.

Demand for interest rate futures contracts should show strong growth from all types of companies.

One in four companies should be accessing these instruments in the months to come vs. one in 10 for current users,

# Top 200 funds win $63 billion in rally

By Marcia Parker

Riding the market's explosive new year's rally, the equity portfolios of the 200 largest pension funds gained almost $63 billion in January, *Pensions & Investment Age* estimates.

Combined with the market gains of the third quarter, this lifted equity assets for the top 200 funds to an estimated $528 billion from $441.1 billion as of Sept. 30.

The $62.8 billion increase estimated for the top 200 in January assumed they equaled the return of the Standard & Poor's 500 stock index. The composite asset mix among the top 200 funds was 43.6% equities as of Sept. 30. Total assets of the top 200 on that date were about $1.1 trillion.

The S&P 500 registered an impressive 13.5% gain in January, while the Dow Jones industrial average topped the magical 2,000 mark Jan. 8, then rushed past it to set a string of consecutive day new highs, hitting 2,163 during the month.

Except for a couple of steep declines that sent brief tremors through the market, the advance is back on track. And most analysts expect the bull market to endure at least through June.

That's good news for pension executives like W. Allen Harrison, assistant treasurer of Exxon Corp., New York. Although he didn't yet have performance data for January, "we have a fairly good feeling about how we did." Mr. Harrison wouldn't give a recent equity number, but said the fund has more than the 58% in equities reported as of Sept. 30.

Ralph Cuomo, assistant treasurer of the $240 million Hearst Corp., New York, said his fund "did real well, though I don't know yet just how well." He said Hearst would remain heavily weighted in equities because he is confident about the market's continued strength. As of Sept. 30, Hearst had 73.5% in stocks.

Eric Fuchs, director-pension fund benefits, AMAX Corp., Greenwich, Conn., said the $280 million fund was about 76% invested in equities as of Jan. 1. "We achieved about 10% total return for month, with equities up 13%-14%," Mr. Fuchs said.

He added equities will continue to be the predominant investment for the pension fund for the foreseeable future because he thinks the market will be driven by strong earnings and the AMAX portfolio is heavily invested in growth stocks. As of Jan. 31, the AMAX fund had about $135 million in equities.

Among the pension funds profiled by *P&I Age* each January, the equity portfolios for the 108 corporate funds in the top 200, in aggregate, swelled an estimated $43.3 billion to $267.7 billion as of Jan. 31 from $223.4 billion as of Sept. 30. The corporate funds in the top 200 were 50.1% invested in equities.

The 71 public funds in the top 200, which had $145.6 billion — or 33.4% of assets — invested in equities of $435.9 billion in total assets, gained more than $29 billion between the end of September and Jan. 31.

The 10 union funds in the top 200, which had 36.1% or $13 billion in equities of $36 billion in total assets as of Sept. 30, gained about $2.4 billion.

# Plan's surplus pays loan

## Acme-Cleveland's switch to technology aided

By John Covaleski

CLEVELAND — Acme-Cleveland Corp., using some $19 million in surplus pension assets, is redirecting its future into technology and telecommunications products, moving away from its old-line machine tool manufacturing businesses.

The $19 million reversion — reduced to $17 million after taxes — stems from the recent termination of the company's $82 million pension plan for salaried employees. The surplus assets will be used to help pay off a bank loan, which has covenants that could prevent the company from acquiring or selling off business operations.

The company, which had sales of $186 million in 1986, owes about $19 million from a $25 million revolving loan agreement it has with four banks, led by AmeriTrust Co., Cleveland.

The termination took effect in October, with Acme-Cleveland purchasing $63 million in annuities from John Hancock Mutual Life Insurance Co., Boston, to insure the accrued benefits of the 2,223 active and retired employees who had participated in the terminated plan.

All eligible employees have been vested in a new defined benefit plan that bases benefits on each participant's average pay during his or her career. This gives the company greater control on costs than the old plan, which calculated benefits on an employee's final years of service. The company expects to make its first contribution in June 1988.

*David L. Swift of Acme-Cleveland said recapturing the surplus will speed debt payments.*

As an interim measure to safeguard against interest rate risks, the company in June had transferred about $65 million of the old plan's assets into a short-term, immunized bond portfolio.

In such a portfolio, the duration of the assets is matched to the duration of the liabilities, thus eliminating interest rate risk. Duration is the time it takes to recapture half of the present value of the cash flow of the assets or liabilities.

David L. Swift, vice president of administration and secretary at Acme-Cleveland, said, "Without the recaptured surplus, it would have taken the company several years to pay off the debt and remove the covenant."

L. Michael Braig, an analyst with Johnson, Lane, Space, Smith & Co., Atlanta, called the use of the reversion to pay off the loan "exceedingly important."

"The banks last year started tightening the covenants to where it was a choke collar," he added.

Mr. Swift said the company

# *Labor trustees sue Eastern*

By Brad Rudin

MIAMI — Two labor trustees of an Eastern Airlines pension fund have charged Eastern Airlines Inc. with breach of fiduciary duty.

If the suit filed in U.S. District Court in Miami goes to trial, it likely will clarify the responsibility of a management-appointed trustee faced with conflicting demands from the plan sponsor and plan beneficiaries.

The labor trustees of the Eastern Airlines Fixed Benefit Retirement Income Plan for IAM Mechanics and Related Personnel claim Eastern breached its fiduciary duty to plan beneficiaries by withholding a $16 million contribution to the $218 million fund.

Texas Air Corp., which engineered a merger with Eastern last year, the three management trustees appointed by Eastern and the company's general counsel are defendants in the December complaint that started the lawsuit in the Miami division of the Southern District of Florida.

As a part of a 1983 collective bargaining agreement, Miami-based District 100 of the International Association of Machinists and Aerospace Workers won two seats on the five-member board of trustees. Unions rarely have representation on single-employer pension plans.

The 33-page complaint charges the management-appointed trustees breached their fiduciary responsibilities when they refused to obtain independent legal and actuarial advice after the company decided to withhold payment for the 1985 contribution, which was due Sept. 15, 1986.

In addition, the complaint said the defendants breached their fiduciary responsibility under the 1974 Employee Retirement Income Security Act by failing to consider the impact of the loss of funding and by acting in response to the business needs generated by the merger of Eastern and Texas Air Corp., Houston.

No answer has been filed in response to the complaint.

The complaint seeks payment of the contribution, an award of un-

## Managers' survey out

Questionnaires for *Pensions & Investment Age*'s annual Money Manager Directory, to be published May 25, are in the mail. Completing and returning the questionnaire ensures your firm will be profiled in the special issue, which last year profiled almost 1,000 money managers in the United States, Canada and Europe.

The questionnaires should be returned by Feb. 27.

If your investment management firm or insurance or bank investment department does not receive a questionnaire, please call Carol Wiley, directory coordinator, at (312) 649-5486.

# Investors ease stance against GM

By Barry B. Burr

Cracks are appearing in the once-solid front of the institutional investors that co-sponsored a shareholders' resolution protesting General Motors Corp.'s $742 million buy-out of H. Ross Perot.

Among the six co-sponsors:

- The $13.198 billion Teacher Retirement System of Texas, Austin, has withdrawn its support;
- The $13.5 billion State of Wisconsin Investment Board, Madison, has softened its position; and
- The remaining co-sponsors still support the resolution, although their positions could change.

Roger B. Smith, GM's chairman and chief executive officer, has agreed to at least two more meetings on the issue with co-sponsors.

The $37.7 billion California Public Employees' Retirement System has scheduled a meeting with Mr. Smith Feb. 23 in Sacramento.

Vanguard Group Inc., the mutual fund company, has scheduled a meeting with Mr. Smith the week of Feb. 9 in Valley Forge, Pa.

Both meetings will be private. GM executives already have met with several co-sponsors at Council of Institutional Investors meetings in New York in December and January and with the Wisconsin Investment Board in Madison last month.

Joe Perrone, chief investment officer of the Texas teachers fund, said the fund informed GM executives it was withdrawing as a co-sponsor. The fund isn't a member of CII.

Although he said the fund still objects to the buy-out, "We felt they had at least listened to our position."

Mr. Perrone said he and other fund officials had talked with top GM officials, although not Mr. Smith, by telephone before withdrawing as a co-sponsor.

"We heard their position, which wasn't different from what we knew," he said. "We still disagree with them. What are we going to do about it? Not a whole helluva lot. We don't feel there is much else we can do," he added.

The fund has no plans to sell its GM-related holdings — 532,000 shares of GM common stock, 45,000 of E stock and 23,000 of H stock.

"We would never have attempted to support a resolution on our own," he said.

Nevertheless, he said, the fund would vote independently of management. "We're probably past the stage of a couple of years ago when we voted as a rubber stamp the way management wanted."

Even so, "There is a growing amount of influence taking place as institutions become more vocal," he said. "Management wouldn't attempt to placate us as they do if they didn't think our role had an impact."

Kenneth E. Codlin, executive director of the Wisconsin fund, said of the investment board's position, "We've become more knowledgeable and understanding of (GM's) position. We are still discussing with them this (shareholder) discrimination issue." Wisconsin was a leading advocate of the resolution.

Thomas Aceituno, counsel for the Californ a state treasurer, who is trustee for the two major public funds, said Mr. Smith's meeting would involve only the public employees. The $19.361 billion California State Teachers' Retirement System, another co-sponsor, has not made a request for a meeting.

Mr. Aceituno said no decision has been made on withdrawing support for the resolution.

John Lukomnic, press representative for Harrison J. Goldin, New York City comptroller, said the New York City Employees' and Teachers' retirement systems each is continuing as a co-sponsor. "Right now, there are no plans to withdraw our co-sponsorship," he said.

He said Mr. Goldin believes GM has to show "concrete signs" of improving in 1987. Otherwise, he said Mr. Goldin would work to change management.

Mr. Goldin "wasn't ready to set a time frame," he said. "He wasn't setting a daily or quarterly time frame. But he wasn't willing to wait a decade either." ■

# *Portfolio insurance faces risk*

By Trudy Ring

Even though some market observers say program arbitrage, not dynamic hedging, caused the wild stock market gyrations Jan. 23, continued volatility eventually could create significant problems for dynamic hedgers.

The arbitrageurs, meanwhile, contend they were merely reacting to more fundamental market sentiments that were reflected in futures prices before stock prices. Their arbitrage programs pulled the stock and futures prices in line with one another, they said.

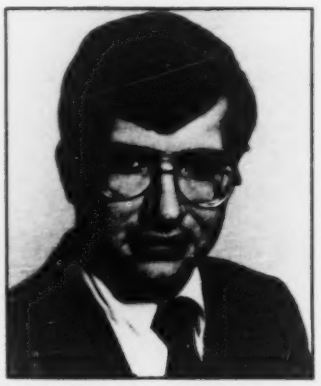
Most dynamic hedgers said they executed no trades that day, when the market, as measured by the Dow Jones industrial average, rose 64 points and fell 114 in little more than an hour. The Dow closed down 44.15 points for the day at 2101.52.

Most managers using dynamic hedging, also called portfolio insurance, said they didn't trade that day because it wasn't necessary. Rises in the stock market in 1986 and early 1987 had lifted client portfolios to the point the Jan. 23 decline wasn't enough to trigger the insurance programs, which generally are implemented with the short sale of stock index futures. The strategy is designed to cut off portfolio losses at a specified point.

But William M. Morris, a principal of William M. Mercer-Meidinger Inc., New York, said dynamic hedging managers couldn't have traded that day if they had wanted to. "It's inconceivable to me that they could have gotten trades off (in the market's most volatile period), and if they did, it cost them a full year's insurance," he said.

During the wild stock market swings, the Standard & Poor's 500 stock index futures contract went quickly to a discount from a premium price, although it recovered later in the day.

Leland O'Brien Rubinstein Associates Inc., Los Angeles, the biggest dynamic hedging manager, did little trading that day, said Larry Edwards, president. Client accounts had benefited from the earlier market run-up and therefore did not reach the point at which the hedge would be triggered, he said.



*The market activity Jan. 23 didn't effect Mead's hedged fund, said Gerald W. Bialka.*

"The net effect (of the market's activity on Jan. 23) was not that much," said Gerald W. Bialka, assistant treasurer of Mead Corp., Dayton, Ohio, whose $525 million pension fund is hedged by LOR.

"As far as I know, there was no trading done on our behalf that day," added C.F. Lemons, director-trusteed benefit funds at Manville Corp., Denver, which has LOR and J.P. Morgan Investment Management Inc., New York, as dynamic hedging managers for its $756 million pension fund.

Oppenheimer Capital Corp. and Bankers Trust Co. — Investment Management Group, both of New York, and Skye Investment Advisors Inc., Cupertino, Calif., did no trades for dynamic hedging clients that day, officials of those firms said.

"I've heard other portfolio insurance managers say the same thing," said Ethan Etzioni, a vice president of Oppenheimer.

Dean D'Onofrio, vice president and manager-quantitative investment group at Bankers Trust, disagreed that dynamic hedgers couldn't have entered the market Jan. 23.

"Couldn't make trades? That's kind of unrealistic," he said. "You couldn't make trades at the prices you wanted, maybe."

He said he did a simulation for a large pension fund showing what would have happened if Bankers Trust had made trades every hour Jan. 23 to implement a six-month portfolio insurance program, in effect from Jan. 1.

# Withdrawals hit Hancock fund

## Real estate pool may surrender one-third of assets

By Steve Hemmerick

BOSTON — Pension funds want to withdraw at least one-third of the assets in the $600 million Equity Real Estate Account of John Hancock Mutual Life Insurance Co., one of the nation's oldest open-end real estate funds.

Other, larger commingled real estate funds also have experienced withdrawal requests. But those requests, although higher in dollar terms, represent a much smaller percentage of the funds' total assets than they represent to Hancock's 11-year-old fund.

Among reasons for the withdrawals are pension executives' increased sophistication in real estate and the relatively poor performance by the commingled funds. Data collected for *Pensions & Investment Age*'s Scorecard survey shows investors increasingly are moving toward more specialized real estate investment firms that offer closed-end funds or separate accounts, through which they can make direct investments. (*See story on page 13.*)

The $2.6 billion Alaska State Retirement System in early 1986 asked to withdraw its entire $19 million investment in the Hancock fund. Its sole reason for pulling out was to go into more specialized real estate funds, said Marty Lentz, real estate investment officer. The system since has received only $1 million.

Ron Garner, a senior real estate investment officer with Hancock, said he believes there is no run on the fund even though such a large percentage has been marked for withdrawal.

He said he believes the pace of withdrawals will slow and the fund could stabilize with the remaining $400 million in assets.

To stem the withdrawals, Hancock officials are exploring radical changes to improve the investment performance of the fund, which in 1986 had a total return of −2%, according to Mr. Garner. The fund had a return of 6.5% on income, but −8.5% on appreciation.

The changes could include doubling the asset size of the fund through positive leverage — in which debt is used to increase return — and "securitizing" part of the fund by forming a real estate investment trust. The actions would increase the liquidity of the fund sharply, which now has no debt, as well as improve cash-on-cash yields.

Mr. Garner said, however, these moves are under consideration and he could offer nothing "concrete."

He estimated about half of the $200 million in withdrawal requests probably would be honored by the end of this year. Remaining requests would be paid later.

He said requests are honored on a "pro rata" basis and that about $150 million of the withdrawal requests are "serious." He said the other $50 million in requests probably were made because of the time it takes for withdrawals to be honored and because other participants are making withdrawals.

Some investors want to withdraw all of their assets, others only some. The commingled fund has 60 investors, but Garner wouldn't say how many have requested to withdraw money.

Mr. Garner said the trend toward withdrawal from open-end

Scorecard

# Passive firms more active

## Quantitative managers also net equity clients

By Trudy Ring

Passive and quantitative strategies proved most successful in attracting money for equity management in 1986.

Index funds accounted for much of the gain in domestic equity assets under management by large investment firms in 1986, while quantitative managers were the big gainers among midsize and small firms.

Among firms with more than $1 billion under management, the four that reported the largest net gains in domestic equity assets are all major index fund managers — Wells Fargo Investment Advisors, San Francisco, with a net gain of nearly $10.7 billion; State Street Bank and Trust Co., Boston, with $7.9 billion; Mellon Capital Management Corp., San Francisco, with $4 billion; and Alliance Capital Management Corp., New York, with nearly $2.3 billion. These four had either all or most of their new equity assets in index funds.

The fifth, Northern Trust Co., Chicago, had about one-fourth of its nearly $1.8 billion in new equity assets in pure index funds, but most of the remainder was in derivative products, such as futures, that also are tied to a market index.

Stock indexing soared in the first half of 1986, continuing the trend of the past few years, but appeared to level off in the second half *(Pensions & Investment Age,* Jan. 12). Index funds have been popular because of their management fees and transaction costs are lower than those of active managers, and because many active managers have underperformed broad market indexes in recent years.

However, the leveling off may indicate traditional index funds, such as those based on the Standard & Poor's 500 stock index, have reached the saturation point, and plan executives desire custom index products.

"There has been a fair growth in non-S&P-type index funds," said Frederick L.A. Grauer, president of Wells Fargo. Because many tax-exempt funds now use "normal portfolios," or custom-designed benchmarks to measure performance, they want index funds that behave like these benchmarks, he said.

The 38 new equity clients listed by Wells Fargo on its questionnaire include Singer Co., Stamford, Conn.; Nevada Public Employees' Retirement System, Carson City; Illinois State Universities' Retirement System, Champaign; and Pacific Gas & Electric Co., San Francisco.

Respondents were asked to list clients and were permitted to stipulate some or all client names not be published. Those not listing any client names were not ranked.

State Street Bank provided client names on the condition they not be published. Mellon Capital's new equity clients included Eli Lilly & Co., Indianapolis; Honeywell Inc., Minneapolis; and the Pennsylvania Public School Employes' and State Employes' retirement systems, both of Harrisburg.

Alliance's new equity clients included F.W. Woolworth Co., New York; Los Angeles Fire & Police Pension System; and Nevada Public Employees. Northern Trust's new equity clients included Allied-Signal Inc., Morristown, N.J.; Eli Lilly; and Tribune Co., Chicago.

Index funds, either traditional or custom, often form the core of a pension fund's investment strategy, receiving the largest portion of assets and being supplemented by active management.

Among active managers, those using quantitative techniques proved popular in 1986, possibly because investors may doubt managers' ability to pick stocks based on subjective criteria.

"There's a certain quest for more disciplined and rigorous processes," said Denis R. Bastin, senior vice president of Paribas Asset Management Inc., New York.

Paribas, with $146 million in new equity assets under management in 1986, led all small managers — those with less than $250 million — in that regard. One of Paribas' three new equity clients was Michelin Tire Corp., New York.

*Continued on page 42*

# Index managers score in tally of '86 new business

By Trudy Ring

Almost 20% of the tax-exempt business gained by money managers in 1986 went into index funds, continuing a trend of the past two years.

The 259 managers included in *Pensions & Investment Age*'s Scorecard survey reported a net gain of $179.7 billion in assets under management. They reported $76 billion was in contributions from new clients, $59 billion in additional contributions from existing clients and $62.9 billion in market appreciation, dividends and interest.

The sum of the three latter figures is greater than the net gain because some managers also lost business.

The managers reported $48.5 billion in new domestic equity business; of that, $29.5 billion, or 60.8%, was in index funds. Of the $24.3 billion in new domestic bond business, $5.9 billion, or 24.3%, was in index funds. A total of $11.2 billion went into balanced management.

The 20% of net new business placed in indexed funds overall in 1986 was down from 1985 figures, when 22.5% of net new business was targeted for indexing. That year, 52.6% of net new equity business was indexed, and 4.9% of the fixed-income gain was indexed.

Other asset classes attracting significant amounts of money in 1986 were guaranteed investment contracts, $17.2 billion; dynamic hedging, also known as portfolio insurance, $12.7 billion; and real estate, $6 billion.

International investments, and 24 respondents with most of their assets in that area, were excluded from the Scorecard results because of difficulty in determining whether the assets listed were tax exempt.

Another 39 respondents were excluded from the results because they did not name clients. Money managers were asked to provide client names and were allowed to stipulate that any or all names not be published. Most respondents released some names for publication.

Indexing giant Wells Fargo Investment Advisors, San Francisco, led all respondents with nearly $25.8 billion in new business. It was the top gainer in domestic equity and portfolio insurance business, with $10.7 billion and $7.5 billion respectively, and placed in the top 10 for domestic fixed income, with $2 billion. Also, it listed $9.1 billion of its new assets as being a result of market appreciation.

Wells Fargo handles indexed products exclusively, although some of the funds track customized indexes or are enhanced with futures with the aim of beating a market benchmark.

Wells Fargo had the top spot for the second consecutive year, but its 1986 gain of assets under management more than doubled its 1985 figure, $10.4 billion.

" '86 was quite a year," said Frederick L.A. Grauer, Wells Fargo president. Asked the reason for the firm's success, he said, "I think the market has voted."

Wells Fargo has met the tax-exempt market's demand for index funds, which outperform a majority of actively managed portfolios and also carry lower transaction costs and lower management fees than active strategies, Mr. Grauer said.

While Wells Fargo's fees are lower than those of active managers, it has not put in additional discounts to attract business, he added.

Commitments to stock index funds slowed in the second half of 1986, indicating that perhaps the demand for traditional index funds, like those tracking the Standard & Poor's 500 stock index, has been met. However, customized stock index funds and various types of bond index funds apparently still are in great demand.

"I think the major area of growth in '87 will be bond indexing," Mr. Grauer said.

As to portfolio insurance, he said it has been popular because pension executives see it as a means of controlling the distribution of their returns. It also can allow them to change their asset allocation, perhaps increasing their percentage in stocks. "It's certainly one more tool and a fine, powerful tool," he said.

Wells Fargo offers portfolio insurance as a licensee of Leland O'Brien Rubinstein Associates Inc., Los Angeles.

Coming in second was Aetna Life & Casualty Co., Hartford, Conn., with $14.1 billion. Aetna listed $5.9 billion of the increase as market gain, but it also was buoyed by $1.2 billion in GICs, $1.2 billion in domestic equities and $511 million in real estate. It placed in the top 10 in each of these categories.

## *Firms use a variety of strategies*

# Funds hire active bond managers

**By Brian Lehrer**

Bond index funds were a client magnet for a few large managers in 1986, but most bond managers relied on a variety of active strategies to attract business.

Among firms with more than $1 billion under management, the ones with the largest net gain in tax-exempt fixed-income assets were Bankers Trust — Investment Management Group, New York; The Vanguard Group of Investment Cos. Inc., Valley Forge, Pa.; and Wells Fargo Investment Advisors, San Francisco.

Figures are gleaned from responses to a *Pensions & Investment Age* Scorecard questionnaire covering Jan. 1 to Dec. 1, 1986.

Bankers Trust employed active and passive strategies as it wooed $3.61 billion in new fixed-income business in 1986.

Its active strategy focuses on choosing the most attractive sectors and issues, said Win Neuger, senior vice president and managing director of fixed income. "The market is recognizing that other investment styles are attractive besides interest rate anticipation," Mr. Neuger said, explaining Bankers Trust's success.

Of the total, the firm reeled in $1.43 billion worth of index business. Indexes tracked include the Shearson Lehman Government/Corporate bond index, the Salomon Brothers Broad Investment Grade Bond Index and various customized indexes, Mr. Neuger said.

Bankers Trust listed 10 new fixed-income clients, but asked none be identified.

Respondents were asked to list clients and were permitted to stipulate some or all client names not be published. Those not listing any client names were not ranked.

Mutual fund manager Vanguard finished second overall in the fixed-income rankings, picking up $2.417 billion, including individual accounts. Of the total, $870 million came from 65 institutional tax-exempt clients.

Vanguard's bond portfolio comprises five active, "but not superactive" funds, said Jon Bogle, chairman. They cover Government National Mortgage Association securities; investment-grade bonds; high-yield bonds; short-term bonds; and Treasury bonds.

"We take a focused approach," he said describing Vanguard's philosophy, "by allowing the client to choose what portfolio he wants to be in."

The firm stresses yields with low operating fees. Vanguard's expense ratio, the measure of expenses as a percentage of assets, is only 0.41%, Mr Bogle said. Most mutual fund managers will charge 0.9%, he said.

Wells Fargo scooped up $2.036 billion worth of new business in 1986 with a passive strategy that centers entirely on indexing.

The firm tracks the Shearson Lehman and Salomon BIG indexes as well as enhanced subindexes, said Thomas Middleton, vice president of client relations and marketing.

Mr. Middleton credited indexing's propensity toward bettering active bond styles for Wells Fargo's windfall of new clients.

In addition, he said the firm has added two staff members in anticipation of a strong year in 1987.

Eric Clothier, formerly of Mellon Bank, Pittsburgh, and Tom Cooper, formerly of State Street, were hired at the end of 1986, Mr. Middleton said. Mr. Clothier will be a bond index trader and fixed-income manager. Mr. Cooper will be a deputy manager of fixed-income specializing in customized funds.

"It is our desire to be a leader in the development of enhanced index funds," Mr. Middleton said.

Among Wells Fargo's 12 new fixed-income clients are Federal Paperboard Co. Inc., Montvale, N.J.; National Intergroup Inc., Pittsburgh; SEI Corp., Wayne, Pa.; and Burns and Roe Inc., Oradell, N.J.

Ranking sixth this year was State Street Bank and Trust Co., Boston. It attracted $1.33 billion in 1986 "mostly offering index-type funds," said Harry Sterling, director of marketing for asset management services.

The strategy focuses on the Shearson Lehman Government/Corporate index, but Mr. Sterling said State Street does not have tunnel vision.

"We have the capability to index any subset of that universe, and we can also track the Salomon Brothers (BIG) index, but we have not really used it," he said.

Mr. Sterling said the mushrooming interest in bond indexing and the fact that State Street has been a pioneer in that field account for its new asset gains, although the firm asked the names of its two new fixed-income clients not be published.

Among the medium-size firms, those with $250 million to $1 billion under management, a variety of active styles drew new clients. Some of the leading firms in this group were Magten Asset Management Corp., New York; Smith Affiliated Capital Corp., New York; Wolf, Webb, Burk & Campbell Inc., Philadelphia; and Weaver C. Barksdale & Associates, Brentwood, Tenn.

Among small firms, those with less than $250 million under management, some of the largest gainers were E.M.G. Advisors, Fairfield, Conn.; Maryland National Bank, Baltimore; and Mutual Service Life Insurance Co., Arden Hills, Minn.

Magten employed its specialized active strategy to grab $175 million worth of new business in 1986, second in its asset category.

The firm looks for value in the low end of the fixed-income market, said Talton Embry, president.

"We've been successful because we have a differentiated product that has performed well," he said.

Three of its four new clients are

# Money managers that buy GICs show strong gains

**By Trudy Ring**

Money management firms that buy guaranteed investment contracts on behalf of their clients are becoming increasingly important in the GIC business.

Two of those firms are in the top 10 in new GIC business in 1986, according to *Pensions & Investment Age*'s Scorecard survey. The others are the insurance companies that write the GICs.

PRIMCO Capital Management Inc., Louisville, Ky., was third among survey respondents with $1.4 billion in new GIC business. It was ninth last year, with $400 million in new GIC business.

Morley Capital Management Inc., Lake Oswego, Ore., was sixth with $770 million in new GIC business. It did not appear in the top 10 last year.

Both firms buy GICs on behalf of their clients. Traditionally, most pension funds have bought the contracts directly from insurers. But PRIMCO and Morley officials said there is added value in their services.

"We view ourselves as a specialty fixed-income manager and our specific class of assets is GICs," said John Monahan, principal of PRIMCO.

A firm like PRIMCO can help a pension plan improve returns on GICs by deciding when to buy the contracts, Mr. Monahan said. "Any decision to make a purchase on a certain date is making a major interest rate bet," he said. "In today's environment, with lower interest rates, every basis point counts."

Both PRIMCO and Morley follow more than 40 insurance companies, a task few pension funds are able to do internally, officials of the firms said.

"We are basically trying to help plan sponsors use GICs as a true investment asset, rather than something they just buy from an insurance company," said Larry Mylnechuk, senior vice president of Morley.

Morley also is offering open-end pooled GIC funds for banks to offer to their pension fund clients, he said.

PRIMCO's 23 new clients included Crown Zellerbach Corp., San Francisco; Occidental Petroleum Corp., Los Angeles; Scott Paper Co., Philadelphia; and the Milwaukee City Employes' Retirement System. Morley's 10 new clients included MidCon Corp., Lombard, Ill; Graphic Communications International Union, Washington; and Occidental Petroleum.

Eight insurance companies joined PRIMCO and Morley in the top 10 GIC firms. As PRIMCO and Morley buy the contracts from major insurers, there may be some double-counting of assets in the top 10.

Leading the pack, as it did the previous year, was Prudential Asset Management Group, Newark, N.J with nearly $7.2 billion in new GIC business.

In 1985, Prudential had $4.3 billion in net sales. Bob Chmely, president, attributed the increase to an expansion of the GIC market, as well as some annuity sales, which Prudential included in the GIC figure. Also, some of the growth represented reinvestment of the proceeds of maturing contracts, he said.

Prudential's hold on the GIC market is largely because of its reputation and the expertise of its sales force, Mr. Chmely said. "When (a pension fund) has a Prudential GIC, it means something to the participants," he said.

Prudential listed 50 new GIC clients, including National Rural Electric Cooperative Association, Washington; North American Philips Corp., New York; and Procter & Gamble Co., Cincinnati.

The Travelers Cos., Hartford, Conn., came in second with $1.6 billion. "We're very aggressive in that business," said Tom Willison, vice president-asset management and pension services.

Travelers already has a good market position in GICs, so many pension executives think of Travelers when in the market for contracts, Mr. Willison said. Also, Travelers' sales force is distributed well geographically and has contacts at major corporations, he said. Also, consultants know and respect Travelers, he said.

Travelers provided client names on the condition that none be published. Respondents were given the option of doing this, but those that did not provide any client names were not ranked.

Provident National Assurance Co., Chattanooga, Tenn., ranked fourth with $1.3 billion. "Unlike a lot of the companies, the GIC is our primary product," said Win Profio, vice president-marketing. He attributed Provident National's success primarily to its aggressive sales force and skilled underwriters.

Provident National provided client names on the condition none be published.

Aetna Life & Casualty Co., Hartford, was fifth with $1.2 billion. Aetna's ability to be in the GIC market at all times buoyed its business, said T. Jerald Moore, vice president.

Aetna chose to provide new business figures for Jan. 1 through Sept. 30, while the other managers gave figures for

# Real Estate

## 10 managers rake in $4.1 billion in '86

By Steve Hemmerick

Ten of 36 real estate investment managers got about 67.8%, or $4.107 billion, of the $6.065 billion allocated to equity real estate during 1986, as measured by the *Pensions & Investment Age* Scorecard survey.

The Scorecard figures support consultants' beliefs that pension plan executives are picking well-known names for investment management and prefer advisory firms at which the owner/operators have an equity stake in the firm.

All of the managers making the Scorecard top 10 were well-established names in the business.

And nine of 10 that received the most new business in 1986 were advisory firms, rather than banks or insurance companies.

Insurance companies once dominated the business with open-end funds. Now, investors are increasingly moving to more specialized real estate investment firms that offer closed-end funds or separate accounts.

The only insurance company making the top 10 was Aetna Life & Casualty, Hartford, Conn., which placed third, helped by the 1986 closing of a $200 million closed-end apartment development fund. It received $511 million in 1986.

Pat Bowerman, a vice president with Aetna, said Aetna's offering of more closed-end and specialty fund real estate products than other insurance companies might have helped it make the top 10.

Heitman Advisory Group, Chicago, led the firms with $900 million in new assets. It was followed by Copley Real Estate Advisors, Boston, with $775 million.

For nine of the top 10 in aggregate, most of the assets received went to either separate accounts, $2.177 billion, or closed-end commingled funds, $1.691 billion, according to officials.

About 11% of the assets for the top 10 funds went into the less-popular open-end funds: $300 million to Aetna and $196 million with Copley's Development Properties Account.

There was also more money invested this year, as the top 10 firms reported receiving about $800 million more in assets than did the top 10 firms last year.

Other firms making the top 10 this year are: TCW Realty Advisors, Los Angeles, $317 million; Richard Ellis Inc., New York, $301 million; Jones Lang Wootton Realty Advisors, New York, $300 million; JMB Institutional Realty, Chicago, $261 million; J.W. O'Connor & Co., New York, $260 million; Eastdil Realty Inc., New York, $243 million; and LaSalle Advisors Inc., Chicago, $239 million.

Only one firm that was on last year's real estate Scorecard didn't make a return appearance: Boston Co., Inc., Boston. It was replaced by LaSalle.

All of the firms interviewed — LaSalle officials weren't available — reported doing all or part of in-house property management and leasing, which attract pension executives. In-house property management helps cut costs and keep up property while in-house leasing is critical because managers buy out tenant leases that are below market rental rates and make other moves to increase return on properties.

But entrepreneurial or employee-owned business may be a more important factor in getting new business. "Pension sponsors basically like that," said William Ramseyer, president of San Francisco-based Pension Realty Advisors.

"Sponsors like to see the service people as basically stake holders," he said. The theory is that employees will work harder, stay longer and increase profits when they can share in their productivity, he explained.

TCW Realty had the most named clients with 21, including Brunswick Corp., Skokie, Ill.; Duke Power, Co., Charlotte, N.C.; General Signal Corp., Stamford, Conn.; and Hallmark Cards Inc., Kansas City, Mo.

Copley named 11 major new clients, including Alameda County Employees' Retirement Association, Oakland, Calif.; Centel Corp., Chicago; and Dallas Employees' Retirement Fund. In addition, it reported, but did not list, 28 other tax-exempt funds as clients.

Heitman reported among its new clients in 1986: Pennsylvania State Employees' Retirement System, Harrisburg; Kellogg Co., Battle Creek, Mich.; Southwestern Bell Corp., St. Louis; and Fresno County (Calif.) Employees' Retirement Association.

J.W. O'Connor reported as new clients: U S WEST, Denver; Ford Foundation, New York; Burlington Northern Inc., Seattle; and Oregon Public Employes' Retirement System, Salem.

Aetna Life reported General Motors Corp., New York, as a new client.

JMB's new clients in 1986 included New Castle County Employees' Pension Program, Wilmington, Del.; Southwestern Public Service Co., Amarillo, Texas; Houston Retirement System; and CF Industries Inc., Long Grove, Ill. ■

## RREEF property sold off; tops S&P

By Steve Hemmerick

CHICAGO — Officials of The RREEF Funds have sold all of the properties in what they say was the first closed-end real estate fund, garnering a return in an 11-year holding period that bettered the skyrocketing Standard & Poor's 500 stock index.

Stanislaw Maliszewski, a principal in RREEF's Chicago office, said the properties that were purchased for $27 million in RREEF West I have been sold for about $60 million to provide a 16.79% compound annual return.

For the holding period, 1975 through 1986, the 16.79% return beat RREEF's calculations of the S&P 500 return of 13.84% and the Shearson Lehman Government/Corporate bond index return of 10.4% return, he said.

Adjusted for inflation, the closed-end fund had a return of 10.19%.

RREEF officials said the sale is important because it demonstrates equity real estate can compete with stock returns.

Also, some investors have been worried about the sale of real estate when so many office markets across the United States are overbuilt.

Unlike open-end funds, closed-end funds have a seven- to 10-year holding period, and the West 1 fund is one of the first large closed-end funds to be sold since pension funds began investing in them in the mid-1970s.

*Point West Plaza, a two-story office building in Sacramento, Calif., was one of the holdings in the RREEF Fund's first closed-end real estate fund. The portfolio was liquidated recently, providing a 16.79% annual rate of return to investors during its 11-year lifetime.*

The holding period could have been extended for a few more years, but investors voted to sell partly because they wanted to see how the appraised values held up. Mr. Maliszewski said the 12 properties in the fund sold for slightly more than appraised value, but he wouldn't say by how much.

Ten of the 12 properties were sold last month, only five weeks after they went on the market, to Santa Fe Pacific Realty Corp., a real estate division of Santa Fe Southern Pacific Corp., Chicago. Santa Fe was one of 12 bidders.

"One of the interesting things about the sale was we wanted to decide whether we should sell the properties individually or as a package. We determined that all of the properties but two, which had their own peculiarities, could be sold as a package," said Mr. Maliszewski.

One was excluded from the package because space was being re-leased, he said. Of the two, one has been sold and the other is in the process of closing.

Basically, the properties in the fund were located in the Western United States and were well located and well leased, he said. That supports the claim by RREEF officials that the best real estate investments for pension funds are existing properties already leased with tenants and bought for all cash.

Other investors have claimed RREEF's returns would suffer because of the way it buys properties.

RREEF officials, however, view the sale as a demonstration of the validity of their investment approach.

Six pension funds had invested in the fund, which had about 40% of its assets in shopping centers, 18% in business parks, 29% in low-rise garden office buildings, 8% in industrial properties and 5% in office buildings. RREEF officials would not disclose the investors' names. ■

## Wrap-up

### Interest still there

SAN FRANCISCO — Some pension fund executives are optimistic about investing in what others are describing as a disastrous equity real estate market that will only get worse before getting better.

Bob Wysocki, manager of financial operations and investment management for NYNEX Corp., New York, and manager of that company's $10 billion pension plan, said NYNEX officials are selectively looking for real estate investment opportunities in the current market.

Speaking at the winter conference of the Pension Real Estate Association in San Francisco, Mr. Wysocki said "our timing is reasonable" concerning investment in real estate. Real estate certainly is not at the top, though it may not be at the bottom of the cycle, he added.

He said his fund has hired some separate account managers, though he did not name them. *Pensions & Investment Age* has identified them as Aldrich Eastman & Waltch, Boston; Heitman Advisory Corp., Chicago; and John McMahan Associates, San Francisco.

He did not discuss NYNEX's holdings in the Telephone Real Estate Equity Trust, a $4 billion wasting trust set up by American Telephone and Telegraph Co.

Thomas M. McMahon, vice president for finance and administration of the Pacific Maritime Association in San Francisco, voiced some doubt that media descriptions of a worsening real estate market should scare investors out of that market.

He recalled that, in 1975, when New York faced a serious finan-

# Futures & options

## Wells Fargo gets most new business in dynamic hedging

By Trudy Ring

The nation's biggest passive investment firm made a major inroad into the dynamic hedging market in 1986.

Wells Fargo Investment Advisors, San Francisco, was the leading gainer of new business for dynamic hedging, also known as portfolio insurance, through Dec. 1, according to *Pensions & Investment Age*'s Scorecard survey.

Wells Fargo, with more than $55 billion under management, most of that in index funds, gained $7.5 billion in assets to be hedged dynamically.

Dynamic hedging involves the selling of futures against a portfolio to limit the portfolio's loss to a pre-specified level in down markets.

If the market rises again, the futures contracts may have to be bought back.

"What makes for good indexation also makes for good portfolio insurance management," said Frederick L.A. Grauer, president of Wells Fargo, explaining the firm's success in attracting clients.

Index funds must be managed within narrow boundaries to replicate an index precisely, and portfolio insurance also must be managed with precision to produce the degree of protection desired by the client at the lowest possible cost, he said.

"Our ability to manage a hedge within fine tolerances and at low cost is second to none," Mr. Grauer said.

Wells Fargo's new dynamic hedging clients include the $2.4 billion Illinois State Universities' Retirement System, Champaign, which is applying the strategy to all its marketable securities, valued at $2.1 billion.

Wells Fargo uses the dynamic hedging technology developed by Leland O'Brien Rubinstein Associates Inc., Los Angeles, another leading firm in this field. LOR does not appear in the Scorecard because the firm did not respond to *P&I Age*'s questionnaire.

Had Leland O'Brien Rubinstein participated, it would have shown $2.5 billion in new assets directly under management and another $20 billion under management through licensees such as Wells Fargo, said Larry Edwards, president.

Another LOR licensee appearing in the top 10 for portfolio insurance is BEA Associates Inc., New York, with $309 million in new business.

## Methods' use up 40%

### Futures, options gain among top 200

By Trudy Ring

Futures and options continued to gain acceptance among the nation's top 200 pension funds in 1986.

According to *Pensions & Investment Age*'s survey of the top 200, 63 were using stock index futures as of Sept. 30, a 40% increase from the 45 a year earlier. Forty-six pension funds used fixed-income futures, up 39% from the the previous year.

Stock options users rose to 62 users from 49, a rise of 26.5%, while 22 used bond options, up from 18 a year earlier, a rise of 22.2%.

Several of the funds use derivative products in dynamic hedging, which became a popular strategy during the year. According to the survey, 18 of the 200 largest pension funds use this strategy *(P&I Age*, Jan. 26), which uses the derivative markets to hold portfolio values to a predetermined level in declining markets.

However, some of the funds using dynamic hedging also implemented other futures and options strategies in 1986.

The $1.9 billion Conoco Inc. pension fund, Wilmington, Del., and the $1.4 billion Bechtel Power Corp. fund, San Francisco, use futures in the three-way asset allocation strategy run by Wells Fargo Investment Advisors, San Francisco.

The strategy allows Wells Fargo to shift assets among a Standard & Poor's 500 stock index fund, long Treasury bonds and cash. The manager may use futures to make the shifts.

"It seemed like every time, they've outperformed those three asset classes," said Lu Jones, Conoco coordinator-pension investments, explaining why the fund went into the strategy. Neither Conoco nor Bechtel divulged the amount invested in three-way asset allocation.

All Conoco's equity and bond managers have permission to use derivatives, Ms. Jones added.

Bechtel recently granted Wells Fargo permission to use futures in an arbitrage program with a stock index fund, said James Rhodes, senior vice president of Sierra Asset Management, San Francisco, Bechtel's investment subsidiary.

The $1.2 billion State of Delaware Retirement Funds, Dover, gave Wells Fargo and Mellon Capital Management Corp., San Francisco, permission to use futures in accounts that allocate assets between stock and bond index funds, said Bruce Kallos, chairman-investment committee. "We're taking advantage of some mispricings," he said.

The nearly $1.2 billion Milwaukee City Employes' Retirement System started an options buy-write program in the second quarter of 1986. Loewi Asset Management, Milwaukee, is running $3 million in this pilot program, said Robert G. Nehls, secretary and executive director of the fund.

"We're closely monitoring it to see what incremental return it will produce and what downside protection it will produce," he said. The fund and its consultant, SEI Funds Evaluation Services, Chicago, will review the results at midyear and decide whether to continue the program.

Some pension executives view futures and options investments not as distinct programs, but as tools to be used by their money managers when necessary. "We just turned a manager loose," said William H.S. Preece Jr., director-corporate finance at the $1.8 billion Dart & Kraft Inc. pension fund, Northbrook, Ill. The survey was taken before the company split into two units.

"Some of our managers sometimes have used them to, basically, hedge our positions," said Sunny Oberoi, director-pension fund management Pacific Gas & Electric Co., San Francisco, which has $3.2 billion in pension assets. "It's very rare that they use them."

While many funds among the top 200 initiated futures or options programs in 1986, a few terminated them. One was the $5.8 billion Shell Oil Co. pension fund, Houston, which ended an options overwriting program *(P&I Age*, July 21). Shell officials declined to detail reasons for ending the program.

The $5 billion Allied-Signal Inc. pension fund, Morristown, N.J., also discontinued an options overwriting program in 1986. "There was little incremental value relative to the overall fund's size," said Edward T. Tokar Jr., vice president-investments. It had been used on a small portion of a stock index fund. ■

*James Rhodes, of Sierra Asset Management, left, and William H.S. Preece Jr., of the former Dart & Kraft Inc., are among pension executives allowing money managers to use futures and options.*

## Notes

### Derivative use listed

GREENWICH, Conn. — Use of futures and options by corporate and public pension funds likely will grow in 1987, according to reports by Greenwich Associates.

The most growth is expected to be in dynamic hedging, a specialized futures program also known as portfolio insurance.

Of the more than 1,000 corporate pension funds surveyed by the consulting firm, 11% plan to start using portfolio insurance in 1987; 6% used it in 1986.

Another 6% of the corporate funds will start using other financial futures programs in 1987, the report said. Thirteen percent used these strategies in 1986.

Growth of options use was expected to be slower; 4% of the corporate funds will begin writing options in 1987, the report said, with 11% already doing so in 1986.

Among the 370 public pension funds surveyed by Greenwich, use of portfolio insurance is expected to double. Five percent of the funds surveyed used this strategy in 1986; an additional 5% plan to add it in 1987.

Use of other futures strategies also is expected to double, to 12% from 6%. Use of option writing, already employed by 18% of the funds, is expected to rise by six percentage points.

### Higher costs seen

NEW YORK — The actual cost of portfolio insurance in 1986 will prove to be much higher than expected, predicts Louis I. Margolis, managing director of Salomon Brothers Inc., New York.

"The cost of portfolio insurance will be higher in 1986 than everyone expected and people will be disappointed," Mr. Margolis told a conference on quantitative investment management hosted by the Institute for International Research.

He explained the higher costs would result from the different market circumstances. He said that during 1984 and 1985, the cost of portfolio insurance was lower because volatility in the market was increasing and futures contracts were overvalued.

"One of the ways you control your costs of your exposure in the stock market is using stock index futures, which is less costly than actual stocks. The mispricing of futures contracts increases or decreases those costs. In 1984 and 1985 . . . volatility was increasing and contracts were overvalued and people benefited. So peoples' actual experience in 1984 and 1985 probably was better than could reasonably have been expected," he said.

Mr. Margolis warned people who began using portfolio insurance during 1984-'85 will find the cost of pursuing portfolio insurance programs in 1986 will be higher. "The difference in experience is a fairly wide spread," he said.

Another cost issue Mr. Margolis expects more people to become "sensitized" to in 1987 is opportunity cost.

He said money managers used to be mostly concerned about trading costs, especially commis-

# Wells Fargo . . .

*Continued from page 31*

The remaining firms among the top 10 use other technologies for dynamic hedging.

Bankers Trust Co. — Investment Management Group, New York, developed its own computer model and has been in the portfolio insurance business since 1981. "We think there are some subtleties in the model which are really nice," said Kathy Condon, senior vice president.

Because Bankers Trust is not strictly a hedging manager, it often runs some of the hedge clients' assets, rather than just overwriting them. Some of the hedge clients have set up index funds with Bankers Trust, allowing the manager the flexibility to sell stocks rather than futures when futures are undervalued, Ms. Condon said.

Bankers Trust got nearly $2.1 billion in new portfolio insurance business.

Skye Investment Advisors Inc., Cupertino, Calif., developed its own model and uses it to do hedging for another top 10 firm, RepublicBank Dallas, as well as for direct clients and for Massachusetts Mutual Life Insurance Co., Springfield. The $840 million in new portfolio insurance assets listed by Skye include the accounts managed for those companies; RepublicBank's total was $800 million.

"Our model is based on very strong mathematical theorems," said Manit Rye, vice chairman of Skye. He said Skye officials believe their model is more accurate than some others.

Oppenheimer Capital Corp., New York, developed its model based on experience in the options market. "Portfolio insurance is basically an options product," said Eugene Brody, director of options management, noting portfolio insurers use futures to create a synthetic put option on an entire portfolio.

"We've incorporated what we've learned in the trenches into our portfolio insurance program and we're not as academic as some of the others," Mr. Brody said.

Oppenheimer makes smaller adjustments in its hedge ratio than do some other dynamic hedgers and also will sell fewer futures when they are at discounts and buy more when they are at premiums, he said. "We are making a trade-off between imperfect replication and transaction costs," he said.

Oppenheimer listed $425 million in new dynamic hedging business.

Advanced Investment Management Inc., Pittsburgh, uses its own software to hedge accounts that came in, for the most part, because clients thought they would get better service from Advanced than from some of the larger portfolio insurance providers, said J. Thomas Allen, president.

"We tend to be pretty close to our client base," he said. "We'll design (the hedging program) any way they want it." Advanced listed $205 million in new dynamic hedging business.

Rounding out the leading gainers in portfolio insurance business in 1986 are Northern Trust Co., Chicago, eighth with $120 million; J.P. Morgan Investment Management Inc., New York, ninth with $115 million; and The Boston Co., Boston, and Citicorp Investment Management, New York, tied for 10th with $100 million each.

Portfolio insurance managers said the popularity of the strategy is explained easily. "It's such a useful tool to control the volatility of an asset," Skye's Mr. Rye said. ■

## Notes

*Continued from page 31*

sions. Then as people got more sophisticated, they worried about the bid-ask spread and liquidity premiums.

"People always raise the question, why are more and more active managers doing trading in packaged formats in a short period of time? The reason is that people are trying to contain these opportunity costs, the one that got away, by executing packaged trades in a short time frame."

Mr. Margolis also said interest in derivative products is keen.

### New fund offered

NEW YORK — Oppenheimer Capital Corp. is getting set to launch a dual-purpose mutual fund that may be the first to include portfolio insurance and options writing overlays in its investment strategy.

The QFV Dual Purpose Fund will be Oppenheimer Capital's third mutual fund.

It is part of an effort to build a family of funds since its parent, Oppenheimer & Co. L.P., went private in a management buy-out last year.

Through its mutual fund subsidiary, QFV Advisors Inc., Oppenheimer already runs the Quest for Value fund, its flagship, and a cash management trust.

"The appeal of the dual-purpose concept is that it offers a means of appealing to specific investor interests through a single investment vehicle," said Joseph La Motta, president of the fund and Oppenheimer.

Oppenheimer, which now uses portfolio insurance on about $1 billion in separate account assets, will launch the portfolio-insured fund at a time when the strategy has gained tremendous popularity among investors.

It is estimated portfolio insurance is used on some $60 billion in assets. About a year ago that figure was estimated at $4 billion.

As investment adviser, Oppenheimer will manage fund assets through the value-oriented approach used for many of its more than $9 billion in tax-exempt and individual accounts.

However, the fund's dual objectives — long-term capital appreciation and preservation of capital as well as current and long-term income growth — will be represented through two types of stock: capital, or common, shares and income or preferred shares.

A public offering of the new closed-end fund was scheduled for late January or early February and includes at least 2 million shares each of capital and income shares. Both classes have been priced at $12.50 a share.

Mr. La Motta said the fund is registered to raise as much as $100 million from institutional and individual investors.

The dual-purpose structure offers investors built-in leverage without incurring the risks of typical leveraging strategies, such as buying on margin.

That's because the capital and income shares initially will each represent 50% of fund assets, while each will receive 100% of the fund's capital appreciation and income respectively.

Thus for every $1 invested, capital shareholders earn capital appreciation on $2 of initial assets, while income shareholders get income earned on $2 of assets.

The leveraging also can magnify the risks of capital depreciation.

According to the preliminary prospectus, the financial leveraging means capital shares of the fund may show greater price volatility than non-leveraged investment funds generally.

Oppenheimer will seek to control these downside risks as well as provide potential for generating additional incremental income through the use of portfolio insurance and options overwriting.

### Trading increases

Trading of most financial futures and options instruments increased in 1986, according to leading exchanges.

Activity in Standard & Poor's 100 and 500 stock index options paced the Chicago Board Options Exchange to record volume of 180.3 million contracts, up 21.2% from 1985's 148.8 million total.

Trading in the S&P 100 option amounted to 113.1 million contracts, up 24.6% from 1985's 90.8 million total. The S&P 500 option, revamped last year, had 1.6 million contracts traded, more than a 200-fold increase from 1985, when only 7,762 were traded.

Individual stock options traded on the options exchange had their first volume increase since the introduction of index options in 1983. Volume rose to 64.7 million, up 12.5% from the 57.5 million traded in 1985.

Twelve individual contracts set records on the way to the Chicago Mercantile Exchange's record volume of 68.7 million, up 21.6% from 1985's total of 56.5 million.

Leading the way were S&P 500 stock index futures, whose 19.5 million total volume was a 30% increase from 1985's total of 15 million. Options on S&P 500 futures, four currency futures and four options on currency futures also set records at the Mercantile.

Interest rate futures and options on futures led volume gainers at the Chicago Board of Trade, which had record volume of 100.8 million contracts, up 20.3% from 1985's 83.8 million.

*Continued from page 3*

Mr. Bastin described Paribas as a highly quantitative firm, like several other small and medium-size firms that ranked high in the survey. Firms are considered medium if they have $250 million to $1 billion under management.

The firm that ranked second in the small category, Wedge Capital Management Inc., Charlotte, N.C., has a strategy based about 75% on quantitative analysis and 25% on more subjective judgments derived from that research, said Richard Hodde, executive vice president.

"We take a very conservative, disciplined approach to investing," he said. "We use computer models to evaluate individual stocks and the market as a whole."

Wedge had 16 new clients, including L.L. Bean Inc., Freeport, Maine, and Southwire Co., Carrollton, Ga. It had $90 million in new equity assets.

Moran Asset Management Inc., Greenwich, Conn., would have outranked Wedge for second place if it had provided client names. It had $120 million in new equity business. Evans & Moxon Capital Management Inc., Yardley, Pa., would have tied for fifth in the small firm category had it provided client names. It had $67 million in new equity business.

The firms that ranked second and third in the midsize category both are quantitative, while the one that ranked first is an exception to this general trend.

Ranking second was Renaissance Investment Management Inc., Cincinnati, with $280 million. The firm, now 100% invested in equities, uses quantitative techniques to determine when to make moves among equities, bonds and cash, said Frank Terrizzi, president.

Besides being quantitative, Renaissance also is one of only a few firms that provides asset allocation services, a factor that makes it attractive to pension funds, he said.

Renaissance provided client names on the condition none be published.

Ranked third, with $230 million, was Advanced Investment Management Inc., Pittsburgh, a quantitative manager that looks at such factors as price-earnings ratios, dividend discount models and risk levels, said J. Thomas Allen, president.

Many people have a great feel for subjective stock picking, he said, but clients often are more comfortable with managers applying objective, quantitative methods.

New equity clients listed by Advanced include Joy Manufacturing Co., Pittsburgh, and Hershey Foods Corp., Hershey, Pa.

Standing out from the "quants" was Eagle Asset Management Inc., St. Petersburg, Fla., which ranked first in new equity business among medium-size firms, with $327 million. "We feel investing is as much an art as it is a science," said Lincoln Kinnicutt, senior vice president.

Eagle's president, Herbert Ehlers, is not as famous as some other stock pickers, like John Templeton, founder of the Templeton Funds, St. Petersburg, Fla., or Warren Buffett, chairman of Berkshire Hathaway Inc., Omaha, Neb., but he has been successful at it, Mr. Kinnicutt said.

The Eagle staff makes individual stock selections from companies that are healthy and growing, are in easy-to-understand businesses, have recurring income streams, have strong balance sheets and have strong cash flow, Mr. Kinnicutt said.

The eight new clients listed by Eagle include Carolina Mills, Maiden, N.C.; McKee Baking Co., Collegedale, Tenn.; and the Louisiana Teachers' Retirement System, Baton Rouge. ■

# Indexing . . .

*Continued from page 3*

It also had substantial business in an area for which respondents were not ranked — annuity closeouts. Aetna had $4 billion in new business there.

"We have a very broad product line," said T. Jerald Moore, vice president, explaining Aetna's success. Aetna was ranked eighth in Scorecard last year.

Unlike some other large firms that ranked high, Aetna concentrates on active management. An Aetna product that proved popular with clients in 1986 was its discretionary asset management service, which has a large equity component but also allows for moves of money among bonds, cash, real estate and international investments, Mr. Moore said.

Ranked third was another prominent index fund manager, State Street Bank and Trust Co., Boston, with $11.9 billion. State Street reported that $9.4 billion of this was in stock index accounts, including those using futures and foreign stocks. Another $1.25 billion was in bond index funds.

State Street has a large amount in S&P 500 stock index funds, but also uses customized indexes extensively.

Among the top 10 large managers, those with more than $1 billion under management, others with significant index fund business are Mellon Capital Management Corp., San Francisco; Bankers Trust Co. — Investment Management Group and Alliance Capital Management Corp., both of New York; and The Boston Co., Boston. Bankers Trust and Boston Co. have substantial portfolio insurance business, as does another top 10 firm, J.P. Morgan Investment Management Inc., New York.

Among the medium-size firms, $250 million to $1 billion under management, and small ones, less than $250 million under management, the top gainers represented a mixed bag of investment styles.

First in the medium-size category was Hahn Holland & Grossman, Chicago, with $475 million. The firm did not provide figures on how much of that came from equity, fixed-income or balanced accounts. However, most of the firm's accounts are equity only, or balanced with a heavy equity orientation, said Lou Holland, partner.

He described the firm's equity strategy as top-down and risk-averse. Explaining the firm's success, he said, "Our story is relatively simple. We've worked hard and we've told our story."

Ranked second in the midsize category was Axe-Houghton Management Inc., Tarrytown, N.Y., whose $451 million net gain included substantial amounts in index funds. During the year, Axe-Houghton acquired index fund manager Great American Core Investors, also of Tarrytown. The acquisition accounted for $270 million of Axe-Houghton's gain.

Coming in third, with $415 million, was Merganser Capital Management Corp., Cambridge, Mass., an active fixed-income manager.

Paribas Asset Management Inc., New York, led small firms with a net gain of $146 million. Paribas is a highly quantitative equity manager.

PMRealty Advisors Inc., Newport Beach, Calif., came in second with $91 million. As the name implies, it is a real estate manager.

Wedge Capital Management Inc., Charlotte, N.C., an equity manager using quantitative techniques primarily, was third with $90 million.

Two firms would have placed in the top 10 for small managers had they provided client names. Moran Asset Management Inc., Greenwich, Conn., would have been second, with $120 million in new equity business. Evans & Moxon Capital Management Inc., Yardley, Pa., would have been seventh with $67 million in new equity business. ■

# Active . . .

*Continued from page 4*

the National Can Corp., Chicago; General Motors Corp., New York; and Primark Corp., Detroit.

Smith Affiliated Capital placed third among medium-sized firms, gaining $123 million.

"We are aggressive shifters of maturity risk, disciplined by yield curve analysis," said Robert Smith, president, describing the firm's active strategy.

Although the firm is risk averse, it has produced high returns and "that is why we have attracted a good deal of new business," said Dick Dearnley, executive vice president.

Its new fixed-income clients are Medical Inter-Insurance of New Jersey, Lawrenceville; Metromedia Inc., Secaucus, N.J.; Uniroyal Plastics Inc., Stamford, Conn.; and F.W. Woolworth & Co., New York.

An active strategy also works well for Weaver C. Barksdale, as the firm gained $82 million.

Its controlled-risk approach is designed for institutions seeking the added value of active management, without the traditional volatility associated with such techniques, said John McDowell, principal and senior vice president of client relations and marketing.

The strategy's two objectives, high-income yields and consistent returns, have produced a 12.3% annualized return in the past nine years, he said. This compares with the Shearson Lehman Government/Corporate annualized return of 11.3% for the same period.

"We have had only one down quarter in 36 (quarters)," Mr. McDowell said, explaining the firm's ability to attract new customers. He asked the names of his firm's three new fixed-income clients not be published.

Among smaller firms, E.M.G. Advisors outdistanced the pack with $62 million in new business. Maryland National Bank and Mutual Service Life Insurance Co. each gained $15 million, tying for second.

E.M.G. Advisors employs an active fixed/variable methodology. The firm buys discounted fixed-rate mortgage-backed securities, either agency or government guaranteed, and enhances the return with variable-rate government securities.

This strategy has produced a seven-year annualized return of 16.6% with a standard deviated risk of 5.1%, said Eben M. Graves, president. This compares with Shearson's 14.1%.

It lists Amerace Corp., New York, among its six new fixed-income clients. ■

# Labor . . .

*Continued from page 1*

specified damages to the pension fund resulting from the suspended payment and the replacement of management-appointed trustees with trustees appointed by the court.

"We don't want to get lax with our contributions, especially in light of the corporation we are dealing with," said Marty E. Urra, a labor trustee and plaintiff in the case. Mr. Urra is president of Local 702 of the International Association of Machinists and Aerospace Workers, Miami.

The labor trustees' counsel, Gerald M. Feder of Feder & Associates, Washington, declined to comment on the charges made against Eastern and Texas Air. "The complaint speaks for itself," he said.

Theodore M. Forbes, a partner in the law firm of Gambrell & Russell, Atlanta, which is Eastern's general counsel, declined to comment because he is a defendant in the case. The complaint said Mr. Forbes "knowingly aided, abetted and/or participated" in violations of ERISA.

The lawsuit is "premature" because the Internal Revenue Service has yet to act on Eastern's Sept. 15 application for a funding waiver, said William Bell, an attorney for the defendants. "If the application is denied, the money will be put in," said Mr. Bell, who is with Holland & Knight, Miami.

Meanwhile, the pension fund is suffering a loss caused by Eastern's decision to withhold the $16 million contribution, the complaint alleged.

Because of the company's decision, the trustees Sept. 26 unanimously agreed to liquidate $12 million in stocks and bonds assets to cover anticipated benefit payments, the complaint said. The two labor trustees had wanted Eastern to make the whole $16 million payment or, failing that, to make benefit payments as they came due, but they voted for the sale of assets because the company rejected the alternatives, the complaint said.

Eastern's reluctance to make the contribution for 1985 started with the Feb. 24, 1986, plan to merge the company with Texas Air, the complaint said. Under the merger agreement, holders of Eastern's common stock would receive $6.25 a share, of which Texas Air would pay $4.50 and Eastern would pay $1.75 if it could sell debt to finance the payment to the stockholders.

Approval of certain creditors was needed to issue the additional debt, the complaint said. If Eastern could not make the $1.75 a share payment, Texas Air would pay the entire amount.

Eastern determined it would have to repay $110 million of debt to get approval for the new issue, according to the complaint. "Before Aug. 28, 1986, Eastern and Texas Air had evaluated the cash needs of Eastern, which were related, among other things, to the requirements of the merger agreement, and had concluded that Eastern probably would withhold the required $16.007 million contribution to the plan on September 15, 1986," the complaint stated.

The Eastern case raises stubborn questions about fiduciary responsibility that are inherent in the management trustee's dual role as corporate executive and pension plan official. For example, when The LTV Corp., Dallas, initiated an unsuccessful tender offer for Grumman Corp., Bethpage, N.Y., in 1981, management trustees of the Grumman pension plan directed the purchase of additional shares of Grumman stock in an effort to thwart the takeover.

The 2nd U.S. Circuit Court of Appeals in New York found in 1982 the trustees had breached their fiduciary duty by failing to act for the exclusive benefit of the plan beneficiaries.

Proponents of greater rights for pension plan beneficiaries won another battle last year, when the U.S. Supreme Court refused to review a lower court's finding IRS approval of a funding waiver does not override a union contract that obligates funding by the plan sponsor.

Robert C. Long, a lawyer on the losing side of the case — which involved the United Auto Workers and Keystone Consolidated Industries Inc., Dallas, said plan sponsors should consider adopting collective bargaining agreements that explicitly recognize the employer's right to withhold funding if the IRS approves a funding waiver.

"This is another item on the checklist" in preparing contracts, said Mr. Long of Seyfarth, Shaw, Fairweather & Geraldson, Chicago.■

# Hancock . . .

*Continued from page 2*

funds will continue, and he said he believes some pension fund executives are taking assets from open-end funds for present liquidity needs instead of taking assets out of other investments, particularly the stock market.

Those withdrawing could be paid out in unit share values that are substantially lower than only 12 months ago.

Mr. Garner said Hancock officials are aggressively writing down values of properties in the fund to current market values to protect the assets of remaining fund participants and so the fund is not paying out inflated values.

Although the fund has only 35% of its assets in office property, among the hardest hit property type, it does have substantial holdings in Houston, Dallas and Denver, cities suffering from high office vacancy rates.

That need to write down asset values, however, worsens the situation, according to Barbara Cambon, a principal with Institutional Property Consultants, San Diego, Calif. "You don't want to be the last one in the fund in case there is no value left," she said.

Mr. Garner said the fund will not be selling troubled buildings to meet withdrawal requests. He said other properties, including some believed to be at peak value, have been designated for sale. Those sales will account for about $60 million of the payouts expected to be honored this year; the other $40 million will come from income.

Hancock's ERA fund is not the only life insurance open-end real estate fund having redemption problems, said Ms. Cambon.

Prudential Realty Group's Property Investment Separate Account 1, for example, lost 50 investors in 1986 alone. In the past two years, the giant open-end fund has experienced an average outflow per quarter of $150 million to $200 million and an average inflow of $44.5 million.

As of Sept. 30, PRISA had $5.03 billion in total assets (gross) (*P&I Age*, Jan. 12).

"The first thing that I think generated the withdrawal requests is the relative poor performance of the funds" that were hit by withdrawal requests, Ms. Cambon said.

"Because they (the commingled funds) have this stand-in-line system for getting out, I think people who are even concerned about the possibility of getting out feel the necessity to get in line," she said.

In addition to pension executives' concerns about investment performance, Ms. Cambon said there is a structural change in the real estate market.

"I think the market has changed in a lot of ways," she said, adding there still is a place for the broadly diversified open-end funds, including the need of funds that have not previously invested in real estate. ■

# Money managers buy . . .

*Continued from page 4*

Jan. 1 through Dec. 1.

Aetna also provided client names on the condition they not be published.

Rounding out the top 10 were Principal Mutual Life Insurance Co., Des Moines, Iowa, with $695 million; The New England, Boston, $452 million; MONY Financial Services, New York, $434 million; and Pacific Mutual Life Insurance Co., Newport Beach, Calif., $419 million.

Some big names were absent from the list. Equitable Life Assurance Society of the United States, Secaucus, N.J., would have ranked sixth, with $1.05 billion, had it provided client names. Connecticut Mutual Life Insurance Co., Hartford, would have been ninth, with $565 million, had it provided client names.

Also, three of 1985's top 10 did not participate in the survey. They are Metropolitan Life Insurance Co. and New York Life Insurance Co., both of New York, and John Hancock Financial Services, Boston. A year ago, they ranked second, fourth and fifth respectively.

The top GIC managers said defined contribution plans, particularly 401(k) plans, account for much of their business. GICs are especially popular in employee-directed plans. "The employees still give a lot of credence to the guarantee," Provident's Mr. Profio said.

Prudential's Mr. Chmely added, "Except for plans where there's a requirement that company stock be the investment for some portion of the contributions, we think 80% to 85% of the new investments are being made in a GIC product."

Rates on GICs fell during 1986, as did interest rates on other fixed-income investments, but that hasn't hurt GICs' popularity, the managers said. Travelers' Mr. Willison said that already in 1987, his company has written as much GIC business as it did in all of 1986.

"While rates have actually declined, the real rate of return, adjusted for inflation, is still very attractive, relative to other fixed-income investments," he said. "And people still place high value on that guarantee.

"Even though rates have dropped, we have not seen a reduction in our business." ■

# Mercantile launches sub

ST. LOUIS — Mercantile Trust is forming a wholly owned subsidiary to focus on the needs of large tax-exempt investors, said Ralph Webster, vice president-trust employee unit.

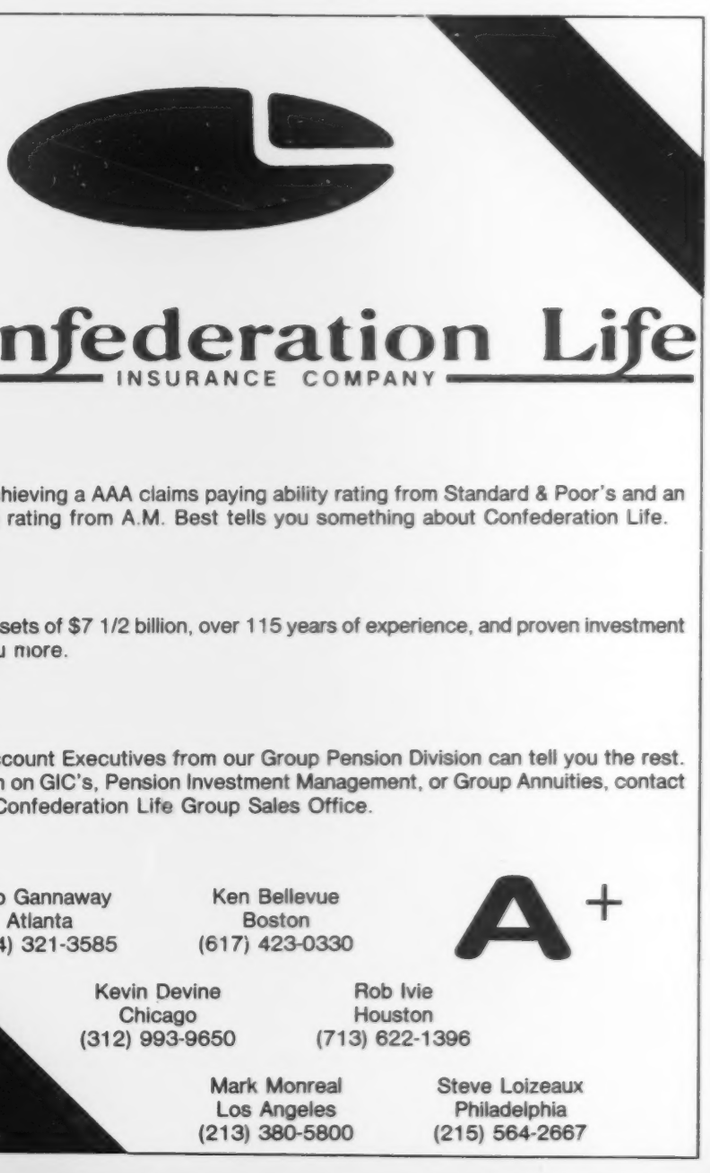
The subsidiary, Mississippi Valley Advisors, will be staffed by 19 investment professionals from the parent company, along with two "experienced portfolio managers" who are joining from other firms. Mr. Webster declined to disclose the managers' names because negotiations are still in progress.

MVA is scheduled to open this month, pending Securities and Exchange Commission clearance. Mr. Webster said MVA would begin with about $2.5 billion under management and about 150 clients.

The move allows the holding company, Mercantile Bancorp, to offer equity, fixed-income and balanced services under MVA, while Mercantile Trust can service the individual, small accounts and master trustee or custodian relationships according to client's needs, he said.

2Mr. Webster said there will be incentive bonuses for managers that should bring long-term benefits to the clients and "attract and keep qualified investment personnel."

John Blixen, the chief investment officer at Mercantile Trust, will become president; Gene Gillespie, head of investment research at the parent company, will transfer his duties to the subsidiary. Mr. Webster will become managing director. ■



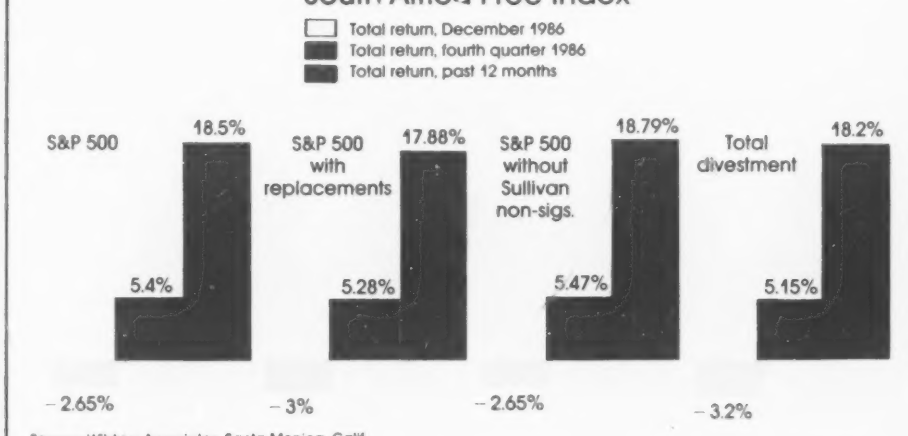
# Statistically speaking

The Statistically Speaking page offers an at-a-glance look at statistics for the latest quarter.

The Wilshire South Africa Free Index, Mercer-Meidinger bullet GIC data, First Chicago's MMI and the Russell 3000 returns will appear regularly.

Other data will be used as time and space allow.

## South Africa Free Index



Source: Wilshire Associates, Santa Monica, Calif.

**S&P 500 with replacements**: replaces a South Africa-related company with next largest company in the industry. **S&P 500 without Sullivan non-signatories**: excludes 20 companies, no replacements. **Total divestment**: eliminates all companies with South Africa involvement, no replacements.

## Multiple Markets Index

The Multiple Markets Index is a benchmark for total portfolio returns. It is composed of nine asset classes used by retirement plan executives; it is calibrated to reflect the same degree of risk of the typical pension portfolio; it uses passive fixed policy weights; and it represents the individual asset classes by the broadest and most complete market return data available.

## Tighter funding rules proposed

By Richard Gillespie

WASHINGTON — Pension rules proposed by the Reagan administration last Thursday would toughen funding requirements for companies with weak plans and accelerate pension contributions to all defined benefit plans.

Pension contributions would be due 2½ months after the end of the plan year, six months earlier than under current law.

The package also contains a proposed clarification of standards under which minimum funding waivers would be given. This would include a new definition of "business hardship" that could meet strong opposition from Rust Belt companies.

Another provision would enable corporations with overfunded pension plans to make tax-free rollovers into post-retirement health care plans to pay for the health costs of current retirees.

The bill also generally would limit to 10% the amount of qualified employer securities that can be placed in a floor-offset plan.

In addition, the administration's new competitiveness package — which includes the pension proposals — would make it easier for companies to withdraw surplus assets from their overfunded pension plans.

A companion measure intended to boost the Pension Benefit Guaranty Corp.'s finances by introducing a variable-rate pension plan premium will be part of the administration's upcoming budget bill.

Generally, the pension reforms cover long-standing issues raised by the overfunding and underfunding of pension plans, as well as the unfolding financial crisis at the PBGC.

"The primary objective is to make pension plans more secure. While the current law has worked well, there have been some disturbing trends," said Dennis Kass, assistant secretary of labor.

## U.S. to help some terminated plans

By Barry B. Burr

WASHINGTON — Federal procurement agencies are offering to subsidize the burden of underfunded pension plans that contractors terminate and dump on the Pension Benefit Guaranty Corp.

The offer, contained in a proposed addition to the Federal Acquisitions Regulations, reaffirms a little-known, dormant policy that is opposed by some government advisers.

The reaffirmation is a reciprocal agreement to efforts by the Defense Department to secure a piece of the reversion contractors get when they terminate overfunded pension plans.

The Defense Department, the National Aeronautics and Space Administration and the General Services Administration jointly proposed adoption of the rule, which includes handling overfunded and underfunded plan terminations by government contractors.

The proposal notes the government is seeking redress for overpaying pension expenses. Reversion "proceeds represent an adjustment of prior periods' pension costs," the proposal states. "If the actual cost had been known, the prices the government previously paid would have been reduced commensurately."

The proposed rule affects all federal procurement agencies. Comments will be accepted through April 10.

Acting without formal regulations, the Defense Department already has negotiated shares in reversions from terminated plans at FMC Corp., Chicago, and Rockwell International Corp., Pittsburgh, and has received credits for contributions in full-funded plans of United Technologies Corp., Hartford, Conn., and Lockheed Corp., Los Angeles.

Charles Brown, an auditor in the Defense Department's controller's office who helped write the proposed rule, said he left in the indemnification policy. He said the policy has been in existence for about 10 years, although he knows of no instance in which a contractor asked a procurement agency to subsidize a deficit of a terminated plan.

He calls it a reciprocal arrangement. "If we are going to be in there with our hand out when they have a (termination) profit . . . we should be man enough about it . . . and help out" to fund a termination deficit.

But he acknowledged some advisers to the 10-member Defense Acquisition Regulatory Council that recommended the rule proposal oppose keeping the indemnification.

"There is strong feeling we shouldn't step in and make payments for underfunding," he said. "There are people who feel contractors will start gaming up . . . and start coming to us with big bills."

The version in the Federal Register erroneously refers to underfunded plans. It states: "The new coverage provides rules for determining the government's equitable share of prior periods' pension costs which are recaptured by contractors when an *underfunded* pension plan is terminated."

"That should have been *over-*" funded, confirmed Frank Van Lierde, procurement analyst for the GSA. After checking, he noted the copy was sent to the printer incorrectly.

The proposal continues: "The same rules are also applicable when an underfunded plan is terminated and indemnifications payment must be made to the Pension Benefit Guaranty Corporation."

Mr. Van Lierde said that seems to mean the government would assume some liability for underfunded plans turned over to the PBGC. "If we are going to share in an overfunded plan . . . we felt that the government ought to share in indemnification payments to the PBGC," he said.

Other officials were not available to confirm his interpretation.

The proposed termination rule would apply to almost all contracts. Among the major excep-

## Market likely to surpass 2,500

### Experts predict bull could charge for 3 more years

By Fred Williams and Brian Lehrer

The bull market will exceed 2,500 before peaking within the next three years and then retreat by 20% or more, more than half of a group of market experts surveyed by *Pensions & Investment Age* agreed.

But a significant minority expects it to peak this year at 2,500 or less.

Estimates for gains in the benchmark Standard & Poor's 500 stock index vary widely, but should top 350 to 400 by 1990, according to these investment specialists.

• Michael Metz, portfolio strategist with Oppenheimer & Co. Inc.'s research department, New York, expects a first-quarter gain of 3% to 5% before a market decline.

• Steven Leuthold, president of the Leuthold Group, Minneapolis, expects the Dow to go to about 2,400 in the next three to four months.

• Peter Anderson, president and chief investment officer at IDS Growth Spectrum Advisors Inc., Minneapolis, said officially his firm is projecting a 25% advance in the S&P for the year: "Unofficially . . . I wouldn't be surprised to see 30% to 35% for the year . . . I expect the Dow to be at 2,500 and the S&P to be 310 or higher."

• Kenneth Grossman, partner in Hahn Holland & Grossman, Chicago, expects the Dow to reach 3,000 to 3,500 in the next several years.

More immediately, he expects the Dow to reach 2,300 and the S&P 500 to reach 290 to 300 by the "second or third quarter" before a correction.

• Although he is cautious, Chuck Clough, director of investment strategy at Cowen Asset Management, Boston, expects the Dow could reach 2,300 by April.

• Robert Farrell, chief market analyst for Merrill Lynch Capital Markets, New York, said he thinks the Dow will hit 2,400 or 2,500 in the first half of the year.

• David Bostian Jr., president of Bostian Research Associates Inc., New York, believes "the Dow could reach 3,000 by 1988-'89."

• James R. Solloway, director of economic research at Argus Research Corp., New York, looks for the Dow to peak in the 3,000 to 3,500 range in 1988-'89.

• Thom Brown, market strategist for Butcher & Singer Inc., Pittsburgh, said the Dow should balloon above 3,000 in 1988-'89.

• Martin Sass, president and chief investment officer at M.D. Sass Investment Services, New

# Asset reversions fall 27% as plan terminations slow

By Chuck Paustian

WASHINGTON — Surplus assets recovered by companies terminating overfunded pension plans fell during 1986 to their lowest level in two years, statistics from the Pension Benefit Guaranty Corp. show.

Expected asset reversions for 1986 totaled $4.06 billion, a decrease of 27% from $5.59 billion the previous year. Companies recovered $3.61 billion in surplus pension assets from 1984 terminations.

The slowdown was greatest during the fourth quarter of 1986, when the amount of surplus assets reverting to corporations fell 83% from the same period a year earlier.

For the quarter ended Dec. 31, expected reversions totaled $379.3 million from 61 plans with total assets of $1.12 billion, compared with the previous year's fourth quarter expected reversions of $2.23 billion from 252 plans with total assets of $5.14 billion.

Since May 1980, completed and pending terminations involve recaptures of $15.66 billion from pension plans with total assets of $34.52 billion.

Filings in the most recent PBGC data, as of Jan. 29, include:

- Enron Corp. Inc., Houston, expected to recapture $232.2 million from a plan with assets of $254.1 million (*Pensions & Investment Age*, Oct. 27).
- Ashland Oil Inc., Russell, Ky., expected to recover $195 million from two plans with total assets of $460 million (*P&I Age*, June 9).
- Foster Wheeler Corp., Livingston, N.J., with an expected reversion of $25.2 million from a plan with assets of $70.1 million.
- Ozark Air Lines Inc., St. Louis, expected to recover $21.1 million from a plan with assets of $132.9 million.

Pension experts cited several reasons for the decline in reversion activity, including a drop in long-term interest rates, new tax law and uncertainty about proposals in Congress regarding access to surplus pension assets.

Long-term interest rates, upon which actuaries base their discount rate for calculating the present value of pension obligations, have fallen steadily in the past couple of years.

Declining interest rates mean a higher present value of pension liabilities and less surplus assets. A one percentage point drop in rates, in general, means a 15% to 20% increase in the present value of pension obligations.

As of Jan. 1, the Moody's Aaa rate — considered the most representative — had fallen to 8.53%, from 12.6% as of Jan. 1, 1984.

"That's the primary reason" for the decline in reversion activity, said Frank McArdle, education director at the Employee Benefit Research Institute, Washington.

"The secondary (reason) is that now there is a 10% excise tax on the reversion," he said.

Under the provisions of the Tax Reform Act of 1986, recovered surplus assets are subject to a 10% excise tax on top of the normal corporate tax rate. This excise tax applies to terminations filed after Dec. 31, 1985.

"I think that's reasonably significant for companies that were on the border line of whether (terminating) is worthwhile or not," said Rowland M. Davis, vice president of Towers, Perrin, Forster & Crosby, Chicago.

The new tax law played a slightly different role in the decision by executives of Blue Cross of California, Los Angeles, to terminate a $90 million pension plan and recapture $32 million.

Ann Monroe, vice president of human resources at Blue Cross, said under the new tax law, the company would no longer be tax exempt as a not-for-profit organization. "But, because (the termination) occurred before 1987, when our tax status changed, we didn't have to pay the tax." The reversion would be used for general corporate purposes.

The outcome of various proposals being bandied about Washington could have a direct effect on the pace of reversion activity.

"Anyone looking out into the future (during the past two years) would have thought it'd be more difficult to gain access to the surplus and they'd be more careful to not accumulate a surplus," said EBRI's Mr. McArdle.

He was referring to a bill recently introduced in the U.S. House of Representatives that would prohibit companies from terminating pension plans and recouping surplus assets (*P&I Age*, Feb. 9).

Another proposal that would affect reversion activity is contained in a Reagan administration bill carrying a number of reforms to the Employee Retirement Income Security Act (*P&I Age*, Jan. 26).

Under the terms of the proposal, being discussed at the departments of Labor and Treasury, employers could withdraw pension assets in excess of 120% of accumulated benefits. ■

# Codlin quits Wisconsin for Illinois

By Trudy Ring

Two pension officials have resigned, one to join another fund and the other to enter another business.

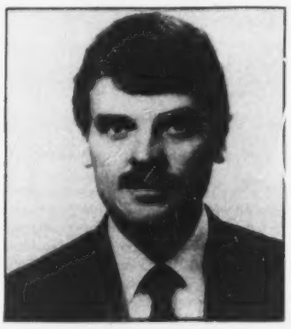
Kenneth E. Codlin is resigning as executive director of the $13.5 billion State of Wisconsin Investment Board, Madison, to become investment officer for the $2.4 billion Illinois State Universities' Retirement System.

He replaces Charles M. Hundley, who left in August to become a vice president of Northern Trust Co., Chicago.

Kevin Burke has resigned as manager of pensions at PepsiCo Inc., Purchase, N.Y. His plans are unknown.

PepsiCo has about $530 million in pension assets. No replacement has been selected for him yet.

Mr. Codlin's last day at the Wisconsin fund will be March 6; he expects to join the Illinois universities system March 9, he said.



*Kenneth Codlin is taking over the reins at the Illinois State Universities Retirement System.*

"They made me a very attractive offer — it looked like a good opportunity and I'm looking forward to joining them," Mr. Codlin said of the Illinois fund.

One aspect of his new job he found attractive is that the Illinois fund's board of directors has authority to set the fund's operating budget, while in Wisconsin, that was a matter for the Legislature to decide, he said.

The Wisconsin Legislature

# Pension expense controlled

## Volatility cut, income statement boosted under FASB

By Brad Rudin and Chuck Paustian

Corporate executives completing their second year of compliance with the Financial Accounting Standards Board's rules for pension accounting were able to minimize the volatility of pension expense that some had feared would result from the new rules.

In addition, dozens of other companies implementing FASB Statements 87 and 88 for the first time were able to boost 1986 income statements by millions of dollars.

Executives at the companies that have used FASB 87 for the past two years, and other pension experts, said alternatives for controlling pension expense were available through the statement itself and through external review of the pension plan.

One means contained in FASB 87 was amortization of transition amounts, which could be used to offset increases in liabilities produced by declining interest rate assumptions.

A lower interest rate assumption makes it more expensive for a sponsoring company to settle pension obligations with an annuity purchase.

The plan's transition amount is the surplus or deficit at the time of transition to the new accounting rules.

The transition amount, an asset for companies adopting early, must be amortized over the average remaining service period of employees or 15 years if the average remaining service period is less than 15 years.

Upon adoption of FASB 87 on Nov. 1, 1985, Hewlett-Packard Co., Palo Alto, Calif., had an unrecognized net asset of $128 million, to be amortized during the subsequent 15 years. For 1986, the company recognized a credit of $11 million toward pension expense.

For this past year, Hewlett-Packard recognized $24 million in pension income from its defined benefit plan, reducing the company's total pension expense for 1986 to $56 million from 1985's $86 million.

Total pension expense includes the company's profit-sharing plan, which is its primary retirement vehicle, a supplemental defined benefit plan and foreign pension plans.

"Rather than recognizing costs over a relatively short period, you're required to amortize over a relatively long period (the average service life of participants), and that has a tendency to smooth the costs," said Joseph M. Zaelit, treasury manager in charge of compensation and benefits at Hewlett-Packard.

Exxon Corp. recorded $93 million in negative pension expense in 1985 when it first adopted the rule, said Thomas Dodson, the

## Opinion

# Some GM investors are wimps

THE KNEE-JERK REACTION and wishy-washy actions by some General Motors Corp. shareholders threaten to tarnish the reputation of institutional investors as a serious and responsible force.

Although some investors contended the $742 million buy-out of H. Ross Perot carried an excessive price and was a waste of corporate assets, the manner in which they reacted to the buy-out reeks of wounded egos, rather than of concern over such lofty issues as corporate governance.

Look at the chain of events: Following the buy-out, the Council of Institutional Investors invites Roger B. Smith, GM's chairman, to meet with council members. Mr. Smith doesn't show up, and sends a team of GM executives in his stead. Council members are miffed over being stood up by Mr. Smith. One member of the council, the State of Wisconsin Investment Board, introduces a shareholders' resolution protesting the buy-out, and five of GM's other institutional shareholders become co-sponsors.

By then, Mr. Smith wises up. He agrees to attend meetings with institutional investors, particularly those co-sponsoring the resolution. The round of meetings begins, not surprisingly, with members of the Wisconsin board.

Following that first session, the board informs Mr. Smith the resolution might be withdrawn. Within days, other co-sponsors soften or withdraw their support of the protest resolution.

What divine revelations from Mr. Smith changed their minds? Listen to the explanation of Joe Perrone, chief investment officer of the Teacher Retirement System of Texas, the first co-sponsor to withdraw support for the resolution: "We heard their (GM's) position, which wasn't different from what we knew. We still disagree with them. What are we going to do about it? Not a helluva lot. We don't feel there is much else we can do."

What changed their minds? Apparently it was nothing more than Mr. Smith's willingness to do some hand-holding, which, in turn, helped heal some hurt feelings.

That these investors — once indignant and irate enough to launch a shareholders' resolution — quickly said "never mind" once their egos were massaged, leaves a bad taste in the mouths of many.

The events leading to the shareholders' resolution transpired because members of the Council of Institutional Investors apparently didn't believe Mr. Smith was taking them seriously. Their subsequent actions demonstrate Mr. Smith was right not to do so.

# Does dynamic hedging meet needs?

THE AMOUNT OF ASSETS covered by portfolio insurance programs, also known as dynamic hedging programs, has climbed to more than $50 billion, according to some estimates.

Clearly, this is phenomenal growth for a product that was introduced in 1980 and which grew rather slowly for the first two years.

Portfolio insurance uses a sophisticated computer program to trigger sales of stock index futures to hedge pension fund portfolios against market declines. By giving up some of the upside potential of the portfolios, pension executives can protect the portfolios against losses in a down market, proponents claim.

Judging by its acceptance, the product fulfills a need. However, the question needs to be asked: Whose need?

Some pension executives, presumably those skeptical about the use of portfolio insurance, have begun to refer to it as "job insurance."

The implication is that portfolio insurance is being bought by some pension executives more to protect their own jobs than because it is the right thing for the pension fund and the sponsoring entity.

A pension executive clearly has less to fear from slightly underperforming the indexes in a bull market than outperforming the market in a bear market — but still seeing the fund lose 10% or 20% or more of its value.

The decision to buy a portfolio insurance program should be based on the long-term needs of the plan. It should fit within the investment strategy adopted for the plan.

If the plan and the sponsoring organization can afford to take a truly long-term investment approach — 15 or even 20 years — then portfolio insurance should be unnecessary.

In that time period, the market's long-term growth pattern should overcome any cyclical declines. And the market returns not sacrificed to the portfolio insurance program will enhance the well-being of the plan and its sponsor.

Only if the plan and its sponsor cannot accept short-term volatility does portfolio insurance make sense.

Where a plan has no need of insurance against such volatility, such as in a highly funded plan, dynamic hedging may be being bought as "job insurance."

That's the wrong reason for buying it.

## Letters to the editor

### Need right diagnosis

To the Editor: Most investors feel uneasy about the wild gyrations of the stock market and there is growing talk of seeking regulatory remedies.

Before remedies can be prescribed, a proper diagnosis is needed. It appears to us it is the extreme conflict of interests that need to be remedied.

The conflict of interests lies with the three key players: The executors of "portfolio insurance;" managers of index funds; and index-futures arbitrageurs. It arises when all three players really are one player wearing three hats, whose primary allegiance is to his pocketbook.

To begin with, "portfolio insurance" promises to protect pension portfolios by selling index futures against the portfolio with every 50-point or so decline in the Dow Jones industrial average. They are not concerned with the price at which they sell the futures, they simply dump them on the market.

But because some of the executors of the portfolio insurance are also index-futures arbitrageurs, the lower the prices they get in selling the futures for their portfolio insurance clients, the lower they can buy the futures for their own index-futures arbitrage.

And as managers of index funds they can sell stocks in the index without requiring an uptick for what are effectively short sales when executing the index-futures arbitrage.

So by using the portfolio insurance clients as a source of "cheap futures," and their index fund clients as a source of stocks that effectively can be sold short without an uptick, the three-hatted middlemen profit at the expense of both clients. The index fund investors obviously do not share in the arbitrage profits of the fund managers.

One of the flaws in the portfolio-insurance programs is that they are not executed by the portfolio managers but by third parties. If the portfolio manager were to try to protect his portfolio, he would not necessarily sell index futures, but rather stocks or futures, whichever were higher. Conceivably, he could buy futures if they were selling at a discount and sell stocks.

But a third party follows no such logical consideration. When the "insurance" executor wears "other hats," the conflicts of interests contribute to the seemingly inexplicable gyrations of the market which are really quite logical, viewed from the perspective of the three-hatted middlemen.

The remedies now become clearer.

### ASB cites indexing

To the Editor: The article on index funds in the Jan. 12 issue of *Pensions & Investment Age* lists a table of "top index fund managers." This table does not include the index assets managed by ASB Capital Management Inc.

Our firm manages $401 million in domestic equity indexed assets, most of which track the Standard & Poor's 500. The remainder of the assets track the S&P 500 modified to exclude companies that do business in or with South Africa (thus creating a "South Africa Free Index.") Based on your table, this would place ASB Capital Management 21st among top index fund managers, and 15th among domestic equity index fund managers.

ASB Capital Management is a District of Columbia, SEC-registered investment adviser offering a full complement of money management services to institutional clients, including corporations, associations, foundations, endowments and unions.

With $5.2 billion in assets under management, we are the largest money manager with headquarters in the Washington area.

We hope to continue this type of communication to avoid future omissions.

# PIPER

*The statistical data are extracted from Pensions & Investment Performance Evaluation Report, a quarterly performance evaluation published by Pensions & Investment Age. PIPER details comparative performance data on equity and fixed-income funds at more than 200 banks and insurance companies. PIPER is compiled by Rogers, Casey & Barksdale Inc., Stamford, Conn.*

# Equity funds win using discipline

**By Fred Williams**

A disciplined approach emphasizing high-quality, large-capitalization, blue-chip stocks was the hallmark of the best-performing pooled equity funds in Pensions & Investments' Performance Evaluation Report for 1986.

The top PIPER equity fund for the year was Sun Banks, Orlando, Fla., which recorded a 32% return.

Sun Banks has been a perennial leader, finishing at the top of the list for the three- and five-year periods ended Dec. 31 with a compound annual return of 31.1% in each period, and fifth for the 10 years, with an annualized 19%. For the quarter it finished in the top 25%, with a return of 6.3%.

But Sun Banks' high-level performance was not reflected by the PIPER median funds, which lagged the Standard & Poor's 500 stock index for every period. For the year, the PIPER median fund returned 17.1% vs. the S&P's 18.7%.

For the three-, five- and 10-year periods, the median fund returned a compound annualized 15.9%, 18.2% and 13.3%, respectively, vs. the benchmark's 18.5%, 19.9% and 13.9%. For the quarter, the median fund returned 4.4% and the S&P, 5.6%.

The PIPER universe comprises 300 pooled equity funds of banks and insurance companies.

Remaining atop the performance list for the long term requires discipline and clear objectives, said Anthony Gray, executive vice president at Sun Bank.

"We spend a lot of time in relative valuation work. We try to find out what is cheap by looking at the relative (price-earnings) ratios in the past and present ... We like homogeneous industries; for example, food stocks. In the last three years we have been heavily overweighted in foods," said Mr. Gray.

The $220 million portfolio was heavily invested in large-cap stocks such as **General Electric Co.**, **Ralston Purina Co.**, **Merck & Co.** and **Dun & Bradstreet Corp.**, "companies which have done well in the past and with good five- and 10-year records that we expect to do well in the future.

"Our largest and most successful stocks were in the technology sector. We sold **IBM** in the summer and bought **Digital Equipment Corp.**, **Tandem Computers Inc.** and **Computer Associates**. That added 6% to our total return," he said.

For the year, Sun Banks was followed by Bank of Delaware's equity fund with a return of 29% and Barnett Banks Trust Co., Jacksonville, Fla., employee benefit equity fund with 27.9%.

Edgar Loring, vice president at Bank of Delaware, also credited large-cap issues for the success in 1986.

"By and large, most of the performance was in the first half of the year and it was centered around consumer stocks, blue chips and large capitalization, which made up two-thirds of the portfolio," he said.

"We follow a growth-stock orientation with above-average quality stocks, high market yields and then look at relative p/e basically. It's fairly simple, but it works," said Mr. Loring. Bank of Delaware's strategy also placed it in the top 25% for the fourth quarter, with a return of 6.3%.

Equity performance at Barnett Banks was focused primarily on the consumer sector, said John Allen, vice president and senior investment officer. In addition to its third-place finish for the year, Barnett ranked eighth for the three years with an annualized 22.8% and was in the top 20% for the five years, with an annualized 21.5%.

Stock selection in the $115 million Barnett equity fund is based on a quantitative bottom-up, value-oriented approach, he said.

# Delaware Trust leads bond pools

**By Trudy Ring**

A newcomer to Pensions & Investments' Performance Evaluation Report topped all bank and insurance company pooled fixed-income funds in 1986.

Delaware Trust Co., Wilmington, Del., which had not participated in the report before, had a 24.4% return on its employee benefit income fund in 1986. It also led all bond funds for the fourth quarter, with an 8% return, and placed among the top four funds in the three- and five-year periods covered by PIPER. The fund is too new for the 10-year period.

Among the others registering stellar performance for most periods of the survey were United Bank of Denver, First Interstate Bank of Denver and Life Insurance Co. of Virginia, Richmond. All are repeaters among top PIPER performers. The PIPER fixed-income universe comprises 284 funds.

Delaware Trust, the two Denver banks and Life of Virginia have divergent fixed-income investment strategies, although they all tended to be in the intermediate maturity range at the end of the year. This is a change from the past few quarters, when the top performers generally were in very long bonds. Many managers have shortened the maturities of their portfolios to shorten their interest rate exposure as rates have come down.

While these and some other bond funds achieved good performance, a majority of the PIPER participants underperformed market indexes. For calendar 1986, the median PIPER bond fund returned 14.2%, while the Shearson Lehman Government/Corporate bond index returned 15.6%. For the fourth quarter, the median fund and the index both returned 3.1%.

In the three years ended Dec. 31, the median bond fund had a compound annual return of 15.8%, while the index returned 17.3%. For the five-year period, the median fund's annualized return was 16.7% and the benchmark's, 17.9%. For the 10-year period, the median was 10% and the index, 10.4%.

Delaware Trust managed superior performance in all periods in which its pooled bond fund existed. The fund was launched about seven years ago. It now has assets of $18.9 million.

Its compound annual return for the three years ended Dec. 31 was 21.9%, placing it third among all funds. For the five-year period, its annualized return was 21.6%, putting it fourth.

The fund stays in the middle of the bond market's maturity range and stays fully invested, said

# WHAT IF YOU COULD IMPROVE RETURN ON A $500 MILLION PORTFOLIO BY .3 PERCENT?

There is one system—just one—designed to help you realize that kind of potential by changing nothing but your people's access to information.

The system is ISA PRISM. Integrated, on-line, real-time, IBM mainframe-based—PRISM is designed to give financial professionals instant access to the information they need to achieve optimum return.

And it's from ISA—a United Telecom company—whose systems are already helping manage half a trillion dollars on three continents.

If your organization is managing securities without PRISM, you may be settling for a smaller return than you should. Have someone look into it. Call us at 1-800-554-1193. In Georgia, 404-587-6865.

# Three reasons to consider Hutton Capital Management for investment portfolios in excess of $3 million:

1. Disciplined and understandable approach to asset allocation and portfolio structure
2. Value-oriented, fundamental equity selection process
3. Results have been consistently superior in both up and down markets. *Of course, past performance does not guarantee future results.

# Most Master Trust teams are connected by telephone. Not ours.

It's pretty obvious that a Master Trust team can only run at peak efficiency when everyone on the team knows what everyone else is doing.

However, of all major money center banks, only The Bank of New York seems to have figured out that the way to achieve this is not via telephone tag.

It's by having each Master Trust team work together–not just figuratively, but literally. Desk to desk. Terminal to terminal.

So your administrative officer can literally turn to your investment specialist or your accountant to get your questions answered and your requests acted upon immediately. For that matter, you can call any one of them directly.

What's just as important, The Bank of New York has committed its resources to supporting the teams with one of the most extensive and highly sophisticated "back office" complexes anywhere, featuring timely, accurate, audited reports, cash management services, advanced on-line technology and performance measurement.

To learn more about our team approach to Master Trust, call Robert S. Darbee, Vice President, at 212-530-1351. Or write him at The Bank of New York, 19 Rector Street, New York, New York 10015.

# Equity funds . . .

*Continued from page 15*

Large-capitalization stocks didn't play a major role in the portfolio. "We don't screen high," Mr. Allen said. "We own a large number of medium-cap issues."

Among the Barnett portfolio holdings are **Ashton-Tate Co.**, **Merck** and **Fuji Photo Inc.**

Barnett screens stocks based on financial quality, relative value and changing earnings expectations.

"The difference in a quantitative approach and the more traditional approach is that we aren't listening to stories from Wall Street. We aren't story oriented; we base our decisions on the numbers," said Mr. Allen.

The $18 million stock fund of South Carolina National Bank, Columbia, finished sixth for the year with 26.9% and in the top 20% for the quarter, with a return of 5.7%.

Robert Beaudette, president of SCNC Advisory Corp., which manages the fund, said stock selection is based on a sophisticated computer screening process, with about 60 stocks held out of a 2,000-stock universe.

No stocks of less than $250 million in capitalization are held, he said, and the focus is on large- to intermediate-capitalization stocks. Companies are reviewed for earnings momentum and value.

Some of the larger holdings in the portfolio include **Exxon Corp.**, **Merck**, **Quaker Oats Co.**, **Lockheed Corp.**, **Abbott Laboratories**, **Imperial Chemical Corp.**, **Central & Southwest Corp.** and **Telex Corp.**

In the three-year period, Sun Banks was followed by Bank of the West, San Jose, Calif., with a compound annualized 25.7%, and First of America Bank, Kalamazoo, Mich., with 25%.

For the five years, the runners-up were First Union Bank of North Carolina, Charlotte, with an annualized 25.3%, and Manufacturers Life Insurance Co., Toronto, 25.1%.

Other high rankers in the five-year period were First Interstate Bank of Denver's modern value portfolio, which placed fifth with an annualized 24.8%, and First Interstate Bank of Oregon, which rated sixth with 24.2%.

First Interstate of Denver's modern value portfolio placed in the top 25% for the year and for the three years with 20.3%.

For 10 years, its growth-stock fund ranked 11th, with a compound annual return of 17.1%. The First Interstate of Denver equity portfolios are handled by Denver Investment Advisors.

While the modern value portfolio attempts to hold the 25 most undervalued stocks from among the stocks of the 300 largest U.S. corporations, including **Great Western Financial Corp.**, **Lockheed** and **RJR Nabisco Inc.**, the growth portfolio holds medium to small-cap stocks, including **Myers Parking Systems Inc.**, **Great Northern Nekoosa Corp.** and **CPC International Inc.**

Manufacturers Life also was a leader in the 10-year period, placing first with an annualized 23.2%. It was followed by Guardian Insurance Co., New York, with 19.9% and First Wisconsin National Bank, Madison, with 19.5%.

In the fourth quarter, First Interstate Bank of Oklahoma, Oklahoma City, led the PIPER universe with a return of 9.1%. It was followed by Boatmen's First National Bank of Kansas City, Mo., with 8.3%, and American National Bank & Trust Co. of Chattanooga, Tenn., with 7.9%.

First Interstate Bank of Oklahoma's return was a turnaround from the third quarter, said Lee Liscom, vice president and chief investment officer.

The $25 million equity fund "got hit in the consumer services area during the third quarter with a fairly large weighting. Those stocks seemed to be the ones that came back in the fourth quarter. What happened for us was a snap-back from the third quarter," Mr. Liscom said.

First Interstate applies a dividend discount model dividing the market into 11 sectors, each with specific buy and sell rules, said Mr. Liscom.

For instance, in the energy sector First Interstate buys on long-term value, earnings surprise, earnings acceleration and momentum, while in the technology sector only earnings acceleration and price momentum are considered.

First Interstate of Oklahoma narrowly missed the top quartile for the one-year period with a 19.5% return and was in the top 10% for the five- and 10-year periods with annualized returns of 22.5% and 17.1% respectively.

The $20 million equity portfolio at Boatmen's First National, ranked second for the quarter, had a definite high-quality bias, said Steven Pohle, vice president.

The portfolio was overweighted in the technology sector for the quarter, said Mr. Pohle. Major portfolio positions include **General Electric**, **Owens-Illinois Inc.** and **Digital Equipment**, the largest single holding.

"We consider ourselves sector rotators. We are certainly not market timers," he said. "During the fourth quarter we held a lot of large-capitalization, high-quality, blue-chip stocks," he said.

The $20 million corporate employee benefit equity fund at American National Bank & Trust of Chattanooga, finished the quarter third.

"It was a big-cap quarter," said Dale Holmes, portfolio manager and trust investment officer. "We are growth-stock investors with quality standards requiring us to focus on large-capitalization stocks.

We were fortunate in the fourth quarter in that there was a movement to quality after the Boesky affair."

Major holdings in the American National equity portfolio include **Merck**, **General Electric**, **Bristol-Myers Co.**, **Eastman Kodak Co.**, **Minnesota Mining & Manufacturing Co.** and **Wal-Mart Stores Inc.** ■

During the last 10 years, Lomas & Nettleton has made over $22.4 billion in mortgage loans to over a quarter million of America's hardest working families.

This commitment to America's most dedicated workers has paid rich dividends. During the last 10 years, our revenues have increased from $63 million to $500 million, our dividend rate has increased an average of more than 20% every year, our total capital and credit resources have risen to more than $3.5 billion . . . and in just the last five years, revenues, net income and dividends have doubled.

And the future looks even brighter. The fact is, America will always be building its dreams. And Lomas & Nettleton will always be helping Americans afford them.

Lomas & Nettleton Financial Corporation

# Delaware . . .

*Continued from page 15*

Kenneth Holmes, vice president in charge of investment marketing. The average maturity in the portfolio is 10.6 years, he said.

Being in the middle of the maturity range allows the fund to reap some of the benefit when long bonds are performing well and some when short ones are performing best, he said.

In mid-1986, the fund went largely into mortgage-related securities. It had been primarily in Treasuries, before yield spreads widened sufficiently to warrant a move, and also used a lot of regional bank bonds.

"Mortgages are the only place you get extremely high credit quality with high incremental yields," said David W. Baldt, senior vice president and director of fixed-income investments. "We're not promising we're going to stay there, but in the latter half of 1986 that was the place to be."

Mr. Baldt wouldn't say where the fund might move next, but said it avoids industrial bonds because of leveraged buy-out threats. "There's no telling what companies will fall next," he said.

The fund keeps to high-quality securities; at the end of 1986, 85% of the portfolio was rated AAA, Mr. Holmes said.

Delaware Trust avoids interest rate forecasting. "We monitor the major interest rate forecast people and find that they're less than 50% accurate," Mr. Baldt said.

"We do not believe that anyone can forecast interest rates accurately and consistently," Mr. Holmes added.

In contrast to this philosophy is that of United Capital Management, the investment subsidiary of United Bank of Denver. Its fixed-income strategy relies primarily on interest rate forecasting, which then is supplemented by decisions based on sector spreads, said W. Lon Schreur, president of United Capital.

The commingled fund it manages for United Bank topped PIPER performers for the three-, five- and 10-year periods of the survey. Its compound annual return was 23.7% for the three years, 23% for five and 12.8% for 10. It placed fifth for calendar 1986, with 21.2%.

The fund, now at $31 million, went into long bonds — to a 22-year average maturity from a six-year average maturity — in 1980 and 1981 and stayed long until January 1986, Mr. Schreur said. Management brought the average maturity down throughout 1986, to seven years at year end, he said.

The fund went long when management believed inflation had peaked, Mr. Schreur said. But United Capital officials now believe inflation has hit its low for this cycle and will pick up, he said. Interest rates also will be higher the rest of the year, he predicted.

In keeping with that scenario, he said he would expect to bring the United Bank bond portfolio's average maturity to four or five years during 1987.

Along with changing maturities, the fund has changed the type of bonds it holds. In 1981 and 1982, when yield spreads were wide, it held many A and BAA rated corporate issues. In recent years, it upgraded its holdings and now is mainly in government securities, Mr. Schreur said.

The fund's performance fell off in the fourth quarter of 1986, when it was in the seventh decile with a 2.8% return. Mr. Schreur attributed this to the shortening of maturities in the portfolio.

"We're penalizing short-term performance to get ourselves positioned for the next major move," he said.

First Interstate Bank of Denver's bond fund benefited from good security selection to place it among the top three in all periods except 10 years, when it still ranked in the top 10%.

The fund returned 23.1% in 1986, placing it second, and 5.3% in the fourth quarter, making it third. It ranked second in both the three- and five-year periods, with compound annual returns of 22.7% and 22.1%, respectively. In the 10 years ended Dec. 31, its annualized return was 11.9%.

The fund, with assets of roughly $70 million, is about 60% in corporate bonds, 20% in Treasuries and 20% in government agency issues, said Jay Barr, vice president of Denver Investment Advisors Inc., the First Interstate spinoff that manages the bond fund.

It went to that allocation during October and November, after having been about 60% in governments and 40% in corporates since the end of 1985, Mr. Barr said. The fund typically has a high allocation to corporates because the fixed-income management group has been good at selecting them, he said.

However, the fund moved into governments at the right time, when they were outperforming corporates, then switched back to a higher allocation to corporates when yield spreads narrowed, Mr. Barr said.

The bonds now in the portfolio have an average quality rating of A+, he said. Average maturity at year end was 7.6 years. The corporate issues are divided about evenly among financial, industrial and utility bonds, he said.

Denver Investment Advisors eschews market timing and does minimal interest rate forecasting, relying instead on security selection, Mr. Barr said.

Life of Virginia's bond fund was among the top five performers for the three-, five- and 10-year periods of the survey. Its three-year compound annual return was 20.7%, tying it for fifth; its five-year number was 21.7%, putting it third; and its 10-year figure was 12.5%, tying it for fourth.

Its performance dropped off somewhat in 1986, when it finished the year with a return of 15.7%, just topping the index and placing in the third decile. In the fourth quarter, it returned 3.9% and placed in the second decile.

The 1986 performance slipped because long Treasuries outper-

# Public funds hike specialty allocations

GREENWICH, Conn. — Increased assets allowed public pension funds to throw more money into specialty management and passive investing in 1986, but active management still played a large role, according to a study by Greenwich Associates.

Although good performance boosted pension assets nearly 29% in 1986, increasing unfunded liabilities have fund officials scampering just to stay in place, according to the report.

The study, the fifth annual report to participants on the management of public pension funds, surveyed 270 funds whose assets total $540 billion.

In the past 12 months, 43% of the public funds surveyed hired new managers, while 24% terminated a manager.

The average public fund now uses more than six managers, double the number of five years ago.

This is a byproduct of the trend toward specialty management, according to the report.

A prominent example is the Teachers' Retirement System of Louisiana, Baton Rouge.

In a move toward specialty management effective this year, the system terminated one manager and hired five new ones (*Pensions & Investment Age*, Jan. 26).

According to the report, 43% of the public funds plan to hire new managers by the end of 1987. If these intentions are carried out, about 325 hirings will occur.

Within five years, public funds also expect to increase the average number of managers used to 7.8 from 6.1 in 1986.

Public funds invest almost $95 billion in stock and bond index funds and by 1989 the number should exceed $170 billion, the report said. Indexing's low costs and guaranteed market returns make it an attractive investment vehicle for public funds.

Last year, the Public Employees' Retirement System of Mississippi, Jackson, began the process of indexing 50% of its equity and fixed-income assets (*P&I Age*, Jan. 26).

Common stock index funds are now used by 22% of all public funds, the report said. By the end of 1987, 29% of all public funds will be using them.

Bond index funds are just beginning to surge. Now used by 9% of all public funds, Greenwich Associates predicts 14% will be using indexed bonds by the end of this year.

Actively managed assets, however, also increased. Stock investments now make up 37.6% of assets, compared with the previous year's 33.1%. Actively managed bonds increased 14.6% to $181 billion from $158 billion.

Other growing investment areas are equity real estate, mortgages, venture capital and portfolio insurance.

According to the study, 40% of public funds use equity real estate, and Greenwich Associates predicts an additional 9% of all funds will launch such investments by the end of this year.

Mortgages are now used by 34% of the public funds, up from 26% in 1985, the study showed. And by year end, mortgages should be included in the portfolios of 41% of all public funds.

According to Greenwich, venture capital is used by 17% of the funds, and should jump to 22% by the end of 1987. In 1985, 12% of the funds used venture capital, and in 1984, only 9% used this vehicle.

Only 5% of funds use portfolio insurance, but this percentage should double by the end of 1987, the study said. ■

## Delaware . . .

*Continued from page 26*

formed corporate issues so significantly in the early part of the year, and the fund was concentrated in corporates, said L. David Hale, senior vice president of Continental Investment Advisors Ltd., Richmond, which ran the fund through Dec. 31.

(Continental Investment had been an affiliate of Life of Virginia, which was purchased by Combined International Corp., last year. Continental Investment's management is buying the money management firm's stock from Combined, with the transfer to be completed April 1. Combined has assembled an in-house investment staff for the Life of Virginia fund, while Continental Investment, as an independent firm, will continue to serve outside clients.)

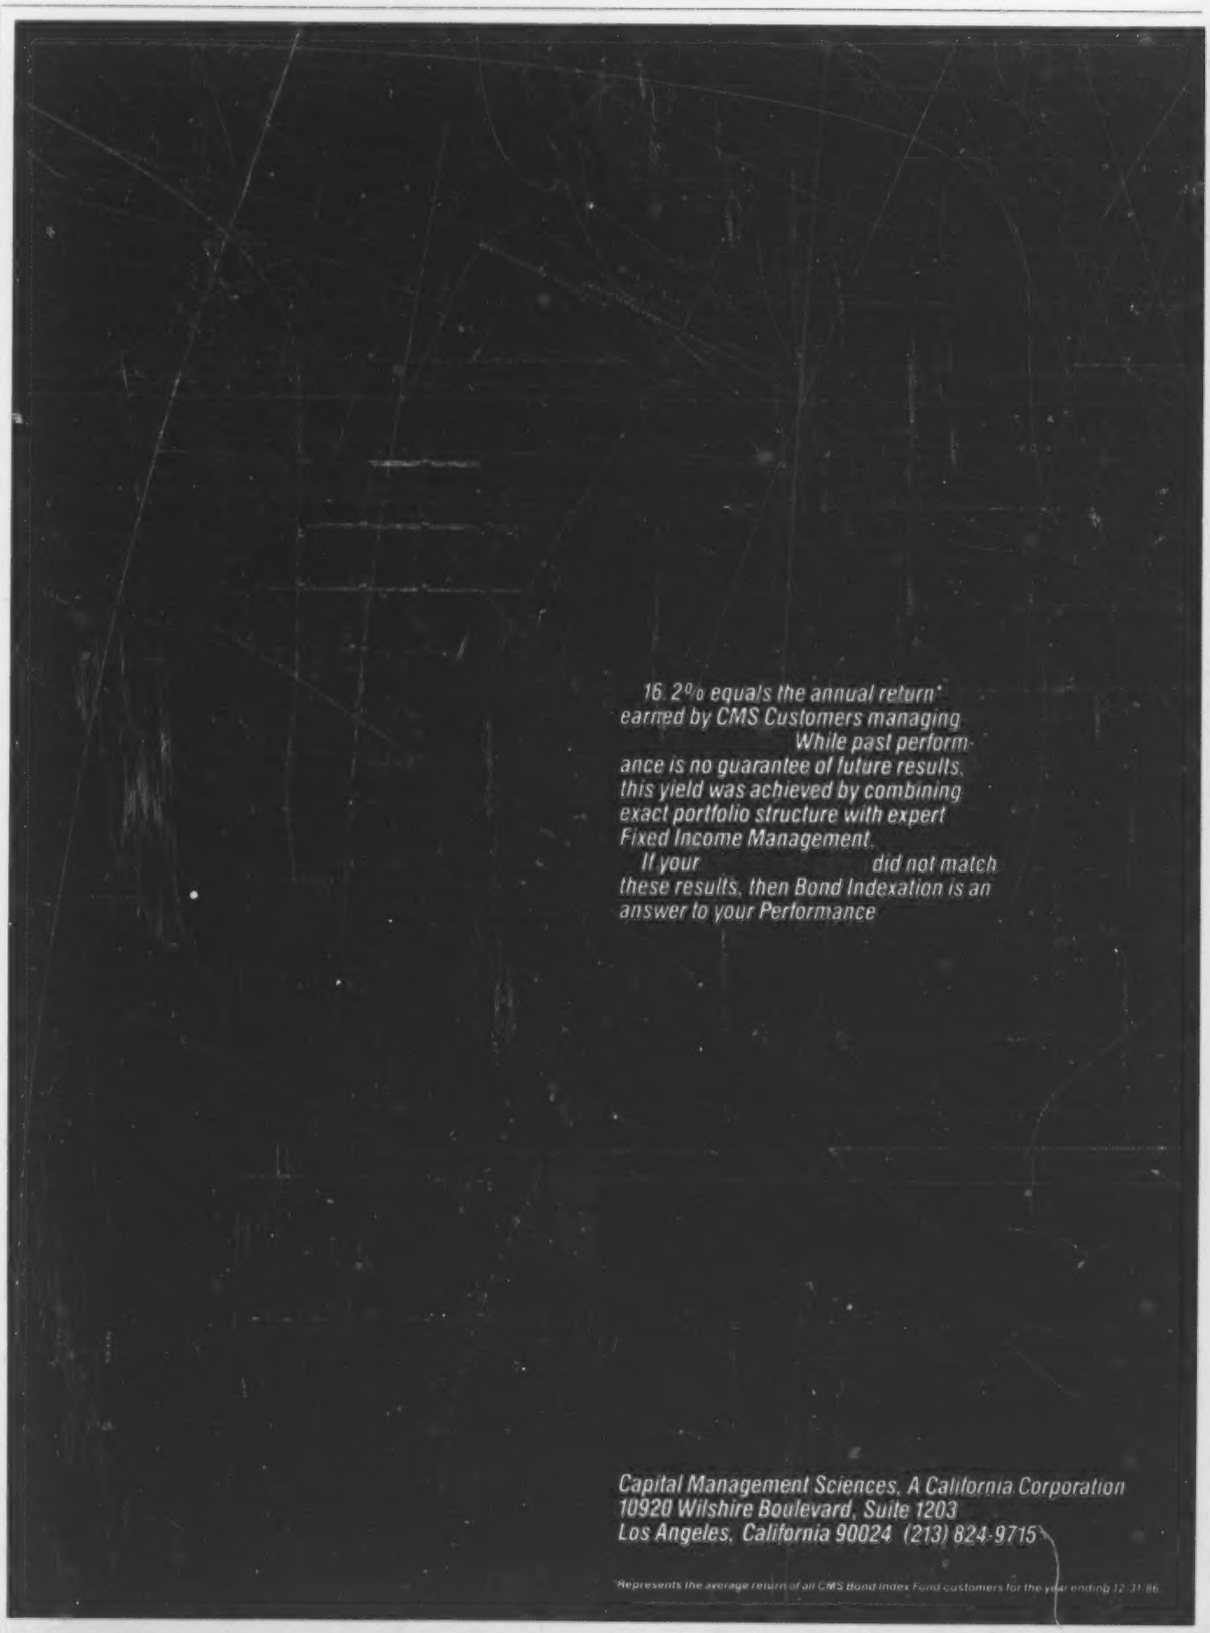
Continental Investment's strategy concentrates on corporate bonds with sinking fund provisions, meaning a portion of the principal must be retired each year. As of Dec. 31, the $400 million Life of Virginia portfolio was 80% in corporates and 20% in mortgage-backed securities, Mr. Hale said. The average maturity was 11 years and the average quality was A+, he said.

Other funds in the top five for the quarter were Connecticut National Bank, Hartford, second with 5.7%, and RepublicBank Dallas and Chase Manhattan Bank, New York, tied for fourth with 5%.

Other top performers for the year were Equitable Life Assurance Society of the United States, New York, third with 22.2%, and Chase Manhattan, fifth with 21.3%.

Equitable Life was fourth for the three-year period with 20.9% and Connecticut National tied with Life of Virginia for fifth with 20.7%. Connecticut National was fourth for the five-year period with 20.4%.

For the 10-year period, Sovran Bank, Richmond, was second with 12.7%; Bank IV Wichita, Kan., was third with 12.6%; and Fidelity Bank, Philadelphia, tied with Life of Virginia for fourth with 12.5%. ■



# Cash Management

## CIGNA taps controlled disbursement

By Barry B. Burr

HARTFORD, Conn. — CIGNA Corp. executives now use controlled disbursement for the bulk of CIGNA's payments, a practice other insurance company officials are divided over adopting.

CIGNA, of Hartford, Conn., opened controlled disbursement for three of its four divisions with Bankers Trust (Delaware) Co., Wilmington, Del.

Aetna Life & Casualty Co., while it had been using controlled disbursement for a couple of years at banks in its Hartford base, recently established additional accounts in Delaware with the Wilmington offices of Citibank and Morgan Guaranty Trust Co.

But The Travelers Cos., also of Hartford, still uses ordinary disbursement accounts at two local banks, Connecticut National Bank and Connecticut Bank & Trust Co.

"It's not that we haven't considered it by any means," said Bruce H. Diesl, Travelers' director-corporate finance. He noted he has visited several banks offering the service, including New York banks' operations in Delaware.

Cash management executives gave different views on how widespread controlled disbursement is in the insurance industry, although they agreed the practice is routine among companies in other industries.

"I would consider that rather unusual" for a company not to have controlled disbursement, said Steven F. Maier, president of UAI Technology Inc., Research Triangle Park, N.C., a consulting company. "One expects to find controlled disbursement done rather universally today," he said.

But Travelers' Mr. Diesl contends that, among insurers, "more of them don't use that product than do," although no regulation precludes the use.

At Aetna, James L. McAuley, assistant vice president-banking services, said, "I don't think it's unusual for insurance companies" to use controlled disbursement.

With controlled disbursement, corporations get better control over the amount of checks that clear against their account each day. Controlled disbursement sites ideally are situated outside major cities, where presentments, or check deliveries, come only once or twice a day — early in the morning — and come from only one Federal Reserve Bank.

Thus, the controlled disbursement bank avoids presentments from other sources, such as other banks, which might come later in the day. Corporations, by knowing the exact amount needed to fund their controlled disbursement accounts to pay the checks, can take advantage of more attractive early morning money markets to invest idle cash or to borrow.

*Stephen J. Myott, CIGNA's directory-treasury services, said the company has moved to controlled disbursements to better serve the business and its customers.*

"I think today that the key reason for doing it is information," Mr. Maier said. "Float isn't important.

"There is nothing about controlled disbursement that extends float." Those interviewed were careful to distinguish between controlled disbursement and remote disbursement.

Stephen J. Myott, CIGNA's director-treasury services, said, "We feel from a business and customer standpoint we ought not to disburse remotely from where we do business."

"There is not a significant float advantage in Delaware," said Anne S. Bradley, vice president at Chemical Bank's controlled disbursement operation in Wilmington.

William N. Natsis, vice president, Bankers Trust (Delaware) added, "Delaware is probably the best controlled disbursement site without being remote."

Mr. Myott said the insurance company moved its principal accounts that were at Hartford banks to Delaware. He declined to identify the Delaware bank, but *Pensions & Investment Age* learned it is Bankers.

Mr. Myott said CIGNA clears some 9 million items, about $3 billion to $4 billion, annually in the account. He said the company wanted a better forecast of cash flow.

He said the bank reports its first presentment at 8 a.m. and the second, and last, by 10:15 a.m.

Before the move, he said, CIGNA would forecast its daily cash needs, revising them often as updated clearings were reported.

"On any given day we could miss our clearings by a wide margin," he said. "If overdrafts became systematic, we would be concerned. It was not in keeping

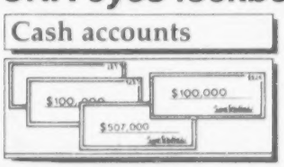
## CNA eyes lockbox consolidation



CHICAGO — CNA Insurance Cos. officials are reviewing CNA's seven wholesale lockbox banks in hopes of consolidating and reducing processing costs.

The Chicago company retained Harris Trust and Savings Bank, Chicago, for the study, said David Berkow, who has been cash manager for about seven months.

Harris is one of the seven lockbox banks. The others are: First Interstate Bank, Los Angeles; RepublicBank Dallas; First Wachovia Corp.'s First National Bank of Atlanta; National Bank of Detroit; First Pennsylvania Bank, Philadelphia; and Connecticut Bank and Trust Co., Hartford.

The lockboxes, which were selected about five years ago, handle property and casualty remittances sent by agents. As wholesale lockboxes, they handle large payments.

Brian Loebach, manager cash analysis and collateral, said the diminished value of float as inter-

## Electronic statements gain

By Chuck Paustian

Electronic transmission of account analysis statements slowly is garnering support among corporate and bank cash management professionals.

Chevron Corp., San Francisco, and Westinghouse Electric Corp., Pittsburgh, are the latest companies setting up systems to receive account analysis data electronically from their banks.

The two corporate pioneers in electronic transmission of account analysis statements — Ford Motor Co., Dearborn, Mich., and Procter & Gamble Co., Cincinnati — already have started receiving test transmissions from four banks.

Ford has received monthly data from Sovran Bank, Richmond, Va., since November. Procter & Gamble has received transmissions from Citibank, New York, The Central Trust Co. and Fifth Third Bank, both in Cincinnati, since December.

Other banks that have agreed to work with Ford and Procter & Gamble on sending account analysis statements electronically are Continental Illinois National Bank and Trust Co., Chicago, and Manufacturers Hanover Trust Co. and Morgan Guaranty Trust Co., both in New York.

By receiving account analysis statements electronically, corporations can facilitate reviewing these statements and realize substantial savings of time, effort and expense.

"If we could get our top 15 banks (on the system), we could cut by 85% our data entry," said Patrick J. Finan, senior systems analyst at Procter & Gamble.

Those kind of results have caught the attention of cash managers at other corporations.

"We have looked at what Ford and P&G have done, as well as what the (National Corporate Cash Management Association) has done to standardize the account analysis form, and we believe at some point it would be smart to receive account analysis

# Ginnie Mae payment delays hurt funds

By Barry B. Burr

Difficulties in recording mortgage-backed securities trades and payments are costing pension funds millions of dollars in potential earnings, fund officials and bank executives acknowledge.

State Street Bank and Trust Co., Boston, lost its largest pension custodial account, the $7.1 billion Teamsters, Central States, Southeast & Southwest Areas Pension Fund, Chicago, over a dispute about uncredited interest on and failed purchases of mortgage-backed securities.

The fund had about $1.1 billion in mortgage-backed securities, including about $666 million in Government National Mortgage Association bonds, as of Dec. 31.

The $7.3 billion Los Angeles County Employees' Retirement Association almost dropped Brown Brothers Harriman & Co., New York, believing the manager was performing poorly. But the problem arose from difficulties Security Pacific National Bank, Los Angeles, the fund's custodian, had in recording payments on the mortgage-backed securities Brown Brothers was managing, according to fund officials.

The fund had $1.1 billion in mortgage-backed securities as of June 30. The fund decided to keep its account with Security Pacific.

Scudder, Stevens & Clark Ltd., Boston, is the largest mortgage-backed securities investment adviser. Keeping track of the securities' payments "is a massive job," said David H. Glen, vice president of Scudder, Stevens.

"Mortgage-backed securities are the worst things banks have to contend with," said Catherine Janson, investment coordinator at Buck Pension Fund Services Inc., New York.

Many problems go unnoticed by pension fund officials. For example, some executives of large pension plans who were interviewed were unable to say how timely their payments are credited to their accounts at their custodial banks.

Because the problems can be costly, many trust departments and pension clients are reluctant to acknowledge them.

Central States first uncovered the problems after a routine audit of the fund by its internal audit staff in late summer 1985, said George W. Lehr, executive director.

The Central States' staff auditors found State Street was not crediting monthly payments on some securities on a timely basis.

Mr. Lehr said the problems continued for months, despite promises by State Street executives to correct them.

"Mechanically, they weren't able to handle it," he said.

The problem was particularly acute because of the rapid paydown in principal by mortgage

# CEOs lobbied for pension votes in favor of anti-takeover plans

By Marcia Parker and Joel Chernoff

The chief executives of Rockwell International Corp. and GTE Corp. have sent letters to their Fortune 500 counterparts asking them to lobby their pension executives and money managers to vote in favor of anti-takeover measures.

The letters went out just before special meetings were scheduled at which the two companies' stockholders were being asked to vote on management-sponsored charter amendments designed to ward off raiders.

The changes were approved by wide margins by GTE stockholders Dec. 24 and by Rockwell shareholders Feb. 11.

As of Dec. 31, institutions held slightly more than 50% of both companies' stock, according CDA Technologies Inc., Silver Spring, Md.

*Pensions & Investment Age* obtained copies of the letters, along with a memorandum from well-known takeover lawyer Martin Lipton of Wachtell, Lipton, Rosen & Katz, New York, that he sent to clients in mid-February urging them to follow the lead of GTE's Theodore Brophy and Rockwell's Robert Anderson and "make their views known to their pension fund managers, banks, insurance companies and other institutions."

*The plea by Rockwell's Robert Anderson, left, for corporate executives to lobby their pension funds was heeded by Goodyear's Robert E. Mercer.*

Citing creation of investor groups such as the Council of Institutional Investors and T. Boone Pickens Jr.'s United Shareholders of America, and sponsorship by major pension funds of proxy resolutions attacking "poison pill" provisions, Mr. Lipton said "it has become clear that institutional investors are supporting corporate raiders for the purpose of continuing the junk-bond bust-up takeover frenzy."

In his memo, Mr. Lipton also took one step further a controversial proposal by New Bedford, Mass.-

# Airline drops dedication

By Fred Williams

FORT WORTH, Texas — American Airlines has liquidated its $1 billion dedicated bond portfolio and set up a dollar duration bond portfolio, correlating the duration of plan assets and liabilities to take advantage of interest rate fluctuations and reduce volatility of pension expenses.

The program is called HALO — hedged asset/liability optimization — by the American pension executives who developed the concept. HALO effectively allows the company to cover its pension liabilities by investing less than half of its $1.7 billion in total defined benefit assets in a special internally managed bond portfolio of longer duration than in the internally managed dedicated portfolio.

Duration is the time it takes for an investor to recover half of the present value of the cash flow of the security.

In setting up a dollar duration bond portfolio, the dollar change in the value of the assets and liabilities becomes roughly equal.

The program involved the sale of about $1.05 billion in bonds and the repurchase of some $850 million in long duration bonds, concentrated primarily in government bonds, zero-coupon securities and treasury receipts, said William F. Quinn, assistant treasurer-funds management.

Pension liabilities at American total about $1.7 billion with a duration of 8½ years. The new bond portfolio has a duration of 17 years, he said.

The procedure allowed American to lock in the pension surplus and minimize interest rate risks, said Mr. Quinn. He would

*The possible purchase of Pan Am by AMR Corp. was grounded in part by a large unfunded liability.*

# Unfunded liability casts pall over Pan Am buy-out

By Fred Williams

FORT WORTH, Texas — Pan American World Airways Inc.'s unfunded pension liability of $670 million was among the major reasons AMR Corp., the parent company of American Airlines Inc., decided in late February not to acquire Pan Am, analysts say.

AMR, Fort Worth, announced late last month it wouldn't bid on New York-based Pan Am after weighing the deal for nearly a month. American and Pan Am exchanged financial and operating data in January.

William F. Quinn, assistant treasurer-funds management at American, said the pension liability was a significant factor in deciding not to pursue the deal.

"Yes, we obviously considered it (the unfunded liability) among other assets and liabilities in determining the overall value of the company," he said.

"It clearly was not a plus factor in assuming a major unfunded liability, but that was only one part of the overall analysis. If there had been other pluses which offset the negatives, the result may have been different," Mr. Quinn said.

"It was only one of many reasons we didn't think it would make sense for us," he said. Other reasons included integrating work forces, the overall value of Pan Am's assets and American's ability to gain access to European routes without Pan Am.

Pan Am's unfunded liability totaled about $670 million as of Dec. 31.

Several analysts agreed the pension liabilities at Pan Am played a significant role in American's decision to walk away from a proposed acquisition of part or all of Pan Am.

"I think it was one of several very important factors," said Julius Maldutis Jr., airline analyst at Salomon Brothers Inc., New York. "I wouldn't place it as *the* most important, but it definitely played a part in the decision."

Other factors were the aging Pan Am fleet and the company's shaky financial condition, including more than $800 million in long-term debt.

Anthony Hatch, airline analyst at Argus Research Corp., New York, said, "Over- or underfunded pension plans certainly are part of the deal and figure into the acquisition fees, even though they are often less obvious. Certainly American must consider all of that and decide if it is cost effective."

Mr. Hatch said Pan Am's unfunded pension liability "will certainly make them hard to sell" since the liability is almost as much as the price of Pan Am's stock. At $6.50 per share, the 136,434 shares of Pan Am stock outstanding would total $887 million.

"Pension costs and liabilities must enter into the calculation of the overall net asset value of the property," said Mr. Hatch.

He characterized the overall financial health of Pan Am as "weak" with "no real obvious prospects of a turnaround."

Except for 1985, the airline has

# IBM's Shultz to RJR; 4 more switch jobs

Robert E. Shultz, director of U.S. retirement funds at IBM Corp., is joining RJR Nabisco Inc. as vice president-pension asset management.

Separately, three other corporate pension executives and one public fund executive have made job changes.

Philip J. Schneider has left his position as assistant treasurer-employee trusts at Baxter Travenol Laboratories Inc. to take a job at a division of The Wyatt Co. Carolyn Groh, formerly manager-investment administration at Federated Department Stores Inc., has joined Mead Corp. as manager of pension investments. Charles Tharp has left PepsiCo Inc. as director of benefits for its $570 million pension fund. And Layne Denning, executive director, left the Denver Employees' Retirement Plan to become president and chairman of Intermountain Capital Management Inc., Denver.

Other than to say he looked forward to the opportunities at RJR, Mr. Shultz declined to comment on the reasons for his departure from IBM.

Mr. Shultz, who has been at IBM, Stamford, Conn., for almost seven years, will report to Edward J. Robinson, senior vice president and chief financial officer at RJR Nabisco, Winston-Salem, N.C.

Mr. Shultz's appointment requires approval of RJR's board of directors, which is expected to take action March 19, said company spokesman Bill Ruffin. IBM has yet to announce a successor to Mr. Shultz.

Mr. Ruffin declined to comment on how Mr. Shultz's arrival will affect Robert Bennett, president of RJR Investment Management. Mr. Bennett's relationship to others in RJR corporate hierarchy also remains unclear.

When Gene A. Hoots, who was replaced by Mr. Bennett late last year, served as president of RJR Investment Management, he reported to John Dowdle, senior vice president-financial services, who in turn reported to Gwain Gillespie, the chief financial officer.

Mr. Hoots joined Reich & Tang Inc., New York, as a vice president while Messrs. Gillespie and Dowdle retired.

RJR Nabisco has been in transition, consolidating investment managers and developing investment strategy. Several key executives left after the 1985 merger of R.J. Reynolds Industries Inc. and Nabisco Brands Inc., including Messrs. Gillespie, Dowdle and Hoots.

As of Sept. 30, RJR's employee benefit assets totaled $3.2 billion.

Having made his home on Long Island, Mr. Shultz said Winston-Salem will be a big change. Eventually he will be moving to Atlanta, probably in fall, to RJR Nabisco's new headquarters.

Before going to IBM, Mr. Shultz was general financial supervisor of pension funds at New York Telephone Co., and pension funds administration manager at Western Electric Co., both in New York.

He is a member of the board of directors of the Institute for Quantitative Research in Finance and past president of Pension Group East. He is a member of the client advisory board at Chase

*Robert E. Shultz, who directed retirement funds at IBM, has moved to RJR Nabisco.*

Manhattan Bank, the Investment Technology Association, and the committee on investment of employee benefit assets of the Financial Executives Institute.

Mr. Schneider, who begins his new job March 16, will be a consultant in the Chicago office of Wyatt Asset Services Inc., a subsidiary of The Wyatt Co. He reports to Asghar Alam, who is chairman of the asset services practice committee.

His successor at Baxter Travenol has not been named.

As manager of pension investments at Mead, Dayton, Ohio, Ms. Groh will report to Gerald W. Bialka, assistant treasurer. Mead has about $550 million in pension assets.

She replaces Jane Burruss, who

# Passive equity cut

## Alaska fund transfers $725 million

By Steve Hemmerick

JUNEAU, Alaska — Alaska Permanent Fund Corp. trustees are reducing the fund's passive equity portfolio, part of a move to decrease the fund's equity exposure by $725 million and shift the money into Treasury securities.

The action is the reverse of a long trend by pension plans during the five-year bull market to put increasing amounts into passive equity portfolios. Many fund executives have increased passive management because of disillusionment with active managers' ability to outperform the stock market indexes.

But David Rose, executive director of the $9 billion Alaska fund, expects a drop, or at least a sharp correction, in the market in the coming months, and recommended passive equities be cut because he believes active managers tend to do better than the index in a falling market. He also said he wanted to take profits out of the passive fund.

The approximately $1.3 billion passive portfolio, which tracks the S&P 500, is managed by Bankers Trust — Investment Management Group, New York.

The passive portfolio will retain about $550 million. No money will be taken from the fund's five active equity managers, which manage a total of $550 million.

Mr. Rose noted the Alaska Permanent Fund is conservatively invested. With the additional money shifted into bonds, the asset mix of the fund ultimately will be about 84% fixed income, 4% real estate and 12% stocks, compared

## Opinion

# No call for pressure on proxies

PENSION FUNDS SHOULD VOTE their proxies, but they should vote them in the long-term best interests of their beneficiaries. ERISA demands it.

The Employee Retirement Income Security Act requires pension fund assets to be invested solely in the interests of the beneficiaries and, clearly, proxy votes are part of the assets.

Unfortunately, some corporations are attempting to pressure pension executives and managers to vote the proxies in support of proposals to entrench management.

As reported on Page 1 of this issue, a number of letters have been circulated to corporate chief executives enlisting the support of their pension funds in proxy votes in favor of managements that believed themselves vulnerable to takeover bids. Phone calls have been made on other occasions.

In one letter, Martin Lipton, partner in the law firm Wachtell, Lipton, Rosen & Katz, urged all companies to instruct their pension fund managers to vote in favor of charter amendments designed to protect management against "abusive takeover tactics."

Mr. Lipton declared "it has become clear that institutional investors are supporting corporate raiders for the purpose of continuing the junk-bond bust-up takeover frenzy."

In another letter, Theodore F. Brophy, chairman of the board of GTE Corp., suggested other top corporate executives tell the managers of their pension funds to vote for the proposals adopted by GTE's board "if you agree that the proposals will benefit GTE's shareholders in the long run."

The top executives of other companies, who may themselves become targets of unfriendly takeover efforts, are hardly the best-qualified judges of whether the anti-raider proposals of GTE's board are in the long-term best interests of the shareholders.

Corporate pension executives, daily involved in the stock and bond markets, would be better qualified to make a reasoned, unbiased determination on the issue. They also generally pursue the long-term best interests of the pension plan beneficiaries. However, as these letters demonstrate, they may be vulnerable to pressure from top management.

The investment managers, with research resources at their disposal, with an understanding of whether management is doing a good job, and further removed from corporate politics, are the best qualified to decide what is in the long-term best interests of the shareholders and thus the beneficiaries.

Despite Mr. Lipton's intemperate letter, institutional investors are not interested in supporting corporate raiders, or in feeding the "junk-bond bust-up takeover frenzy."

They are interested in getting the best long-term investment results for their clients — in effect, the pension beneficiaries.

Any money managers or pension executives who succumbed to pressure from top management to support with proxy votes another company's top management might find themselves in breach of their fiduciary duties under ERISA.

# A 'half-full' view of the economy

A RECENT REPORT by Polyconomics Inc. provides evidence as to why the economy and the stock market have confounded economists and market analysts who have been predicting doom and gloom.

The economy has performed much better than many analysts give it credit for, the Polyconomics report shows. For example, while many reports suggest the U.S. standard of living has declined in the past five years, the Polyconomics report shows real after-tax income per capita rose 11.3% compared with only 7.5% between 1973 and 1980.

Similarly, reports that U.S. manufacturing industries are dying are premature, the Polyconomics report suggests. It states manufacturing output in the United States increased almost 30% between late 1982 and the end of 1986, a rate exceeding all other major countries. Manufacturing productivity improved 4.1% per year between 1981 and 1985 compared with a 0.9% annual increase in the 1976-1980 period.

From 1980 to 1985 employment in the United States increased by 1.5% annually, 1% in Japan and declined by 0.3% per year in the European Economic Community.

The Polyconomics analysis said the U.S. trade deficit did not indicate the United States was not competitive. The trade deficit did not arise from excessive merchandise imports, which actually declined to 8.7% of gross national product in 1986 from 9.4% in 1980, but from a decline in exports to 5.2% of GNP from 7.9%. The biggest trade problem confronting the United States is that it cannot export to the United States, according to Polyconomics.

The Polyconomics report also had a revisionist interpretation of the "debt crisis," arguing the nation's saving rate was a healthy 19% to 20% of GNP in 1983-'85 compared with 12% to 14% in 1976-'79 and the consumer debt burden was not excessive.

Perhaps investors, like Polyconomics Inc., have been seeing the glass half full while many economists and market analysts have been seeing it as half empty.

## Letters to the editor

### Fund omitted

To the Editor: Omitted from your listing of "Ranking of fund/sponsors" of the top 1,000 pension funds in the Jan. 26 issue of *Pensions & Investment Age* is Southwestern Public Service Co., an investor owned electric utility in Amarillo, Texas.

Pension fund assets for all plans as of Sept. 30, were $250.7 million. Retirement fund assets were $204,414; and stock bonus plans $46.3 million. MBank Dallas is the trustee for retirement fund assets.

**Larry Higgins**
Manager-employee services
Southwestern Public Service
Amarillo, Texas

### Missing data supplied

To the Editor: We were pleased to be included in your scorecard article as the top net business gainer for 1986 of firms between $250 million and $1 billion in assets under management.

Our net new equity business was $378 million and net new balanced accounts totaled $97 million.

**Kenneth S. Grossman**
Partner
Hahn Holland & Grossman
Chicago

### Objects to term use

To the Editor: On the money manager profile questionnaire, question 14 includes the phrase "Dynamic Asset Allocation" — a registered trademark of Leland O'Brien Rubinstein. We would appreciate it if, in future, you acknowledge it as such, or find a substitute phrase such as risk hedging.

**Elaine W. Baker**
Leland O'Brien Rubinstein Associates
New York

### Misattribution alleged

To the Editor: An article in the Jan. 26 issue ("Dedications fall with rates") reports me as saying a recent asset dedication enabled the Western Conference of Teamsters Pension Trust "to wipe out its unfunded liabilities" for purposes of MEPPA. This is a misattribution: I neither said, nor implied, any such thing.

In a telephone interview ostensibly dealing with the trust's asset allocation, I said that dedications enabled the trust to reduce the UVBL significantly.

I neither said it had been "wiped out," nor suggested or implied that doing so was a trust objective.

While the difference may seem unimportant to *Pensions & Investment Age*, I do not appreciate reporters taking liberties with my words, or putting words in my mouth. The error makes me reconsider my willingness to respond to requests for information in the future.

**Alan D. Biller**

## Responses due

Questionnaires for *Pensions & Investment Age*'s annual Money Manager profiles issue, to be published May 25, are due March 16.

Investment management executives who want their firms profiled should return their completed questionnaires to Carol Wiley, directory coordinator, *Pensions & Investment Age*, 740 N. Rush St., Chicago, Ill. 60611.

Money managers who have not received questionnaires should contact Ms. Wiley at (312) 649-5486.

The annual Money Manager profiles issue lists almost 1,000 investment advisers, including managers of real estate, international and other alternative investments. The issue includes articles and statistics on the amount of tax-exempt assets managed, investment approaches, investment vehicles used and details of the largest managers.

# Real Estate

## Wrap-up

### Trust joins in loan

WASHINGTON — The Multi-Employer Property Trust, an open-end commingled real estate fund of Kennedy Associates Real Estate Counsel Inc., Seattle, invested $17.2 million in a participating mortgage loan on the Arboretum Lakes Office Park in Lisle, Ill., a suburb of Chicago.

The trust is a co-investor with the $8 billion Alaska Permanent Fund Corp., Juneau, a trust for a portion of state royalties from Alaskan mineral rights.

The Alaska trust will invest $11.5 million in the mortgage.

Landon Butler, a member of the multi-employer trust's policy board, said his trust's investment in the participating mortgage will yield a 10.5% cash on cash return, and an estimated internal rate of return of 14% over the next 10 years. The rate of return is higher than many other current ones because the commitment was made more than a year ago, when interest rates on such loans were higher, Mr. Butler said.

"With the funding of Arboretum Lakes, we will have invested a total of $30 million in five Chicago office park properties," he noted.

"The trust's targeted Chicago investments are designed to accomplish two key objectives. First, by investing in high-quality properties in one of the nation's top office markets, the trust is meeting its long-term investment objectives. Second, we enable our Chicago-based clients to reinvest their pension fund assets in their home region," he added.

Three of the 83 pension funds in the trust are Chicago funds: the $390 million Chicago District County of Carpenters Pension Fund; the Laborers Pension Fund; and the Iron Workers Mid-America Pension Fund.

### Teachers finance mall

AUSTIN, Texas — The Teacher Retirement System of Texas has made a $52 million mortgage on Southwest Plaza Mall in Jefferson County, Colo., the largest mall in that state.

The two-level regional mall, with 1.2 million square feet, is 12 miles southwest of Denver's central business district.

The investment was made through one of the $16 billion retirement system's advisers, L.J. Melody Co., Houston, which services and manages real estate investments.

### Mall partnership set

DALLAS — A closed-end limited partnership fund that invests solely in retail shopping centers is being marketed by Lehndorff & Babson Real Estate Counsel, Dallas.

According to G. Andrews Smith, president of Lehndorff & Babson, the fund is the only one to be entirely in shopping center investments.

The fund will share investments with Lehndorff & Babson's separate account clients and thereby allow the fund to invest in several large centers, each of which will have a minimum of 800,000 square feet. The fund, which is expected to close in about 12 months, will have total assets of $75 million to $100 million.

# Appraisal guidelines eyed

**By John Covaleski**

In an effort to bolster pension fund executives' confidence in real estate investing, leading industry groups are pressing real estate managers to take more responsibility for the real estate appraisal process.

The National Council of Real Estate Investment Fiduciaries, New York, has proposed guidelines for how real estate managers should contract with appraisers and direct their work. The Pension Real Estate Association, Washington, is interested in using the NCREIF proposal to establish its own guidelines.

NCREIF's members are real estate managers with more than $20 billion under management from pension funds. PREA's members are both pension funds and managers whose investments in real estate account for more than $100 billion.

In another development, James A. Graaskamp, a University of Wisconsin professor who led a PREA-funded study that found widespread errors in appraisals of pension fund-held real estate, has spoken out strongly for regulating managers in the hiring of appraisers.

"My belief is that if something (establishing guidelines) isn't done, it will lead to problems for asset managers. It could make plan sponsors squeamish about real estate," he said.

Mr. Graaskamp's 1986 study of more than 50 appraisals of properties in commingled funds determined the properties can be significantly undervalued or overvalued because appraisals in general lack necessary information and appraisal methods are inconsistent (*Pensions & Investment Age*, Dec. 8).

Real estate investment managers are in most cases solely responsible for the appraisal of their commingled fund properties, either by performing appraisals with their own staff or contracting the duties of third-party appraisers. It is generally believed that establishing guidelines for contracting the service would give pension executives and other investors in real estate funds a better understanding of the appraisal process.

NCREIF's proposed "Guideline For Preparation Of An Appraisal Engagement Letter" would require that real estate managers who serve as fiduciaries, in drafting agreements with appraisers, include the methods and procedures to be used in the appraisals. The proposal also sets guidelines for other terms in engaging appraisers and requires that minimum standards be established for the appraisers' work.

*"My belief is that if something isn't done, it will lead to problems for asset managers. It could make plan sponsors squeamish about real estate."*

— James A. Graaskamp

Mark Decker, executive vice president of PREA, commended the NCREIF proposal saying, "There's a strong feeling among our leaders to adopt rules similar to theirs."

PREA President Kenneth Campia, president of LaSalle Advisors Inc., Chicago, said he expects standardization to come to the appraisal industry, but he has reservations about adopting a policy requiring managers to direct how appraisals are done. "You don't want appraisals to be client-driven," he warned.

Robert Smedley, NCREIF president and president of Wachovia Real Estate Fund, Winston-Salem, N.C., said NCREIF has no power to enforce the guidelines on its members, but he hopes the members adopt the proposal and follow it voluntarily. He said the guidelines are necessary to make the appraisal process "more credible" to pension executives.

The appraisal industry's reputation was seriously wounded last year when a congressional subcommittee investigation found many incorrect appraisals.

As a result of that study, the subcommittee of the House's Committee of Government Operations isdrafting legislation that would establish a "self-regulatory organization" within the appraisal industry. That organization would be responsible for licensing, testing and setting work standards for appraisers.

But Mr. Graaskamp, who has been described as one of the country's foremost appraisal experts, said, "The problem is with the employers of appraisers, not with the appraisers. Any regulatory system that fails to place sanctions against the employers is doomed to fail."

Irregularities in the appraisal industry are caused by appraisers' "willingness to satisfy their employers," as much as by the appraisers' negligence, he said. He did not name any specific cases, but said managers trying to increase their portfolio asset sizes sometimes pressure appraisers to misstate appraisals.

Mr. Graaskamp wants managers to be given guidelines in the method of contracting appraisers, dictating certain aspects of how the appraisals should be done, and in evaluating appraisers' work.

The board of directors of PREA, concerned about giving fiduciaries too much input in the appraisal process, earlier this year voted not to accept Mr. Graaskamp's recommendations. Mr. Decker said despite that rejection, the association feels some standardization of appraisals, such as the NCREIF proposal, is needed.

Interviews with real estate managers showed lack of uniform appraisal methods is of greatest concern. David Glickman, president of Heitman Advisory Corp., Chicago, said: "If appraisals are not uniform, plan sponsors cannot fairly compare the real estate products available to them."

# Returns decline; assets withdrawn

**By Steve Hemmerick**

Investment returns for some large open-end commingled real estate funds continued to slide for periods ended Sept. 30, Pensions & Investments' Performance Evaluation Report results show.

At the same time, some pension executives are continuing to withdraw assets from some of the commingled funds.

PRISA, the largest open-end fund, which is offered by Prudential Asset Management Co. and managed by Prudential Realty Group, Newark, N.J., reported a 7% return for the 12 months ended Sept. 30, down about 2.7 percentage points from the 9.7% previous 12 months ended Sept. 30, 1985.

Clients of the Prudential Real Estate Investment Separate Account took out $1 billion from the fund during calendar year 1986. The fund ended Dec. 31 with $4.76 billion in assets, down from $5.32 at the beginning of the year.

The reason that the fund hasn't dropped $1 billion in assets is because the fund generated $332 million in income and $73 million in new contributions. The biggest cash outflow for 1986 was in the fourth quarter, when about $350 million was taken out by clients, according to Richard Merrill, the new chairman of Prudential Asset Management.

Mr. Merrill said preliminary estimates indicate in the first quarter of 1987, clients will take out an estimated $150 million in additional assets. He said Prudential officials think this may be an indication that the large outflows of cash are now being reduced.

He said the money taken out is partly because of plan reversions and because people have been bullish about stock market returns.

However, he said investors are becoming edgy about the market and this is contributing to part of the reduction in asset outflow. He also thinks the fund has new appraised values that present opportunistic buys for investors.

Although assets of the Prime Property Fund, the second largest open-end fund and offered by Equitable Life Assurance Society of the United States, New York,

# Returns drop . . .

*Continued from page 15*

have remained stable at between $2.8 billion and $2.9 billion during year ended Sept. 30, returns are dropping. The fund returned 8.8% for the year ended Sept. 30, vs. 11.9% the 12 months ended Sept. 30, 1985.

According to PIPER figures, the John Hancock Real Estate Separate Account reported a 0.2% return for the 12 months ended Sept. 30, down 7 percentage points from the 7.2% return during the previous 12 months.

Returns for all three funds are below a median of 9.5% for 90 open- and closed-end real estate funds with $26 billion total assets for the year ended Sept. 30. This median was provided by Evaluation Associates Inc., Westport, Conn.

The lower returns largely are due to depreciation of assets rather than loss of income yield, managers and consultants say.

The break out of the PRISA return, for example, shows relatively stable income yields, but declining appreciation. For the 12 months ended Sept. 30, PRISA had an income return of 7.01% but an appreciation return of −0.5%. In the 12 months ended Sept. 30, 1985, the return on income for PRISA was 7.2%, but the appreciation return was 2.4%.

Returns may be sliding because real estate managers have been slow to react to current market conditions, such as asbestos problems, increasing vacancies and declining rents, suggested Paul Saylor, a principal with Institutional Property Consultants, Atlanta.

What is seen today in stable or declining appreciation for many properties, he said, is a proper adjustment to offset past optimism.

Problems could multiply for some open-end fund managers because poor performance could set off a new wave of withdrawals.

Mr. Saylor said investors "should be encouraged by the fact that the large open-end fund managers are showing a great deal more realism than they have in the past," while performance is "not getting to the area of extreme concern when people should again try to take money out in mass quantities."

Unit values for open-end funds "are getting into the range where they might represent some pretty decent buys," he added.

Income for many of the commingled real estate funds remains above the U.S. Consumer Price Index, which increased 1.8% for the 12-month period.

And a key reason for being in real estate — to help stabilize returns for portfolios — hasn't changed, pointed out Tina Brownley, a director at Prudential.

She said the real rate of return has been positive for PRISA since it began in 1970.

Not every fund suffered during the 12 months ended Sept. 30. Citicorp Real Estate Equity Fund, offered by Citicorp Investment Management Inc., New York, had the highest one-year return — 23% — of any fund in PIPER. Yet for the year ended Sept. 30, 1981, when most real estate funds were scoring returns in the teens, the Citicorp fund was in the last decile with a 5.9% return.

Citicorp moved out of the basement beginning with the 12 months ended Sept. 30, 1985, primarily because of rent increases. It also realized gains from the sale of two buildings, said H. Piper Andrews Jr., a vice president with Citicorp. The office buildings, in the Century City area of Los Angeles, were sold for $230 million to Japanese investors last year. That same year, Citicorp refinanced an office building at 633 Third Ave., New York, that produced another $96 million in cash.

Mr. Andrews said the New York building is appreciating sharply because 300,000 square feet of space is being re-leased at $27 to $30 per square foot from $10. Citicorp originally bought into the building because fund officials believed the low rents could be raised by buying out old leases.

He said the fund is using the cash to make a "major play" in retail properties and industrial buildings.

Other open-end funds with high returns for the year ended Sept. 30 were Chase Investors Management Corp., New York, Chase Bank Real Estate Investment Fund, with an 18.3% return; J.P. Morgan Investment Management Inc., New York, Commingled Pension Trust Fund, 17.2%; and Copley Real Estate Advisors, Boston, Developmental Properties Account, 17.2%.

The closed-end fund with the highest return is JMB Institutional Realty Corp., Chicago, Group Trust No. 1, which returned 18.1% for the 12 months ended Sept. 30.

Managers of the JMB fund, which has $319 million in net assets, decided five years ago to put the majority of the assets in retail space, said Ted Stern, an executive vice president with JMB.

The fund is 57% in retail properties, while the average fund has about 23% of assets in retail, Mr. Stern said.

Other closed-end funds with high returns for the 12 months ended Sept. 30 were: Equitec Institutional Realty Advisers, Oakland, Calif., Fund No. 1, with a 16.1% return, and Lehndorff & Babson Real Estate Counsel Inc., Dallas, Lehndorff & Babson Property Fund, with a 17.1% return.

For five years ended Sept. 30, the Morgan Guaranty Fund has the highest return among open-end funds, 17.6% compounded annually. It also has the highest 10-year return at an annualized 19.1%.

Among closed-end funds, JMB Group Trust No. 1 had the highest return of an annualized 16.9% for five years; Colowell Banker Capital Management Services, New York, Institutional Fund No. 1, had a high return of 20.6% compounded annually for the 10-year period. It is the only fund reported in the PIPER 10-year universe. ■

At NCNB,
We Follow The Philosophy
Of The Pharaohs.

They knew two things were critical to solid real estate investments. Quality construction and teamwork. Given the enduring results of that way of thinking, NCNB insists on it too.

Our experienced team of development, architectural, construction, and property management specialists work exclusively with high-quality properties, located primarily in the Southeast. And our dedication to quality and teamwork has paid substantial dividends.

With consistently high returns, the NCNB Real Estate Fund has climbed to the peak of the industry in recent years. We've cemented our place at the top of the open-end fund universe with an average annual return of 16.4%* over the last five years. Our ten-year average is just as impressive.

Many real estate investments may look good in the short run, but The NCNB Real Estate Fund has passed the ultimate test...the test of time. Call Mark Coltrin, NCNB Trust Group Vice-President for details at (704) 374-8405.

*As reported by CDA Investment Technologies, Inc. for the period ending 12/31/85.

REAL
ESTATE
FUND

## Wrap-up

*Continued from page 15*

The new partnership fund will focus on "vintage" shopping centers that can be renovated for added return.

Also, he said, Lehndorff will do all its own property management on the centers it buys.

Mr. Smith said the fund "is a major move for us, and it will be for investors as well because well-managed shopping centers have shown time and again to be attractive investments, both in terms of risk and value added."

## L.A. prices near high

LOS ANGELES — Prices of Los Angeles real estate, supported by the city's booming economy, are at upper levels, according to a report by Salomon Brothers Inc., New York.

For Los Angeles real estate to generate the returns the investors expect, the report said, the Los Angeles economy must continue to perform as well, or nearly so, as it has in the past.

The report suggests caution because the Los Angeles area economy is facing some risks. The report said defense spending growth, an important part of the Los Angeles economy, is slowing. The city area has also benefited from imports that will probably decline with the value of the dollar.

But while returns on property there could decrease, the report said prices for Los Angeles real estate are expected to remain high, partly because of Los Angeles' growing importance as an international city and its economic connections with Tokyo.

Despite the presence of rent control in some areas of the Los Angeles basin, apartment fundamentals appear to be better in the Los Angeles area than other parts of the country, the report said.

## Trouble spots noted

NEW YORK — There are some "truly troubled" office markets, including Dallas, Denver, Houston, New Orleans and Oklahoma City, according to a 1987 real estate market forecast by Landauer Advisors Inc., New York.

Those cities' office markets are not likely to regain their real estate or general economic balance until the 1990s, the forecast said.

"The indication that Texas is experiencing net migration out of state for the first time in its history aptly suggests that this message has been received and understood by the general population," the report noted.

But the report said office market conditions vary among the nation's cities.

New York City, for example, has steady office rents and below-average vacancy rates. But downtown Manhattan, with a 9% office vacancy rate, is experiencing its most intense competition for tenants since New York's economic recovery in the late 1970s.

The report also said the amount of vacant office space in Chicago and Los Angeles is rising.

According to the report, investors are presently focusing on established regional malls. But the report said, shopping centers, like hotels, are management intensive and require strong merchandising ability, detailed maintenance and close security.

Retail markets in the Northeast, from New England through Washington, are star performers in retail property; the retail markets in Southern California are also outstanding.

As for industrial properties, the report noted there is a slowly rising level of vacancies, and properties should be approached selectively.

**PIPER**

*The statistical data are extracted from Pensions & Investments' Performance Evaluation Report, a quarterly performance evaluation published by* Pensions & Investment Age. *PIPER details comparative performance data on special equity and international funds at more than 50 banks and insurance companies. PIPER is compiled by Rogers, Casey & Barksdale Inc., Stamford Conn.*

# Sector picks pay off in international

**By Marlene Givant**

To 1986's top-performing international managers, picking profitable industrial sectors was almost as important as country weighting, Pensions & Investments' Performance Evaluation Report shows.

Most managers cut back on Japanese investments during the year, but because of the yen's strength, some remain bullish on Japanese industries oriented toward domestic demand.

Similarly, the jump in the deutsche mark is causing some managers to reduce exposure to West Germany while others are attempting to overweight domestic-oriented German companies.

The Continent was a good play in 1986 but growth of Europe's more mature markets might slow this year, managers predicted.

According to PIPER, the top-ranked manager of a commingled international fund for the one- and three-year periods ended Dec. 31 was BA Investment Management International Ltd., London, with walloping returns of 97.7% and a compound annual 44.3% for those periods, respectively, on its $55 million International Employee Benefit Equity Fund.

Ranked second for the year and third for the three years was American National Bank & Trust Co., Chicago, with 75.1% and a compound annual 42.1%, respectively, on its $21 million International Equity Fund.

Bessemer Trust Co., New York, ranked third for the year with a 75% return on its $85.9 million Fund E Equity vehicle and Marine Midland Bank's, New York, $30 million International Equity Fund, managed by Wardley Investment Services International, New York, ranked fourth with 73.9%.

These were the only international pooled funds of the 28 that PIPER tracks to beat the Morgan Stanley Capital International Europe Australia Far East index's 70% return in 1986. Centerre Trust Co. of St. Louis, was just below the index with a 69.4% return for the year.

For the three years, only BA beat the EAFE index's annualized 42.2% return, and for five years, IDS International Inc.'s, Minneapolis, International Collective Equity Fund of $59.5 million with an annualized return of 30.8% and BA with a 30.1% return, narrowly beat the index's 28.8%.

During the fourth quarter of 1986, in contrast, 18 out of 28 international managers in the PIPER universe outperformed the EAFE, which returned only 4.2%.

Ranked first for the quarter with an 8.9% return was Provident National Assurance Co.'s, Chattanooga, Tenn., International Low P/E Equity Fund, managed by Provident Capital Management Inc., Philadelphia.

Marine Midland's fund was second with an 8% return and IDS International's fund returned 7.2%.

BA Investment Management looks at consensus expectations of international market prices, levels of growth, earnings, interest rates, currencies and political and policy trends over a 12-month time horizon.

Portfolios are structured to add value where the firm's expectations differ from the consensus. Stocks are chosen the same way. Individual markets and sectors are emphasized equally and currency risk is managed entirely separately using forward contracts.

"In all world markets we saw a heavy emphasis — with only minor diversions — on the same broad sectors as the best performers across all markets: financials, services, consumer goods. Basic industry sectors, on the other hand, had poor performance," said John Horseman, investment manager.

"Earnings growth in 1987 will be somewhat short of expectations. In Japan, earnings are likely to decline, partly due to the dollar's decline, particularly in certain industries. We tend to find better value in other markets."

Since early last year, the firm reduced its Japanese exposure to 10% at year-end from less than 30%. It now stands at 5%.

**Open- and closed-end real estate fund results - page 15**

The firm's scant holdings in Japan during 1986 were in finance-oriented companies and asset-based sectors, which significantly outperformed the Japanese market.

Globally, "we still hold the view that the U.S. economy will muddle along. Germany and Japan will have stable to low interest rates. Disinflation continues to favor the stocks and the sectors we're in."

BA likely will be overweighted in West German financial and consumer food stocks this year. "Earnings in Germany will probably be down 10% this year," Mr. Horseman said. "Automobile, capital goods and machinery industries will be hurt by the deutsche mark increasing and the flat world economy."

The Spanish market appears to have reasonable values and the United Kingdom has strong potential, he said.

"We're still keen on the U.K. — consumer sectors, high wage growth, strong background in consumer credit, domestic-based companies benefiting from the weaker sterling. There's a lot of similarity with our position last year," said Mr. Horseman.

BA also might explore smaller Southeast Asian markets — such as Korea or Thailand — partly because Japan is establishing alternative manufacturing facilities there, Mr. Horseman added.

American National Bank, which manages $30 million in assets for U.S. tax-exempt clients, runs a diversified international equity fund using index fund principles. It was able to beat the EAFE last year because the firm curbs excessive trading costs, which are especially high in international investing. But holdings in the fund are not rebalanced as frequently as holdings in a traditional index fund, said Steve Manus, vice president at American National Bank.

In addition, the fund doesn't hold stock in every country included in the EAFE. "Some are small and trading costs are high," Mr. Manus said. "They don't add much value."

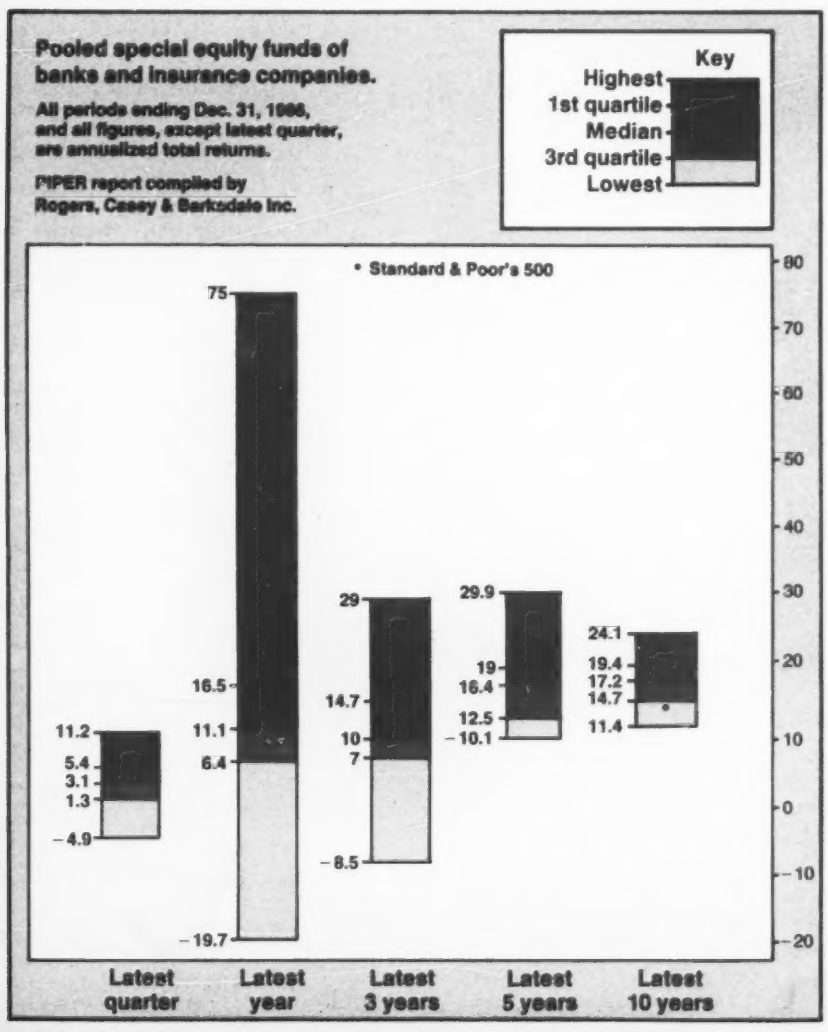
Bessemer Trust reduced its exposure to Japan in 1986, shifting instead to the European continent.

"We had a larger position (than the EAFE) in Italy and Spain and continued our emphasis on domestic companies in Japan. By the end of the year, we were taking profits in Japan and putting them into Hong Kong and Australia," said Jane N. Abitanta, assistant vice president.

The firm did not like the United Kingdom through most of 1986. But in the fourth quarter, with the country's strong consumer spending and weaker pound, Bessemer increased its weighting there.

"We're bullish on the Continent. We reduced the U.K. weighting through 1986 shifting emphasis to Belgium and Spain.

*Continued on page 24*



# Home-run plan scores

## Managers in small-cap stocks foul out

**By John Covaleski**

Finding "home-run" stocks and an aversion to small-capitalization stocks paid off for some special equity managers in the Pensions & Investments' Performance Evaluation Report, although most of the funds still lagged the index.

The "home run" strategy entails investing large portions of assets in a small number of stocks, which increases risk but also can substantially increase returns.

That strategy helped RepublicBank Dallas' special equity fund bring in a 75% return, leading 20 special equity funds that outperformed the Standard & Poor's 500 stock index in 1986.

The S&P returned 18.7% for the year, while the median return for the 90 special equity pooled funds of banks and insurance companies tracked by PIPER was 11.1%.

For the three years ended Dec. 31, RepublicBank again was the leader with a compound annual return of 29%. The S&P returned an annualized 18.5% for the period and the PIPER median was 10%.

The other top-performing special equity funds during 1986 were Manufacturers Hanover Trust Co.'s Supplemental Equity Fund, New York, 42.1%; Chase Manhattan Bank, New York, 31%; Security Pacific National Bank, Los Angeles, 28.6%; Trust Co. of the West, Los Angeles, 27.8%; First National Bank of Neenah, Wis., 27.1%; and National Bank of Detroit, 26.8%.

The top performers for the three years, in addition to RepublicBank, were First National Bank of Neenah, 23.8%; Citicorp's real estate stock fund, 23%; Citicorp's emerging health care fund, 22.7%; and Fidelity Management Trust, Boston, 22.1%.

Part of the reason for the poor overall performance by the special equity funds was attributed to the funds' invest in the stocks of smaller capitalization companies. Those stocks have fallen out of favor with investors.

Asked about the effect of small-cap stocks on special equity funds, Dale F. Wise, vice president and trust investment officer at Merchants National Bank of Allentown, Pa., said, "If I had to decide (on starting a new investment fund) today, it certainly wouldn't be a special equity fund."

Merchant National's fund returned 7.7% for the year.

The unpopularity of lower-cap stocks is well illustrated at Manufacturers Hanover where its supplemental equity fund, investing in intermediate-cap companies, returned 42.1% for the year and 11.2% for the quarter and its special equity fund, investing in small-cap companies, returned 10.6% and 5.6%, respectively.

But Thomas E. Larkin, managing director of Trust Co. of the West, said he believes small-cap stocks are strengthening because the buying public "is finally recognizing they're relatively cheap." He said TCW's special equity fund, which returned 27.8% for the year and 6.4% for the quarter, invests with both a small-cap and growth bias.

Other leaders in the quarter, following Manufacturers Hanover, were Society National Bank, Cleveland, whose Ohio regional equity fund returned 9.3%; Central Fidelity Bank, Richmond, Va., whose aggressive equity fund returned 8.6%; Michigan National Bank of Grand Rapids, 8.6%; and Irving Trust, New York's Special Fund II, 8.1%. The S&P returned 5.6% for the

# Sector . . .

*Continued from page 23*

We're leery of the profit outlook in more mature (European) economies," Ms. Abitanta said.

In early 1986, the firm had a 23% exposure to Japan, which had increased to 50% by June. Bessemer cut back to 39% in the fourth quarter.

"We still think Japanese protectionist pressures will result in further appreciation of the yen," she said, explaining why the firm continues to overweight domestic sectors like construction, retail, and health care sectors.

Marine Midland Bank's fund was successful because Wardley, the fund's manager, was accurate in its strong country plays.

"In 1986, the environment in Europe was a market selection environment vs. 1985 when all markets did well in Europe," said Deborah George, senior vice president at Wardley.

"Japan this year was very much a sector selection game," she added. "We were in exactly the right sectors — domestic consumer-oriented sectors. Those are the stocks that moved because individuals continued to pour money into those areas of the market."

The fund began 1986 heavily weighted in Europe. At the end of the year, European exposure had been pared to 50% with the remaining 50% in the Pacific Basin, Ms. George said.

Bullish on the United Kingdom, Wardley hopes to increase its exposure there to 24% by year end. In September, its U.K. holdings were 13%.

But it has reduced its exposure to the Spanish market to 4% from last year's 5% and its holdings in France to 8% from 11%. The fund has left the German and Italian markets, after having 11% and 9% in those markets, respectively.

It started 1986 with 26% invested in Japan, and ended with 39%. The firm's other Pacific Basin holdings include 5% in Australia, 4% in Singapore and 5% to 6% in Hong Kong.

IDS International, which manages $500 million for U.S. tax-exempt clients, has positioned itself to avoid countries damaged by strong local currencies. However, in the fourth quarter, it increased its exposure to Japan relative to other portfolio managers.

"At the moment we have 41% in Japan," said Mark Hayes, vice president and senior portfolio manager.

Like Wardley, IDS sees continued heavy domestic cash flow into the Japanese market, despite valuation problems perceived by other managers.

IDS also boosted its exposure to Hong Kong, Australia and Singapore in the fourth quarter. The assets came in part from German investments. IDS cut its weighting there to 6% to 7% from the fourth quarter's 17% to 18%.

"We wanted to get out of traditionally strong currency blocks — those parts which are export-oriented. In Germany, domestic

We Don't Follow The Pack. We Lead It.

When First Union formed the Capital Management Group as an investment management division, we knew we had to have a special breed of professional. Because pack followers just wouldn't be good enough. For us or for you.

And the Capital Management Group has successfully attracted top-caliber analysts and portfolio managers. Experienced individuals with seasoned judgment. Proven money managers who thrive in an atmosphere in which they are encouraged to work independently. Real professionals whose compensation is tied to the performance of their clients' portfolios.

To receive a copy of our investment management brochure and latest annual report, call Debbie Tate Corson at 704-371-5155. See for yourself who's way out in front of the pack. And why.

period and the median was 3.1%.

Ben Fischer, vice president and manager of the corporate asset management group at RepublicBank, attributes home-run thinking to much of the select equity fund's success.

"You could say we're swinging for the fences. To get a 75% return, you need a few home runs and we got the home runs," he said.

"Sure, you're at risk, but if you consistently pick stocks with the best characteristics, you'll end up doing better."

The fund managers follow a value investing approach and look primarily for low price-to-earnings ratios and high dividend yields.

Among the fund's 1986 home runs was **Galoob Lewis Toys Inc.**, which it acquired in late 1985 for 6⅝ and sold off in September at 16 (the buy and sell figures are adjusted for a 3-for-2 split that occurred while the stock was held). By the time it was sold, Galoob represented 22% of the fund's portfolio.

**Alaska Air Group Inc.** was another home run stock for RepublicBank. It invested 17% of its total assets in the stock when it bought at 16 and within four months sold it at 21.

Another home-run-hitting fund is National Bank of Detroit's Intrinsic Value Fund, which has $38 million in assets and limits itself to 40 stock choices.

"We don't want to dilute our successes with a lot of names," said Peter Zuger, vice president of special funds.

Part of the fund's approach is looking for companies that are undervalued because of "transitory problems," such as an operations difficulty that is in the process of being repaired, said Mr. Zuger.

For example, the fund acquired **Goodyear Tire & Rubber Co.** stock in early 1986 when it was selling in the low 30s. Investors then were concerned about problems with an oil pipeline the company was building between California and Texas. After the pipeline problems were repaired, the fund sold the stock in the high 40s, he said.

Also helping to drive up the price of Goodyear stock was a takeover attempt by a group led by Sir James Goldsmith.

But the home-run strategy can backfire, as it did for Merchants National in Allentown, which holds no more than 10 different stock names in its $1.2 million special equity fund.

Mr. Wise said among the largest losses was **Ryan Beck & Co.** The fund placed 8% of its assets in Ryan Beck when the stock was selling at 13, and then watched it drop to 8 by year's end.

The stock since has climbed back to 10.

Merchants National did have some winners, Mr. Wise noted. Among them was **Caremark**, a health services company that it bought around 12 and sold around 26.

Jeff Mills, senior vice president at Manufacturers Hanover and investor for its supplemental equity fund, which returned 42.1% in 1986, said the fund invests in stocks that are undervalued because the companies are undergoing corporate restructuring. He called them "story stocks."

Among its 1986 stock purchases was **Mead Corp.**, which was purchased at 35 but has recently climbed to 60; **Louisiana-Pacific Corp.**, which was purchased at 22 and since has climbed to 40, and **Weis Technologies**, which was bought at less than 12 and since has reached 22.

The supplemental fund, which has assets of $95 million, holds no more than 25 to 30 stocks, Mr. Mills said.

American Fletcher National Bank, Cleveland, whose Natural Resources Fund places heavy emphasis on high-yield stocks such as utilities, and Citicorp's Real Estate Stock Fund, which invests in the stocks of real estate related companies, also did well last year.

The American Fletcher fund returned 25.8% in 1986 and a compound annual 18.8% for the three years. The Citicorp fund returned 25.6% and an annualized 23% for the respective periods.

Fran Brazette, vice president/investment officer at American Fletcher, said much of the investment interest in high-yield stocks has come from investors who have pulled their money out of the bond market because of low interest rates.

Kenneth D. Statz, a vice president with Citicorp, said the real estate fund's advantage over traditional real estate investments is its liquidity. "We're not stuck in any one place, we can move to the hot markets, and someone's always making money in real estate," he said.

Mr. Statz said the pension funds investing in the $30 million fund consider investments there as part of their real estate allocations.

The fund invests in development companies, such as **Rouse Co.**, builders such as **Toll Brothers Inc.** and real estate investment trusts. Its REIT investments include **First Union Real Estate Investments, Pennsylvania**

*Continued from page 24*

sectors are not well represented in the market. You can't get money into some sectors."

Noting the effect of the strong yen, Mr. Hayes said, "We're out of export and into domestic (industries) where the real profits will be made" in Japan.

He likes services such as financials, as well as housing and construction stocks since the government is encouraging those two industries.

"Forty percent of corporate profits in the Japanese stock market will be in the financial sector in 1987," said Mr. Hayes.

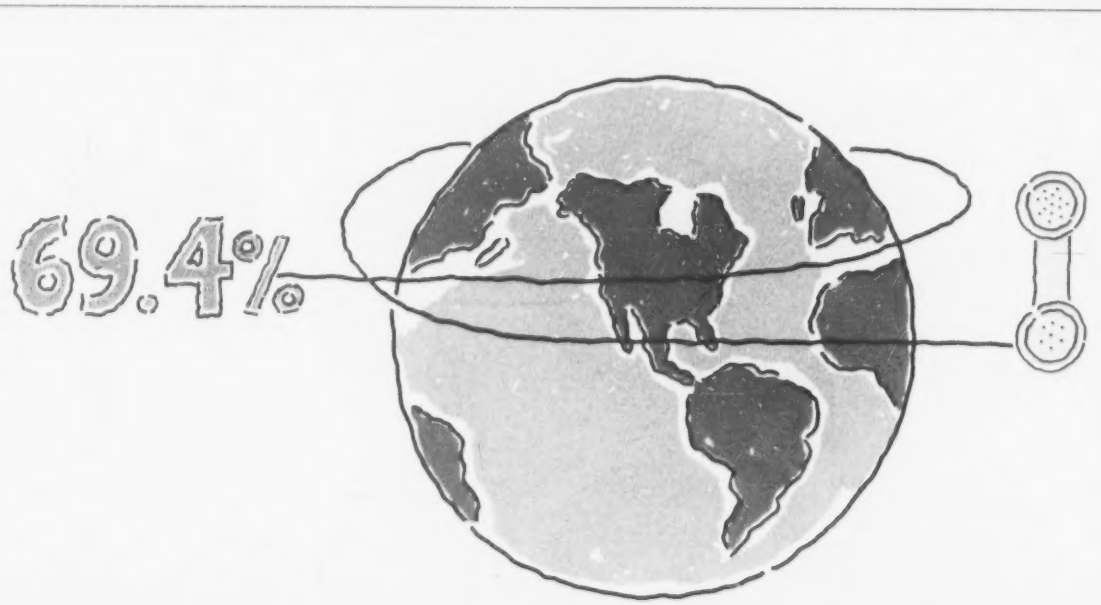
Provident Capital Management, which manages Provident National's $27 million low p/e fund, purchases data bases and computer screens to calculate median p/es for various markets. The p/e cutoff for a stock pick by the firm differs by country.

Provident's 8.9% leading fourth quarter performance marked a relative improvement over its respectable but sub-index one-year return of 64%.

"In Japan, (in 1986) the best performing sectors were large-capitalization sectors; p/e was not a criterion on whether a stock performed well or not," said Sandor Cseh, vice president-international investments.

"Over time, low p/e works but it doesn't work every year. In 1987, we're not likely to see that 1986 trend continue. On the other hand, you're not going to see a quick shift. The difference in p/e between small- and medium-cap stocks is not that big. You'll see good value in middle-cap stocks."

He expects good value in Japan this year, particularly for stocks with low p/es, good fundamentals and capitalizations of more than $1 billion. The firm will keep a minimum of 40% in Japan. It also has 5.75% — 2.5 times the EAFE index's weighting of 2.3% — in the Netherlands. ■



WE WENT AROUND THE WORLD TO GET A 69.4% RETURN.
OUR CLIENTS JUST WENT TO THEIR PHONES.

Centerre Trust launched its international equity fund over five years ago on the premise that diversifying beyond the U.S. market could lead to higher returns and lower risk.

We were right.

For the five year period ending December 31, 1986, the international fund had a 26.6% return as compared to 19.7% for the S&P 500.

And for one year, we not only significantly outpaced the S&P 500, we ranked in the top 11% of the WM Universe (formerly Wood-MacKenzie), which measures 108 portfolios invested in foreign equities with a total market value of $6.2 billion.

Morgan Grenfell Investment Services of London provides the international expertise.

Centerre Trust's management of the fund provides you with close communication.

If you think consistently higher returns and lower risk seem too good to be true, four minutes on the phone with our marketing director, Dick Hibbs, will change your mind.

**Real Estate Investment Trust and Western Investment Real Estate Trust.**

Citicorp's real estate fund also placed second in the five years ended Dec. 31, returning an annualized 27.9%.

Others in the top five were Security Pacific National Bank's Growth Fund G, with 29.9%; Chase Manhattan's intermediate-cap fund, 24%; Wachovia Bank, Winston-Salem, N.C., 23.3%; and Provident National Bank, Philadelphia, 23.1%. The S&P returned 19.9% and the median was 16.4%.

For the 10 years, the leaders were MTrust, Dallas, with a compound annual 24.1%; California First Bank, San Diego, 23.9%; Equitable Bank, Baltimore, 23.6%; and Bankers Trust Co., New York, 22.5%. The S&P was 13.9%, and the median was 17.2%. ■

BEYOND THE OBVIOUS

In the world of investments as well as in art, patterns can overlap one another. Confounding traditional boundaries.

At Concord Capital we look beyond the obvious for our investment insights. We aren't predisposed to growth stocks. Or small companies. Or asset value. We take a broader view of the equity market. We target opportunities that others miss.

The results are clearly visible. Over the last five years, we outperformed 87% of the managers in Frank Russell Company's universe of equity managers.

Concord Capital

San Mateo, CA • 94403 415/572-0400

# *Medians lag the indexes*

WAYNE, Pa. — The median stock and bond funds in the SEI universe traded blows with industry benchmarks for the quarter and the year ended Dec. 31, and usually came up short, according to a report by SEI Funds Evaluation Services.

The median return for the equity fund for the quarter was 4.3%, compared with the Standard & Poor's stock index return of 5.6%.

The median fund for the 12-month period also lagged the S&P, returning 16.7% vs. 18.7% for the index.

For longer periods, the median fund also got clobbered by the index, returning compound annualized returns of 15.9% and 18.1% for the three- and five-year periods, respectively. The S&P 500, for the same periods, returned an annualized 18.5% and 19.9%, respectively.

The equity fund universe represents 943 pension fund accounts holding a market value of $110.2 billion in assets. The bond fund universe represents 426 funds holding a market value of $46.2 billion. The balanced universe is comprised of 844 funds and has a market value of $96.7 billion.

Although the return of the median bond fund topped the indexes for the quarter, for longer periods the indexes won out again.

The median return for the quarter was 3.4%, vs. 3.3% for the Salomon Brothers Broad Investment Grade Bond Index and 3.1% for the Shearson Lehman Government/Corporate index.

For the year, the median fund returned 14.7% vs. Salomon BIG's 15.5% and Shearson Lehman's 15.6%.

For the three- and five-year periods, the median bond fund in SEI's universe returned compound annualized returns of 16% and 17.5%, respectively, vs. Salomon's annualized 17.5% and 18.2% and Shearson Lehman's 17.3% and 17.9%.

The median return for the equities-only portion of the SEI balanced fund was 5.2% for the quarter and 18.1% for the 12 months.

The median for the bonds-only portion of the balanced fund was 3.4% for the quarter and 14.9% for the year.

The total SEI balanced fund returned 4.2% and 15.6% for the quarter and one-year period. ■

# International

# Settlement problems tax funds

## Investors' opportunity and dollar costs, performance can suffer

By Marlene Givant

A number of institutions stopped investing in Italian stocks — missing last year's 65.6% rise in that market — because of problems in settling trades there. And pension fund executives are voicing similar settlement complaints about Spain, France, Switzerland and Japan.

Settlement problems not only can cut into opportunity costs, but also into actual dollar costs and investment performance.

Liquidating holdings in some markets is easier said than done.

Because settling trades in Italy can take as long as 12 months, the approximately $600 million Retirement System for Savings Institutions, New York; an unidentified international money manager of the $9 billion GTE Corp., Stamford, Conn., pension plan; SBC Portfolio Management International Inc., New York; and James Capel & Co., a London investment firm, have stopped investing there.

John Conlin, SBC's marketing director added, "Spain's market is like a Roach Motel — you check in but you don't check out.

"In international investing you have to know your market, know your returns will offset a market's (settlement) costs. You've got to plan entrances and exits."

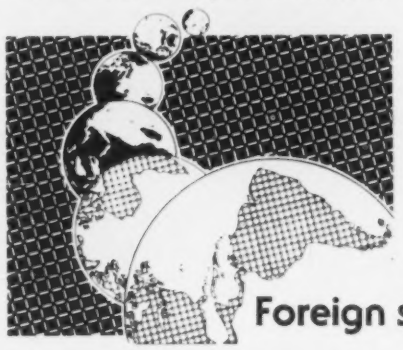
Fast settlement also can be a problem. The $6 billion internally managed Tennessee Consolidated Retirement System, Nashville, and the $52.3 billion Teachers Insurance and Annuity Association — College Retirement Equities Fund, New York, noted Japan's three-day settlement period is hard to handle.

The U.S. market's settlement period is five days.

The internally managed $1.1 billion Young Men's Christian Association Retirement Fund, New York, has had problems clearing some Swiss stocks and has experienced delays of about two weeks on the Continent in general.

A trade is settled when a custodian has paid a broker for securities bought or when a custodian delivers securities that have been sold and receives the proceeds of the sale. Clearing is the final exchange of securities for cash on delivery.

A failure of either party to receive or



Foreign securities

deliver securities by the effective settlement date is called a fail. Fails are common in international trades because for the most part, securities must be delivered physically. In the United States, trades are settled through the Depository Trust Co., a central automated clearing system.

The physical delivery leaves ample room for human error. "When there's a small error in a stock certificate, you can't pencil it out; it has to be reprocessed," noted one international broker.

A security does not reach a custodian until it has been registered in a pension fund's name. Because of the time involved in some countries, if a manager or fund decides to sell that security in the interim, the custodian can receive instructions to deliver shares that have not yet been delivered.

To combat settlement problems, the $6.6 billion United Nations Joint Staff Pension Fund, New York, makes sure it approves of — and keeps in touch with — the 20 local subcustodial banks chosen by its global custodian, Fiduciary Trust Co. of New York.

TIAA-CREF also regularly contacts its overseas subcustodians. In addition, it has adopted standardized numbers for stocks to avoid mix-ups in listing names of foreign securities.

Wardley Investment Services International, New York, has speeded settlement by holding stocks through its own settlement department instead of a custodial bank.

Among problems contributing to settlement woes is the overtaxing of foreign stock exchanges because of the explosion in global investment. U.S. investors usually trade securities frequently, while Europeans traditionally have bought and held securities.

Further muddling international settlement are differences in time zones, exchange rates, markets and regulations. Language differences complicate the communication of orders and exchange of information.

And with generally higher trading costs in overseas investing, settlement mix-ups can be more expensive to the broker, custodial bank or investment manager paying for a fail.

Differences in settlement periods among markets can cut into investment performance.

Often managers must keep cash reserves to cover trades even though they might want to remain fully invested. Large international managers often keep pools of cash in different countries for that purpose.

"Performance drops off when you can't get the money back from the stock you've sold in order to buy another. We are in such a competitive marketplace that to lose 50 to 60 basis points (by holding cash required for trades) could cost a manager an appointment. Settlement is the biggest problem facing international managers. What we have now is growing pains of an industry," said Mr. Conlin of SBC.

The investors who froze investments in or dropped out of the Italian market had varying explanations, with one underlying reason.

Late in 1985 the Retirement System for Savings Institutions, advised its international managers to hold Italian stocks they had but not to purchase any more securities in Italy.

"We're still taking that position," said Bill Dannecker, president and chief operating officer. "As I understood it, the Italian custodial bank, (Banco Commerciale d'Italia, Milan), was not able to track the securities we had. The securities hadn't been entered; we weren't able to confirm to our auditors that the securities were there."

The verification for transactions in late 1985 came only two months ago. "That leads us to believe the problem is not yet corrected," he said.

"I'm sure our international managers would have invested more in the Italian market, but we haven't tracked that closely the Italian market vs. others we were in. We don't know whether we gained or lost by that move but our man-

# Index managers get biggest slice

By Marlene Givant

As a large number of corporate and public funds plunged for the first time into overseas investing last year, two leading index fund managers reeled in about 30% of the roughly $4.9 billion in new international equity business in 1986, according to *Pensions & Investment Age*.

The top gainer, State Street Bank and Trust Co., Boston, added $1.12 billion in new business for the 11 months, ended Dec. 1, that were covered by the survey.

Wells Fargo Investment Advisors, San Francisco, another leading index player, ranked fourth with $310 million in new business for the period.

Even among active managers, a small number gained the bulk of the new business.

Warburg Investment Management International, London, and Schroder Capital Management International, New York, ranked second and third behind State Street in new international equity business, reporting $421 million and $407 million, respectively.

New business includes contributions from new U.S. tax-exempt clients and additional contributions from existing U.S. tax-exempt clients.

Other international equity managers ranked among the top 10 were: ABD International Management Corp., New York, $215 million; American Express Asset Management, London, $212 million; Arnhold & S. Bleichroeder International, New York, $210 million; Capital Guardian Trust Co., Los Angeles, $179 million; The Prudential Asset Management Group, Newark, N.J., $140 million; and IDS International Inc., Minneapolis, $118.5 million.

With its gain, State Street nearly doubled its tax-exempt assets under management. And as of Dec. 31, the firm had $3.3 billion in tax-exempt assets from U.S. and non-U.S. tax-exempt clients, according to Harry Sterling, vice president and director of marketing.

The firm, which began offering a Morgan Stanley Capital International Europe Australia Far East index fund in 1978, its first overseas index fund, has developed a base of 45 clients. A large number of new clients last year were public funds, he said.

"When interest in international indexing slackened off in the early 1980s, some firms dropped out," while State Street remained,

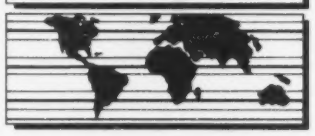
**International update**



## Global markets rise

NEW YORK — The dollar's January tumble boosted returns for dollar-denominated investors in Japan and offset the decline in West Germany's stock market.

With the global economy's slow steady growth, low and falling interest rates and excess liquidity, the World Index rose 11.6% and the Europe Australia Far East index grew 10.5% in January, according to the Morgan Stanley Capital International Perspective, which publishes the indexes.

Nine of the 19 national markets comprising the World Index soared to new highs during January. In local currency terms, Denmark rose 14.4%. Also, Mexico surged 25.4%, reversing its 1986 last place standing.

Other hefty returns were 13% for the United States; Japan, 11.8%; Spain, 10.9%; and Canada, 10.6%. The United Kingdom and Singapore/Malaysia indexes moved up 8.7% and 8.9%, respectively.

In local currency terms, stock markets dropped in Austria and Sweden by 11.2% and 12.5%, respectively.

The fall of the dollar against such currencies as the yen provided significant gains for dollar-denominated investors. In dollar terms, the Japanese market rose 16%, the Canadian market rose 13.9% and the Mexican and Danish markets rose 17.1% and 21.1%, respectively.

## Acquisition complete

LONDON — The newly formed Wardley Investment Services International Ltd. has acquired all the business of Wardley Marine International Investment Management, London.

Formerly a 50-50 partnership of Wardley Investment Services Ltd., Hong Kong, the acquiring firm's parent company, and Marine Midland Banks Inc., New York, Wardley Investment Services International will continue as investment adviser to the Marine Midland International Equity Fund, New York.

"The acquisition of the business provides us with a stronger foothold in the Western Hemisphere," said Thomas A. Veitch, the firm's managing director.

With the new arrangement, Wardley Investment Services International will manage $345 million for tax-exempt clients, including $315 million for non-U.S. tax-exempt clients and the $30 million in the Marine Midland fund.

The price of the acquisition was not disclosed.

*Continued on page 38*

# Get slice . . .

*Continued from page 37*

Mr. Sterling said.

"The product we've been providing is an international index fund primarily. When people are thinking about investing in an international index fund, they come to State Street. We have good people running it and good people marketing it."

The firm did not disclose the names of new clients for publication.

Second-ranked Warburg, which manages more than $915 million for tax-exempt clients, attributes its growth to top-quartile performance.

"I think from our point of view growth has reflected performance over the last few years," said John G. Townsend, director. "We're right at the top of the pack" vs. other money managers in the Wood Mackenzie Co. Inc., New York, universe for one-, three- and five-year periods.

"If you race around the country enough and knock on doors enough and you've got good (performance) numbers, you get new business," said Mr. Townsend.

The firm began the year with one person reporting to clients; it now has four reporting staff members. It also added seven portfolio managers, bringing the total management staff to 35.

**Most new international equity business**

| Company | $ mils. |
|---|---|
| State Street Bank, Boston | 1,120 |
| Warburg Invest. Mgmt., London | 421 |
| Schroder Capital Mgmt., New York | 407 |
| Wells Fargo Invest., San Francisco | 310 |
| ABD Mgmt., New York | 215 |
| American Express Asset Mgmt., New York | 212 |
| Arnhold and S. Bleichroeder, New York | 210 |
| Capital Guardian Trust, Los Angeles | 179 |
| Prudential Asset Mgmt. Group, Newark, N.J. | 140 |
| IDS, Minneapolis | 118.5 |

"We've been preparing for growth. We've seen our competitors grow and then have clients not be able to ring them up . . . a huge education job needs to be done — that's right and proper."

Keeping clients in the dark as to world market conditions and firm strategy can be dangerous.

"If you have a bad quarter, you don't have a leg to stand on . . . We let clients know what we're doing and why. We tell them what's going right and wrong."

Not much has gone wrong so far. The firm's composite international equity returns were 65.9% for the year, a compound annualized 37.1% for three years and an annualized 27.1% for the five years ended Dec. 31.

This compares with the EAFE index returns of 70% for one year, an annualized 42.2% for three years and an annualized 28.8% for five years.

Warburg's new clients include San Bernardino County Employees' Retirement Association, San Bernardino, Calif.; Massachusetts Pension Reserves Investment Trust, Boston; Dun & Bradstreet Corp., New York; and the Arizona State Retirement System, Phoenix.

Schroder, the third-ranked manager, added 12 new clients during the 11-month period.

Among them are PaineWebber Inc. pension plan, New York; Northeast Utilities Service Co., Hartford, Conn.; Houston Police Officers' Retirement System; and State of Hawaii Employees' Retirement System, Honolulu.

"We did so well last year because of consistency of personnel and good performance," said Sharon L. Haugh, first vice president.

The firm, which managed $1.7 billion in tax-exempt assets as of Dec. 31, had returns of 60.7% for the year, 35.9% for the three years and 29.1% for the five years ended the same date.

Wells Fargo, like State Street, benefited from indexing's surge in popularity last year.

"We're one of the leading indexers in the business. In 1986, there was lots of interest in indexing in general. People interested in international are also interested in indexing. We seem to be one of the logical choices," said Bob Haber, vice president.

Most of the new business was corporate accounts going international for the first time. "Indexing is a fairly inexpensive way of getting into that market," he said.

Two of the eight new clients gained last year were public funds, and the number is expected to increase in 1987. The public funds added were Baltimore County Employees' Retirement System and the Prince Georges County, Maryland, employee benefit fund. ■

# An International Quiz

## Do you use an international investment manager who...

- ☑ Ranks in the top decile of INTERNATIONAL EQUITY managers and has beaten EAFE by 5% a year.
- ☑ Ranks #1 in GLOBAL BONDS over the past 1, 2 and 3 years and has beaten the world bond index by 9% a year.
- ☑ Offers a GLOBAL CASH MANAGEMENT vehicle yielding over 13% a year.

*Continued from page 37*

Wardley Marine International Investment Management managed $155 million in total tax-exempt assets at the time it was acquired.

### *Stock buys healthy*

NEW YORK — Despite the fact U.S. investors sold a net $800 million in foreign stocks in the third quarter of 1986, the first three quarters' net purchases were a healthy $3.4 billion, according to a report by the Securities Industry Association.

Record net purchases of $4.2 billion in foreign stocks by mid-1986 were offset by the third quarter net sales, many of which were of Japanese stocks.

In the same period, gross activity hit $72.4 billion, 59% higher than 1985's annual record of $45.6 billion.

During 1986, U.S. investors had a love-hate affair with Japanese stocks. They followed their first quarter net purchases of $1.1 billion with net purchases of only $198 million in the second quarter and swung to net sales of $1.2 billion in the third quarter.

After a hefty gain of more than 20% in the first quarter, the Japanese stock market slowed in the second quarter. Although upward momentum resumed in the third quarter, the Japanese market was particularly turbulent in September.

Some of the third quarter's climb was prompted by expectations of interest rate cuts. When a reduction in Japanese rates did not follow a decrease in U.S. rates, the Japanese stock market sold off sharply, the report said.

U.S. investors took a cautious approach to European stocks in the third quarter. Net purchases plunged to $202 million from $1.3 billion in the second quarter.

Underlying the drop was a 92.6% cutback in net purchases of U.K. stocks to $55 million in the third quarter from $746 million in

## Leasing OK in spite of tax reform

**By Brad Rudin**

Predictions of tough times for the leasing industry in the aftermath of tax reform now appear overstated.

Reduced tax rates, longer depreciable lives and the end of the investment tax credit were expected to stunt the industry, which, according to government figures, had grown almost 19% between 1978 and 1984.

Lessors have emerged as major players in the equipment financing business despite legislative changes that have reduced the benefits of tax-oriented deals, said Mark S. Comora, president of Commercial Union Capital Corp., New York.

"Even though leasing may not make sense in as many places as before, leasing as a form of financing is so widely accepted that every good idea gets a very fair hearing."

Leasing in recent years has financed more capital investment than equity and debt offerings combined, according to figures compiled by the U.S. Department of Commerce and the American Association of Equipment Lessors, a trade group based in Arlington, Va.

Tax advantages will play a smaller role as lessors diversify into real estate leases, secured loans and operating leases, according to the Commerce Department's report.

*Continued on page 48*

# Mack rolls out $450 million TRUCS

**By Marci Baker**

ALLENTOWN, Pa. — Mack Trucks Inc. is revving up to launch the first public offering of securities backed by heavy duty truck receivables, saving in excess of 200 basis points on its cost of debt.

Mack Trucks Receivables Corp. filed a shelf registration with the Securities and Exchange Commission in late February to issue $450 million of asset-backed notes. The company is a special purpose subsidiary of Mack Financial Corp., which, in turn, is a subsidiary of Mack Truck.

Mack's first offering likely will be about $250 million and is expected to hit the market in late March, said Joseph McDevitt, treasurer of Mack Financial and Mack Trucks Receivables.

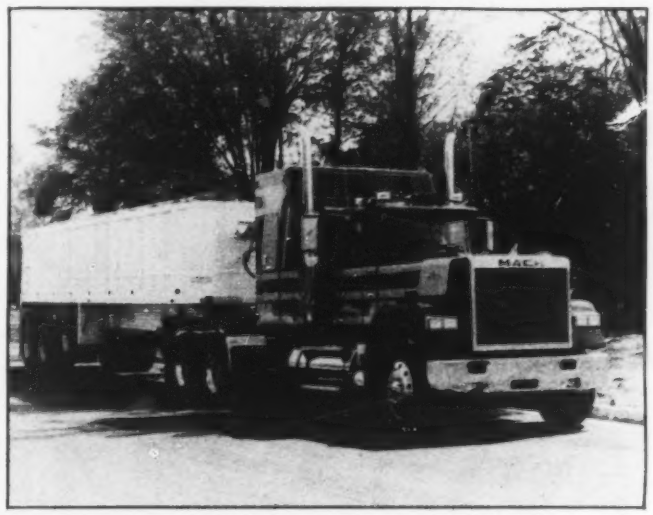
Like previous asset-backed deals, such as CARs, automobile receivables, and CARDs, securities backed by credit card receivables, Mack's will carry its own signature: TRUCS, or truck receivables underlying certificates.

The deal, which Shearson Lehman Brothers Inc., New York, and Mack have worked on since last summer, will be Shearson's first major public receivables transaction. Mack Truck Receivables will use the proceeds to buy the heavy duty truck loans from Mack Financial, which, in turn, will use the money to pay down debt. "We should significantly reduce our cost of debt with the issue," Mr. McDevitt said.

The company now carries about $360 million in intermediate and long-term debt on its books, with an average interest rate of 10.2%. "We were quite happy with that rate for a long time, but now it's over current market rates," he said.

Unlike most other receivables transactions, which typically are structured as pass-through certificates, the Mack Truck offering will be structured as secured debt via a pay-through format.

Pass-through instruments represent interests in the underlying collateral, with principal and interest of that collateral being passed through to holders of the certificates.



*Mack Trucks, Inc., manufacturer of this Super-Liner II, filed a shelf registration to issue $450 million of receivable-backed securities, a first for the trucking industry.*

Under the TRUCS structure, Mack Financial will sell the heavy duty truck receivables to that subsidiary, which, in turn will issue debt against them.

One advantage of that structure is it eliminates the prepayment uncertainty surrounding the underlying receivables, said Thomas Richardson, senior vice president at Shearson.

Early prepayment risk imposes an element of uncertainty on the cash flows and final maturity with the pass-through structure. With the secured debt structure, investors will get an instrument with a known stream of payments and a known final maturity.

"One reason we've taken the approach is because there's not much familiarity with the performance characteristics of prepayments on heavy duty trucks," Mr. Richardson said. By eliminating prepayment uncertainty, Shearson expects to gain better pricing on the deal.

The loans backing the TRUCS deal will be fixed-rate, fixed-term retail loans of Mack Financial. Prepayment rates on heavy duty truck financings tend to be low. "In the last rapid rate decline, there wasn't any dramatic change in the performance of prepayments," noted Mr. Richardson.

The lower prepayment rates are mainly because of the nature of truck financing and the life of the vehicle.

Heavy duty truck loans generally are made to operators of one- to five-truck fleets. The terms of the financings generally carry five-year lives and rapid payment streams, while Mack trucks are on the road for an average of 10 to 12 years. By the time an operator may think it worthwhile to refinance, he's paid off much of the original loan and is building up equity in the truck.

If the market responds well to the initial TRUCS transaction, Mack Truck plans to do at least two more deals of $100 million each.

A letter of credit from a highly rated bank will likely provide additional credit enhancement for the TRUCS transaction. Whether the deal will require overcollateralization will be a function of negotiations with the bank providing the letter of credit.

The transaction will be treated as an intercompany sale of assets. The receivables will continue to show up on Mack Truck's consolidated balance sheet. The equity or residuals associated with the deal will continue to be owned by Mack Financial. ■

# Leasing OK . . .

*Continued from page 47*

Although the report said loss of tax advantages would shrink the leasing industry's growth to 2.1% between 1986 and 1987, Commerce Department economist M. Bruce McAdam now believes that figure should be doubled because of the industry's strength so far this year.

That growth rate still is almost half of the 8% increase in leasing volume predicted for this year by the American Association of Equipment Lessors.

The alternative minimum tax, which discourages some companies from owning equipment, has invigorated the leasing industry more than expected, Mr. McAdam said.

Still, the big-ticket end of the industry has been slow to feel the beneficial effects of the alternative minimum tax, said Bruce E. Walenczyk, a vice president in the lease financing group at Kidder Peabody & Co., New York.

Until corporate executives "get their arms around the whole situation, they just are not going to be spending money on new capital acquisitions," he said.

Middle-market lessors — those that lease equipment with a purchase value of less than $5 million — offered a brighter view. "We are busier than we have ever been," said W. Randall Dietrich, manager of capital funding at Republic Financial Corp., Denver, which is a middle-market and big-ticket lessor.

"We've had companies that in the past have not leased and have now said that it makes sense for them to lease because they are going to be in the AMT . . . so their lease vs. buy decision, which before said buy, now says lease," Mr. Dietrich said.

Equipment ownership generates accelerated depreciation deductions that are treated as tax preference items, which are added to a company's ordinary income to determine federal tax liabilities under the alternative minimum tax.

Under the Tax Reform Act of 1986, corporations must pay the AMT if that tax bill is higher than the one produced under the calculations for the ordinary tax.

The amount of the preference item from depreciation is set by calculating the difference between the current tax law's double-declining balance method and the 150% declining-balance method used in prior legislation, according to a brochure published by General Electric Credit Corp., Wilton, Conn.

In addition, half of the excess of book income over tax income will be a tax preference. The less generous depreciation typically used in calculating book income creates more exposure to the alternative minimum tax.

Treasurers have become more involved in the decision to lease because of the AMT, said Robert A. Bardagy, executive vice president for marketing at Comdisco Inc., Rosemont, Ill.

Before tax reform, Comdisco — a lessor of high technology equipment — dealt mostly with the customer's computer specialists, Mr. Bardagy said. "Suddenly we have a situation now where our thrust is to the CFO as opposed to the technical side of the house."

Concern about the AMT takes second place as a reason for leasing in the airline industry, said Douglas B. Swets, treasurer of Western Air Lines Inc., Los Angeles. The company leases slightly less than 50% of its planes.

Western leases to get tax advantages it can't obtain by buying equipment, Mr. Swets said, explaining the company's net operating loss carryforwards prevent it from using tax benefits as rapidly as some lessors. Those tax benefits are passed through to Western in the form of lower rental rates.

A recent $121 million leveraged lease of six Boeing 737 aircraft, in which Westinghouse Credit Corp., Pittsburgh, put up a third of the amount as equity, resulted in a financing cost of 6.5%, rather than the 10% that Western would otherwise pay if they'd bought the aircraft, Mr. Swets said.

The debt in this 1986 deal came from U.S. life insurance companies and European banks, Mr. Swets said.

In a leveraged lease, the lender provides debt on a non-recourse basis to the lessor, which provides the equity layer of the transaction. The lessor's equity interest in the asset provides access to tax benefits of ownership that are passed through to the lessee in

## Takeover debt grows

NEW YORK — In spite of some predictions to the contrary, the Federal Reserve Board's crackdown last year on junk bond-financed takeovers did little to curb high-yield financing or the takeover phenomena.

According to a report by Morgan Stanley & Co., New York, acquisition-related issuance continued to be a major contributor to new high-yield debt issuance in 1986, but non-acquisition-related financing made up most of the activity.

Dollar volume for acquisition-related junk bond deals more than doubled to $14.7 billion from $6.2 billion in 1985.

At the same time, high-yield issuance unrelated to acquisitions closed the year at $21.4 billion, up from $10.1 billion in 1985.

While volume surged on an absolute basis, Morgan reported acquisition-related deals constituted only a slightly greater portion of overall junk bond issuance last year than it did in 1985 — 40.7% vs. 38.2%.

Financings outside the takeover arena made up 59.3% of total volume, down slightly from 61.8%.

The Fed ruled in December 1985 that margin rules would apply to certain kinds of high-yield financed takeovers. Effective Jan. 1, 1986, junk bonds issued by an acquirer's shell company could not be used to finance more than 50% of a takeover transaction.

Although some at the time predicted the ruling would be a severe blow to the high-yield bond business, others, including Morgan Stanley, noted the Fed granted enough exceptions to allow other means of launching acquisitions with the help of high-yield bonds.

The Morgan report supports the firm's 1985 contention that the Fed ruling would not slow the pace of junk bond financing or merger activity.

"Takeovers are not the whole story in the high-yield bond market," said Martin Fridson, Morgan's manager of credit research.

Likewise, high-yield bonds are not the whole story in the takeover arena.

The report points out acquisition-related issues made up less than 10% of the $188.6 billion of total merger and acquisition volume last year. Only a portion of the $14.7 billion high-yield volume stemmed from hostile transactions, it stated, dispelling the view that junk bonds in the hands of hostile suitors have been responsible for merger mania.

"Whether mergers are good or bad, from a public policy standpoint, speculative-grade bonds do not deserve the bulk of the credit or blame for the boom," the report asserts.

Morgan Stanley's numbers do not include low-rated debt created from large recapitalization efforts by such companies as Colt Industries Inc. or Owens-Corning Fiberglas Corp. Since such transactions may have been motivated by a desire to avoid hostile bids that could have been financed through the high-yield market, the report concedes low-rated bonds probably played a greater role in corporate restructuring last year than in prior years.

But acquisition activities by highly rated companies also continued to be important in the trend toward industrial consolidation and increased corporate leverage.

More than half of the multibillion-dollar deals in 1986 stemmed

*Continued on page 50*

## Leasing . . .

*Continued from page 48*

the form of lower rental rates.

Mr. Swets said 100% financing ranked as another important reason for leasing, and off-balance sheet financing offers a third — but less important — reason.

Leveraged leasing gives companies with weak credit ratings the ability to gain access to large amounts of capital if they have strong cash flows, said Donald R. Kendall, a managing director in the leasing unit at Drexel Burnham Lambert Inc., New York.

The Alamito Co., Tucson, Ariz., a supplier of wholesale power, last year refinanced a $707 million electric power generating station with a leveraged lease in which Drexel served as the agent. Lenders were willing to finance the $513 million debt portion of the transaction because Alamito has a contract to sell power to the Tucson Electric Power Co., Mr. Kendall said.

Leasing enabled The Williams Cos., Tulsa, Okla., to build a $100 million fiber-optic cable from Fairfax, Kan., to Salt Lake City. Because Williams had below-investment grade credit ratings, "the public markets did not offer an attractive alternative," said William J. La Croix, Williams' treasurer.

The January 1987 leveraged lease and sale-leaseback of the fiber-optic system, in which The CIT Group, New York, provided the equity financing, provided a boost to Williams because the company had the use of the $100 million after the sale and leaseback, said Stephen C. Rosenberger, a project manager with The CIT Group. The CIT Group is the leasing subsidiary of Manufacturers Hanover Corp., New York.

Typically, in a sale-leaseback, the lessor can use the asset's tax benefits more efficiently than the end user, which benefits from rental rates that reflect the tax advantages enjoyed by the lessor.

Lessors can add value irrespective of the tax characteristics of a deal because they know the equipment being financed better than other sources of capital, said Craig H. Raddatz, a vice president in the equipment financing group at Heller Financial Inc., Chicago. "We can turn the credit around faster than somebody who doesn't understand the industry."

He also cited long financing terms and variable payment streams as other advantages of leasing. ■

# Sasco trio begins to see payoff

FAIRFIELD, Conn. — Leaving the security of IBM Corp. to strike out on their own has worked out well for three of the partners of Sasco Capital Inc., which now has three clients and more than $600 million under management, and three more clients about to sign contracts.

The three — Lee Garcia, Daniel Leary and Bruce Bottomley — who ran IBM's internally managed equity assets, and Daniel Sullivan, who departed Rollert & Sullivan Inc., launched their own money management firm just over a year ago.

Armed with IBM of Stamford, Conn., as its first client, Sasco was able to avoid many of the growing pains a start-up normally experiences. The foursome also shared the same investment philosophy and worked well together.

But mastering the mysteries of marketing was another challenge altogether.

"Getting our names and faces out there — the cold calls and the initial personal contacts — it was an adjustment," Mr. Leary said.

Added Mr. Garcia, "Learning how to approach the marketplace was the most difficult part of the startup. We were used to being portfolio managers, not marketers."

Today the firm has more than $600 million under management, and three accounts, including IBM and General Dynamics Corp., St. Louis. Three more corporate accounts will be on board before the end of the second quarter, Mr. Garcia said, but he declined to identify them.

"We're well ahead of where we thought we'd be after one year," he added.

Sasco holds about 30 companies in its portfolio. Its dynamic value philosophy is centered on spotting companies in transition, financial underachievers that can benefit from redeployment of assets. Unlike traditional value managers, Sasco isn't interested in price-earnings ratios and quarterly earnings.

"We are more event driven," Mr. Garcia said.

The firm uses proprietary software developed at IBM that screens companies with sizable investment gaps. And the partners spend a good deal of time talking with senior management.

In 1986, Sasco somewhat underperformed the Standard & Poor's 500 stock index and so far this year, it is modestly trailing the index. Less than 40% of Sasco's portfolio comprises S&P companies. "Ours is very much a non-market portfolio," Mr. Garcia said. ■

# Proxy solicitation under fire as votes near

**By Marcia Parker**

As corporations attempt to influence the voting of their pension funds' proxies, the proxy solicitation process is coming under increasing attack, with some calling the system unfair and at least one independent expert saying it is subject to "outright fraud."

The upcoming spring proxy season will place the system under growing pressure, as record numbers of proxy sponsors are placing myriad resolutions before corporations on issues ranging from poison-pill withdrawals to South Africa divestiture.

"The biggest issue facing corporate America today is who has the ultimate right to vote these shares, who has the right to influence those votes, and how much influence is allowable," said Don Carter, president of The Carter Organization, a leading proxy solicitation firm in New York.

"In the past, there was a lack of knowledge and indifference about voting procedures and policies. Now that executives understand how important the vote is, they are asking questions."

Shareholders increasingly are challenging a system they claim is misunderstood, ill-defined and sometimes stacked against them. Many are calling for key changes, including secret ballots, indepen-

# High hedging costs surprise funds

**By Trudy Ring**

Portfolio insurance cost some pension funds 50 to 100 basis points more than expected in 1986, largely because of the stock market's volatility, especially during the second half of the year.

Experts in the field said cost projections usually are 200 to 300 basis points a year; the actual cost in 1986 likely was 50 to 100 basis points higher.

Portfolio insurance, also called dynamic hedging, generally involves the short sale of stock index futures to create a synthetic put option on a large portfolio. The goal is to hold portfolio losses to a pre-specified level in a down market; the cost is underperformance in an up market.

"The costs were well in line with expectations during the first half (of 1986), but higher than expected in the second half, due to the choppy, trendless market," said C.F. Lemons, director-trusteed benefit funds at Manville Corp., Denver.

This led Manville to modify its dynamic hedging program, which it uses on its entire $756 million pension fund, Mr. Lemons said. The program had aimed for a 0 minimum rate of return over a three-year time horizon; Manville changed this to a −5% return.

Several pension funds use a negative minimum return in portfolio insurance programs. This doesn't mean they are likely to end up with a negative return, but lowering the minimum return means they lower the cost of hedging because they won't have to put hedges on the fund as frequently.

"There's a trade-off in terms of cost," Mr. Lemons acknowledged.

Nevertheless, he said, dynamic hedging has been worthwhile for the Manville fund, which was one of the technique's earliest users, in 1984. The program has allowed the fund to lock in substantial gains and cut contributions, he said.

The $350 million Minneapolis Teachers' Retirement Fund, one of the few public funds using dynamic hedging, also saw costs exceed expectations in 1986. "It did cost us a little more than projected, because of the increased volatility," said Harry Adams, executive secretary and investment manager. "It was not a dramatic increase."

The fund, which started using dynamic hedging last spring, will make a routine review of the program at the end of its first year. "I would think that we would continue some form of portfolio insurance during the coming year," Mr. Adams said. "I would hope my trustees would see the advantages of some sort of program."

The fund applies the hedge to $185 million in equities, which was its entire equity allocation at the time the program started. The equity allocation now is up to $250 million, the result of market gain and increased allocation made possible by the hedge, Mr. Adams said.

Even though the price tag on dynamic hedging for the $200 million equity portfolio of the $300 million San Diego Gas & Electric Co. pension fund also was higher than expected, it's too early to judge the

# Japanese lifting U.S. investment

**By Joel Chernoff**

Japanese investors, long major buyers of U.S. Treasury securities, are expected to pour between $15 billion and $20 billion into the U.S. stock market this year, but a few observers think the total could be $200 billion to $300 billion within three years.

Even a $15 billion to $20 billion influx would far exceed last year's $6 billion in net new purchases by Japanese institutional and retail investors, and is a far cry from the $1 billion invested in 1985.

The infusion from the Japanese institutions is expected to help prolong the current bull market.

"In terms of equities, I predict an avalanche. If you want to stay on top of things, you better get a pair of skis," said Robert Brusca, senior vice president and chief economist for Nikko Securities Co. International, New York.

Mr. Brusca predicted new money invested in U.S. stocks by the Japanese in 1987 would total $52 billion to $60 billion, buoyed by Japan's huge trade surplus, loosened restrictions permitting Japanese institutions to invest more abroad, a more stable exchange rate with the dollar and relatively cheap values for U.S. stocks.

He said the total easily could top $200 billion during the next three years and might well reach $300 billion — or roughly 10% of the current capitalization of the U.S. stock market.

Similarly, William Jacques, who recently left Batterymarch Financial Management, Boston, to become a partner in newly formed Martingale Asset Management, Boston, estimated Japanese investors will put $150 billion to $200 billion in U.S. stocks during the next two years.

*Major Tokyo managers are among Japanese investors expected to put $15 billion in U.S. stocks.*

Cheaper U.S. stocks are attractive to the Japanese, of course. In addition, Mr. Jacques said, the Japanese government has quietly signaled to investors there to buy U.S. stocks in an amount equal to the $200 billion they now hold in U.S. fixed-income securities.

The Japanese have four times the savings rate of Americans, with an economy half as big, he said.

# ESOP may be key in Harper & Row takeover

By Brad Rudin

Harper & Row Publishers Inc.'s continued existence as an independent book publisher could rest in the hands of its employees, who hold 29% of the company's stock in an employee stock ownership plan.

"While they don't control the company, they do have a large block of stock," said J. Kendrick Noble, an analyst at PaineWebber Inc., New York. "Therefore they could be a swing factor in the vote."

Harcourt Brace Jovanovich Inc., an Orlando, Fla.-based book publisher, earlier this month proposed to pay Harper & Row stockholders $50 cash a share for the New York company. Another offer, $34 a share, came from private investor Theodore Cross. Harper & Row stock had been trading at $25 at the time of Mr. Cross' offer in early March. The stock closed at $52 March 17.

Harper & Row's board of directors retained Kidder, Peabody & Co., New York, as its financial adviser and appointed a committee of independent directors to study options.

The chairman of the committee, Winthrop Knolton, said in a prepared statement the company will consider all options, "including continuation of our existing business plans, possible business combinations, sales of stock, restructuring and the sale of all or part of the company."

Harper & Row postponed indefinitely an April 2 vote on the creation of two classes of stock shares with different voting rights.

If Harper & Row employees vote for a takeover, they stand to gain as stockholders. But acquisition of the company could jeopardize their job security.

Harper & Row's unionized workers have not made their views known to District 65 of the United Auto Workers, New York, which represents 50% of the company's non-managerial employees, said Patricia Slesarchik, a union official.

The plan document governing the 6-year-old ESOP gives employees the right to vote and tender their own shares, said Edward A. Miller, Harper & Row's general counsel.

Manufacturers Hanover Trust Co., New York, serves as the ESOP's trustee.

What role Manufacturers Hanover would take in a vote or tender offer remains unclear.

"The bank still has the responsibility, and the bank will have to decide whether what the participants want to do is proper," said a lawyer who asked not to be named.

The Employee Retirement Income Security Act of 1974 gives the trustee the responsibility to manage and dispose of ESOP plan assets unless an investment manager is appointed to control the assets or unless a named fiduciary assumes the responsibility, the lawyer said.

"There's a big debate whether you can give something like an investment decision to plan participants," said Thomas A. Jorgensen, a lawyer with Calfee, Halter & Griswold, Cleveland.

David M. Binns, executive director of the Employee Stock Ownership Association, a Washington-based trade group, said he opposes any formula that would give trustees final say over ESOP plan assets.

A rule giving final authority to the trustee would deprive both employees and managers of their ability to shape the company's future, he said, adding this result would be most anomalous when the ESOP owned most of the company's shares. ■

# *University fund tops bull market*

By Steve Hemmerick

BERKELEY, Calif. — The $9 billion University of California pension fund is using active in-house equity management to beat the same roaring bull market that has left many others behind.

While the thinly staffed UC investment team bettered the Standard & Poor's 500 stock index in 1986 by just less than four percentage points, some equity money managers are complaining it's tough to beat a bull market and will make it up when the market turns bearish.

Those managers have a lot of catching up to do. According to the Trust Universe Comparison Service, a performance evaluation service with 43 member banks and insurance companies, about 64% of the active equity managers couldn't beat the S&P 500 in 1986, although they were paid millions of dollars in fees to do so.

The UC pension fund's equity portfolio returned 22.4% in calendar 1986, while the S&P returned 18.7%. The median TUCS portfolio returned 16.8%.

For the two years ended Dec. 31, the UC equity portfolio returned a compound annual 27.1% vs. 25.1% for the S&P; the TUCS median was 22.4%. And for three years, UC returned an annualized 19.1% vs. 18.5% for the S&P and 16% for the TUCS median.

For the first two months of 1987, the retirement system had an equity return of 18% vs. 16.5% for the S&P 500.

Because of its performance, the retirement system logged a gain of $1.2 billion in assets, to $9.2 billion at the end of February from $8 billion at the end of 1986.

And the endowment fund, which has slightly better return figures than the retirement fund in the past three years, jumped to $980 million at the end of February from $860 million at the end of 1986.

The money is managed actively because "we don't believe in" passive management, said Patricia A. Small, associate treasurer for the university.

She said there are too many "me-too" second-rate companies in the S&P. The retirement system wants to invest in companies that are "dynamic growers in the economy," she said.

When salaries for the 11 professionals on the team that runs both the pension and the endowment fund are subtracted, UC's performance still shines, she said.

Ms. Small said she couldn't estimate how much money the system saves by using university-employed workers instead of external active money managers: Fees for external managers vary too markedly. She did say the entire investment office budget for about 30 people, including secretaries, is about $2 million a year.

On a balanced-fund basis, the retirement system is at or near the top of the 10,000-portfolio universe of SEI Funds Evaluation, Wayne, Pa.

For the year ended Dec. 31, the retirement system returned 23.2% for total fund performance, while the top quartile breakpoint in the SEI balanced universe was 18.1% and the median was 15.6%.

For two years, the retirement fund returned a compound an-

*Clothing Workers union members protest a financing agreement that affects their Reeves pension plan.*

# Termination draws union ire

By Trudy Ring

The Amalgamated Clothing and Textile Workers Union is fighting the proposed termination of Reeves Brothers Inc.'s pension plans, whose excess assets will be used to pay down debt incurred by Schick Inc. in its acquisition of Reeves last year.

The union is launching a campaign against the nine banks that financed Darien, Conn.-based Schick's acquisition of Reeves, Spartanburg, S.C. The situation also is likely to put overfunded plan terminations under more scrutiny by Congress; a Reeves worker is scheduled to testify at a joint meeting of House and Senate subcommittees March 24.

The loan agreement between the nine banks and Schick states that upon receipt of any surplus from termination of Reeves' salaried or hourly pension plans, Schick will use up to $20 million of that surplus as a loan payment. The document also says Schick and Reeves agreed to seek termination of the plans as soon as possible.

Schick has filed with the Pension Benefit Guaranty Corp. for termination of the salaried plan, but not for the hourly plan. Union officials said they believe the loan agreement mandates termination of both plans.

The union and the Virginia AFL-CIO began the campaign with a demonstration March 10 at Sovran Bank, Richmond, Va. Demonstrations and meetings with officials at other banks are planned, said Bill Patterson, national field director for the union.

# Groups to fight SEC ruling on ads

By Chuck Paustian

Members of the investment management community intend to fight the Securities and Exchange Commission staff's decision to require performance figures in advertisements to reflect management fees and other costs paid by clients.

Both the Investment Counsel Association of America, New York, and the Investment Company Institute, Washington, plan to seek further guidance on, and possible alteration of, the SEC staff's position.

The staff's views were promulgated in a no-action letter sent to Clover Capital Management Inc., Pittsford, N.Y., at the end of 1986.

In an important policy switch, the division of investment management staff said it no longer would take the position that the use of a model portfolio or actual results in an advertisement is necessarily fraudulent.

In approving Clover's use of model portfolio returns, the staff took the opportunity to give broader guidance on performance measurement because "of the significant degree of interest in this issue." The SEC had promised to give such guidance since early 1986.

The letter said performance figures used in advertisements, including such items as marketing brochures and possibly data sent to consultants, would be prohibited if, among other things, they include "model or actual results that do not reflect the deduction of advisory fees, brokerage or other commissions, and any other expenses that a client would have paid or actually paid."

An SEC official, who asked not to be identified, said the staff may recommend formal changes to the advertising rule after a comprehensive review.

While agreeing with most of the letter's content, executives of investment management organizations took exception to the provision regarding management fees and other costs.

These executives contend performance data net of fees and other costs would not be meaningful because the fees vary not only among firms, but also frequently within a particular firm.

In addition, they said the other costs paid by the client, such as custodian fees, are not known by the adviser and are subject to negotiation.

"We think the key to proper presentation of performance is full disclosure of how the numbers are computed," said Keith J. Rudolf, legal counsel for Stein Roe & Farnham, Chicago, and chairman of the legal and regulatory committee of the ICAA.

"We are also seeking additional interpretive information because (the staff's decision) is contrary to the types of investment advisory performance numbers that have been shown historically," said Robert L. Bunnen Jr., assistant general counsel for the Investment Company Institute.

Mr. Rudolf said one possible solution would be to allow managers to continue presenting performance figures before fees as long as that fact is clearly disclosed.

Both Messrs. Rudolf and Bunnen declined further comment until their organizations' formal requests are filed with the SEC.

The SEC official said any proposals submitted to the SEC staff would be reviewed.

The official added, however, one of the staff's concerns is that exclusion of advisory fees from performance figures during an extended period of time would have a compounding effect during the later years. A footnote may not adequately cover that matter, he said.

If enforced, the SEC staff's position would alter dramatically the way managers present performance numbers; most don't include management fees and other costs in their performance data.

Ronald D. Peyton, president of Callan Associates Inc., San Francisco, noted 70% of the managers in his firm's universe present performance data before fees.

"It's a real hodgepodge and you always have to ask," he said.

Roger C. Bransford, partner in the Atlanta office of D.L. Eager Associates, Louisville, Ky., said for years he and other individuals have been calling for a self-policing effort by managers and consultants.

It was the pension community's inability to agree on a standard method of performance measurement that resulted in the SEC staff's position, he said.

"My attitude toward it is frankly, this is a chipping away of the freedom and flexibility that the investment managers have," he said, adding those days of flexibility are numbered.

"This in and of itself is significant but I think the greater significance may rest in the fact it may be a precursor for even tougher regulation that's coming down."

Despite its onerous implications, "In some ways it's also better to have a known out on the table so you can go ahead and deal with it," he said.

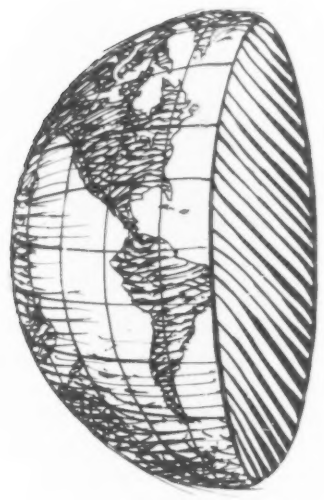
Other pension industry executives said while they appreciate what the SEC staff is trying to accomplish, they believe the issue is being addressed improperly.

Said a top executive at a large investment management firm, who asked not to be identified: "To us, nobody is confused because the plan sponsor who gets the results knows it's before fees and they know what the fees are."

He said his firm would comply with any SEC decision.

"This is the age-old problem in comparing performance results: What is it net of?" said James Knupp, principal of Ennis, Knupp & Associates Inc., a consulting firm in Chicago.

Mr. Knupp said he agreed management fees and other costs are an issue, but "it's trivial compared to the true quality of the basic underlying data." ■



**Nobody has ever kept an eye on more than half the ball. Until now.**

Did you know that the U.S. represents only half of the world bond market? At MFS, we've known it for years. We keep our eyes on both halves of the ball. That's why we can offer you the whole world.

We invest in U.S. *and* international bonds and currencies. That means we can capitalize on interest rate movements and relative currency strengths throughout the world.

So get the complete picture. Talk with us. With five years' global fixed-income experience, a 62-year record and $10 billion under management, we can make a world of difference. For more information, please contact William H. Lynch.

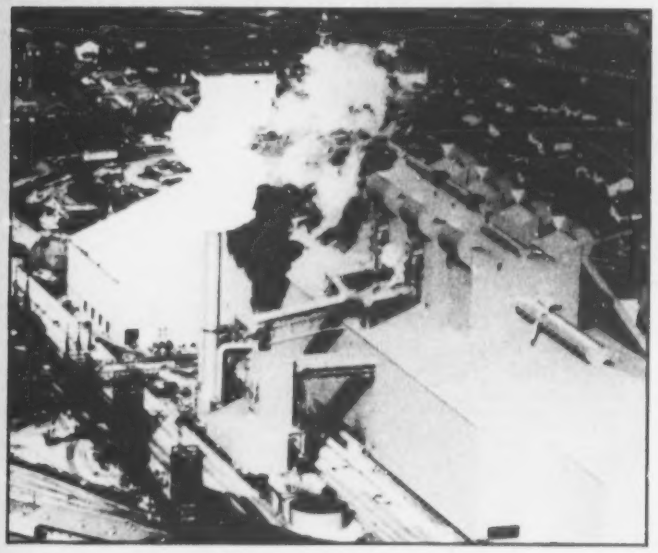
## Corrections & clarifications

• In her testimony before the Senate Finance Committee, Kathleen Utgoff, executive director of the **Pension Benefit Guaranty Corp.**, said the agency's proposed risk-related premium would not increase premiums for two-thirds of plans and almost 60% of participants in single-employer plans. Her testimony was reported incorrectly in the March 9 issue.

• **Aetna Life & Casualty** was inadvertently omitted from the March 9 list of top gainers in portfolio insurance business for 1986. Aetna would have placed first, with $12.3 billion.

• A March 9 Pensions & Investments' Performance Evaluation Report international article misidentified the parent company of **Provident Capital Management Inc.**, Philadelphia. It is Provident National Bank, Philadelphia.

# ESOPs



*Weirton Steel Co., which operates this plant in Weirton, W. Va., established an employee stock ownership plan in 1983 that experts now regard as a true success story.*

## Dan River, Weirton: A tale of two ESOPs

**By Fred Williams**

Dan River Inc. and Weirton Steel Co., both troubled companies in 1983, turned to employee stock ownership plans to put themselves back on even keels.

But while both companies survived and hundreds of jobs were preserved, only Weirton is regarded by industry observers as a true ESOP success story.

Employee benefit experts are troubled by several aspects of the Danville, Va.-based Dan River plan, among them the motivation of management in establishing it.

Controversy surrounded the formation in 1983 of leveraged ESOPs to buy the two companies from their previous owners so the companies could continue operating as they had before the buy-outs. The inception and evolution of these two ESOPs represent the poles between which other ESOPs fall.

The Weirton Steel, Weirton, W. Va., plan embodies all that traditional ESOP supporters believe is possible through employee ownership; the establishment of the Dan River plan is viewed by these same traditionalists as a financial maneuver — favoring entrenched management — to fight a hostile takeover attempt.

Weirton employees voted to purchase the steel unit from National Steel Corp. in fall 1983 for $194.2 million. Terms of the agreement, which was proposed by the employees, called for employees to take a 20% pay cut and became one of the important test cases for employee ownership on a large scale.

Dan River's ESOP was formed to acquire 70% of the company's stock as the culmination of a nine-month battle to ward off a hostile takeover attempt by Carl Icahn, who had acquired 30% of Dan River stock. The ESOP was proposed, and is controlled, by management.

The company terminated its defined benefit pension plan and used the $16 million surplus to make the first payment on a $150 million bank loan to purchase stock.

A look at the ESOPs now shows both have worked in the way they were intended, but are viewed much differently by employee benefit specialists.

Both companies operate in troubled industries. Both were only marginally profitable in 1983

## Searching for a hero

### Long's successor facing tougher struggle

**By Richard Gillespie**

WASHINGTON — Advocates of employee stock ownership plans are seeking a new champion to carry on what likely will be a much tougher struggle to preserve ESOP legislation.

The retirement of Sen. Russell Long, D-La., the prime architect of ESOP laws, coincides with closer examination of the use of ESOPs by tax attorneys and Wall Street to snag advantages for corporations.

"ESOPs have been manipulated in so many ways that are harmful to their beneficiaries that if they do have a future, that is a mixed blessing," said Mike Gordon, a Washington pension attorney.

Said Marc Zimmerman, vice president at the ESOP Consulting Group, Washington: "Now that Russell Long is gone, people may start taking potshots at ESOPs, especially given the favorable tax situation they are in."

The Tax Reform Act, which includes ESOP provisions engineered by Sen. Long, was generally favorable to ESOPs. Repeal of the tax credit for contributions to payroll-based ESOPs was the only adverse change.

But in response to alleged manipulation of ESOPs, legislation and regulatory activity has been proposed. Among the proposals:

- The Reagan administration, through its competitiveness package, wants to eliminate ESOP-based floor-offset plans (in which benefits promised in a defined benefit plan are offset by a defined contribution plan) by reducing to 10% the amount of employer securities that can be held in such plans.
- In the Senate, Sen. Lloyd Bentsen, D-Texas, chairman of the Senate Finance Committee, has introduced a bill proposing curtailment of the provision that allows an estate to exclude from taxation 50% of the sale of the stock of an ESOP.

*The retirement of Sen. Russell Long, D-La., could mean tough times ahead for ESOPs.*

Rep. Dan Rostenkowski, D-Ill., chairman of the House Ways and Means Committee, and Rep. John J. Duncan, R-Tenn., ranking minority member on the committee, have launched an identical bill in the House.

- The Labor Department's ERISA Advisory Council, a panel of experts which advises the secretary of labor on employee benefits policy, recently set up a special ESOP working group, which will investigate the use of ESOPs in leveraged buy-outs.

The working group will hold public hearings the first week in April.

- ESOPs also will be affected by a new regulation the Labor Department plans to issue by summer regarding Section 318 — the adequate consideration rule — of the Employee Retirement Income Security Act.

ESOPs are exempt from the 10% restriction on investment in employer securities under the adequate consideration test contained in Section 318.

In addition, Roger Thomas, counsel to the House Select Committee on Aging, said there is concern among the staff on various committees regarding all ESOP-related provisions of the 1986 Tax Reform Act, and in particular over the 50% exclusion of estate sales to ESOPs and the exclusion from the 10% excise tax for surplus rollovers into ESOPs.

The Labor Department has other regulatory projects on its drawing board that also might affect ESOPs, said David Walker,

*Continued on page 20*

## *Plans are financing tools*

**By Brad Rudin**

Tax benefits, liquidity and the promise of improved productivity have combined to give employee stock ownership plans a secure foothold as a corporate finance technique.

Although recognized by the Employee Retirement Income Security Act as a tax-qualified retirement plan, ESOPs are typically not viewed as such.

"We feel very strongly that ESOPs are not pension plans," said Corey Rosen, executive director of the National Center for Employee Ownership, Oakland, Calif.

"ESOPs should not be confused with retirement plans," added Frank M. McArdle, education and communications director of the Employee Benefit Research Institute, Washington. "Having all your eggs in one basket is risky," he said.

Replacement of a defined benefit plan with an ESOP to aid a financially distressed company — as was the case with Raymond International, Houston — points up the risk because this kind of transaction leaves employees with shares in a troubled company.

Raymond terminated its defined benefit plan in 1983, using the $30 million reversion to help finance a $219 million leveraged buy-out of the company by the ESOP.

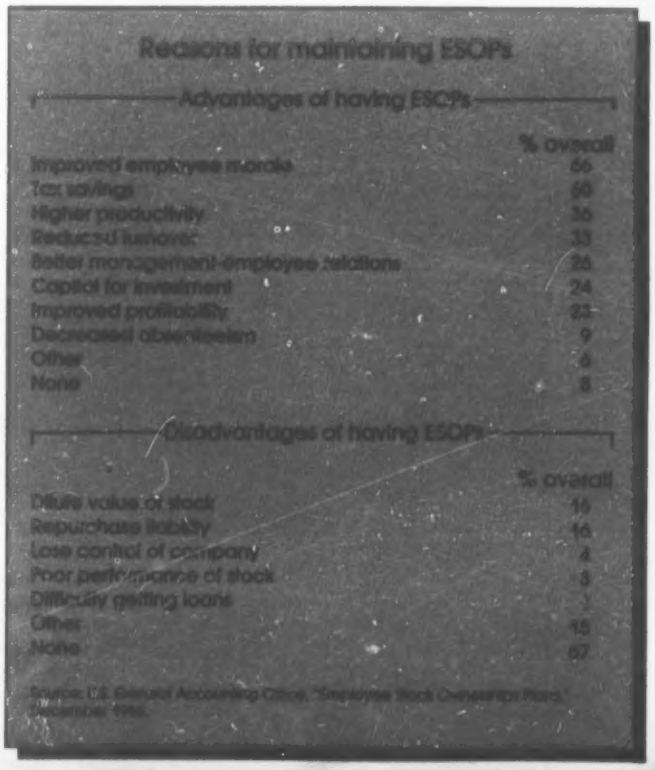
But an ESOP can also be used successfully to reduce corporate debt, improve employee morale and insulate a company from a hostile takeover.

This was the case with Ashland Oil Inc, Ashland, Ky. Ashland Oil earlier this month recaptured about $200 million in surplus pension assets.

"We believe this was the most efficient use of an ESOP," said William R. Seaton, Ashland's vice chairman.

The transaction gives the company $200 million that is exempt from income tax and the special excise tax on defined benefit plan reversions. Recognition of this

*Continued on page 18*



# Plans are tool . . .

*Continued from page 15*

gain will reduce the company's debt-to-equity ratio to 35% from 27%, Mr. Seaton said.

Ashland also regards the "very distinct and thorough feeling of company ownership" among employees as a major advantage, Mr. Seaton said.

Another plus, he said, is having 20% of the company's shares held by employees who might be more resistant to corporate raiders.

In April 1986, the energy company purchased 5.35 million newly issued shares of Ashland common stock to establish a $255 million ESOP that would form a floor-offset arrangement with the existing defined benefit plan.

Under floor-offset plans, if the value of a participant's account in a defined contribution plan fails to provide the minimum promised benefit, the defined benefit plan provides the balance.

Despite success stories like Ashland's, some concerns surround ESOP use, including stock repurchase liability, administrative costs, dilution of the value of existing stock and the prospect of employee interference with management.

Stock repurchase liability will emerge as the biggest ESOP issue of the 1990s, said Paul J. Much, a principal at the Los Angeles office of Houlihan, Lokey, Howard & Zukin, a valuation advisory firm. This liability arises because retirees have the right to put their shares back to the employer at current fair market value.

Independent appraisers are retained to set the price of shares issued by privately held companies, while the stock market price determines the liability of publicly owned companies.

Employers with ESOPs "have this time bomb (stock repurchase liability) ticking away that if they haven't planned for could force them into selling the company or force them into having to take the company public," Mr. Much said.

In addition, even the most ardent supporters of ESOPs acknowledge employee ownership is only a small part of the work force.

About 8,000 employers cover 8 million employees, approximately 7% of the work force, with benefits provided by ESOPs.

Interest in ESOPs has increased, in part, because of the benefits created by the Tax Reform Act of 1986, said Donald C. Weeden, a managing director at Morgan Stanley & Co., New York. "There are a lot more companies today looking at the use of ESOPs than there were two years ago."

ESOPs emerged from the Tax Reform Act of 1986 with most of the old tax advantages for corporations intact and some new ones added to the list.

Among the tax provisions having the most impact was the widening of the 3-year-old 50% exclusion on interest earned from loans to ESOPs by allowing the exclusion to apply to loans made to the employer if stock equal in value to the loan is transferred to the plan within 30 days.

The provision allowing lenders to exclude from their income 50% of the interest earned on ESOP loans has made employee ownership a more familiar concept to loan officers. "So now it's less likely that when a company goes to a bank and says, 'I want to do some ESOP financing,' that it gets met with a blank stare," said David Binns, executive director of The Employee Stock Ownership Association, a Washington research and lobbying group.

By granting the exclusion, Congress enabled lenders to provide below-market rate loans to ESOPs and the sponsoring employer.

"We're seeing a lot of activity, especially in the ability to use excess pension assets in an ESOP," said William E. Mattingly, a partner in the Chicago law firm of Katten, Muchin, Zavis, Pearl, Greenberger & Galler.

Tax-free transfers of surplus pension plan assets to an ESOP can improve cash flow if that money is used to reduce payments to a defined contribution plan, he said.

Interest in employee stock ownership also is sustained by the tax code's favorable treatment of leveraged ESOPs.

In a leveraged ESOP, borrowed funds are used to buy employer stock for the trust. In a nonleveraged ESOP, the employer uses its own funds to purchase the stock.

Shares acquired by a leveraged ESOP are held in a suspense account, which may be used as collateral for the loan. Shares are allocated to plan participants as the loan is paid off.

*Corey Rosen's organization feels ESOPs cannot be regarded as pension plans.*

*David Binns of the Employee Stock Ownership Association says banks know about ESOPs.*

The employer's cost of borrowing is reduced in a leveraged ESOP, which accounts for about a third of employee ownership plans, because the funds used to repay the debt are deductible from pre-tax corporate income.

The 15% contribution limit for profit-sharing and stock bonus plans doesn't apply to leveraged ESOPs, which are allowed to make tax-deductible contributions of up to 25% of the covered payroll to make principal repayments. All contributions for interest payment are tax deductible.

In nonleveraged ESOPs, employers benefit because their stock contributions are tax deductible up to 25% of the covered payroll although no cash payments are made. As a result, after-tax cash flow can increase.

ESOPs also are considered a valuable corporate finance tool because of their role in leveraged buy-outs.

But Department of Labor concerns about the equity proposed to be allocated to the ESOP of Scott & Fetzer Co., Westlake, Ohio, have put a cloud over ESOPs in leveraged buy-outs.

Under the terms of the proposed Scott & Fetzer buy-out, the ESOP would have received a 41% equity stake in the company even though its $182 million tax-sheltered loan represented more than the cash invested by other investors.

Although the Labor Depart-

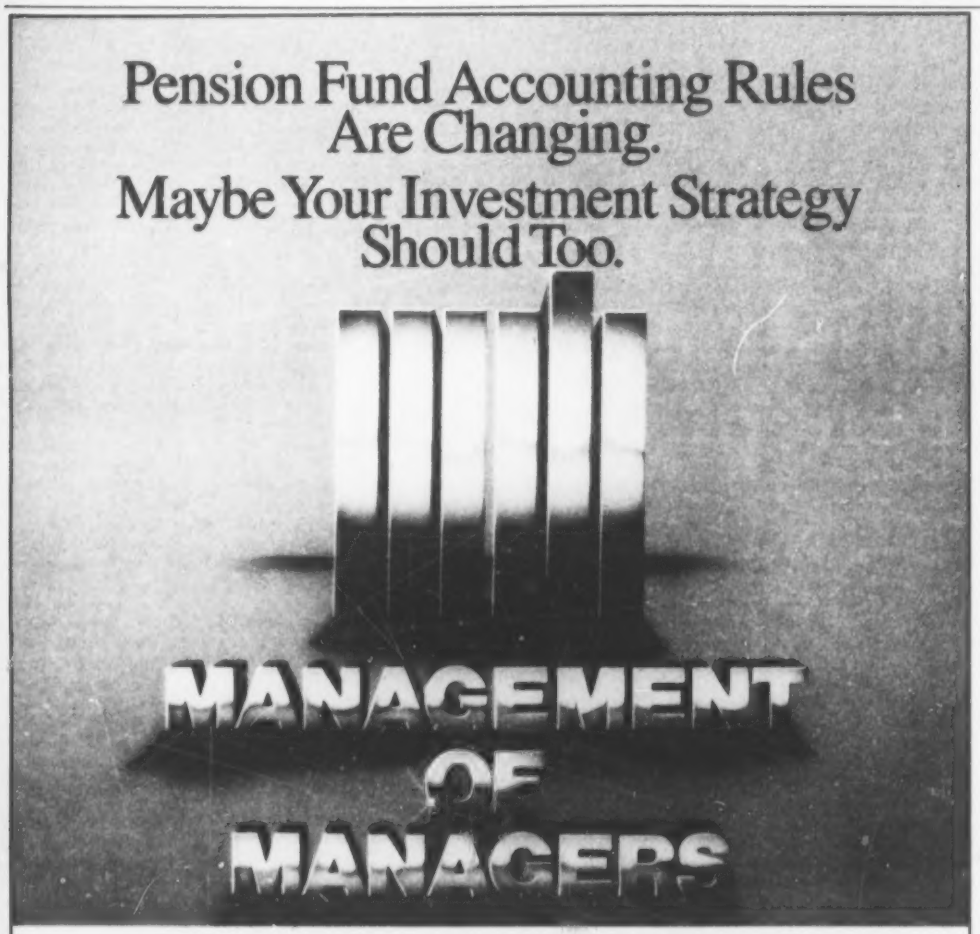
Pension Fund Accounting Rules Are Changing.
Maybe Your Investment Strategy Should Too.



If you've been re-evaluating your pension fund investment strategy, you're not alone.

Some of America's most successful companies are now taking a second look at their pension strategies in light of recent regulatory developments. And turning to Management Of Managers: a new performance-driven investment option.

Management Of Managers is a multi-manager investment program developed by the asset management consulting specialists of Evaluation Associates Investment Management Company.

This state-of-the-art investment alternative gives you easy access to the investment expertise and strategic thinking of some of America's top-performing investment managers, and at the same time, offers instant portfolio diversification—and a new degree of executive convenience.

Our objective: maximum investment performance with reduced volatility. And a minimum investment of your time.

If the investment objective of your pension fund is consistent, superior, long-term performance—with reduced risk—you should look into Management Of Managers.

For more information, please call Phillip Maisano, Vice President, at **1-914-697-8773.** Or write to him at MONY, 4 Manhattanville Road, Purchase, NY 10577.

MANAGEMENT OF MANAGERS
Performance Made Simple.

deputy assistant secretary of the Department of Labor, such as pass-through voting rights, corporate governance and takeover matters.

Mr. Thomas said pass-through voting "gets back to who owns the corporation, to what extent participants own the corporation through their holdings in ESOP arrangements."

"With a leveraged buy-out, the bank advancing the funds may hold a substantial interest in voting those shares until the loan amounts are paid off, so employees only get a graduated ownership based on the repayment of those amounts."

Regarding takeovers, he said, "ESOPs have been used offensively and defensively." For example, at Bluebell Inc., Greensboro, N.C., various classes of stock were issued to management and participants, with fewer voting rights issued to participants.

"Under the terms," said Mr. Thomas, "Bluebell's management would have profited handsomely from appreciation of the stock or its sale, or more so than the rank-and-file.

At Harper & Row Publishers Inc., New York, he said, "the company purchased the shares from a principal stockholder and placed them in an ESOP, effectively for the purpose of taking them out of the open market so they would not be available to a potential takeover candidate."

Rep. William Clay, D-Mo., chairman of the Labor-Management Relations Subcommittee of the House Education and Labor Committee, recently expressed concern that ESOPs are "sometimes put together in ways that are harmful to their members' interests," a subcommittee spokesman said.

"Frequently, it is the employees who come out on the short end. In some instances, they lose whatever pension security they might have had," he said.

Although no clear lines have been drawn in the Senate, Sen. Bill Bradley, D-N.J., has called for a repeal of the estate tax provision in the Tax Reform Act.

In the House, Fortney H. "Pete" Stark, D-Calif., has been identified as an opponent of ESOPs.

The Employee Stock Ownership Association, Washington, a 1,000-member lobby group, referred in a recent newsletter to such opponents as an "ill wind blowing through the nation's capital."

On the other side are those willing to fill the shoes of Sen. Long. While there are many eligible candidates, none would compare himself to Sen. Long in either stature or commitment.

"You cannot minimize the loss of someone like Sen. Long. His influence was rare even among powerful senators," said David Binns, executive director of the Employee Stock Ownership Association.

"Having lost a champion of that magnitude it would be difficult to say we were in as good a position as in the past," he said.

Among the emerging leaders are:

- Sen. Spark M. Matsunaga, D-Hawaii, a member of the Senate Finance Committee who considers Sen. Long to be his mentor both philosophically and politically and who considers the ESOP legislation to be among Sen. Long's greatest achievements.
- Sen. Max Baucus, D-Mont., who sponsored the provision in the 1986 Tax Reform Act that enables companies to avoid payment on the 10% excise tax on asset reversions by rolling the surplus into an ESOP.

Sen. Long sponsored the other provisions.

- Sen. John D. Rockefeller IV, D-W. Va., who as governor of West Virginia introduced legislation to help make the buy-out of Weirton Steel possible — the largest employee-owned company in America and considered one of the most successful ESOPs.
- Sen. Bob Packwood, R-Ore., former chairman of the Senate Finance Committee, who called ESOPs the "bulwark of capitalism" during a debate on the 1986 Tax Reform Act.

Others, such as Sens. Paul Simon D-Ill., Jim Sasser D-Tenn., and Albert Gore Jr. D-Tenn., do not serve on the Senate Finance Committee but have still demonstrated their support to the idea of broadening employee ownership. On the House Ways and Means Committee, Reps. Beryl F. Anthony Jr., D-Ark., and Charles Rangel, D-N.Y., have been big ESOP supporters.

The ESOP constituency has grown to an estimated 8,000 plans covering 8 million workers in 1986 from about 1,600 plans covering 248,000 employees in 1975, according to statistics provided by the National Center for Employee Ownership, Oakland, Calif. The center also reported that in 1985, 550 firms adopted ESOPs and 800,000 employees became participants.

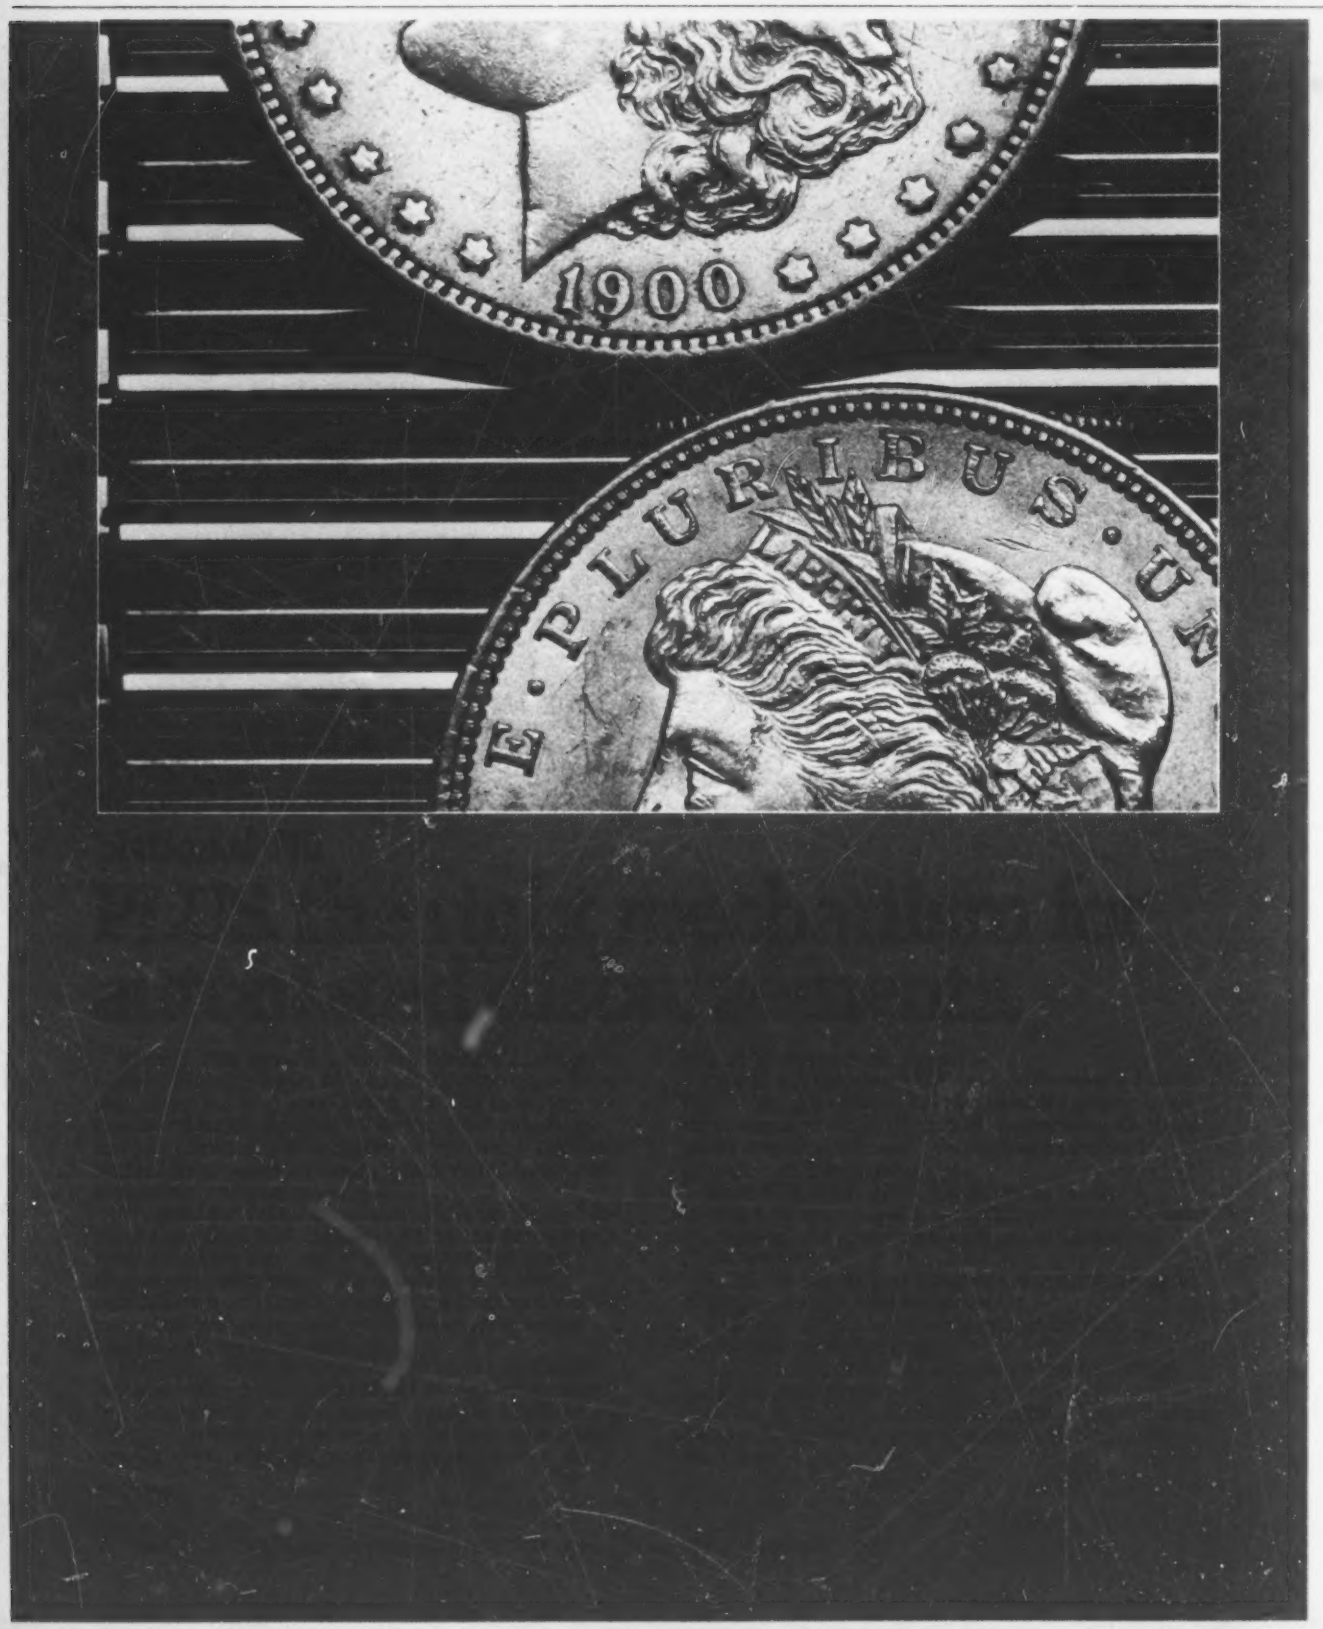
Mr. Zimmerman explained, "There was strong growth after the 1984 act (DEFRA), but the 1986 act really gave ESOPs a big boost, so you can expect that growth to continue and accelerate."

In other developments aiding the growth of ESOPs, Mr. Binns pointed to the increasing role of mid-size and regional banks in financing.

Sam Wessinger, communications director at the Employee Stock Ownership Association, explained: "Banks lost most of their opportunities for tax-free interest income with the 1986 Tax Reform Act. I don't know how aware banks are that ESOPs are all that is left when it comes to tax-free income."

Mr. Binns also said ESOPs, which were typically the mechanism by which privately held and small firms were passed along by their founders to employees, have drawn the interest of big business.

He cited the use of ESOPs by such companies as Ashland Oil Inc., Ashland, Ky.; Enron Corp. Inc., Houston; Unocal Corp., Los Angeles; Lowe's Cos. Inc., North Wilkesboro, N.C.; E-Systems Inc., Dallas; and MCI Communications Corp., Washington. ■



## Plans are . . .

*Continued from page 18*

ment eventually wrote a "no action letter" in the proposed Scott & Fetzer deal, the department's concerns still inhibit ESOP leveraged buy-outs.

The Labor Department is set to issue guidelines on equity allocation within six months.

At issue in the controversy over the role of ESOPs in leveraged buy-outs is whether the retirement plan gets enough equity stake for the note that it invests in the transaction.

ESOPs bring tax benefits to a leveraged buy-out, but the value of these deductions hinges on whether the new company becomes a taxpayer.

Tax breaks are overrated as a force driving employee stock ownership, said Mr. Rosen.

"What we've concluded is that what is going to drive ESOP growth or not drive it is the perception among management that it is a way to improve corporate performance," Mr. Rosen said. "If that doesn't take hold, ESOPs will always be a minor footnote." ■

# Cash Management

## Divide to conquer

### Splitting cash portfolios boosts returns

By Chuck Paustian

Some treasury executives are leading their corporate cash investment strategy out of the inertia of typical low-risk, short-term money market portfolios.

The idea, which doesn't depend on hiring outside money managers, is to divide corporate cash — typically handled as one lump portfolio — into different risk classes without jeopardizing operating capital.

Corporations can protect essential operating cash by keeping it in low-risk portfolios, while significantly boosting overall returns by investing the rest more aggressively.

John J. Murray, director-short-term investments and borrowing at Amoco Corp., Chicago, said company executives set aside a "very small percentage" of the overall portfolio of marketable securities for more aggressive investing.

"We have earned four times as much as we would have earned had we not set up this portfolio," he said.

Mr. Murray said recent returns weren't available, but noted the company's investment portfolio, which uses both longer-term and riskier instruments, has generated substantial returns. "By substantial I mean in some years, 40%, 30% and 20%," he said. Those returns were generated when money market instruments also were yielding much higher returns than they are today.

At the end of 1985, Amoco had a total of $834 million in marketable securities, including the aggressive portfolio.

A smaller company, Carl Karcher Enterprises, Anaheim, Calif., also segments its investible corporate cash, using four money managers to invest in preferred stocks.

"We've given guidelines as to how much, on a percentage basis, we can put into preferreds as opposed to (certificates of deposit) or overnight money," said Rick Roth, manager-cash planning at Carl Karcher. The company has about $50 million in cash and marketable securities.

Utilities, many of which have accumulated vast pools of cash, have started taking more aggressive approaches to their investments.

El Paso Electric Co., El Paso, Texas, is investing about $500 million in takeover arbitrage, leveraged dividend capture programs and other aggressive investments (*see related story at right*).

The Iowa-Illinois Gas and Electric Co., Davenport, Iowa, plans to set up an investment management subsidiary to run about $50 million in longer-term instruments, including leases. Iowa-Illinois has applied to the Illinois Commerce Commission for permission to start the subsidiary.

While money market rates hover around 5% and 6%, pretax returns in the upper teens can be obtained from less traditional investments such as preferred or common stocks.

Some financial service firms are preparing to provide the services to managers of corporate cash.

A research project conducted by Treasury Strategies Inc., Chicago, for Merrill Lynch Capital Markets, New York, found the 3,000 largest industrial companies had between $300 billion and $400 billion in short-term cash at the end of 1985, the latest available data.

"That's all investible, but some of it should only be overnight," said Anthony J. Carfang, a principal at Treasury Strategies. "We believe, of the $400 billion, about 10% should be turning over on a daily basis.

"Another $80 billion to $120 billion should fall into the short-term category, which is up to about six months. As much as $250 billion could go out longer than that," Mr. Carfang said.

Robert H. Arnold, director of corporate market strategy and development at Merrill Lynch, said although some companies segment cash positions to invest in riskier assets and more are hiring outside investment managers, the typical short-term approach is still the rule.

Because corporate cash represents the future of a company, cash managers generally prefer investments that offer little or no risk.

Typical corporate cash investments would include commercial paper, certificates of deposit, bankers acceptances and Treasury bills. While these instruments are fine for operating capital, cash managers tend to overuse them.

Mr. Arnold said he talked with executives of one company who had been investing several hundred million dollars in overnight repurchase agreements. But he believes cash managers are becoming more aware of the disadvantages of such programs.

"I think it's an appreciation that to get the kind of returns they're looking for, they have to broaden their perspectives in terms of the kinds of vehicles they're using and not treating their assets as a common pool," Mr. Arnold said.

He said treasury executives need to establish a link between their cash and overall corporate strategy to determine what portion of assets can be allocated to strategies aimed at boosting overall performance.

One way to maximize performance is to match the time horizons of the investment strategy to when the company will need that cash.

Investments with longer time horizons could offer similar quality and liquidity characteristics as more traditional cash investments, but carry higher returns because of the added interest rate risk.

Marvin Pember, senior vice president-finance at Oklahoma Healthcare Corp., Oklahoma City, said, because some of the corporate cash wasn't needed immediately to operate the hospital management company, that money was allocated to a long-term balanced strategy to be managed by Schaenen Wood & Associates Inc., New York.

"There's a restriction that (the assets) be 50% equity and 50% fixed income," said Mr. Pember, who declined to release the amount of assets given to Schaenen Wood.

"One of the major things we do when we get involved with a company is find out what their time horizon is," said Robert B. Maehr, director of mar-

*State laws are forcing Maxicare, which operates HMOs such as this one, to segregate some cash management operations.*

## Banking costs rise for HMOs

By Barry B. Burr

Corporations operating health maintenance organizations are burdened with higher banking costs and lower investment returns because of state laws requiring HMOs to segregate some cash management operations.

State regulations generally call for the companies to provide collection and disbursement services or depositories for investment securities or some combination within the few states with the rules.

As a result, HMOs are having to decentralize cash management activities for certain states, so banking costs are higher than if they were consolidated among a few banks. Cash managers also complain that segregating cash management activities by state inhibits investment of idle cash, hurting returns.

"There is a movement toward total segregation of receipts, disbursements and investments" by each state in which HMOs operate, said Thomas Nannini, cash manager, Humana Inc., Louisville.

He said the rules are forcing the company "to segregate the whole cash flow process, from receipts to disbursements and investments — where the money's coming from, where it's going and how much cash you have."

A recently adopted rule in Georgia, for example, requires HMOs operating there to use an in-state bank for disbursements of claims paid to residents and collections of premiums paid by residents as well as holding securities of investments made with cash generated from the operations within the states.

As a result, Mr. Nannini said, Humana is using Citizens & Southern National Bank, Atlanta, for disbursements and collections for its Humana Health Plan Inc. unit.

In addition, Humana has to have separate lockboxes, as required by state regulation, in Florida and Nevada. In Florida, it also uses Citizens & Southern, which processes collections there. In Nevada, it uses First Interstate Bank, Las Vegas.

The states are the only ones of the 22 in which Humana operates HMOs with such regulations, Mr. Nannini said.

With its non-regulated HMOs, he said Humana uses Wachovia Bank & Trust Co., Winston-Salem, N.C., a unit of First Wachovia Corp., for disbursements, and a number of other banks for lockboxes.

Maxicare Health Plans Inc., a Los Angeles-based holding company that operates HMOs in about a dozen states, faces similar rules.

Jack Christensen, treasurer, said Maxicare recently opened separate disbursement accounts for its HMOs in Georgia

# Proxy battles heating up

## More chief executives join letter-writing campaign

**By Marcia Parker**

NEW YORK — The fight for pension fund proxy votes has heated up, with dozens of corporate chief executives writing letters asking their counterparts to use their influence with pension fund managers to support management's positions on shareholder resolutions, especially withdrawal of poison pills.

The letter-writing campaign appears effective: Some investment managers are refusing to support proxy resolutions to repeal management-supported proposals.

Among those who have written such letters are John Georges, chairman, and Paul O'Neill, president, of International Paper Co., and Charles Exley, chairman of NCR Corp.

Among other companies that have sent them are Anheuser-Busch Cos. Inc., St. Louis; American Airlines Inc., Fort Worth, Texas; Colgate-Palmolive Co., New York; and The Louisiana Land and Exploration Co., New Orleans.

The letter-writing campaign seems to have accelerated since shareholders approved the anti-takeover measures that Rockwell International Corp. Chairman Robert Anderson and GTE Corp. Chairman Theodore Brophy lobbied for in letters earlier this year (*Pensions & Investment Age*, March 9).

John Gavin, executive vice president D.F. King & Co., one of the biggest proxy solicitation firms in New York, who originated the GTE, Rockwell and NCR letters, said almost all of the firm's clients are using the letters.

"The letters do have a tendency to lose some of their effectiveness as another piece of paper coming across a CEO's desk. But they are sensitizing management to a problem and creating an awareness," he said.

*International Paper's John Georges has sought support in proxy votes.*

Don Carter, president of The Carter Organization, New York, a large proxy solicitation firm, said he has sent dozens of letters for clients and is working on at least three.

"These letters are losing their effectiveness and uniqueness," Mr. Carter said. "If you were a CEO and you got 225 personal letters from other CEOs, how effective would it be?"

William Poudrier, vice president at Morrow & Co., another New York proxy solicitation firm, said he is encouraging corporate clients to try the letter route.

Several attorneys and chief financial officers of large corporations also said they have seen or received such letters.

The New York law firm of Skadden, Arps, Slate, Meagher & Flom sent a lengthy memo to clients, laying out a detailed strategy for companies trying to combat shareholder rights plans.

The letters often are tailored to appeal to an individual chief executive officer's past experience with corporate governance issues.

The more recent letters also are more sophisticated than some of the early ones, conveying not only the chief executive's concerns about a given shareholder resolution, but also some suggested actions.

"Your company has a shareholder rights plan, and so you obviously understand the benefits of such plans to shareholders," said one letter sent by Mr. O'Neill of Inter-

*Dennis M. Kass*

# Kass leaves DOL after 18 months

**By Joel Chernoff**

WASHINGTON — Dennis M. Kass, head of the Department of Labor's pension unit, will leave the government in mid-May to return to the private sector after nearly 18 months on the job.

In an interview, Mr. Kass said he expects to return to the realm of financial and institutional services, most likely in New York.

Some observers believe the departure of Mr. Kass — who was a key architect of the administration's proposal on the funding of pension plans and serves as "point man" for the administration — may impede the progress of the funding proposal, which is being debated in Congress.

"His departure would come at an extremely critical juncture" in efforts to get passed the administration's funding proposal as well as a variable-rate premium for the Pension Benefit Guaranty Corp., observed Stuart Brahs, executive director of the Association of Private Pension and Welfare Plans, Washington.

But administration officials believe the proposal will not be harmed.

"I'm told that all folks — even ones who disagree with parts of the proposal — want it to be worked out this year," said William Maroni, the Labor Department's deputy undersecretary for congressional affairs.

Mr. Kass' departure, which had been rumored for weeks, came as no surprise, although several observers were disappointed at the news.

"I'm sorry to see him go. I think he's done a very good job over there," said John Erlenborn, former congressman and now partner in the law firm of Seyfarth, Shaw, Fairweather & Geraldson, Washington.

Attention immediately turned to David M. Walker, Mr. Kass' deputy, as the most likely successor, especially given the need for a knowledgeable player in the legislative process and the problems in recruiting personnel for the remainder of the Reagan presidency.

Mr. Walker said the appointment is up to the president and Labor Secre-

# Fund invests in CMOs it issued

**By Marcia Parker**

HARTFORD, Conn. — Acting as both investor and issuer, the $4.8 billion State of Connecticut Trust Funds has issued $252 million in collateralized mortgage obligations in mid-March, selling two of the three classes of bonds and keeping one for itself.

Public pension funds rarely act as both investor and issuer of mortgage-backed securities. Indeed, pension funds rarely issue those securities; they are generally investors only.

Investment bankers believe Connecticut is the first public pension fund to act as investor and issuer since two California funds began doing similar deals last year.

The $37.7 billion California Public Employees' Retirement System sold more than $1 billion in CMOs in four transactions, including a $250 million one last month. In each case, the state pension fund has retained a class of bonds for itself.

"We continue to do them because they are attractive. You can get a better price on the new security and you can reinvest the money in other parts of the securities market," said Walter Williams, principal investment officer for the employees' fund.

The $19.3 billion California State Teachers' Retirement System issued $400 million in CMOs in spring 1986 and did not keep any of the tranches for itself. Proceeds were invested in other investment vehicles.

The teachers' fund will consider doing additional CMOs now that "we've broken the ice," said Monty Lee, fixed-income portfolio manager.

Mortgage-backed security specialists at Salomon Brothers Inc., First Boston Corp., Shearson Lehman Brothers Inc. and Alex. Brown & Sons Inc., which handled the private placement CMO transaction for Connecticut, all said they are talking to other funds about doing similar deals. They declined to name the pension funds.

Investment officers of several public pension funds that invest heavily in mortgage-backed securities said they had considered or were considering the idea.

Officials of at least one fund have rejected the notion, though. Said David Bronner, chief executive officer of the $5.45 billion Retirement Systems of Alabama:

"Funds with heavy cash flows like ours, it just doesn't make sense. Generating more cash flow is nuts to me. Then I have a

*Continued on page 50*

# PRIT pumping cash into gas exploration

By Fred Williams

BOSTON — The $2 billion Massachusetts Pension Reserves Investment Trust is making its first oil and gas investment, pumping $7.875 million into a newly formed exploration program in the Texas-Louisiana Gulf Coast region.

It is unusual for a fund's first deal to be concentrated on exploration. Most pension funds invest in the less risky development of proven producing properties.

Sandra Whiston, deputy director-administration for the Pension Reserves Investment Management board, which oversees PRIT's investments, said the fund decided against investment in producing wells "because everyone is interested in producing wells . . . This is more of a long-term play. The returns on existing proven producing wells is probably below what we are going to receive from our investment."

The deal, recommended by the fund's consultant, Wilshire Associates, Santa Monica, Calif., is part of a $45 million private placement with Smith Offshore Exploration Co., Houston.

Harvard Management Co., Cambridge, Mass., through its affiliate Aeneas Venture Corp., also will invest $15 million to $20 million, said Michael Eisenson, partner. Harvard Management, with assets of $3.5 billion, is the investment affiliate of Harvard University.

Smith was formed this year to develop oil and gas reserves in the gulf region in partnership with Brooklyn Union Exploration Co. Inc., New York. Like other deals generating interest from pension investors, the three-year exploration program is aimed primarily at discovering and developing natural gas reserves, rather than crude oil, said Ms. Whiston.

Smith will finance exploration by issuing units, costing $1.125 million, equally consisting of convertible preferred stock and zero-coupon bonds due in 1993. The units will have an effective yield of 12.25%.

*Continued on page 48*

*Robin Jacobson's skill at dog-sled racing impressed Steven Leuthold, whose company helped sponsor Mr. Jacobson in the Iditarod.*

# Leuthold goes to dogs

By Trudy Ring

MINNEAPOLIS — Institutional research strategist Steven Leuthold doesn't mind investing in a few dogs.

His company, The Leuthold Group, helped sponsor a team of canine competitors in Alaska's Iditarod, which he calls "the Super Bowl of sled-dog racing."

The team's driver, Robin Jacobson of Minnetonka, is a friend of Mr. Leuthold's son, Kurt. Mr. Jacobson impressed Mr. Leuthold with a victory last year in a dog-sled race from Duluth to the Canadian border. So when Mr. Jacobson needed sponsors for the Iditarod, The Leuthold Group stepped in.

Mr. Leuthold acknowledges having "a long-time love affair with Alaska." He said the company contributed somewhat less than $10,000 toward Mr. Jacobson's costs.

The firm didn't underwrite the whole effort; an Iditarod entrant's costs typically run around $20,000, including $5,000 to $7,000 for lamb, seal and other hearty meats to feed the dogs.

For his efforts, Mr. Jacobson received $6,000 — $3,000 for finishing 18th in a field of 62 and $3,000 for being "rookie of the year." He finished first among the 18 first-time entrants in the race, Mr. Leuthold said

The race, which began March 7, covers 1,250 miles from Anchorage to Nome, Alaska. "It's a long, drawn-out affair," Mr. Leuthold said.

It typically takes 10 to 12 days for the teams to finish. This year's winner, Susan Butcher, covered the course in 10½ days and received $50,000, Mr. Leuthold said.

Mr. Jacobson finished respectably, in 12 days. He was one of only three entrants from the lower 48 states; there also were some competitors from overseas, but most, like Ms. Butcher, were Alaskans, Mr. Leuthold said.

"I thought it was really neat that a kid from the lower 48 could get into this and do so well," he said.

The Leuthold Group will sponsor Mr. Jacobson again next year. Mr. Leuthold, who recently sold a 50% interest in The Leuthold Group to Weeden & Co., a New York brokerage firm, joked that the sponsorship costs were a major point of the negotiations.

The Leuthold Group didn't take a share of Mr. Jacobson's winnings, but received some publicity and good will.

"He has 'The Leuthold Group' painted all over his truck," Mr. Leuthold said, "but unfortunately, we don't have any clients in Alaska." ■

# CSX says pension data not worth mentioning

By Barry B. Burr

RICHMOND, Va. — At CSX Corp., a $663 million pension fund isn't material, at least so far as its financial statements are concerned.

CSX's 1986 annual report makes no mention of the pension assets, liabilities or costs. There isn't even a brief statement referring to pensions.

"I find it incredible," said Howard Hodges, chief accountant for the Securities and Exchange Commission's division of corporate finance.

"It's kind of puzzling," said Larry Brooke, project manager at the Financial Accounting Standards Board, Stamford, Conn.

"It's highly unusual and highly irregular," said Leonard M. Savoie, professor of accounting at the University of Notre Dame, Notre Dame, Ind.

"I think it's wrong. They are violating good reporting standards. I think a $700 million pension fund is material and ought to be disclosed," he added.

According to the controller and external auditor for CSX, a Richmond, Va., transportation and natural resources company, the pension information was omitted because they don't believe it is material.

SEC and other accounting experts said they can't recall a similar void in the annual report of a major company. None of those interviewed had been aware of CSX's omission.

"I'm not familiar with anyone that would leave it out," said Mr. Brooke.

He said FASB 87 states pension sponsors "shall" disclose the data. Even though he conceded FASB 87 is subject to CSX's determination of materiality, he said, "That's not the way we would interpret it."

Bruce G. Lawler, CSX's vice president and controller, said the company deliberately left out any mention of pensions. "It's solely based on the fact it's not a material number," he said.

"Our pension expense is not that significant, so for the last couple of years" the company hasn't had the customary footnote to its annual financial statements, showing pension assets and liabilities.

CSX's 1985 report devoted three sentences to pensions: "CSX and its subsidiaries have pension

*Continued on page 48*

*CSX Corp. left its pension data out of its 1986 annual report, claiming the figures were not a material part of the report.*

# 3 executives take new jobs

By Marlene Givant

Three more corporate pension executives have taken new jobs.

Jainel M. Buell, former manager-pension fund analysis at the more than $600 million Air Products & Chemicals Inc. employee benefit plan, Allentown, Pa., has joined the $2.7 billion Xerox Corp. retirement plan, Stamford, Conn., as manager-trust investments.

Michael Schonberg, head of equity investment and a member of the investment policy committee of the more than $11 billion E.I. du Pont de Nemours & Co. pension fund, Wilmington, Del., joined New York-based Chase Investors Management Corp. as managing director-large capitalization equities.

And Richard Cote, manager of banking for Beatrice Cos. Inc., Chicago, has assumed the additional position of director-pension investments for the company's $600 million pension plan, replacing Ingrid Sarapuu.

Mr. Cote said Ms. Sarapuu left the company, but he had no information on her new position.

Xerox hired Ms. Buell to replace Myra Drucker, who left to become director-trust investments of the more than $1.6 billion retirement fund of International Paper Co., New York. (*P&I Age*, Sept. 29.)

Ms. Buell joined Air Products & Chemicals more than seven years

*Continued on page 49*

*Michael Schonberg moved from Du Pont to Chase Investors Management Corp.*

# Managers still cautious despite market drop

By Frea Williams

Despite the recent stock market decline, equity managers generally say they would continue to invest new client accounts cautiously, viewing the dip as a minor correction, not the beginning of a bear market.

Many investment managers interviewed said the market's drop last week represented volatility; some called it a minor correction with potentially more to come. They said, however, it is a temporary phenomenon.

How quickly a new equity account of $20 million to $50 million would be put to work depends more on the style of the manager than the market's recent moves.

At one extreme is Robert Torray, president and chief investment officer at Robert Torray & Co., Bethesda, Md. Mr. Torray said he wouldn't put any money into the market now, investing instead in cash equivalents, primarily Treasury bills or money market instruments.

"In general, these markets are 'incredibly inflated, and I'm willing to wait for as long as it takes even though there are certain areas in which I may be interested."

As for the recent market decline, Charles Brooks, Torray's vice president, said, "We just don't find too many things we consider values in this market, and a small selloff doesn't produce the kind of values we have seen in the past."

At the other extreme is Bert Dohmen-Ramirez, founder and president of Wellington Financial Inc. and publisher of the Wellington Letter in Honolulu. He would become fully invested within 10 days.

Of the recent market drop, he said, "We expected a sharp decline to last only a few days with the downside target at 2,250 and then to go back up. Basically, what we had was a little 5% correction in two days. That's good for the market."

The approaches of other managers fall between the extremes.

● Prior to the market's decline, Marc Kelly, vice president at Argus Investment Management, Newport Beach, Calif., said he would "work (new money) in very cau-

# N.J. plan continues divesting

By Trudy Ring

TRENTON, N.J. — The New Jersey Division of Investment cut its South Africa-related holdings by more than half in the last six months of 1986.

As of Dec. 31, the division had $1.37 billion in these securities, down from $2.84 billion six months earlier, according to its semiannual divestiture report to the Legislature.

The division has been reducing these holdings since August 1985, when the Legislature passed a law requiring divestiture of all securities in companies operating in South Africa. New Jersey started with $4.2 billion in these securities; the law allowed three years to complete the sales.

*Roland M. Machold said the list of securities targeted for divestment by New Jersey may grow.*

The latest report reiterated the conclusions of a previous one — the divestiture program has reduced the diversification and quality of equity holdings and produced additional transaction costs (*Pensions & Investment Age*, Nov. 10). However, it also said

# 2 funds call for meeting

## Royal Dutch's S. African business questioned

By Trudy Ring

Two large tax-exempt funds have called for a special shareholders' meeting concerning Royal Dutch Petroleum Co.'s South African operations.

The $11.7 billion New York City Teachers' Retirement System and the $825 million Ministers and Missionaries Benefit Board of the American Baptist Churches issued the call March 31, apparently the first time shareholders of any company have requested a special meeting on South Africa.

Royal Dutch, based in The Hague, The Netherlands, refused to include on its annual meeting's agenda shareholder resolutions calling for it to leave South Africa. It operates there through a subsidiary, Shell South Africa. The annual meeting is scheduled May 14.

Royal Dutch is not subject to U.S. laws requiring these resolutions to be put to votes at the meeting. However, Netherlands law allows shareholders to force a special meeting to vote on a given topic, if holders of 10% of the shares sign a petition requesting such a meeting, said Gordon Smith, treasurer of the American Baptist benefit board, New York. In the case of Royal Dutch, this amounts to about 27 million shares.

Mr. Smith and Harrison J. Goldin, New York City comptroller and a trustee of the teachers' fund, said their call for the meeting already has pledges of support from holders of 4.8 million shares.

The teachers' fund holds about 162,000 shares, said Steven Matthews, assistant comptroller-public affairs. Other New York City funds, which are supporting the move, hold 496,000 shares, he said.

The American Baptist benefit board holds 40,000 shares, Mr. Smith said.

Other shareholders that have pledged their support are the $19.3 billion California State Teachers' Retirement System, Sacramento; the $1.75 billion Board of Pensions of the Presbyterian Church (U.S.A.), Philadelphia; and several smaller religious organizations, Mr. Matthews said.

Messrs. Goldin and Smith said they are contacting other institutional shareholders.

Royal Dutch Petroleum owns 60% of Shell South Africa; the remainder is owned by Shell Transport & Trading Co. PLC, London.

# New issues rise 29%; Salomon maintains lead

By Marci Baker

NEW YORK — First-quarter 1987 domestic new issues volume climbed 29% from the first quarter 1986, with Salomon Brothers Inc. leading underwriters with 15.1% of the total volume.

According to IDD Information Services Inc., New York, issuers raised $87.7 billion domestically during the first three months of the year compared with $68 billion during the first quarter last year, showing U.S. corporations took advantage of rising stock prices and lower interest rates to raise additional capital.

Of the total, $71.8 billion was in debt issues and $15.9 billion was in equity issues.

Salomon Brothers acted as lead manager on 99 deals totaling $13.3 billion. Although the firm continues to lead competitors in the overall league tables, its dominance has been eroding. Its 15.2% market share was less than one percentage point better than the 14.5% garnered by First Boston Corp., which ranked second as lead manager on 83 deals totaling $12.7 billion.

For the first quarter of 1986, Salomon held 24.3% of total domestic underwriting volume, while runner up First Boston captured 15.7% of the market.

Merrill Lynch Capital Markets placed third in the overall rankings during the first quarter this year, managing $11.2 billion, or 12.8% of the total. Following Merrill Lynch were Goldman, Sachs & Co., with $9.3 billion or 10.6% of the total, Morgan Stanley & Co., with $8.5 billion, 9.7%, and Drexel Burnham Lambert Inc., with $7.1 billion, 8.1%.

Much of the increase in overall domestic volume came in the mortgage-backed securities arena, where 1987's first-quarter volume climbed to $31.1 billion from $10.6 billion in the first quarter of 1986.

The jump in mortgage securities offerings stemmed largely from the popularity of a new type of security — the CMO floater.

The floating-rate securities, which generally represent the shortest-term tranche of otherwise fixed-rate collateralized mortgage obligation transactions, have offered cheaper financing and reduced equity volatility to mortgage-backed issuers and high-quality, more lucrative investments to commercial banks and other floating-rate investors (*Pensions & Investment Age*, Feb. 23).

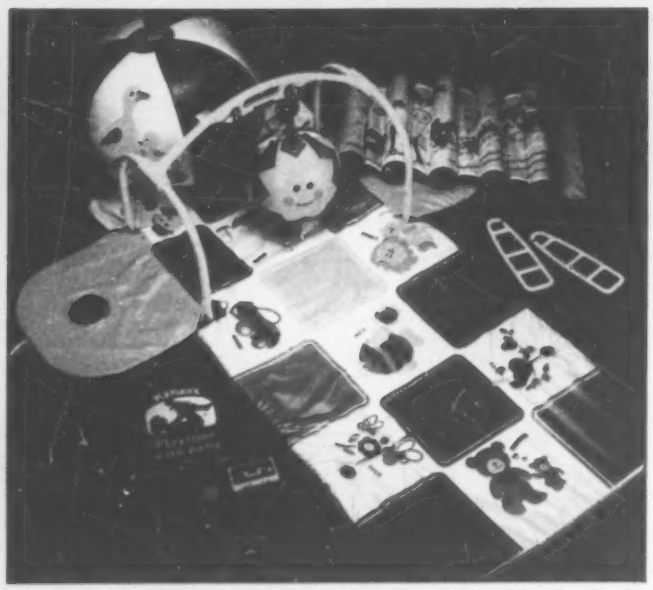
# Corporate Finance



*Hasbro's 1984 acquisition of Milton Bradley and its Playskool subsidiary boosted the company's prospects for potential sales volume.*

## Hasbro using cash, stocks to be winner in acquisition game

**By Marci Baker**

At a time when corporations are piling up debt to restructure through acquisitions, Hasbro Inc. has maintained a clean balance sheet while pursuing the same objective.

Hasbro, based in Pawtucket, R.I., eschewed the debt markets for its acquisitions, relying instead on cash or cash and stock offerings to finance them.

For example, Hasbro acquired the Milton Bradley Co. for half cash and half a combination of common stock and convertible preference stock, which carries more seniority than preferred stock. The company also acquired the Knickerbocker Toy Co. from Warner Communications Inc. for a mixture of cash, stock and warrants that gave Warner a 14% stake in Hasbro with an option to purchase another 5%.

While the company has been expanding, its long-term debt has been shrinking. At $186 million in 1985, Hasbro's debt to total capitalization stood at 44.5%. Last year, that percentage fell to 21.5%, or $125 million, aided in part when the company called $60 million of senior convertible debentures.

Meanwhile, the company continues to be flush with cash, although capital expenditures reduced its cash position in 1986 to $116 million from $185 million.

The company's clean balance sheet should be a plus this year, when toy industry growth isn't expected to be strong.

Also, Hasbro's resistance to the trend toward greater leverage reflects its ability to resist the herd instinct, which it has demonstrated in the toy business.

Hasbro was being called "has been" by competitors and industry analysts when it failed to follow other toy manufacturers into the short-lived video game craze.

"After taking a look at it we decided we didn't want to be in the video game business. We saw no real product differentiation," said Robert Hubbell, vice president-finance.

Instead, the company concentrated on improving traditional products, such as G.I. Joe, and expanding through acquisition.

The result, analysts say, is a much more diversified industry leader in terms of both business and finances.

"This isn't a company that's been an aggressive chaser of fads," said Walter Kirchberger, an analyst at PaineWebber Inc. "A lot of its products aren't trendy," he said. Mr. Potato Head, G.I. Joe and My Little Pony have developed into products which, through updating, have continued to be strong sellers.

Despite such longevity, the company didn't want to rely on individual products so it moved to create greater diversification and balance through acquisition.

Hasbro set out to "diversify our portfolio much like that of a portfolio manager diversifies his investment portfolio," Mr. Hubbell said.

As a result, the company has become an international firm with a broad range of products, including toys, infant care and learning products and games and puzzles.

With the 1983 acquisitions of Glenco Infant Items and Knickerbocker, Hasbro added infant care items such as Tommie Tippie cups, plush products and stuffed dolls to its lines.

The 1984 acquisition of Milton Bradley and its Playskool subsidiary pushed the company into the forefront of the toy business in terms of potential sales volume.

The deal put Hasbro into the resurging games and puzzles arena and provided a ready-made foothold in Europe through Milton Bradley's operations overseas. Playskool, meanwhile, added greater depth to Hasbro's preschool and infant toys and ac-

## New Zealand tapped for debt market deals

**By Brad Rudin**

Several U.S. corporations in recent weeks have taken advantage of the steepening inverted yield curve in New Zealand by selling short-term New Zealand dollar-denominated debt that offers high yields to investors and reduced borrowing costs to the issuer.

Treasurers at Sara Lee Corp., Chicago; Emerson Electric Co., St. Louis; Dow Chemical Co., Midland, Mich.; Exxon Capital Corp., New York; Merrill Lynch & Co., New York; and other corporations kept investment bankers busy on an arbitrage based on the difference in interest rates in New Zealand and the United States.

The New Zealand government's tight money policy has boosted short-term rates to more than 25%.

U.S. corporations issued $726.8 million (U.S.) in New Zealand dollar-denominated debt during the first 10 weeks of 1987, more than the $518.7 million (U.S.) issued in all of 1986, according to IDD Information Services Inc., New York.

The rich rewards offered to investors explain the growth of the market, said J. Michael Payte, associate director at the interest rate and currency swap department at Bear, Stearns & Co., New York: "Yields are very high; it's that simple." Deals done in recent weeks have offered fixed-rate coupons in a range between 18% and 20%.

Tax planning by individual investors has created an additional appetite for New Zealand dollar-denominated debt issued by U.S. companies, also known as kiwi debt.

"We're coming into the height of the (individual retirement account) season," said Kenneth C. Marshall, a vice president at Prudential-Bache Capital Funding, New York. "That generates a tremendous amount of interest by investors who want to park their funds and get the maximum yield."

The recent upward movement of the New Zealand dollar exchange rate counts as another factor that encourages investor participation in these deals. Depreciation of the New Zealand dollar against the U.S. dollar erodes the returns of U.S. investors holding kiwi securities.

The New Zealand dollar, now worth about 56 cents (U.S.), would have to fall to 49.55 cents to reduce the return of a 19% one-year kiwi debt note to 6%, a break-even point based on short-term domestic rates, according to Andrew Gordon, an international market analyst at First Boston Corp., New York.

Because U.S. investors in kiwi debt trade credit risk for currency risk to get the high yields, the market has demanded issuers hold high credit ratings.

With conditions now right for kiwi deals, U.S. issuers have been eager to take advantage of the savings offered to them by investment bankers who ply these transactions.

"We have been shown these kinds of opportunities for the last 18 months or so . . . but the opportunity was very marginal in our view so we did not take advantage of them," said Howard W. Burdett, assistant treasurer at Dow.

"This was the lowest cost source of U.S. dollars that we had available at the time so we very quickly took advantage," Mr. Burdett said. The company saved between 60 and 65 basis points over alternative two-year financings, Mr. Burdett said. A 65-basis-point saving would reduce Dow's borrowing costs

*Continued on page 24*

## Private offers up

**By Marci Baker**

NEW YORK — Strong demand and a steady supply led to unprecedented volume in private placements last year, with Goldman, Sachs & Co. the leading agent of such deals.

According to IDD Information Services Inc., New York, overall private placement volume totaled $121.7 billion in 1986, up 67% from the $73 billion recorded in 1985.

Part of the volume stemmed from mergers and acquisitions: Merger-related private placements totaled $22.4 billion in 1986, vs. $2.1 billion in 1985.

In addition, activity intensified in the latter part of the year, as issuers used private placements to complete deals quickly before new tax laws took hold.

Institutions, meanwhile, kept demand strong as they sought investments for their hefty cash positions.

While insurance companies continued to be the dominant private placement investors, other foreign and domestic institutions, including public pension funds and endowments, increased their participation. Investment bankers said their stronger appetites have been whetted by the leveraged buy-out boom.

With equal credit going to each manager of a private deal, Goldman managed $18.6 billion in 224 transactions, for a 15.3% share of the market.

# Debt deals . . .

*Continued from page 23*

$750,000, he said.

Dow's floating rate $56 million (U.S.) two-year issue, lead managed by Bear, Stearns, is expected to provide a 22.8% coupon based on the recent 90-day New Zealand bank bill rate of 26.2%. The issue was priced at par.

The notes offer a minimum 17% coupon, according to a Bear, Stearns official. Investors who buy the notes will be getting a 16-percentage-point spread over comparable U.S. dollar-denominated securities if the mid-March New Zealand bank bill rate continues.

In the Dow transaction, which involved both a currency and interest rate swap, the company issued two-year floating rate notes to raise $56 million (U.S.). Dow's floating rate notes were based on the 90-day New Zealand bank bill rate less 340 basis points.

However, Dow then swapped the floating New Zealand dollar-denominated coupon payments for fixed-rate U.S. dollar-denominated payments with an intermediary bank.

The fixed-rate payments were set at the two-year U.S. Treasury yield less 15 basis points.

In the currency swap, the bank exchanged payments based on the London interbank offered rate with another New Zealand counterparty for the floating-rate New Zealand dollar-coupon payments.

In the interest rate swap, the intermediary bank exchanged the fixed-rate payments it received from Dow with the interest rate-swap counterparty for six-month U.S. dollar-denominated floating-rate payments based on the London interbank offered rate. The arbitrage is based on the New Zealand counterparty's willingness to pay out a New Zealand floating rate that is higher than the coupon paid by the issuer.

In another kiwi offering lead managed by Bear, Stearns last month, Sara Lee issued 19% New Zealand-dollar notes, priced at par, due March 7, 1988. The face value of the offering was about $56 million (U.S.).

The transaction for Sara Lee created a floating rate liability based on A1-P1 commercial paper that was exchanged for fixed-rate New Zealand funding to match the liability created by the debt issue.

"It was an attractive opportunity and we decided to go ahead on that basis," said Mary Ellen Johnson, Sara Lee's treasurer. She declined to specify how many basis points the company saved by issuing kiwi debt.

Kiwi debt also provided an opportunity for Emerson Electric Co., which issued about $56 million (U.S.) last month. The two-year notes, which were priced at par, carry a coupon of 18.55%.

A currency and interest rate swap gave Emerson the chance to obtain floating-rate funding at a rate that will result in a "significant cost saving over the next couple of years," said Robert M. Cox, treasurer.

The transaction, structured by Prudential-Bache Capital Funding, creates an interest rate swap in which Emerson assumes a floating-rate obligation below standard commercial paper rates in exchange for the 18.55% coupon from Prudential Global Funding, a principal in the swap transaction. That is the coupon needed to pay the bondholders.

"The investor in the U.S. earns a high rate, the counterparty in New Zealand pays a relatively lower rate, and between those two you have an arbitrage and it's Emerson that has the advantage of that arbitrage," said Prudential's Mr. Marshall.

*Howard W. Burdett, assistant treasurer, says the low cost of kiwi debt attracted Dow.*

*Mary Ellen Johnson, Sara Lee treasurer, says kiwi debt was an attractive opportunity.*

Other kiwi deals done in March included a transaction for Exxon Capital Corp. The notes, priced at par and carrying an 18% coupon, created a $140 million (U.S.) liability for the company in a transaction lead managed by First Boston Corp.

Merrill Lynch & Co., New York, in a deal managed by Merrill Lynch Capital Markets, sold about $42 million (U.S.) in a one-year debt issue that carried a 20% coupon.

# Offers . . .

*Continued from page 23*

Drexel Burnham Lambert Inc. managed $14.7 billion in 214 deals for a 12.1% share of the overall market, a reflection of its strength in acquisitions and in the placement of securities with public registration rights.

Following Drexel, with a 12% market share, was Salomon Brothers Inc., which managed $14.6 billion in 323 private deals.

First Boston Corp. was fourth, with $14.2 billion or 11.7% of the overall volume, while Merrill Lynch Capital Markets followed with $9.4 billion or 7.7%.

Less traditional private placement transactions — including acquisition-related deals, mortgage-backed transactions and those with rights to register securities publicly down the road — fueled the bulk of the increase in 1986 volume.

Traditional private placement volume remained flat for the year. Some $52.7 billion in straight debt deals was completed in the private market in 1986, compared with $53 billion in 1985.

The intense merger environment made its mark in the market, where $22.4 billion was privately placed with investors. In 1985, IDD reported acquisition-related volume as $2.6 billion.

Deals with registration rights, meanwhile, climbed to $12.4 billion last year, up from $5.9 billion recorded in the previous year.

Drexel managed $6.4 billion in 90 acquisition private transactions for a 28.5% market share.

The firm — clearly the most aggressive in the use of deals with public registration rights — was credited with 94.6% of this category's volume. It completed 165 private transactions with registration rights totaling $11.7 billion.

Goldman completed one such deal totaling $400 million. Goldman was a close second for acquisition-related private placements, managing $6 billion in 18 acquisition-related transactions for 26.4% of that market. First Boston Corp. was third with $3.1 billion or 13.9%.

Fourth and fifth in acquisition-related deals were PaineWebber and Prudential—Bache Securities, which held 7.9% and 6% market shares, respectively.

Volume for lease-related private placements was flat, with IDD recording about $11.5 billion in 1985 and 1986 in that category.

Goldman ranked first, managing $2.4 billion in 38 deals for 20.8% of the market. The firm was followed by Salomon Brothers, with 17% of the market; Merrill Lynch, 12.5%; and First Boston, 8.6%.

Salomon Brothers and First Boston led agents for mortgage-related private placements. Private placement volume in mortgage-related debt totaled $13.3 billion, up from $8.1 billion in 1985.

Salomon, which was credited with $3.3 billion in 157 transactions, was agent on almost 25% of that. First Boston managed $2.5 billion in 24 deals for 18.5% of the total.

Two commercial banks were third and fourth. Citicorp was credited with $2.2 billion and 70 transactions in the mortgage category, giving the firm a 17% slice of that area. Chase Manhattan Bank ended the year with 39 mortgage-related private placements totaling $1.4 billion, or 10.5%.

Commercial banks had a strong showing in the overall and traditional private placement rankings. Five of the top 15 spots in each of the two major categories were held by commercial banks last year.

Citicorp was seventh in the overall private placement rankings, with almost $7 billion in volume. Morgan Guaranty, Bankers Trust, First National Bank of Chicago and Chase Manhattan ranked ninth, 10th, 13th and 14th, respectively.

The showing was even stronger in the rankings of traditional private placements, with Morgan Guaranty fifth, managing $3.3 billion.

Bankers Trust, Citicorp, First of Chicago and Bank of America followed in seventh, eighth, ninth and 12th, respectively. ■

# New issues volume rises . . .

*Continued from page 3*

The surge in mortgage-related offerings helped fuel a 28.2% climb in total debt offerings in the first quarter. Issuers raised $71.8 billion in the straight and convertible debt markets in the first quarter of 1987 vs. $56 billion for the comparable period last year.

Salomon garnered the greatest market share, managing $12.8 billion or 17.8% of total debt volume. First Boston ranked second, with $11.9 billion or 16.6%, followed by Merrill, with $8.5 billion or 11.8%; Morgan Stanley, with $7.4 billion or 10.3%; and Goldman, with $7.1 billion or 9.9%.

In the equity arena, first-quarter 1987 volume climbed to $15.9 billion, up 26.2% from the $12.6 billion raised by issuers in the common and preferred stock markets a year ago.

Merrill ranked first in the equity category, as lead manager for almost $2.7 billion or 17% of total equity volume. Placing second was Goldman, which with $2.1 billion or 13.2% of the market. Drexel, meanwhile, placed third with $1.6 billion or 10.1% of total volume. Fourth and fifth places went to Shearson Lehman and Wheat, First Securities of Richmond, Va., which were credited with $1.3 billion and $1.1 billion each in volume representing market shares of 8.2% and 6.9%, respectively.

Drexel's strong placement in the equity rankings comes as the firm has been battling to preserve its credibility in the face of investigations by the Securities and Exchange Commission and the Justice Department into insider trading and ties to Ivan Boesky. Much of its equity volume stemmed from its lead manager role in the $1 billion common stock offering by Occidental Petroleum Corp. last month.

What may be more surprising to some is that Drexel managed to preserve its dominance in junk bonds last quarter, despite efforts by some competitors to capitalize on the scandal and wrest market share from the firm.

Junk bond volume for the quarter totaled $6.8 billion up from $4.4 billion in the first quarter of 1986. Drexel acted as lead manager on half of that. The firm underwrote $2.1 billion in junk bonds during the same period last year for a 47.7% market share.

Coming in second was First Boston, which underwrote its largest high-yield offering to date — the $800 million placement of high-yield debt in connection with Campeau Corp.'s acquisition of Allied Stores Corp. First Boston's total junk-bond volume for the quarter was $1.5 billion for a 22.1% market share.

Merrill Lynch followed with $603 million or 8.9% of the market. Donaldson, Lufkin & Jenrette was fourth, with $320 million or 4.7%, and Morgan Stanley was fifth with $310 million or 4.6%.

Among other first-quarter underwriting highlights were:

- Salomon and First Boston continued to dominate the mortgage-backed securities market, although, as in the overall rankings, their edge appears to be eroding.

The two firms managed $7 billion and $6 billion, respectively, for a combined market share of 41.8%.

During the first quarter last year, Salomon and First Boston managed $3.8 billion and $3.3 billion, respectively, for a combined market share of 67%.

- Straight-debt issuance for the quarter totaled $67.7 billion, up from $53 billion in the first quarter of 1986. Salomon, in first place, managed $12.7 billion. First Boston, in second, underwrote $11.5 billion and Merrill, in third, $8.5 billion.
- Convertible-debt volume rose to $4.1 billion, up from $3.2 billion a year earlier. Smith Barney, Harris Upham led in this category, acting as lead manager on $965 million in deals.
- Issuers raised $11.5 billion in the common stock arena in the first quarter, up from $8.7 billion the previous year. Merrill, acting as lead manager on $2.1 billion, led underwriters in the rankings.
- Preferred stock volume totaled $4.4 billion for the first quarter, up from $3.8 billion. Morgan Stanley grabbed the largest piece of that, managing $660 million. ■

# Late news

## PBGC settles suit

WASHINGTON — The Pension Benefit Guaranty Corp. will pay previously denied benefits to thousands of participants and retirees whose plans were amended and terminated between Jan. 1, 1976 and Dec. 31, 1981.

The payments, which could cost the PBGC between $20 million and $35 million, will be made as part of a settlement of a class-action suit against the agency.

Under the settlement, the PBGC will be required to recompute benefits for more than 14,000 participants in plans trusteed by the agency, and review records of some 21,000 plans not under agency control.

Plan participants had charged the PBGC had unlawfully denied them benefit increases stemming from implementing the Employee Retirement Income Security Act's vesting rules, which generally required companies to provide maximum vesting periods of 10 years.

But ERISA also limits PBGC liability for benefit increases during the first five years after a plan is amended.

At Lidz Brothers, a New York garment-industry firm, and Midvale-Heppenstall Co., a Philadelphia steel company, plans for certain employees were terminated less than a year after they were amended to satisfy ERISA's vesting rules. Thus, the PBGC ruled participants were not entitled to guaranteed benefits stemming from the plan amendments.

To settle the litigation, the PBGC has agreed to provide 65% of the additional benefits that would have been guaranteed.

## International hire set

CARSON CITY, Nev. — The $2.4 billion Nevada Public Employees' Retirement System has allocated $50 million to Axe Core Investors Inc., New York, its first international manager, said Laura Wallace, investment officer.

The assets will come from a gradual reduction in U.S. equity allocation to 40% of assets from 53%. Accounts of the fund's three largest equity managers — Criterion Investment Management Co., Houston, $258 million; INVESCO Capital Management Inc., Atlanta, $268 million; and Loomis, Sayles & Co. Inc., Boston, $330 million; each will be reduced by $100 million.

Axe was hired for its Morgan Stanley Capital International Europe Australia Far East index fund. Axe, or another international manager, will receive an additional $50 million by next year. The other $200 million is targeted for fixed income.

William M. Mercer-Meidinger-Hansen Inc. assisted in the search.

## Legislation hits funds

WASHINGTON — An amendment to an omnibus trade bill designed to increase reporting by foreign investors in U.S. real estate and securities might affect U.S. investors as well.

The amendment to H.R. 3 would require foreign investors to report to the Commerce Department all interests of $10 million or more in U.S. real estate and securities.

It also would require reporting where a foreign investor holds 5% or more of total equity or ownership interests, regardless of the size of the investment.

U.S. investors would be required to file if they are "acting in concert" with foreign investors, such as in a limited partnership that includes one or more foreign investors.

American companies with overseas units or those with joint ventures or partnerships with foreigners also might be affected, according to Keith Martin, a lawyer with Chadbourne & Parke, Washington.

The bill is expected to be sent to the House floor in late April or early May.

## Hamilton leaves LTV

DALLAS — Thomas Tull has been named director of employee benefit fund investments at The LTV Corp. and president of Western Reserve Capital Management Inc., replacing Dennis Hamilton.

Mr. Hamilton resigned last month to accept the position of director-pension investments at the $1.1 billion Standard Oil Co. pension fund, Cleveland. He replaces Warren Lory, who was named to the new position of director-finance administration and control.

Mr. Tull joined Western Reserve in 1983 as a portfolio manager and vice president. The firm, a wholly owned subsidiary of LTV, manages about $615 million of the company's $2.4 billion in pension assets and oversees the investment of funds placed with external managers.

## Late money movers

- OAKLAND, Calif. — The $525 million Kaiser Aluminum & Chemical Corp. pension plan has hired its first international managers for $7 million each.

They are: Brown Brothers Harriman & Co., New York; J.P. Morgan Investment Management, London; and Baring International Investment Ltd., London.

Assets for the new managers were taken from an equity index fund managed by Wells Fargo Investment Advisors, San Francisco.

Dorn & Helliesen, Larkspur, Calif., assisted in the search.

- SPRINGFIELD, Ohio — The $35 million Wittenberg University Endowment Fund has hired Oppenheimer Capital Corp., New York, as balanced manager for the fund, replacing David L. Babson & Co. Inc., Boston, according to P. Gus Geil, director of business affairs.

Richard A. Schilffarth & Associates Ltd., Milwaukee, assisted in the manager search.

- NEW YORK — The $1.7 billion Rockefeller Foundation has made additional commitments to venture capital and real estate, said Jack Meyer, treasurer and chief investment officer.

The foundation committed $15 million to the International Network Fund, a venture capital fund managed by Advent International Corp., Boston, and $10 million to Copley Institutional Investors Fund, managed by Copley Real Estate Advisors, Boston.

Funding will be from cash reserves. The moves bring the foundation's investments in venture capital and real estate to $41 million and $78 million, respectively.

## Russell loses, gains

TACOMA, Wash. — David A. Anderson, chief investment officer of the Frank Russell Trust Co. for five years, has left to join Composite Research & Management Co., Seattle, as a senior vice president and portfolio manager.

Also, Thomas A. Middleton, formerly with Wells Fargo Investment Advisors, San Francisco, has joined Russell as director of client services.

Michael C. Malone, formerly vice president and investment officer of Frank Russell Co., has been named chief investment officer, replacing Mr. Anderson. Mr. Malone primarily will be responsible for working with firms managing Russell's commingled funds.

*Avon's Hicks B. Waldron*

# Avon fighting short-term emphasis

**By Marcia Parker**

NEW YORK — Hicks B. Waldron, Avon Products Inc.'s chairman and chief executive officer, believes money managers' obsession with short-term performance affects their proxy voting practices — and he is taking steps to change that.

Among his actions are:

- Eliminating the pressure on Avon's investment managers by extending the performance evaluation period to three years from quarterly;
- Instructing Avon's money managers to keep a company's long-term view in mind when they vote a proxy;
- And, reviewing each manager's votes on shareholder resolutions this proxy season.

Mr. Waldron said he hopes other chief executives will follow suit to foster a longer term investment horizon among pension fund managers.

In an interview with *Pensions & Investment Age* in his stately office at Avon's midtown Manhattan headquarters, Mr. Waldron said the emphasis on short-term performance comes from both sides.

Corporate America has been accustomed to making quarterly performance evaluations, thinking that was the best way to track the investment and returns of company pension funds.

Money managers responded to the pressure for strong quarterly performance by gearing their investment decisions to the short term.

Neither side gained much from that practice, and both sides complained the other wasn't taking a long view, said Mr. Waldron, who has been chief executive of the beauty products and health care services company since 1983.

Dissatisfied with the traditional performance evaluation system, Mr. Waldron said Avon this year instituted the changes with all 12 of its money managers for the $427 million pension fund. Avon has no internal management.

"We told them, 'We won't call you every quarter to see how you've done and shoot you if you don't measure up,' " he said. "For equity managers, we are reviewing performance every three years and for venture capital managers,

# Pilots pension assets 20% of bid for United

**By Chuck Paustian**

CHICAGO — Pension assets make up more than one-fifth of the approximately $2.5 billion in financing the United Airlines pilots union needs to raise for its $4.5 billion bid for the airline.

Union leaders expect to use a reversion of $200 million to $250 million in surplus assets from the pilots' overfunded defined benefit plan to initially fund a leveraged employee stock ownership plan. In addition, they hope their members will put about $300 million into a new employer stock option in their defined contribution plan.

Officials of the airline's other two major unions — the International Association of Machinists and Aerospace Workers and the Association of Flight Attendants — say they won't participate in the bid. Cooperation from the other unions and use of their pension assets aren't essential, the pilots contend.

Using pension assets to purchase a huge, healthy company — as the pilots want to do — is one of the most aggressive attempts by labor to influence corporate America.

*If the pilots' bid is successful, they'll own the landing rights at United's new O'Hare terminal.*

In fact, said John J. Peterpaul, general vice president of the Machinists' transportation department, his union might launch its own bid for United, one he hopes won't use pension assets and "would be more equitable to the employees."

Machinists leaders are consulting with their investment banker, Brian M. Freeman & Co. Inc., Washington, about how to respond to the pilots' bid.

Corey Rosen, executive director of the National Center for Employee Ownership, Oakland, Calif., noted other unions have used leveraged ESOPs to gain influence or control at a company, but not a large, financially healthy, public company like United.

"The corporate restructuring we've seen over the last several years has been nothing but damaging to labor" through reduced pensions, wages and job security, Mr. Rosen said.

"Labor may be getting involved as players in corporate finance

# U.S. claims part of plan surplus

**By Barry B. Burr**

EL SEGUNDO, Calif. — The Defense Department has issued a formal claim against NI Industries Inc. to collect more than 10% of the $23 million the company pocketed from terminating an overfunded pension plan, plus accrued interest on the surplus assets.

The Defense Department made the claim April 7 for slightly more than $2.9 million of the surplus assets. In addition, the department is seeking an undetermined amount of accrued interest, dating to Dec. 31, 1983, the effective date of the termination. The assets were distributed May 1985.

NI Industries Inc., based in Long Beach, and a unit of Masco Corp., Taylor, Mich., has resisted sharing the reversion with the government (*Pensions & Investment Age*, Nov. 24).

If NI refuses to answer the claim — either by paying the government or appealing the claim — the Defense Department will collect by reducing payments from ongoing contracts with NI, according to Sam Rousso, public affairs specialist with the El Segundo office of the Defense Contract Administrative Services, a government unit that oversees military contractors.

NI has 90 days to appeal to the Armed Forces Board of Contract Appeals, Washington.

NI executives were unavailable for comment.

The claim is being made as part of a government policy, initiated last year by the Defense Department and adopted by other agencies, to seek refunds or credits for pension cost overcharges by contractors because of terminations, or because plans reach fully funded status as defined by the Internal Revenue Service.

The Defense Department already has received, or has been promised, millions of dollars through agreements to share in termination reversions of FMC Corp., Chicago, and Rockwell International Corp., Pittsburgh, and for credits from fully funded plans of United Technologies Corp., Hartford, Conn., and Lockheed Corp., Burbank. ■

# 3 plans establish incentive-fee programs

By Chuck Paustian

Three public pension funds put some of their investment managers on performance-based fees, but others are slower to accept the fee structures.

• The $8 billion Oregon Public Employes Retirement System, Salem, has a performance-fee arrangement with BEA Associates Inc., New York, which runs about $500 million in equities for the pension fund, said James C. George, investment manager.

• The $7 billion Los Angeles County Employees' Retirement Association, Los Angeles, placed three managers, running about $2.62 billion, on performance fees, said Maureen Oster, senior finance analyst at the fund.

• The $400 million Dallas Police & Firemen Pension Fund placed three equity managers, running a total of $76 million, on performance-based fees, said Jerry M. Hast, fund administrator.

Industry observers said performance-based fees have not gained the support of more funds because of perceived complications in establishing the arrangements.

"I think people, quite incorrectly, perceive the whole issue as more complicated legally, economically and procedurally than it realiy is," said Theodore R. Aronson, a partner of Aronson & Fogler, Philadelphia, which manages $150 million in assets, all tax-exempt. He said one of the firm's six clients is on a performance-fee arrangement.

Mr. George said the Oregon established the performance fee arrangement with BEA Associates at BEA's initiative.

"You can't really say we're pursuing performance-based fees," said Mr. George. "We'll probably see how this works out for a year or so and then maybe pursue it with our other managers," he said. The fund has 17 domestic equity managers and seven international managers.

Mr. George declined to disclose the details of the fee structure, except to say it is a symmetrical fulcrum fee with a cap and floor. BEA Associates' benchmark is the Standard & Poor's 500 stock index; the firm's fee will be calculated during a rolling three-year period, he said.

He said he hasn't pursued other performance fee arrangements because he's generally content with existing fee structures.

"We feel the money management business is one where performance gets rewarded. I don't know of a business that's more performance oriented," he added.

Ms. Oster said the Los Angeles County fund put two equity portfolios and two fixed-income portfolios under a performance-fee arrangement.

The managers are Capital Guardian Trust Co., Los Angeles, which runs a $1.357 billion equity portfolio and a $474.4 bond portfolio; Stein Roe & Farnham Inc., Chicago, which runs $180 million in equities; and CMB Investment Counselors, Los Angeles, which runs $638 million in fixed income.

Ms. Oster said the equity portfolios have the S&P 500 as the benchmark; Capital Guardian's bond portfolio, the the Shearson Lehman Government/Corporate bond index; and CMB, the Salomon Brothers Broad Investment-Grade bond index.

The fund negotiated a base fee with each manager. "Then one half of that base fee is available for the incentive portion, up or down," she said.

For example, if the base fee was 50 basis points, the maximum fee would be 75 basis points and the minimum fee would be 25 basis points. "That way the manager does get paid a fee," said Ms. Oster, who declined to release the specific amounts involved.

To receive the maximum fee, the manager must surpass the stated bogey by at least four percentage points plus its base fee, she said.

The performance measurement period for each manager may be extended, Ms. Oster added. Stein Roe & Farnham and CMB start with three-year rolling periods, while Capital Guardian has a two-year period.

"The object of the incentive fee is for long-term performance," she said. "We're looking at it as being a longer period of time."

At the end of each time period, fund officials will decide whether or not to extend the measurement period, depending on the effects of the fee structure on such things as performance and risk levels of the portfolios.

The idea for performance fees came from the fund's executives. "We were interested in evaluating the effects of performance fees," Ms. Oster said. "We also had some managers that wanted to negotiate fee increases.

"(Performance-based fees) was a way to manage the fee increases," she said.

Callan Associates Inc., San Francisco, aided the fund in setting up the fee structure.

The Dallas Police & Firemen Pension Fund opted for performance fees to spur performance and to lower fees if the firms underperform their benchmarks.

"We previously had a great number of managers that underperformed the S&P 500 for the past five or six years. We were paying them their normal fee for that underperformance," said Mr. Hast.

Under the performance-fee arrangement

# Advisers boost cash

## Market rise keeps percentage steady

By Fred Williams

Institutional equity managers raised cash during the first quarter of 1987, but reserves as a percentage of equity assets remained unchanged from the year-end cash position of 7.3% because of the record rise in equity values.

According to INDATA, an investment analysis service in Southport, Conn., the amount of cash held by equity managers in their portfolios has increased dramatically. For the INDATA universe alone, the increase in dollar valu of cash reserves was $1.24 billio

The higher dollar amount of cash reserves contributes to speculation there is still plenty of cash being held by domestic money managers to continue to fuel the bull market in equities, at least for the foreseeable future.

While the dollar-weighted average of total assets in cash and equivalents in the INDATA universe held steady at 7.3%, all but one of the investment managers contacted by *Pensions & Investment Age* held higher percentages.

The INDATA universe represents more than $240 billion in total assets in 1,256 institutional equity portfolios. Thus the cash held by these institutions totaled at least $17.5 billion.

Cash reserves ranged from 12% at AmeriTrust Co., Cleveland, to 5% at Alliance Capital Management, New York. During the first quarter, two equity managers increased cash — AmeriTrust and Lincoln Capital Management Co., Chicago — while four reduced cash reserves — Sun Bank, Orlando, Fla.; Harbor Capital Management Co., Boston; Hansen Investment Management Co., San Rafael, Calif.; and Sit Investment Associates Inc., Minneapolis. One manager, Alliance, remained unchanged.

"There is an enormous amount of cash there to buy stocks with," said William P. Kennedy, an Atlanta investment consultant interpreting the INDATA findings. "The money is there and the market is strong.

"The interesting thing is that cash reserves are the same as on Dec. 31 but the (Standard & Poor's 500 stock index) is up 21.3%."

The S&P results for the quarter place it in the 52nd percentile, which means 52% of investment managers outperformed the market in the first quarter. For the 12 months ended March 31, only 22%

# Index funds still top draw

By Trudy Ring

Most of the biggest shifts in money management reported in the first quarter involved passive strategies and public pension funds.

Manager hirings reported in *Pensions & Investment Age* during the quarter show index funds bringing in the largest sums. Bankers Trust Co. — Investment Management Group, New York, was the leading manager by far, with $772.7 million in new discretionary asset management business.

Of that, $742.7 million was in stock index funds for major public retirement systems — the New York City Employees', Fire Department and Police Department Pension Funds and the State of Connecticut Trust Funds, Hartford.

Bankers Trust had two other asset management accounts reported in *P&I Age* during the quarter: a $30 million short-term account for May Department Stores Co., St. Louis, and an equity account of undisclosed size for Contel Corp., Atlanta. Two custodial accounts rounded out Bankers Trust's quarter.

But Bankers also had a major index fund account reduced in the quarter. The Alaska Permanent Fund Corp., Juneau, cut its stock index fund to $550 million from $1.3 billion in anticipation of a market correction.

Second in terms of new discretionary assets was Chase Investors Management Corp., New York, with $390 million. The money came from two accounts: a $300 million stock index fund for Unisys Corp., Detroit, and a $90 million bond index fund for Exxon Corp., New York.

Wells Fargo Investment Advisors, San Francisco, a prominent index fund manager, had $286 million in new business reported — $170 million in equities for Pa-

*Smith Offshore Exploration Co., which will operate offshore drilling rigs like this one, has attracted $145 million from seven tax-exempt investors for an oil and gas exploration project.*

# Harvard-led deal attracts 5 more

**By Fred Williams**

Five major tax-exempt institutional investors have lined up behind Harvard Management Co. Inc. and the Massachusetts Pension Reserves Investment Trust to participate in a $145 million, three-year oil and gas exploration and development joint venture in the Gulf of Mexico and the coastal region.

Harvard Management, the Cambridge, Mass.-based investment affiliate of Harvard University, is the lead investor with a $50 million commitment to the Smith Offshore Exploration Co. drilling program. The $2 billion PRIT also has committed $7.875 million to the program (*Pensions & Investment Age*, April 6).

Besides Harvard, which was instrumental in putting the deal together and in promoting it to other institutional investors, the endowment funds of four other major East Coast educational institutions will join in the exploration program: Yale University, New Haven, Conn., which invested $10.1 million; Wellesley College, Wellesley, Mass., which invested $750,000; Duke University, Durham, N.C. and University of North Carolina at Chapel Hill. The seventh partner is the Kamehameha Schools/Bishop Estate of Hawaii, Honolulu, which invested $3.335 million.

There also are individual investors participating in the deal.

Harvard Management provided the initial funding for the formation of Smith Offshore. Scott Sperling, partner and head of direct and private investing at Harvard, is chairman of the board of Smith Offshore.

The $3.5 billion Harvard endowment also is pumping up to $20 million into acquiring oil and gas reserves through Harken Oil & Gas Inc., Dallas (*P&I Age*, Dec. 8). The Harken deal was Harvard's first oil and gas investment.

Wayne Jones, associate vice chancellor-business and finance at the University of North Carolina, said the Smith deal is the $127 million endowment's first oil and gas investment, with an initial purchase of one $3.375 million unit in the partnership.

# Slower growth reported for portfolio insurance

**By Trudy Ring**

The flow of pension assets into portfolio insurance programs slowed in the first quarter, growing by $1.772 billion or 4.5% at 19 leading money management firms.

By comparison, during 1986, the amount of assets covered by portfolio insurance increased more than 600%, according to industry experts.

The assets in portfolio insurance, or dynamic hedging, programs at the 19 firms totaled $41.6 billion March 31.

The figures are for U.S. tax-exempt assets only; the 19 firms were listed because, with one significant exception, they represent the bulk of the market.

The exception is Leland O'Brien Rubinstein Associates Inc., Los Angeles, which provides portfolio insurance both directly and through licensees. LOR officials declined to provide statistics for this report.

But reliable sources said LOR and its licensees likely have about $50 billion under management in insured strategies, of which about $22 billion is for LOR and licensees not surveyed for this story. With the addition of the $22 billion, the total in portfolio insurance as of March 31 would be in excess of $63 billion.

(The LOR licensees in the accompanying table are Aetna Life & Casualty Co., Hartford, Conn.; BEA Associates Inc., New York; Centerre Trust Co., St. Louis; and Wells Fargo Investment Advisors, San Francisco.)

Another manager declining to provide figures was Chase Investors Management Corp., New York, which is marketing dynamic hedging primarily outside the U.S. tax-exempt market.

Some managers said the small first-quarter growth of assets covered by portfolio insurance indicates a lessening of interest in the strategy, which involves use of the futures and options markets to provide an assured minimum rate of return.

"I think the standard portfolio insurance (hedging an entire fund or its entire equity allocation) is peaking — there is a general perception that it's not for everyone," said Ed Peters, portfolio manager-structured investment products group at The Boston Co., Boston.

Mike Alex, vice president of Northern Trust Co., Chicago, agreed. "There certainly is an oversupply (of portfolio insurance capacity) right now."

Other managers still report strong interest in the strategy. A few, such as Oppenheimer Capital Corp., New York, and The Boston Co., drew in more assets in the first quarter than they did all of last year. Although The Boston Co.'s Mr. Peters said the traditional approach has peaked, he pointed out there is interest in using portfolio insurance for hedging fund surpluses or increases in equity allocations.

Others said further growth is possible, but getting pension ex-

# *Strategy integration comes under debate*

**By Marcia Parker**

New accounting rules and investment models have sparked a debate among pension executives, lawyers and investment managers over strategy integration — whether corporate objectives and pension fund portfolio strategy should go hand in hand.

The concept involves structuring the pension fund's portfolio to match overall corporate strategies.

In the past, some executives have hedged pension portfolios against the company's industry exposure by avoiding stock holdings in that sector. For example, oil company pension funds might avoid oil industry stocks to avoid exposing the fund to the same risks as the sponsoring company.

Strategy integration goes much further, aligning pension fund strategy with larger corporate goals.

Almost everyone acknowledges taking a look at the concept of strategy integration in light of new pension accounting rules and other factors, but after that the camps are divided, on either conceptual or legal grounds.

There are firm believers like William F. Quinn, American Airlines' assistant treasurer, who is implementing the concept at the Fort Worth, Texas, company through its bond portfolio and equity selection.

Mr. Quinn said the fund constructed a dedicated bond portfolio in 1981 and 1982 with the concept in mind. Recently, it liquidated that $1 billion portfolio and set up a dollar duration bond portfolio, correlating the duration of plan assets and liabi-

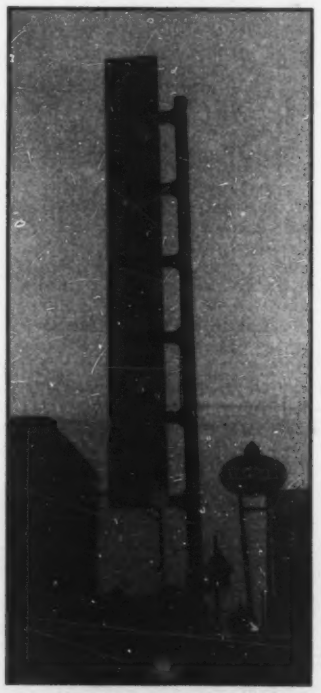
# Texaco plan overfunded



*Although it filed for reorganization under Chapter 11, Texaco's overfunded pension plan leaves the PBGC unaffected.*

**By Barry B. Burr**

Texaco Inc. is one of the few companies with surplus pension assets to file for reorganization and protection from creditors under Chapter 11 of the federal Bankruptcy Code.

Although it has become almost routine for companies to file for Chapter 11 in one breath and dump unfunded pension liabilities on the Pension Benefit Guaranty Corp. in the next, PGBC officials believe that won't be the case with Texaco.

"We are not aware of any exposure to either plan participants or the PBGC as a result of the Chapter 11 filing," Royal S. Dellinger, deputy executive director of the PBGC, commented through a spokeswoman.

According to Texaco's latest annual report, the company's U.S. plans were almost 40% overfunded on a termination basis with about $400 million in surplus assets, which could be used to pay creditors or Pennzoil Co.

As of Dec. 31, the plans had $986 million in accrued vested and non-vested liabilities, using an 8% discount rate, and $1.36 billion in assets.

In addition, many institutional investors with large positions in White Plains, N.Y.-based Texaco or Houston-based Pennzoil are holding their shares for now, despite heavy trading in both stocks after Texaco's filing for bankruptcy-law protection.

"The best case here is really to do nothing," said David Dreman, managing director of Dreman & Embry Inc., New York. He said his firm has added somewhat to the 2.3 million Texaco shares it held as of Dec. 31, although it hasn't purchased any since the April 6 U.S. Supreme Court ruling that ultimately led to Texaco's Chapter 11 filing. Dreman & Embry doesn't hold any Texaco bonds or Pennzoil stock or bonds.

At Batterymarch Financial Management, Boston, John Wagstaff-Callahan, trustee, said, "The decision is to hold the position we have." Batterymarch has 2.1 million Texaco shares, or less than 1% of the total 241.5 million shares outstanding.

Mr. Wagstaff-Callahan said Batterymarch would have taken a loss had it sold its Texaco stock the day after the bankruptcy-law filing, but he wouldn't disclose Batterymarch's average purchase price.

Fayez Sarofim, chairman and president of Fayez Sarofim & Co., Houston, said his firm also is holding its 3.8 million Pennzoil shares.

With 9.2% of Pennzoil's total

# Units . . .

*Continued from page 23*

"Of those 12, if one of the divisions has EDI with a supplier; they have all of the part orders on the electronic purchasing system," Ms. Whitson said.

In addition to the purchase orders, Hewlett-Packard electronically sends its suppliers material forecasts detailing the company's needs in the coming months. Ms. Whitson said six suppliers now receive all documents electronically.

The electronic interchange system has led to some significant time saving, mostly by eliminating mail and document-processing delays, she noted. "We've seen some instances where we've shaved eight to 10 days off the (purchasing) cycle."

Officials at all three companies interviewed noted the EDI projects began in one department, but that an executive steering committee is essential to a broader implementation.

Consumers Power's Mr. Wenzel said special committees helped keep both senior management and department heads informed of developments and alternatives. "It has allayed a lot of the fears they have," he said. "We have tackled a lot of these things up front and gotten them resolved early."

Consumers Power has an executive steering committee of executives from customer service, purchasing, accounting and treasury operations that oversees the general implementation process.

The company also has an EDI project committee, which includes representatives from departments such as accounting, purchasing, treasury and accounts receivable that facilitates the implementation process in each department.

Lucie Cole, manager of data services at Hewlett-Packard and the current head of that company's EDI steering committee, agreed a steering committee can help. "It allows us to establish some policies and coordinate some things," she said. "The steering committee provides a body that can talk with people about EDI in general," she added.

"One thing that shows up a lot with EDI is the need for consulting, whether it is from within the company or from the outside," said Ms. Cole.

Mr. Wenzel said his background in data systems has proved valuable in implementing EDI.

"I wanted to get everyone on board before I started," he said.

At Georgia Power, Mr. Goetzman said he didn't want to establish a steering committee until the electronic system was on-line in the purchasing department.

"We felt the steering committee was a good idea, but it would slow down the approval process," Mr. Goetzman said, adding senior management was informed of the project before it was started.

"Basically, we had the senior management of all the financial areas in for about a two-hour breakfast meeting.

"Once we get it going and things start to expand and it affects more areas of the company, a steering committee absolutely has to be set up. We realize that," he added. ■

# Accounts . . .

*Continued from page 23*

is sending copies of the statements from the 10 banks each month to Phoenix-Hecht's Research Triangle Park, N.C., office, to rekey the data onto a floppy disk. Mr. Stavrolakis said Phoenix-Hecht generally returns the floppy disk within 10 days so Mr. Stavrolakis and his staff can evaluate the data using a Lotus 1-2-3 spreadsheet and IBM-compatible personal computer.

Among the utility's main banks are NCNB National Bank and First Union National Bank, both Charlotte, and Wachovia Bank & Trust Co., Winston-Salem, N.C.

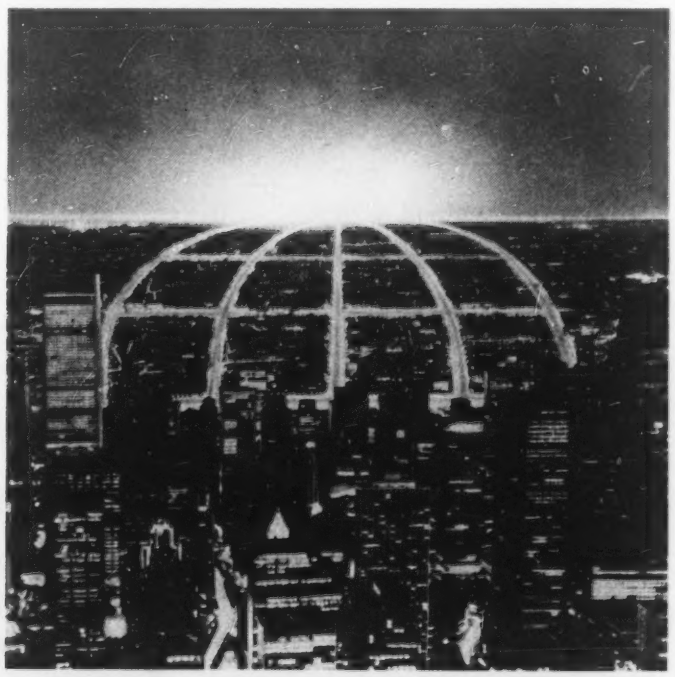
He said the cost involves a monthly charge, generally about $300, for rekeying the data, plus a fixed annual fee. He said Carolina Power, which contracted for a year, negotiated to pay less than the $1,500 list price. He declined to specify the discount.

Mr. Stavrolakis said the utility had looked at an account analysis product sold by Treasury Strategies Inc., Chicago, but at $4,000, "we thought it wasn't worth it."

With the Treasury Strategies product, he noted the utility would rekey the data internally, instead of sending the statements out.

He said he thought the Phoenix-Hecht product was cheaper, even considering the monthly charge for rekeying.

America is poised for new challenges in corporate and investment real estate.



L. J. Hooker International is prepared to meet them.

Corporate and investment real estate is entering an era of sweeping change–from new tax laws to rapidly changing market conditions. There's only one certainty: the coming months will pose an increased challenge for both investors and corporations on the move. And the better informed you become, the better equipped you will be to make critical business decisions.

That's why more and more private and institutional investors and corporations are relying on L. J. Hooker International for corporate and investment real estate services.

We're part of Hooker Corporation, Australia's largest real estate company. Backed by a parent with over 58 years of experience in commercial real estate services, our staff of aggressive, highly expert professionals in 14 major markets across the U.S. offers corporate and investment real estate, consulting and real estate finance services. So if you're looking for a company that knows how to turn major change into profitable opportunity, call L. J. Hooker International today.

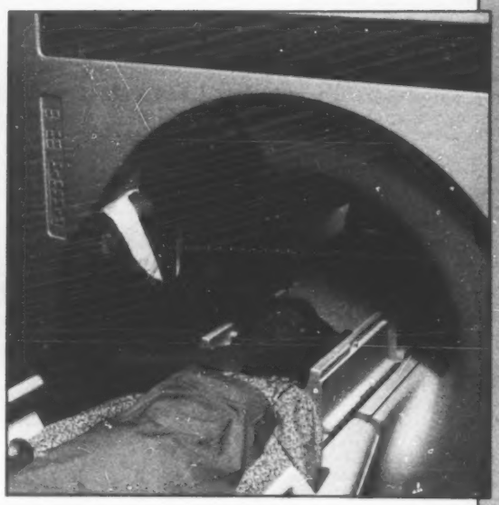
# Top 50 issuers



*Three of America's "generals" all turned to heavy financing in 1986: GTE Corp., left, financed about $2 billion; General Motors Corp., above, financed $1.7 billion to restructure existing debt and raise funds for general corporate purposes; and General Electric Co. went international to get most of its $3.5 billion.*

# Leaders tally 20% of financings

**By Marci Baker**

The top five U.S. issuers in 10 broad industry categories accounted for about 20% of worldwide financing completed by U.S. issuers in 1986, according to data generated by IDD Information Services Inc. for *Pensions & Investment Age*.

Acquisitions and debt refinancings were two major themes motivating the financing activity.

These 50 largest issuers raised at least $85.8 billion — $76.7 billion in public offerings and an estimated $9.1 billion in private placements — domestically and abroad in 1986. That accounts for 20.4% of the $420.3 billion in public and private financings by U.S. issuers worldwide.

The bulk of that financing took place in the United States, where corporations took advantage of the precipitous drop in interest rates and a rousing stock market to raise $71.8 billion. Another $14 billion was generated in overseas offerings of currency-based and Eurodollar securities.

Not surprisingly, the top five issuers in the banking and finance industries accounted for most of the overseas issuing activity. Banks and finance companies, which are continuously scouting financing windows that can provide the lowest cost of issuing, raised almost $10 billion through Eurodollar and foreign currency denominated transactions.

Overall, the top five in those two categories accounted for almost half of the total volume generated by the Top 50.

The five largest banking issuers — Citicorp, J.P. Morgan & Co., Bank of America Corp., Security Pacific and Wells Fargo & Co. — issued an estimated $18.2 billion or 21.2% of the total Top 50 volume.

The leading finance companies — General Motors Acceptance Corp., Ford Motor Credit Co., Asset Backed Securities, Chrysler Financial Corp. and Ryland Acceptance Corp. — raised another $23.4 billion, representing 27.3% of total Top 50 volume.

The financing totals of the Top 50 issuers were based on public and private placement data compiled by IDD and was subsequently verified with the issuer or available public information. In some instances, *P&I Age* was unable to get verification of transactions from the issuer or other sources. In those cases, the transactions were deleted from the universe.

(Also deleted from the rankings because of their quasi-governmental status were the three major agencies, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corp. and the Student Loan Marketing Association. A summary of their financing activities appears on page 48.)

Acquisitions and the refinancing of high-coupon debt were major reasons for companies rising to the top ranks in their respective industries. In 17 cases, acquisitions accounted for all or part of an issuer's financing activities, while in 16 cases, refinancing was cited as a purpose for offerings.

The heated takeover environment of 1986 was most keenly felt in the transportation, retail and service industries. In each, at least three of the top five issuers were there because of acquisitions.

Texas Air Corp. raised more than $1 billion in 1986, almost $500 million of it in common stock and preferred offerings designed to provide funds and expand its equity base to facilitate its acquisition efforts. The company acquired Eastern Air Lines Inc. and People's Express Inc. in 1986.

Safeway Stores Inc. led in the retail arena, with the bulk of its $1.2 billion in capital markets financing done to help take the company private in a $4.3 billion leveraged buy-out led by Kohlberg Kravis Roberts & Co.

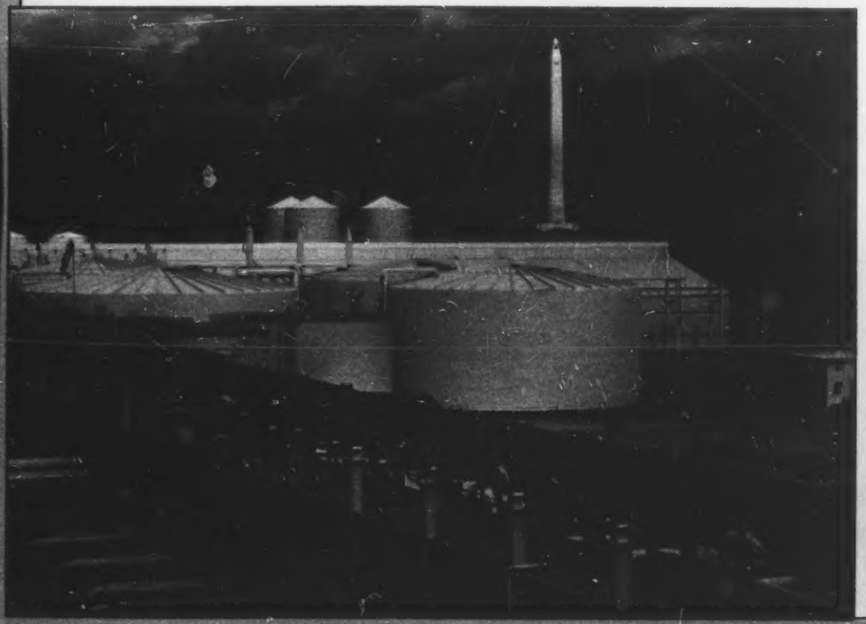
The $3.7 billion buy-out of R.H. Macy & Co. put it in the top slot among service companies. Macy raised $2.7 billion in nonbank debt through the private markets to help pay for the management buy-out.

If acquisition-related activity dominated the top ranks of issuers for these three industries, the trend was felt in others as well. Acquisitions led to financing activity for at least one of the top five issuers in the rail and shipping industry, manufacturing, banking and the health care arenas.

With interest rates reaching their lowest levels in years, many of the Top 50 issuers, like corporations generally, turned to the capital markets to reduce their cost of borrowing. Almost a third raised new debt last year with an eye toward paying off existing issues, replacing floating-rate debt with fixed-rate obligations or refinancing old high-coupon issues with lower interest bonds.

Among the most active in this regard was the utility industry, where a huge volume of debt issued in the high interest rate environment of the early 1980s became available for call in 1986.

*Continued on page 48*



*Occidental Petroleum Corp., one of whose refineries is shown at left, hit the market in March 1986 with debt offerings of $2.5 billion. Officials called it the largest debt offering ever for an industrial company. R.H. Macy & Co. raised $2.7 billion last year to help finance a leveraged buy-out to take the company private.*

## General Motors Acceptance Corp.

| | |
|---|---|
| Total financing | $7,387,369,000 |
| Public offerings: | |
| Debt | $7,381,173,000 |
| No. of issues | 36 |
| Private placements | $6,196,000 |
| No. of issues | 1 |
| Key underwriters | varied |

DETROIT — General Motors Acceptance Corp. used two new types of financings in 1986, a dual-currency yen/Canadian dollar conversion note and a yield curve note.

The automobile financing company also stepped up its efforts to securitize car loans for sale in the capital markets, which GMAC pioneered in 1985.

Richard J. Clout, vice president-borrowing, said the $56.4 million, five-year/five-year optional extension dual-currency bond was issued by GMAC Canada. Investors receive their cash flow in yen for the first five years. If they choose to extend for five years, the security turns into a five-year Canadian bond. If they choose not to extend, they get the principal in Canadian dollars yielding 10⅛%.

For GMAC Canada, the deal is attractive mainly because there is no foreign exchange exposure, Mr. Clout said.

If conditions were right in the foreign exchange market, he said GMAC might do a similar transaction again. He said one attraction was the issue being heavily slanted to the Asian market, and Japanese participation was significant. That is consistent with GMAC's effort to expand its investor base.

The complex $200 million seven-year yield curve note GMAC floated in April 1986 was, in essence, a high-coupon fixed-rate obligation, according to Mr. Clout. The note will pay semiannual 15¼%, less the six-month London interbank offered rate, which meant the investors' yield was variable.

Because GMAC wanted fixed-rate funds, the company swapped the transaction, paid the investment bank six months LIBOR and received a fixed rate. Mr. Clout said the vehicle's usefulness was short-lived because the right conditions were only present for a brief period.

While it wasn't technically an issuer, GMAC and First Boston Corp. scored high points in 1986 for innovative financing using its automobile loans in the new asset-backed securities market.

The biggest deal was GMAC's sale of some $4.2 billion of below-market interest rate loans to First Boston's Asset Backed Securities Corp. It helped reduce the financing subsidiary's increased leverage that came as a result of the low-cost automobile loans.

The $4.2 billion face value of GMAC loans backing the securities was made up of about $2.3 billion of 2.9% loans with a scheduled maturity of 36 months and about $1.9 billion of 4.8% car loans with scheduled maturities of 48 months.

Mr. Clout said the asset-backed securities market was a new one for the company with a somewhat new investor base, and First Boston's Asset Backed Securities Corp. structure opened a new vista. GMAC sold the auto receivables to Asset Backed Securities and ABS issued the straight debt to investors. By year end, GMAC had sold some $8.8 billion in auto loans through that structure.

GMAC raised about $5.245 billion in 21 transactions in the United States and 15 transactions totaling approximately $2.142 billion overseas. The 10 foreign swap-driven deals were denominated in several foreign currencies, including yen, Australian and Canadian dollars and British pounds.

Among the underwriters GMAC used were Morgan Stanley & Co., Merrill Lynch Capital Markets, First Boston Corp. and Salomon Brothers Inc.

## Ford Motor Credit Corp.

| | |
|---|---|
| Total financing | $5,326,127,000 |
| Public offerings: | |
| Debt | $4,845,536,000 |
| No. of issues | 28 |
| Private placements | $480,591,000 |
| No. of issues | 4 |
| Key underwriter | Goldman, Sachs |

DETROIT — Ford Motor Credit Corp. raised $4.15 billion in the U.S. public markets in 20 transactions ranging from $99 million to $299 million and raised almost $1.2 billion in 12 deals in the international markets in 1986.

W.F. Blood, vice president and treasurer, said Ford Motor Credit diversified its financing sources in the international market, which has led to lower rates and lower borrowing costs. The company was able to offer a large volume of issues at attractive rates in different markets.

One of its most noteworthy deals came in October when Ford issued $200 million of debt via book entry, a first in the corporate debt market. The three-year notes were priced at a slight discount to yield 7.17%. Since then, Ford has done several more book-entry issues.

The other innovative offering was its $200 million annuity note issue, which was managed by Goldman, Sachs & Co. It was the first corporate annuity note issue featuring level debt service.

The five-year, $200 million issue provides duration matching for funding amortized assets. Cash flows are structured the same way as a home mortgage, with the debt repaid during the five-year period in equal amounts on a quarterly basis. The investor gets larger payments of interest and principal throughout rather than getting interest only in the early years and all the principal at the end.

Mark Erskine, assistant treasurer-debt management, said the annuity note made sense for Ford Motor Credit as an asset-liability match because the debt liquidates very similar to the way the company's assets liquidate with automobile owners paying down their loans.

The issuer also raised $729.9 million in 10 deals denominated in foreign currencies, including yen, European currency units, Australian and Canadian dollars, British pounds and Swiss francs.

Goldman, Sachs was lead underwriter in 18 of its 32 public offerings for the year. Underwriters tapped to lead other deals included Merrill Lynch Capital Markets, Nikko Securities, Banque Paribas Capital Markets and Salomon Brothers Inc.

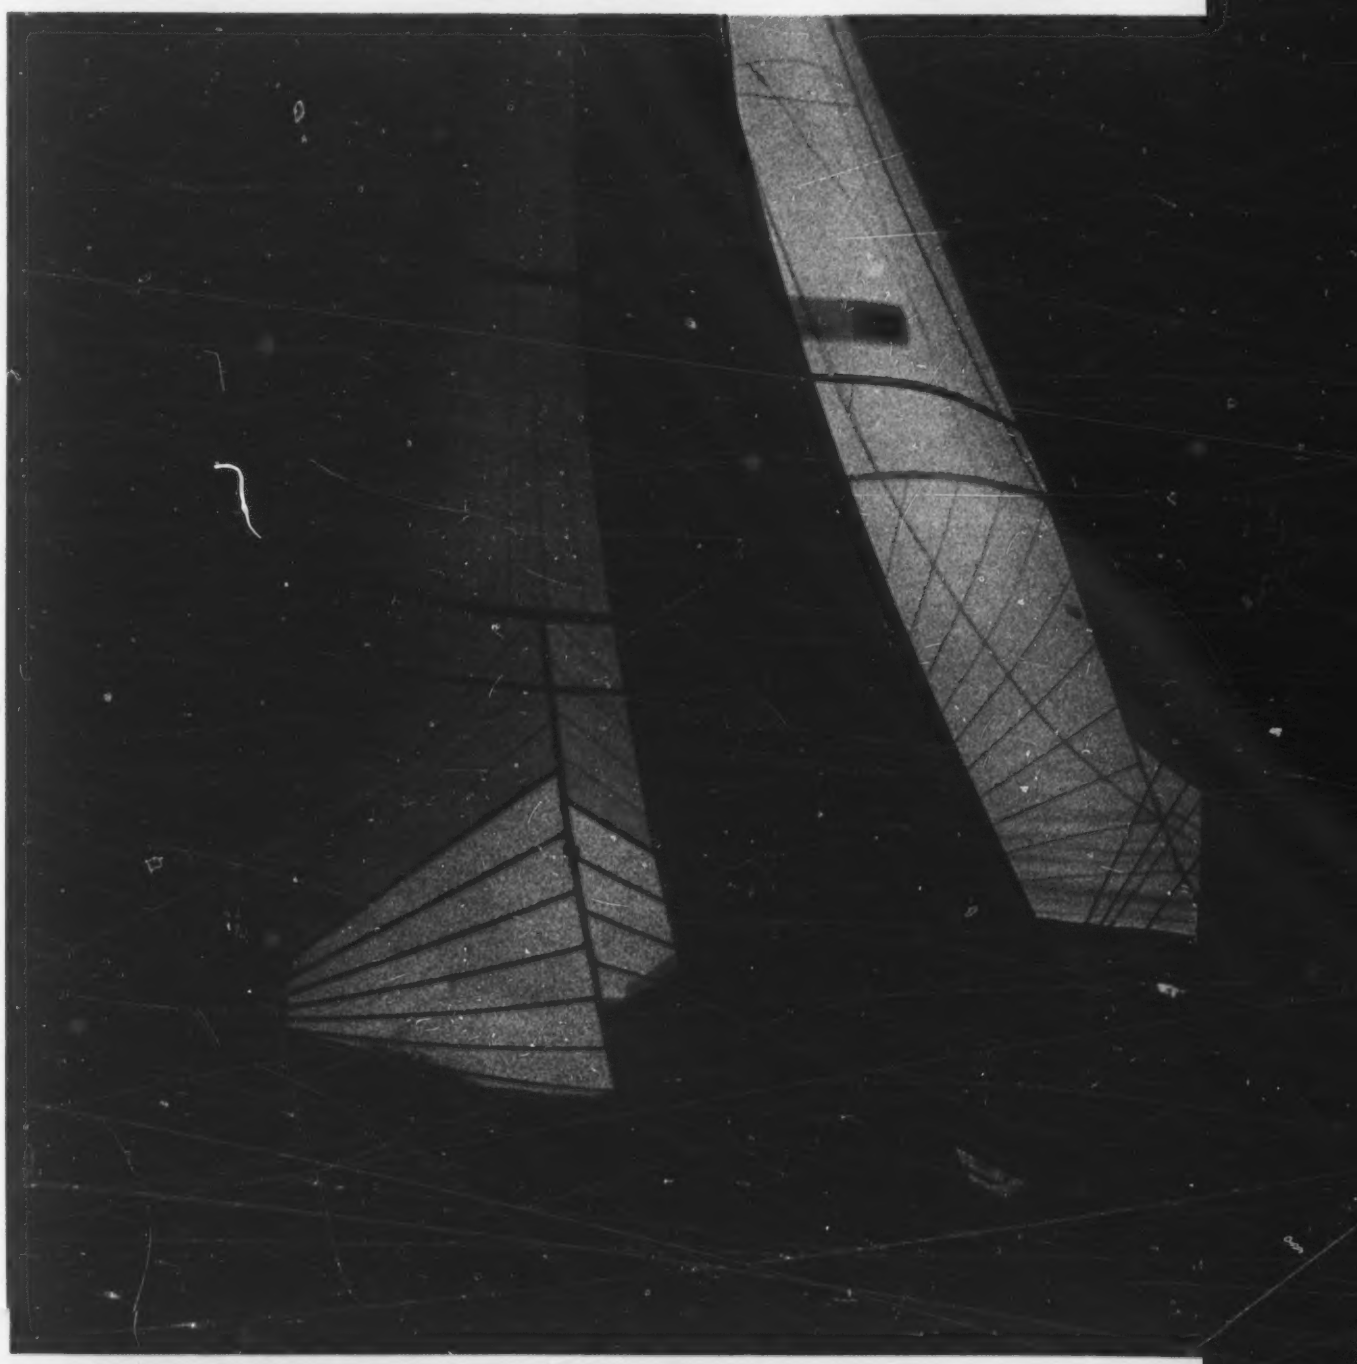
## Asset Backed Securities

| | |
|---|---|
| Total financing | $4,171,025,000 |
| Public offerings: | |
| Debt | $4,171,025,000 |
| No. of issues | 6 |
| Key underwriter | First Boston |

NEW YORK — First Boston Corp.'s Asset Backed Securities Corp. pioneered the emerging asset-backed securities market in 1986, selling a record $4.171 billion in securities backed by auto receivables to hungry investors.

Although listed as six individual issues, the company offered only two issues, each with three tranches, backed by General Motors Acceptance Corp.'s auto receivables.

CREATE THE NEXT MOVE.



First Boston set up this limited purpose finance subsidiary last summer to issue the first multi-class obligations collateralized by automobile-related certificates. First Boston aims to issue more asset-backed securities, using assets other than car receivables.

Hailed as adding a new dimension to the asset-backed securities market, the initial First Boston deal last October defined the potential investing community for these types of securities and introduced a structure for issuing the securities that previously had only been used in the mortgage arena. It was patterned after a collateralized mortgage obligation.

First Boston set up Asset Backed Securities Co., a special-purpose subsidiary, which purchased GMAC's below-market interest rate loans at a discount, then packaged them in a three-tranche offering of securities.

The nearly $4 billion initial offering consisted of $2.095 billion of securities with an average life of 1.05 years, yielding 6.3% on a semiannual basis; $585 million of securities with an average life of 2.2 years and a yield of 6.96%; and $1.32 billion of securities with an average life of 3.07 years and a 7.21% yield.

First Boston increased the size of the first deal to $4 billion from $3.2 billion, then cut the yield on the securities in response to strong investor demand.

Riding on the success of its first deal, First Boston came back to the market in December, selling another $170 million-plus of securities backed by GMAC auto receivables.

The second offering consisted of $95 million of securities with an average life of 1.09 years yielding 6.25%; $25.019 million of securities with an average life of 2.24 years yielding 6.65%; and $60.082 million with an average life of 3.13 years yielding 6.85%.

Investors snapped up the issues immediately, and several tranches of each deal were oversubscribed. Other investment banking firms have since jumped on the bandwagon, and other kinds of receivables are being used as collateral.

## Chrysler Financial Corp.

Total financing ..... $3,500,000,000
Debt ..... $3,500,000,000
No. of issues ..... 31
Key underwriters .... Salomon Brothers, Morgan Guaranty, Merrill Lynch, Banc Paribas

TROY, Mich. — Chrysler Financial Corp. made 15 domestic and 16 European offerings in both the private and public markets that totaled $3.5 billion in medium- and long-term financings. Offerings placed abroad accounted for $1.3 billion of the total.

The company also met its medium- and long-term financing requirements through the private sale of $1 billion in retail installment receivables. These receivables were auctioned to a group of 14 U.S. and foreign banks in the largest sales transaction in company history.

Chrysler also sold $250 million of receivables in a public offering through a subsidiary, Chrysler Auto Receivables Co.

The certificates for the automobile receivables represent an interest in a pool of retail passenger-car and light-truck installment sales contracts. The certificates, issued in July, carry a 7½% coupon and were offered at 99.95% to yield 7.422% on a semi-annual basis.

Proceeds from the offering were paid to Chrysler Financial in partial payment for the installment sales contracts.

Chrysler Financial had $7.7 billion in commercial paper outstanding at year end.

In July, Chrysler Financial purchased the receivables and certain assets of the inventory financing division of Westinghouse Credit Corp., which was renamed Chrysler First Wholesale Credit Inc. The Westinghouse unit had net receivables outstanding of $423.3 million July 1.

## Ryland Acceptance

Total financing ..... $2,964,831,000
Public offerings:
Debt ..... $2,964,831,000
No. of issues ..... 41
Key underwriters ..... First Boston, Shearson Lehman, A.G. Edwards, Wheat, First

RICHMOND, Va. — Ryland Acceptance Corp. issued $2.9 billion of securities in 1986, mostly collateralized mortgage obligations.

Ryland Acceptance, a unit of Ryland Mortgage Co., acts as a conduit for marketing mortgage-backed securities to the secondary market. The parent company, The Ryland Group Inc., builds single-family homes.

The debt issued by Ryland Acceptance is secured by mortgage-backed securities and mortgage loans acquired from RMC and by notes receivable from others that are pledged as collateral.

Ryland Acceptance received $8 million in bond participation fees, a 320% increase from the $1.9 million received in 1985.

Proceeds from the sale of the bonds are used by the issuer to purchase mortgage loans from Ryland Mortgage and to fund loans to the finance companies participating in the issuance of the bonds.

# Banks

## Citicorp

Total financing ..... $9,231,214,000
Public offerings:
Common stock ..... $232,500,000
No. of issues ..... 1
Debt ..... $8,051,314,000
No. of issues ..... 43
Private placements ..... $947,400,000
No. of issues ..... 14
Key underwriters ..... varied

NEW YORK — Citicorp had two unusual offerings in 1986, variable-coupon renewable notes, or VCR, and perpetual debt in the form of subordinated bank adjustable-rate capital securities, called BANCS.

The VCR, as it was dubbed, was first used by Citicorp in June and investors snapped up the issue within hours. It is designed to give issuers long-term funding at short-term rates.

Since then, the VCR has caught on and Goldman, Sachs & Co., which managed Citicorp's issue, has underwritten several others.

Citicorp's $500 million offering basically was a floating-rate note. Robert M. Butcher, vice president, explained the coupon floats 75 basis points over the 91-day Treasury bill rate until the issuer is informed of the investor's intention to redeem the note. Then the coupon drops to 25 basis points over the Treasury bill rate for three quarters.

The initial maturity is one year, but at the end of each quarter when the coupon is paid the security automatically renews itself for an additional quarter unless the holder tells the issuer it wants to sell the bonds on the secondary market or put them back to the company.

Investors are attracted because the latter feature gives the security the potential to be held indefinitely.

The longer the VCRs are outstanding, the more the savings to the issuer, because the cost of is-

1-800-544-3600

suing longer than one-year debt probably would be much higher than the 75 basis points over the T-bill rate.

Citicorp also raised $500 million in primary capital in November in the Euromarket, with the perpetual-debt BANCS that cost 15 to 20 basis points more than traditional primary capital debt. Although it was more expensive, the bank has 30 years before investors can put the bonds back and exchange the securities for common or preferred stock.

The bonds' rate was set to float 37.5 basis points over the London interbank offered rate. The floating rate was another advantage to Citicorp because the bank could match it with floating-rate bank assets.

Citicorp used the proceeds from the sale of the BANCS for corporate purposes, principally to fund investments in or extensions of credit to its banking and nonbanking subsidiaries and affiliates.

Mr. Butcher said the financing vehicle was a response to the federal government guidelines allowing bank holding companies to issue perpetual debt and count it as primary capital. He said the deal was done in the Euromarket because British clearing banks had done it before.

Goldman, Sachs was lead underwriter for the offering of the $500 million of floating-rate perpetual bonds. Citicorp and Merrill Lynch Capital Markets were co-underwriters.

For its other offerings, Citicorp tapped Salomon Brothers Inc.; First Boston Corp.; Goldman, Sachs; Daiwa Securities; and Merrill Lynch.

### J.P. Morgan & Co.

| | |
|---|---|
| Total financing | $4,559,456,000 |
| Public offerings: | |
| Debt | $2,454,833,000 |
| No. of issues | 19 |
| Other | $2,104,623,000 |
| No. of issues | 34 |
| Key underwriters | varied |

NEW YORK — J.P. Morgan & Co. issued long-term fixed- and floating-rate debt totaling $1.02 billion in 1986. At the end of the year, $574 million of that amount constituted secondary capital.

Both the availability of long-term funds at attractive rates and the bank's liquidity management strategy influenced the decision to issue long-term debt.

Interest-bearing deposits averaged $34.9 billion in 1986 and $31.6 billion in 1985. The increase was in large part due to the issuance of medium-term deposit instruments in the domestic and Euromarkets.

J.P. Morgan was an active issuer in the Euromarket. For example, the company in June offered $100 million of 8½% notes due October 1993. The subordinated notes pay no interest until October 1991, when 5.25 years of accrued simple interest will be payable. An annual interest rate of 8½% will be paid after October 1991.

In July, J.P. Morgan offered the first subordinated Euroyen issue approved by Japan's Ministry of Finance. The company sold 20 billion yen in subordinated notes due 1994. The notes, which raised the equivalent of $125 million, were priced at 101⅜% and carry an annual coupon of 6%.

J.P. Morgan made another yen offering in October when the bank's London office sold $100 million of five-year floating-rate deposit notes in the Euromarket. The notes were priced at 101%.

The notes pay interest semiannually at 0.1 times the sum of six-month yen London interbank offered rate and ⅛% for the first two years, and at six-month yen LIBOR plus 2.15% after that.

Also in October, the company announced the offering through its London office of $100 million 7¼% deposit notes sold in the Euromarket. The notes were priced at 100⅝%.

Domestic offerings include $300 million of five-year senior notes carrying a semiannual coupon of 7.1%.

J.P. Morgan's underwriters include First Boston Corp.; Morgan Guaranty Trust Co.; Merrill Lynch Capital Markets; Salomon Brothers Inc.; E.F. Hutton & Co.; The Nikko Securities Co.; Shearson Lehman Brothers Inc.; Bear Stearns & Co.; PaineWebber Inc.; Goldman, Sachs & Co.; Nomura Securities International Inc.; and Kidder, Peabody & Co.

### Bank of America Corp.

| | |
|---|---|
| Total financing | $1,891,643,000 |
| Public offerings: | |
| Debt | $514,000,000 |
| No. of issues | 1 |
| Private placements | $1,377,643,000 |
| No. of issues | 9 |
| Key underwriters | varied |

SAN FRANCISCO — Bank of America Corp.'s most unusual and innovative offerings in 1986 were Certificates of Automobile Receivables, known as CARS.

The bank structured public offerings and private placements of more than $1.35 billion of CARS, which were designed by Salomon Brothers Inc. The certificates represent interests in a pool of motor vehicle retail installment sale contracts and security interests in those vehicles.

There are several benefits to the bank, including providing a cost-effective source of medium-term funds. It also allows the bank to leverage its capital base across a broader range of activities. The bank also has the flexibility to decide if it wants to hold or distribute the loans.

Townsend Walker, vice president-manager of retail asset sales, said pooling and securitizing consumer loans is a major part of the bank's strategy as it tries to capitalize on its capability to originate quality retail loans.

The bank continues to service the loans and to maintain customer relationships while the proceeds of the offerings are used for relending. He said that through CARS, the assets flow to whichever investors have the highest demand to hold them at a given time.

The largest of Bank of America's three 1986 CARS transactions was a $737 million private sale of auto loans and contracts to Bankers Trust Co., which was completed at year end. Bank of America and Bankers Trust arranged the offering. The security was unrated. The certificates had a coupon of 6.82%.

Bank of America also structured a public offering of $514 million of CARS in December. Salomon Brothers Inc. led the underwriting syndicate offering the certificates, which had a coupon of 6.8%. It was rated AAA by both major rating agencies.

The $514 million public offering and the $737 million private sale were the largest transactions of their kind to date by a commercial bank.

Bank of America's smallest offering was a $100 million issue of CARS that was privately placed by Salomon. It was rated AAA by Standard & Poor's Corp. The certificate had a coupon of 7.65%.

All three CARS had a five-year stated maturity and an average life of 1.5 years.

Mr. Walker said the bank plans to expand into other asset-backed securities. In early 1987, the bank structured a public offering of $400 million of certificates in a portfolio of receivables selected from its California Classic credit card accounts. The bank said it was the first public transaction

LOS ANGELES — Security Pacific Corp. issued $616 million of its $1.3 billion in offerings in non-dollar-denominated debt, including the first five-year, floating-rate Australian-dollar issue.

Kenneth Sherman, senior vice president and assistant treasurer, said the bank's $123.7 million (U.S.) floating-rate issue, which was priced at par and non-callable for three years, was underwritten by Salomon Brothers Inc. The notes pay quarterly interest at a rate of 100 basis points below the 90-day Australian bank bill rate. Security Pacific was able to get floating-rate U.S. dollars in return for the Australian dollars at a lower cost than any floating rates of the past year. Mr. Sherman said the floating rate note was a funding alternative to its U.S. commercial paper program and the proceeds were used to pay down that debt.

Security Pacific also offered a $91 million Dutch gold floating-rate note, two dutch auction preferred stock deals, and some debt denominated in Australian and New Zealand dollars and yen.

The bank issued $422.2 million overseas and $901.6 million in the U.S. market, including $843.2 million in public offerings and $58.4 million in private placements.

### Wells Fargo & Co.

| Debt | $557,775,000 |
| No. of issues | 5 |
| Key underwriter | Morgan Stanley |

SAN FRANCISCO — Wells Fargo & Co. raised more than $1.2 billion in 1986, including a large chunk to finance its $1.07 billion acquisition last May of Crocker National Corp. from Midland Bank PLC.

In conjunction with the acquisition, Wells Fargo issued $342 million in common stock, $177.3 million in dutch auction preferred stock, and $73.5 million in adjustable-rate preferred stock. The balance was funded by borrowings. The financing for the Crocker acquisition was designed to raise Wells Fargo's capital ratios. The combined company's primary capital position was stronger at year-end 1986 than 1985.

Proceeds from the rest of the bank's traditional issues were used for general corporate purposes. One issue was a $57.9 million New Zealand dollar-denominated note.

Wells Fargo & Co. is the holding company and does the bulk of the financing for itself and Wells Fargo Bank.

## Manufacturing

### General Electric Co.

| | |
|---|---|
| Total financing | $3,491,236,000 |
| Public offerings: | |
| Debt | $3,491,236,000 |
| No. of issues | 12 |
| Key underwriters | varied |

STAMFORD, Conn. — Although lower U.S. interest rates led many issuers to rely on basic domestic debt financings in 1986, General Electric Co. turned often to Eurodollar and currency-related deals for its financing.

The issuer netted $3.5 billion in 12 debt offerings in 1986, with proceeds used for general corporate purposes and to help finance its $6.8 billion acquisition of RCA Corp. Eight of those transactions were overseas or currency-based transactions. The company's four domestic-dollar deals, however, accounted for $1.8 billion or 51% of its total financing volume.

In its overseas financing activities, GE dipped into the markets three times to issue extendible securities totaling $800 million.

In March and April, the company offered $300 million of 8% Eurodollar extendible notes due 2006, $300 million of 7⅜% extendibles due 2006 and $200 million of 7% extendibles due 1998.

The interest rates on the three issues will be subject to annual adjustment at the company's option beginning in 1993, 1991 and 1989, respectively. In addition, GE will have the option to redeem some or all of the issues at the reset dates, once they begin. Investors get the option to hold the securities or put the bonds back to the company and have their principal returned.

GE also was among U.S. issuers tapping the emerging Australian-dollar market last year, issuing in May about $108 million of three-year notes. The 12¼% notes netted GE about $106 million after underwriting fees. To minimize currency risk, the company swapped its Aussie-dollar obligation with another entity to obtain a fixed U.S.-dollar interest cost of 7.67%.

Other international GE offerings included a Euroyen deal, providing proceeds of $202.4 million; two straight Eurodollar deals netting $466.2 million; and an offering of Eurodollar discount notes with warrants that provided proceeds of almost $110 million.

GE was among issuers to flood the market with debt offerings in the first part of the year in an effort to take advantage of the sharp drop in interest rates. It launched a $300 million of 30-year sinking fund debentures in mid-March carrying a coupon of 8⅝%. It soon followed with three shorter-term deals each totaling $500 million. Two consisted of three-year notes with 7⅛% and 6⅞% coupons, while the third consisted of five-year notes carrying a 6⅞% coupon.

Lead underwriters on GE's domestic transactions included Merrill Lynch, Salomon Brothers Inc. and Morgan Stanley & Co. Inc. Its lead managers on overseas deals included Daiwa Securities, Yamaichi International and Nikko Securities Corp.

### BCI Holdings Corp.

| | |
|---|---|
| Total financing | $2,500,000,000 |
| Public offerings: | |
| Debt | $2,500,000,000 |
| No. of issues | 4 |
| Key underwriter | Drexel Burnham |

CHICAGO — BCI Holdings (formerly Beatrice Cos. Inc.) raised $2.5 billion in the U.S. debt markets in 1986 to help finance the $6.2 billion leveraged buy-out of the company by Kohlberg Kravis Roberts & Co., New York.

The April debt financing, solely managed by Drexel Burnham Lambert Inc., consisted of four issues, all priced at par: $600 million of 11%, 10-year senior notes; $800 million of 12½%, 12-year senior subordinated debentures; $950 million of 15-year subordinated debentures with a 12¾% coupon; and $150 million of 15-year floating rate subordinated debentures with an 11⅛% coupon.

In addition to the high-yield debt offerings, financing for the buy-out included $4.1 billion of bank debt and $497 million of equity provided by KKR, BCI Chairman Daniel Kelly and other members of BCI management.

Proceeds from the debt offerings were used to pay off old Beatrice debt, working capital and to pay for expenses related to the leveraged buy-out.

Terms of the bank debt called for BCI to sell off $1.45 billion of assets within 18 months to repay some of the bank loans. BCI proceeded with asset sales almost immediately.

By year end, asset sales completed or announced included its Avis Car Rental unit, its knitwear division, its soft-drink division and the International Playtex division. Beatrice Leasing Co., Webcraft, the warehouse division and the dairy products unit also have been sold.

Some $1.3 billion has been realized by the sales, with proceeds going to pay down bank debt. The company will net another $2.5 billion when all the transactions are closed.

Among BCI's cost-cutting measures was the exchange, in August, of redeemable preferred stock outstanding prior to the buy-out for $1.25 billion of 15¼% exchange debentures, according to Morgan Stanley & Co. research. The swap will provide BCI with a $90 million savings annually. BCI realized another $20 million savings from the renegotiation of its bank debt.

### General Motors Corp.

| Total financing | $1,681,059,000 |
| Public offerings: | |
| Debt | $1,681,059,000 |
| No. of issues | 7 |
| Key underwriters | varied |

DETROIT — Falling interest rates led to stepped-up capital markets financing activity by General Motors Corp. in 1986, as the company sought to restructure existing debt with the cheaper issues and raise funds for general corporate purposes.

The company was among issuers flocking to debt markets the first part of the year to take advantage of the low yields offering the cheapest financing costs since the late 1970s. Overall, GM raised almost $1.7 billion in seven offerings in the United States and abroad.

Like others, its theme for domestic financings was "back to basics."

GM's first deal of the year was a $500 million offering in mid-April of 30-year bonds carrying an 8¼% coupon and a traditional 10-year call feature. Priced to yield 8.2%, the deal provided the issuer with $496 million in net proceeds. Two subsequent domestic offerings were shorter-term transactions and raised almost $700 million.

Overseas, GM had more esoteric taste. The company raised $481 million in four overseas offerings last year — all currency-related transactions.

In May, it stepped into the Swiss market for the time to raise $165 million with an offering of securities using the controversial foreign interest payment structure.

The securities are perpetual, reverse dual-currency bonds whose interest, in contrast to conventional dual-currency issues, is payable in dollars and whose principal is payable in Swiss francs. The deal provided investors the option to put back the bonds to the company and receive their principal every 10 years at a fixed currency exchange rate. But investors must take the loss if that pre-set exchange rate at issuance is higher than the exchange rate in effect at the time the put can be exercised. Meanwhile, the bonds also allow the company to call the bonds every 10 years at the same exchange rate — a feature that provided built-in protection against currency risk.

Foes of the structure argued the issuers effectively were getting very cheap 10-year financing at the expense of investors. The securities put too much currency risk on the shoulders of investors, they argued, even though the investors were compensated for the

risk in the form of higher Swiss-market coupon rates. The GM issue carried a 7% dollar-denominated coupon, scheduled to be reset every 10 years at 50 basis points below the prevailing 10-year U.S. Treasury rate.

The company launched three more foreign currency deals before the year was out: a deutsche mark-denominated offering with proceeds of $91.2 million, a Euroyen offering netting $132 million and another Swiss franc deal netting $100.5 million.

Lead underwriters included Salomon Brothers Inc. and Morgan Stanley & Co. Inc. in the United States, and Credit Suisse and Credit Suisse First Boston overseas.

## The Henley Group

| | |
|---|---|
| Total financing | $1,224,000,000 |
| Public offerings: | |
| Common stock | $1,224,000,000 |
| No. of issues | 1 |
| Key underwriters | Lazard Freres, First Boston, Merrill Lynch |

LA JOLLA, Calif. — The Henley Group made its way into the top five manufacturing issuers of 1986 with the largest initial public stock offering ever.

The company raised $1.2 billion through the sale of 60 million shares of common stock at $21.25 a share in May. The total was a far cry from the $200 million Henley officials said they would raise in March.

But unbridled demand from institutional investors and the bull market led the company to increase its stock offer to $500 million in April and ultimately to $1.2 billion in May. About 95% of the offering was sold to institutional investors.

Size wasn't the only distinguishing factor of the Henley deal. Equally compelling was that such strong demand could be created for a company on the merits of its management team rather than a track record as an independent entity.

The Henley Group comprises 35 unrelated, mainly unprofitable businesses spun off from Allied-Signal Inc. Its core businesses are health-care technology, energy technology, engineering, construction materials and chemicals.

The group's strongest selling point is Michael Dingman, its chairman and chief executive officer, who has an enviable reputation as a corporate manager. Mr. Dingman had built Wheelabrator-Frye into a $1.5 billion company through acquisitions before selling out to The Signal Cos., which later merged with Allied Corp.

In building up Henley, the management's strategy is one of selective acquisition and divestiture. Proceeds from the IPO, along with a $3 billion revolving credit agreement established with a syndicate of U.S. and foreign banks in December, will be used toward this goal.

## Union Carbide Corp.

| | |
|---|---|
| Total financing | $1,015,000,000 |
| Public offerings: | |
| Common stock | $650,000,000 |
| No. of issues | 1 |
| Private placements | $200,000,000 |
| No. of issues | 1 |
| Other | $165,000,000 |
| Key underwriters | First Boston |

DANBURY, Conn. — Union Carbide Corp. came full circle in 1986, beginning the year with a recapitalization plan that put an additional $2.5 billion of debt on its books and ending the year with another recapitalization plan that wiped out virtually all of that debt.

The bulk of the company's $1 billion in capital markets and private placement financings during the year were related to its year-end debt reduction drive.

In November 1986, Union Carbide launched a tender offer for $2.5 billion of high-interest debt issued in January as part of a recapitalization plan designed to enhance shareholder value and repel a hostile takeover by GAF Corp. Although initial cash for the offer came from $3 billion in bank loans and a short-term bridge facility, Union Carbide immediately turned around to repay some of those loans with $850 million in proceeds from a common stock offering and a private placement.

The January recapitalization called for the repurchase of 38.8 million shares in exchange for $776 million cash and $2.5 billion in 13½% to 15% debt securities. In connection with the exchange offer, the company also sold its consumer products businesses and declared a special cash dividend to stockholders for the excess sale proceeds over the businesses' book value.

The exchange offer bonds increased Union Carbide's debt load to about $5.5 billion, with interest expense in 1986 almost doubling to $543 million.

To reduce interest costs and get out from under covenants tied to the bonds that limited its ability to restructure, Union Carbide launched another recapitalization in November. It offered to pay bondholders a 24% premium to surrender the $2.5 billion in debt, at a total cost of $3 billion.

Initial financing for the tender offer came from $2 billion in two-year bank loans with an initial interest rate of about 7.9% and $976 million in a short-term bridge loan from First Boston Corp., which had an initial rate of 11½%.

But by year end, Union Carbide had reduced these obligations to $1.1 billion and $125 million, respectively, with proceeds from its stock offering and private placement of debt.

In December, the company issued 30 million shares of common to the public at $22.50 a share to net $650 million. Another $200 million was raised through the private issuance of debt — $95 million of 8.6% of senior notes due 1989 and $105 million of 9.1% senior notes due 1990. Another $875 million was repaid from the proceeds from earlier sales of assets and the sale-leaseback of its Danbury headquarters.

This month, Union Carbide moved to pay off the remaining $125 million bridge loan and further reduce its bank debt through a $650 million offering of debt.

Union Carbide expects to save more than $100 million annually in interest expense as a result of the latest recapitalization. The interest savings is expected to offset any dilution that otherwise would have occurred through the December issuance of stock.

Outside of its recapitalization-related financings, Union Carbide also completed a number of project and lease-related financings last year. At least $165 million was raised through private placement transactions with investment banks, including $125 million interim financing with Salomon Brothers Inc. for a cogeneration facility.

Some of these types of financings are not included in Union Carbide's total because they were not arranged through an investment bank. For example, the company did not use a banker on the $350 million sale-leaseback of its headquarters. This transaction was the company's largest lease-related deal of the year.

*Pensions & Investment Age*'s directory of investment advisers will be published May 25.

Who offers your defined contribution plan participants the flexibility of daily telephone transfers between funds?

The same company who offers superior investment performance.

As a leading provider of 401(k) and other defined contribution plan services to more than 1,000 corporations across the country, Fidelity Investments offers a wide range of investment management and client services designed to meet the needs of both you and your employees.

**A Wide Array Of Top Performing Funds.** With more than $70 billion in assets under management, Fidelity offers a broad choice of performance driven mutual funds ranging from equity funds like Fidelity Magellan Fund and Fidelity Equity-Income Fund, to money market funds and GIC's. The funds are available on a *no-load* basis to plans with more than 200 eligible employees. And, as market conditions or personal investment objectives change, plan participants have the flexibility to transfer their investments among available mutual funds by telephone on any business day.

**Comprehensive Recordkeeping.** Fidelity's recordkeeping services are designed specifically to reduce your administrative burden. Not only can your employees call us directly to transfer existing balances, they can also redirect future contributions by telephone. Our state of the art system and experienced employee benefit professionals work to ensure timely and accurate reports for both you and your employees.

**Employee Communications Support.** Fidelity will work with you to develop the communication materials needed to support your employees from enrollment through retirement. We'll help you explain your program and the available investment options clearly and effectively. In addition, your employees can call toll-free 24 hours a day, seven days a week and talk with a knowledgeable Fidelity representative about available investment options.

For more information about Fidelity's defined contribution plan services, including fund prospectuses covering management fees and expenses, please call Jeffrey Paster, Corporate Market Manager, at 1-800-345-5033. In Massachusetts, call collect 617-570-5692.

## R.H. Macy & Co.

Total financing.....$2,700,000,000
Private placements.....$2,700,000,000
No. of issues.....7
Key underwriter.....Goldman, Sachs

NEW YORK — The financing for the $3.7 billion leveraged buy-out of R.H. Macy, one of the largest buy-outs in retail history, was raised by Goldman, Sachs & Co. through private placements and public offerings.

Macy completed its financing and went private in July after nine months of negotiations.

Goldman raised the financing via a $282.5 million private placement to purchase the preferred stock and a $17.5 million private placement to acquire the common stock.

The investment bank also arranged $300 million of 16.5%, 20-year deferred interest, junior subordinated discount debentures due 2006 with a face value of $910 million; a $400 million private placement of 14.5%, 12-year senior subordinated debentures; and $650 million of 14.5%, 15-year subordinated debentures due 2001. Goldman also did a $250 million private placement of 13.5%, 10-year senior notes and lined up an $800 million secured loan backed by real estate.

In addition, the investment bank arranged a $510 million six-year bank loan and a $225 million, one-year loan secured by shopping centers.

General Electric Credit Corp. sold $400 million in 14.5% senior subordinated Macy debentures due 1998 in a public offering soon after it had provided that debt for the buy-out. GECC effectively reduced the cost of its preferred stock holding through the public sale of the 14.5% bonds.

## Wickes Cos.

Total financing.....$1,380,000,000
Public offerings:
Debt.....$1,380,000,000
No. of issues.....1
Key underwriter.....Drexel Burnham

SANTA MONICA, Calif. — Wickes Cos., which has been on an acquisition binge, raised $1.38 billion in 1986 to finance its acquisition of Collins & Aikman Corp. and several retail home-improvement and building materials chains from W.R. Grace & Co.

The retailer and maker of consumer products issued $1.38 billion in 15-year, 11⅞% senior subordinated debentures in the U.S. public market to finance the $1.16 billion acquisition of Collins & Aikman, a New York-based producer of textile products and wallcoverings.

About $200 million was used to purchase several chains, including Handy Dan Colorado, Ole's Home Improvement Center, Orchard Supply Hardware and Cashways and Allwoods.

## Turner Broadcasting System Inc.

Total financing.....$1,203,258,000
Public offerings:
Debt.....$1,203,258,000
No. of issues.....6
Key underwriters.....Drexel Burnham

ATLANTA — Turner Broadcasting System Inc., which raised $1.2 billion to finance its $1.5 billion acquisition of MGM/UA Entertainment Co., later was forced to sell off the bulk of MGM's assets to pay off the debt.

The securities Turner sold initially to finance the acquisition included $440 million principal amount of Turner Broadcasting serial zero-coupon senior notes due 1989 to 1992; $600 million principal amount of extendible senior notes with initial coupon 12.5% putable; and $360 million principal amount of 14% senior subordinated notes due 1993.

The Series A-D zero-coupon notes were issued based on yields to maturity of 13.25%, 13.45%, 13.65% and 13.855% respectively, based on semiannual compounding of interest. Net proceeds were $247.2 million. The extendible notes were issued at 100% of principal amount.

The extendible notes initially bear quarterly interest at an annual rate of 12½%. The rate was slated to rise half a percentage point quarterly for each quarter the notes are outstanding.

The senior subordinated debentures were issued at 98.905% of principal amount to yield 14¼%.

In addition to the $1.2 billion it paid for MGM, Turner assumed about $800 million in debt.

Shortly after Turner completed the merger last year, it became evident the company would have difficulty meeting some of the early debt obligations. To raise money, Turner sold key MGM assets. Lorimar-Telepictures Corp. acquired MGM's film and laboratory and real estate units from Turner for $190 million. The film and television distribution company and MGM logo were sold to United Artists Corp. for $300 million.

Turner has since paid down approximately $450 million in debt from the sale of assets and is negotiating with several cable television companies to invest equity so that the preferred stock issued in connection with the MGM acquisition can be repaid.

## Fox Television Co.

Total financing.....$1,148,000,000
Public offerings:
Preferred.....$1,148,000,000
No. of issues.....1
Key underwriters.....Drexel Burnham, Allen

NEW YORK — In what many view as the most complex and unusual issue of 1986, Rupert Murdoch acquired Metromedia Broadcasting Corp. properties, mainly through a Fox Television Stations Inc. preferred stock issue.

The structure of the deal was so hard to understand it took a 400-page plus prospectus to explain the plan to investors, securities analysts and regulators.

Fox needed $2 billion to purchase Metromedia's seven television stations and two other properties.

As part of the financing, Fox issued $1.15 billion in preferred stock and treated it as debt for tax purposes but equity for accounting and corporate purposes. The prospectus called the security increasing rate exchangeable guaranteed preferred stock.

Drexel Burnham Lambert Inc. and Allen & Co. structured the transaction so the preferred pays an increasing dividend — 13% the first year, 14% the second and 15% subsequent years until its maturity in 1996.

Fox retained the option to redeem the preferred at any time, or exchange it for debentures of similar terms in News America Holdings Inc., a unit of News Corp. The preferred is subordinate to News Corp.'s and its units' existing debt.

If after three years the entire offering has not been redeemed, holders begin acquiring rights that would convert each preferred stock or debenture into at least $1,000 of News Corp. common or cash based on the stock's value.

Fox used the preferred to help finance its assumption of Metromedia junk bonds, whose market value is estimated at $1.465 billion. The rest of the financing came from bank borrowings and from the sale to Hearst Corp. of one of the television stations.

## Coca-Cola Enterprises

Total financing.....$1,118,838,000
Public offerings:
Common stock.....$1,118,838,000
No. of issues.....1
Key underwriter.....Allen & Co. Inc.

ATLANTA — Coca-Cola Enterprises Inc. went to flat from fizzy in an initial public offering that brought $400 million less than the company expected.

Although the preliminary prospectus estimated the offering price between $21 and $24 a share, the deal finally came through at $16.50 a share. Sale of the common stock in November brought net proceeds of $1.1 billion instead of the $1.5 billion originally expected by the company.

Coca-Cola Enterprises, formed by The Coca-Cola Co. and managed by former Coke executives, is a group of Coke bottlers that previously were independently owned.

The Coca-Cola Co. decided to consolidate the bottling operations it acquired after JTL Bottlers and Beatrice Bottlers were offered for sale last year. Coca-Cola Enterprises emerged as the largest bottler of Coca-Cola soft-drink products in the world.

Proceeds were used to reduce bank debt from the purchase of JTL Bottlers and Beatrice Bottlers. The acquisition of two other bottlers were financed by the proceeds, which also were used to provide working capital for Coca-Cola Enterprises.

Allen & Co. Inc. served as lead manager for the public offering while First Boston Corp., Salomon Brothers Inc. and Shearson Lehman Brothers Inc. acted as co-managers.

# Utilities

## GTE Corp.

Total financing.....$1,999,752,000
Public offerings:
Debt.....$1,999,752,000
No. of issues.....19
Key underwriters.....varied

STAMFORD, Conn. — Improved cash flow and the $420 million proceeds from Siemens AG's interest in a joint venture combined to reduce GTE's reliance on external financing in 1986.

In December, GTE used a major part of the proceeds from Siemens AG to extinguish $286 million of long-term debt carrying coupons of 11.95%, 12.25% and 12.5%.

External sources provided 8.7% of the company's financing needs last year compared with 15.5% in 1985.

But the company, taking advantage of a general decline in interest rates and upgrades from the rating agencies, financed a record $2.3 billion ($2 billion net proceeds) in the capital markets.

GTE made 19 offerings, selling debt that ranged in maturity from three to 40 years. GTE Finance made the only foreign currency deal among the company's subsidiaries, a dual-currency 6.5% 20-year Swiss franc offering that netted $30 million.

The finance unit also made two Eurodollar offerings, a three-year deal carrying an 8% coupon and a five-year deal carrying a 7.25% coupon, that together brought proceeds of $303 million.

General Telephone-California, General Telephone-Pennsylvania and General Telephone of Wisconsin all brought 40-year issues that carried coupons of 9.38%, 8.88% and 8.5%, respectively.

GTE, late in the year, authorized purchase of up to 10 million common shares in an anti-takeover move following reports that a buyer was accumulating company stock. The company also announced plans to increase the number of authorized common shares to 750 million from 280 million, reduce the par value to 10 cents a share from $3.33⅓ and split its common stock on the basis of three shares for two.

Five underwriters were selected to lead manage two or more issues in 1986: Morgan, Stanley & Co.; Shearson Lehman Brothers Inc.; PaineWebber; Dean Witter Reynolds Inc.; and First Boston Corp.

Underwriters that served as lead managers on one deal for GTE last year were: E.F. Hutton & Co.; Salomon Brothers Inc.; Goldman, Sachs & Co.; S.G. Warburg & Co.; Dillon, Read & Co.; Soditic; and Daiwa Securities.

## Pacific Gas & Electric

Total financing.....$1,657,188,000
Public offerings:
Debt.....$1,657,188,000
No. of issues.....9
Key underwriters.....Morgan Stanley, Goldman Sachs, First Boston

SAN FRANCISCO — Pacific Gas & Electric Co. issued $1.7 billion in first and refunding mortgage bonds with coupons that ranged from 8.125% to 10.5% in 1986. Proceeds from the nine issues were used to redeem existing debt obligations or preferred stock, finance additions to utility plants and fund general corporate activities.

The debt with the lowest coupon, issued in December and due in 1997, raised $149 million in a deal priced at 99.6% to yield 8.183% to maturity. The highest coupon bond, due 2019, brought proceeds of $196 million in a deal priced at 98.2% to yield 10.699%.

Of the total issued, $1.1 billion replaced outstanding bonds with interest rates ranging from 10.7% to 15.375% and another $243.2 million replaced 9.1 million shares of redeemable preferred stock ranging from 4.36% to 17.38%.

Reacquisition of $1.8 billion of outstanding bonds produced a $325 million loss, which will be amortized over the life of the bonds replaced. The buyback of the preferred stock created an $11.2 million net gain that was credited to shareholders equity.

In addition to issuing taxable debt, PG&E offered $360 million in variable-rate, tax-exempt bonds to finance pollution control, solid waste disposal and waste disposal facilities used by the company. The interest rate on the 30-year bonds fluctuates daily, but the initial rate was set at 4%.

Morgan Stanley & Co., Goldman, Sachs & Co. and First Boston Corp. served as the lead managers in the first and refunding mortgage bond transactions. Goldman served as lead manager for two of the three series of tax-exempt bonds while Kidder, Peabody & Co. held that position for the third.

## NYNEX Corp.

Total financing.....$1,223,750,000
Public offerings:
Debt.....$1,223,750,000
No. of issues.....3
Key underwriters.....Salomon Brothers, Morgan Stanley, Merrill Lynch

NEW YORK — NYNEX Corp., through its New York Telephone and New England Telephone units, launched three debt offerings in 1986 that were used to redeem existing higher-rate liabilities.

New England Telephone in February issued 40-year 9% debentures that raised $347 million for the company. Proceeds from the offering were used to repurchase $300 million of 37-year 12.2% debentures due 2017 and $18.4 million of its 37-year debentures 15¼% debentures due 2018.

New York Telephone raised $440 million in April by selling 8¾% debentures due 2023. Proceeds from the offering were applied to repurchase $221 million of 40-year 11% debentures due 2023 and $156.1 million of 40-year 12¼% debentures due 2024.

In addition, New York Telephone raised $436 million in a 38-year 8⅝% debenture issue due 2024. Proceeds were applied to the redemption of $300 million of 39-year 11⅝% debentures due 2019, $49.6 million of 10-year 14⅛% notes due 1991 and $30 million of 40-year 15⅝ debentures due 2021.

## Southern California Edison Co.

Total financing.....$1,211,725,000
Public offerings:
Debt.....$1,211,725,000
No. of issues.....6
Key underwriters.....First Boston, Salomon Brothers, Morgan Stanley

ROSEMEAD, Calif. — Southern California Edison sold commercial paper, tax-exempt pollution control obligations and taxable debt in a refinancing program that resulted in the retirement or redemption of $1.795 billion of existing debt in 1986.

Since 1984, the company has issued more than $2.7 billion in debt, mostly to refinance higher cost liabilities. Southern California Edison saved more than $70 million in yearly interest costs as a result of the refinancing.

The company raised $1.2 billion of long-term debt in the taxable market in 1986. Southern California also sold $313 million of commercial paper and two tax-exempt deals with a total principal amount of $204 million.

Taking advantage of a rally in the bond market, the company in August got its lowest coupon of the year, 7¾%, in a 10-year first and refunding mortgage bond issue that raised $198 million. The bonds sold at a price of 98.4% of the principal amount, resulting in a 7.985% annual cost — the lowest to the company in 1986.

In February, Southern California Edison announced its lowest cost long-term financing since 1977 when it sold 30-year bonds bringing proceeds of $299 million at a 9¼% coupon. The first and refunding mortgage bonds were sold at 99.099% of principal amount, resulting in a 9.34% annual cost for the company.

Because of strong market demand and attractive interest rates, Southern California Edison brought this issue to market a week earlier than expected while increasing the size of the offering by $100 million.

Proceeds from the issue were to fund a construction program as well as to refund high-coupon debt.

In other borrowings in March and April, the company tapped the capital markets for 32- and 33-year issues at an 8⅝% coupon. Those two issues raised $397 million. A 10-year issue in June carrying an 8% coupon brought the company $198 million.

The company's cost of borrowing edged up in November when it

issued its most discounted offering of the year: a 31-year $119 million first and refunding mortgage bond that carried an 8¾% coupon. Priced at 95% of principal amount, the bonds produced an annual cost to the company of 8.85%.

### Long Island Lighting Co.

Total financing .....$1,204,304,000
Public offerings:
Debt .....$1,204,304,000
No. of issues .....5
Key underwriters ... Shearson Lehman, Dillon Read, First Boston, E.F. Hutton, PaineWebber

HICKSVILLE, N.Y. — The Long Island Lighting Co., drained by the stalled $4.9 billion Shoreham Nuclear Power Station, made five offerings in 1986 that allowed the company to restructure existing debt.

In April, the company raised $250 million in an offering of 11¼% general and refunding bonds priced at par and due 1996. At the same time, it raised $275 million in an offering of 11⅞% general and refunding bonds priced at par and due 2015.

Proceeds from the offerings were used to make permanent prepayments totaling $400 million on $1 billion of outstanding bank loans. The balance of the proceeds were slated for reimbursements to the company's treasury for expenditures related to utility plant construction and other corporate purposes.

At the time of the offerings, the company said it needed to sell the bonds and restructure the bank debt in order to meet $644 million of debt payments due in 1986.

The company later said its "financial viability had been stabilized" by increased revenue and the restructured bank debt.

LILCO went to the debt market again in November when it raised $679 million in three separate offerings. With the proceeds, the company redeemed $225 million of general and refunding bonds and repaid all accrued and outstanding amounts, estimated at $29 million, under a 19% promissory note. LILCO also used $130 million to call $100 million of general and refunding bonds due 2011.

The remainder of the proceeds, about $297 million, was used to reimburse the company's treasury for construction of utility plant and other corporate purposes.

LILCO remains troubled because the Nuclear Regulatory Commission so far has declined to grant a license allowing commercial operation of the Shoreham plant.

Shearson Lehman Brothers Inc. served as lead manager for all of LILCO's offerings in 1986. The co-managers for all the offerings consisted of Dillon, Read & Co. Inc., First Boston Corp., E.F. Hutton & Co. Inc. and PaineWebber Group Inc.

## Natural resources

### Occidental Petroleum

Total financing .....$2,477,803,000
Public offerings:
Debt .....$2,477,803,000
No. of issues .....4
Key underwriter..... Drexel Burnham

LOS ANGELES — Occidental Petroleum Corp. hit the market hard March 21, 1986, with a $2.5 billion batch of debt offerings which company officials called the largest for an industrial company.

It was to have offered $1.5 billion, but said it added another $1 billion because of investors' favorable response to the offerings.

The largest issue raised $990 million in 11¾% senior debentures due 2011. The offering also consisted of $595 million senior notes due 1991 carrying a 10% coupon, $594 million senior notes due 1996 carrying a 10⅞% coupon and $298 million senior notes due 1993 carrying a 10½% coupon.

Proceeds from the issue were principally used to reduce floating rate indebtedness resulting from the 1986 acquisition of the MidCon Corp.

Drexel Burnham Lambert Inc. served as lead underwriter in all company offerings.

Drexel was joined by First Boston Corp. and Salomon Brothers Inc. in one deal, while co-managers in the other three deals were Donaldson, Lufkin & Jenrette Securities Corp., Kidder Peabody & Co. Inc., Shearson Lehman Brothers Inc. and Dean Witter Reynolds Inc.

### Atlantic Richfield Co.

Total financing .....$1,298,513,000
Public offerings:
Debt .....$1,298,513,000
No. of issues .....5
Key underwriters ....Salomon Brothers, First Boston

LOS ANGELES — Atlantic Richfield Co., in a program to repurchase company stock, tapped the dollar and Eurobond markets in five issues in 1986. The company also used the proceeds for general corporate purposes and the retirement of maturing debt.

The company repurchased 79.2 million of its common shares for $4.5 billion in a program that began in 1984 and ended at the beginning of last year.

Arco, a victim of depressed oil prices, has sought to restructure its operations by selling unprofitable businesses and focusing on the hydrocarbon business.

Arco's entry into the capital markets last year began in February with a domestic public offering that raised $250 million. The 9¼% notes, priced at 99.9% to yield 9.27% to maturity, mature in 1993.

Later that month, Arco launched a seven-year 9⅛% $200 million Eurobond offering. The non-callable notes were priced at 99.75%.

The company returned to the U.S. market a few days later with 30-year debentures that carried a 9⅞% coupon in a $450 million deal. The non-callable debentures were priced at 99.875% to yield 9.89% to maturity.

Another debenture deal in March raised $297 million and carried a 9.125% coupon. The 25-year non-callable debentures were priced at 99% to yield 9.23% to maturity.

The company raised $103 million later in March when it offered 10-year yen notes with a 6⅛% coupon that were priced at 100⅞% to yield 6%.

Also in March, Arco announced a public offering on a continuing basis of $200 million third-series medium-term notes due from more than nine months to 10 years from date of issue. Salomon Brothers Inc., First Boston Corp. and Shearson Lehman Brothers Inc. were the agents for these notes.

Salomon Brothers and First Boston are Arco's investment bankers in domestic market deals. S.G. Warburg & Co. and LTCB International Ltd. managed the international offerings.

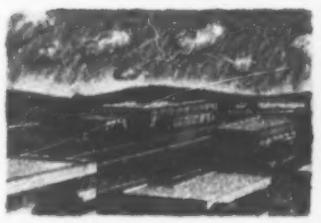
### Standard Oil Co.

Total financing .....$1,138,751,000
Public offerings:
Debt .....$1,138,751,000
No. of issues .....9
Key underwriters.....varied

CLEVELAND — Standard Oil Co. in 1986 issued U.S.-dollar

# Beat The Cycle.

**First Wachovia's counter-cyclical approach to real estate investing out-performs the competition.**



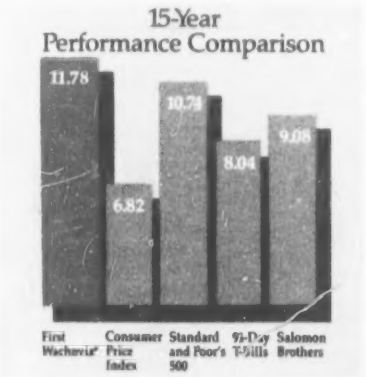
At First Wachovia, we recognized the benefits of real estate in the portfolio almost two decades ago. We saw positive real rates of return, diversification and low volatility.

So we developed a unique long-term formula for dealing with changes in the marketplace and shifting supply and demand.

Our counter-cyclical policy is simple but effective. In certain economic climates we buy quality land slated for development and assume the role – and the profits – of the developer. At other times we are better served by acquiring attractive, mature properties.

This approach allows us to take advantage of any phase of the real estate cycle. Gives us the staying power for long-term performance. And brings us a return that consistently outpaces the leading investment indices.

Our 15-year record speaks for itself. If you'd like to know more, call Nick Verano or Cindy Christopher at (919) 770-5906.



*Net of management fees

FIRST WACHOVIA

debt hedged against the price of oil and Swiss-franc debt hedged against the price of gold while becoming the first U.S. industrial company to sell dollar debt in the Japanese capital markets.

Debt issued last year, along with $400 million of asset sales, enabled the company to implement a debt retirement program that eliminated $1.3 billion of higher-cost liabilities.

The company's debt retirement program was expected by the company to produce an after-tax interest savings of as much as $15 million in 1987 and continued savings after that.

The company started 1986 with a 200 million Swiss franc offering in April that resulted in proceeds of $100 million at a coupon of 7½%.

If the issue isn't redeemed after 10 years, the coupon on this perpetual issue will be reset at 50 basis points below Treasuries.

Standard Oil estimates a savings of 50 basis points in the first 10 years of the issue.

Investors receive interest payments in U.S. dollars and the principal in Swiss francs.

If the Swiss franc appreciates against the U.S. dollar, a foreign exchange rate cap of 2.01 Swiss francs to $1 protects Standard Oil from currency risk at redemption. But if the Swiss franc depreciates, Standard Oil will gain because it will need fewer U.S. dollars to pay the principal.

After selling the Swiss franc debt, Standard Oil in May raised $100 million in a 10-year Eurodollar note offering. The 8% notes were priced at 100.125%.

The company switched away from traditional debt in June when it raised $299 million in debentures and oil-indexed notes.

Standard Oil sold $300 million of 6.3% deep-discount debentures due 2001 and one $37.5 million tranche of oil-indexed notes due 1990 and another of equal size due 1992. The debentures were priced at 74.7% while the notes were priced at 100%.

The company also hedged against raw material prices later in the year when in October it issued $92 million of Swiss franc notes with warrants to purchase 3.3 ounces of gold for $565.20 an ounce.

Standard Oil raised a total of $300 million in two separate offerings in August and September.

In another foreign-market deal, Standard Oil sold a $50 million 7⅛% issue due 1997 in Japan while at the same time selling the Japanese a 7⅛% 8 billion yen issue due 1994. Both issues, brought at the end of year, were priced at 101.375%.

The company's last domestic issue of the year resulted in proceeds of $148 million. The five-year issue, priced at 99.548%, carried a 7% coupon.

First Boston Corp., Merrill Lynch Capital Markets, Salomon Brothers Inc. and Shearson Lehman Brothers Inc. served as lead managers in Standard's domestic offerings.

In the international market, Standard tapped the services of Soditic, Nikko Securities (Europe), Morgan Guaranty (Switzerland) and Nomura Securities.

A medium-term note program started in December with a $350 million shelf registration resulted in less than $10 million dollars in medium-term notes issued in that year.

Shearson, Merrill Lynch and Salomon are the dealers in the medium-term note program.

| Key underwriters | Salomon Brothers, Merrill Lynch, Deutsche Bank |

SAN FRANCISCO — Chevron Corp. refinanced short-term floating-rate debt with about $900 million in fixed-rate obligations sold to the public in 1986.

The company also continued a debt reduction program funded by asset sales. A sale-leaseback of certain assets that generated $166 million was privately placed in a deal managed by Morgan Guaranty Trust Co.

Debt associated with the Gulf Oil Corp. merger was reduced by about $1 billion, mostly through asset sales.

In the U.S. public markets, Chevron sold 10-year 8¾% notes, priced at 99.625%, that drew proceeds of $299 million.

The other U.S. deal raised $296 million in 30-year sinking fund debentures that were priced at 98.625% and carry a coupon of 9.375%.

Chevron ventured into the Eurodollar market in a 10-year $302 million notes issue priced at 100.5% and carrying an 8¼% coupon.

Selling assets to reduce short-term debt and refinancing with medium- and long-term debt enabled the company to benefit from lower commercial paper and long-term rates.

Salomon Brothers Inc. and Merrill Lynch Capital Markets co-managed Chevron's two U.S. public offerings; Deutsche Bank managed the Eurodollar offering; and Morgan Guaranty arranged the sale-leaseback.

### Coastal Corp.

| | |
|---|---|
| Total financing | $1,009,197,000 |
| Public offerings: | |
| Debt | $980,120,000 |
| No. of issues | 3 |
| Private placements | $29,077,000 |
| No. of issues | 1 |
| Key underwriters | Drexel Burnham, Royal Bank of Canada (Suisse) and Banc Paribas (Suisse) |

HOUSTON — Coastal Corp. extended the maturities of its liabilities and reduced exposure to variable interest rates in a refinancing program that affected more than $1 billion of debt.

Some $600 million in outstanding subordinated exchangeable variable-rate notes due 1994 were exchanged for 8.48% subordinated notes due 1991. The company is expected to realize an interest rate savings of 1.5% on the debt as a result of the exchange combined with related interest rate swap agreements.

In February, Coastal completed a private placement of a five-year Swiss franc notes offering that carried a 6% coupon. The deal, which raised $30 million, allowed the company to retire higher-rate debt. A public Swiss franc offering of bonds a month later gave Coastal proceeds of $80 million.

The company launched a major financing in June when it raised $876 million in two debt offerings: $500 million of 11¼% senior notes due 1996 and $400 million of 11¾% senior debentures due June 2006. Both securities, offered at 100% plus accrued interest from June 15, were used to retire bank debt having variable interest rates and shorter maturities.

Coastal completed the purchase of 1 million shares of preferred stock in September as part of a program to replace higher-rate debt and preferred. Three million shares of preferred were issued in 1985 in connection with the merger with American Natural Resources Company; 984 million preferred shares are outstanding.

Drexel Burnham Lambert Inc. underwrote Coastal's domestic offering; Royal Bank of Canada (Suisse) and Banc Paribas (Suisse) handled the Swiss franc deals.

## Retail

### Safeway Stores Inc.

| | |
|---|---|
| Total financing | $1,203,922,200 |
| Public offerings: | |
| Preferred | $45,000,000 |
| No. of issues | 1 |
| Debt | $1,050,833,000 |
| No. of issues | 3 |
| Private placements | $106,000,000 |
| No. of issues | 2 |
| Other | $2,089,200 |
| No. of issues | 1 |
| Key underwriter | Drexel Burnham |

OAKLAND, Calif. — Safeway Stores Inc., the largest retail company issuer, raised more than $1.2 billion in seven transactions in 1986 primarily because it was taken private in a leveraged buy-out late last year.

Kohlberg Kravis Roberts & Co. and Safeway management agreed to the $4.3 billion buy-out in midsummer, thwarting a hostile takeover attempt by Dart Group Corp., Landover, Md.

At the time, KKR acquired 73% of Safeway's 61.4 million shares outstanding for $69 a share, using cash generated from $2.7 billion in bank borrowings, $320 million in loans from KKR's limited equity partnerships and $130 million from the sale of Safeway equity interests to the KKR partnerships.

The remaining shares later were exchanged for 20-year junior subordinated debentures and warrants to buy, in the aggregate, 5% of Safeway common for $17.5 million if the company goes public again.

The junior subordinated debentures carry a 15% annual coupon through November 1988 and a 14½% rate thereafter. Interest payments during the first five years can be made in cash or additional junior subordinated notes.

Safeway raised more than $1 billion of its $1.2 billion in public and private financings in mid-November in order to repay the $320 million KKR loan and about $685 million of the bank financing.

The public offerings, solely managed by Drexel Burnham Lambert Inc., consisted of $750 million of 11¼% senior subordinated notes due 1996 and $250 million of 12% subordinated debentures due 1998. Another $45 million in net proceeds was raised through the offering of 450,000 shares of adjustable-rate cumulative exchangeable preferred stock with an initial quarterly dividend rate of 15¼% payable in cash or additional preferred.

In addition, $2.1 million was raised through the sale of limited

partnership interests in SSI Equity Associates L.P.

The partnership, formed by KKR, was set up to buy warrants giving the partnership the right through 2001 to purchase 13.9 million shares of Safeway stock for $2 a share. The warrants can be exercised for any combination of cash or the surrender of debt and preferred securities issued in connection with the buy-out.

The public offering went off without a hitch and was oversubscribed despite its untimely launch. Safeway came to market as the high-yield market was reeling from the Ivan Boesky insider-trading revelations and fears Drexel would be implicated in the scandal.

Safeway immediately announced plans to sell off assets, including its 130-store U.K. operation and its 20% stake in Australia-based Woolworths Ltd. to help cut the huge debt load incurred in the buy-out. The buy-out added $4.1 billion of debt to the $1.5 billion already on Safeway's books, while stockholders' equity fell to $130 million from $1.7 billion.

Prior to the buy-out, Safeway raised $50.8 million overseas in an April offering of bonds denominated in Swiss francs. Union Bank of Switzerland acted as lead manager on the deal.

Data supplied by IDD Information Services Inc., New York, also lists two private placements of notes totaling $106 million, arranged in late August through Citicorp. However, the private placements are believed to be part of the bank financing arranged at that time for the buy-out.

### Dayton Hudson Corp.

| | |
|---|---|
| Total financing | $998,350,000 |
| Public offerings: | |
| Debt | $998,350,000 |
| No. of issues | 7 |
| Key underwriters | Goldman, Sachs, Salomon Brothers, Swiss Bank |

MINNEAPOLIS — Dayton Hudson Corp. raised almost $1 billion in the U.S. and Eurodollar markets in 1986, ultimately using part of the proceeds to refinance existing higher-cost debt.

In September, the company called in $256 million of long-term debt at a premium for an estimated interest cost savings of $3 million annually. The debt repurchase resulted in an $18 million extraordinary charge in the third quarter.

The diversified retail company, which ranked second among the top five issuers in the retail industry, raised $895 million in the U.S. market through five debt offerings and another $203 million in two Eurodollar transactions.

Tapping into the lower interest rate environment in the United States, Dayton Hudson relied on basic fixed-rate debt financings.

In its first deal in late February, the company raised $100 million in a February offering of 9¼%, 20-year debentures priced at 99¾ to yield 9.278. It followed in April with a $100 million offering of three-year notes carrying a 7⅞% coupon. The deal was priced at 99.7 to yield 7.92%.

After a summer hiatus, Dayton returned to the U.S. arena to issue in September $150 million of 8⅜% notes due 1996 at 99.6 to yield 8.435%. In that deal, the company used a hedge to lock in its rate several weeks earlier, then waited for Treasury market volatility to calm before offering the notes. The company's final U.S. transactions in October and November were both 30-year sinking fund debentures.

The October deal totaled $200 million and consisted of 9.5% bonds priced at 99 to yield 9.6%. The offering came concurrently with a $100 million issue of 8¼% seven-year Eurodollar notes, which were offered at a premium of 101.

The $250 million deal in November carried a 9¼% coupon and was priced at 99.5 to yield 9.3%.

Dayton completed another Eurodollar deal in December to net another $101.8 million before year end.

Financing proceeds were targeted to meet capital expenditure and working capital requirements related to its expansion and store remodeling efforts in addition to being used for debt refinancing.

This year the company has continued to reduce high coupon debt. In January it redeemed outstanding principal of a number of existing issues including a $57 million portion of 14¾% sinking fund debentures due 2012 and a $34 million portion of 11¼% debentures due 2015.

Managing underwriters of its 1986 domestic deals were Goldman, Sachs & Co. and Salomon Brothers Inc. Swiss Bank Corp. International led underwriters on the Eurodollar deals.

### Anac Merger Corp. and Anac Holding Corp.

| | |
|---|---|
| Total financing | $918,770,000 |
| Public offerings: | |
| Preferred | $130,020,000 |
| No. of issues | 1 |
| Debt | $703,750,000 |
| No. of issues | 3 |
| Private placements | $85,000,000 |
| No. of issues | 1 |
| Key underwriter | Salomon Brothers |

TWINSBURG, Ohio — Anac Merger Corp. and Anac Holding Corp. raised almost $919 million through the issuance of high-yield debt and preferred stock in December to help take Revco D.S. Inc. private in a $1.25 billion management-led buy-out.

The financings made the newly private drug store operator the third largest issuer in the retail industry — an industry where the most active capital raisers were leveraged buy-out driven.

Just more than $700 million of the total constituted public offerings of junk bonds. Of that, $400 million was raised with the sale of 13⅛% senior subordinated notes due 1994 and $210 million from the offering of 13.3% subordinated notes due 1996. Both issues were priced at par.

In addition, Anac raised almost $94 million through a units offering, each consisting of a 13.3%, 15-year junior subordinated note plus four common shares and four common stock puts. The units were priced at $1,000.

The common shares reflect a financing strategy being used more frequently in leveraged buy-out transactions. The slivers of common equity continue to trade publicly for the otherwise private companies, providing a means of valuing the owners' investment in the company and receiving a market reading on management's streamlining efforts of the company.

Aside from the debt offerings, Anac issued 7.88 million shares of 15¼% cumulative exchangeable preferred stock for $130 million. Another $85 million of convertible preferred was placed privately with J.P. Morgan Investment Management and New York Life Insurance Co.

The remaining financing for the buy-out represented senior bank debt.

Stockholders approved the buy-out in December, ending a lengthy process that began in March 1986 when Revco management offered $1.16 billion, or $33 a share, to take Revco private. A committee of outside directors recommended increasing the offer, with Revco's board accepting a $38.50-a-share sweetened bid in August.

### Eckerd Holdings Inc.

| | |
|---|---|
| Total financing | $673,047,000 |
| Public offerings: | |
| Debt | $436,047,000 |
| No. of issues | 2 |
| Private placements | $237,000,000 |
| No. of issues | 2 |
| Key underwriter | Merrill Lynch |

LARGO, Fla. — Eckerd Holdings Inc., the fourth largest retail issuer of 1986, raised $673 million in debt and equity last year, generating part of the assets needed to complete the leveraged buy-out of Jack Eckerd Corp. by investors led by management and Merrill Lynch Capital Partners.

The majority of the financing — $436 million — stemmed from the public offering of high-yield securities: a zero-coupon hybrid issue originally aimed at Eckerd shareholders and a 15-year subordinated debenture offering that had been slated as a private placement among investors led by Prudential Insurance Co.

Eckerd issued $345.2 million of 20-year discount subordinated debentures at 53.9% for net proceeds to the company of $186.8 million. The securities carry a zero coupon for five years and provide a 12¾% effective yield during that time and a 13% fixed rate thereafter. It netted $250 million from the $290 million offering of the 11⅛% 15-year subordinated debentures priced at 89.25% to yield 12¼%.

Another $237 million was generated through private placements of equity and debt, including a $75 million placement of preferred stock.

Senior bank loans provided the remaining funds needed for the $1.35 billion buy-out.

Shareholders initially were supposed to be paid $28 in cash and $5 in the discount subordinated debentures for each of their 35.8 million shares outstanding. Eckerd decided to sell the bonds in a public offering and use the proceeds to help pay all cash for stockholders' shares because of concerns the high-yield securities might be deemed equity rather than debt for accounting and tax purposes.

The five-year zero feature and the possibility future interest payment could be curtailed if Eckerd fell short of financial performance objectives required by the bank lenders created the possibility the securities would have to be treated as equity.

The last-minute change regarding the discount subordinated bonds led to the public offering, rather than private placement, of the 15-year debentures. The change made the five-year zeros senior to the 15-year securities, making those securities less palatable to the private investors.

Eckerd is launching cost-cutting measures and asset sales to meet bank debt requirements and reduce leverage stemming from the buy-out. Its total outstanding debt climbed to $1.2 billion as a result of going private, up from $94 million previously.

### J.C. Penney Co.

| | |
|---|---|
| Total financing | $491,250,000 |
| Public offerings: | |
| Debt | $491,250,000 |
| No. of issues | 3 |
| Key underwriter | First Boston |

NEW YORK — J.C. Penney & Co. took advantage of the low interest rate environment to raise almost $500 million in the U.S. debt market in 1986, making it the fourth largest retail company issuer in the capital markets last year.

It also was one of two top retail issuers whose financing for the year was not acquisition related.

Penney dipped into the market for the first time last year in the last week in February — a week when the sharp drop in bond yields led U.S. issuers to raise $5.1 billion through predominantly traditional, fixed-rate debt offerings.

Its deal was for $150 million and consisted of 30-year sinking fund debentures priced at par and carrying a 9⅛% interest rate.

The company returned to the markets in July with a second 30-year sinking fund issue for $200 million. The offering of 9% bonds, which was priced at 96, netted the company $192 million.

Penney shortened up on the maturity for its final deal of the year, a $150 million offering of 8¾% notes due in 1996. The deal, priced at 99.5, generated $149.3 million in net proceeds.

The company indicated that all transactions for the year would be earmarked for general corporate purposes, including working capital and the repayment of outstanding borrowings.

First Boston Corp. was sole manager for all three transactions.

## Transportation

### Texas Air Corp.

| | |
|---|---|
| Total financing | $1,030,330,000 |
| Public offerings: | |
| Common stock | $332,590,000 |
| No. of issues | 2 |
| Preferred | $146,040,000 |
| No. of issues | 1 |
| Debt | $200,000,000 |
| No. of issues | 2 |
| Private placements | $351,700,000 |
| No. of issues | 18 |
| Key underwriters | Drexel Burnham, PaineWebber |

HOUSTON — The highly acquisitive Texas Air Corp. raised more than $1 billion in public- and private-market transactions in 1986, topping other companies as the most active issuer in the transportation industry.

The industry as a whole witnessed tremendous consolidation through acquisitions during the year, with all of the five largest issuers being involved in one acquisition or another. But Texas Air was clearly the most acquisitive as it sought to conclude an expansion drive that would give it control of the nation's largest airline network.

The company acquired Eastern Air Lines for $660 million, paying $6.25 a share in cash and $3.75 in cumulative junior preferred for the airline's outstanding shares. For $300 million in stock, notes and a little cash, it purchased the beleaguered Peoples Express Inc. and assets of People's subsidiary, Frontier Airlines.

In addition, Texas Air entered into an agreement last year to buy the remaining publicly held shares of Continental Airlines Inc., already under the Texas Air fold, for $186 million.

The airline's almost $680 million in public markets financings helped Texas Air build up cash to pay, in part, for its acquisition activity. The financings also were designed to bolster the highly leveraged company's financial underpinnings to facilitate the acquisitions as well as its commitments for the purchase of additional aircraft.

As a result, Texas Air raised almost $480 million in three stock deals that sought to expand the company's equity base.

It raised $142.6 million in May through the public sale of 4.6 million shares of common at $32.25 a share. The deal proved a popular one among investors; original plans had called for the sale of 2.5 million shares.

In July, the airline raised another $146 million with a six million share offering of 6¾% cumulative convertible junior preferred. The stock, priced at $25 a share, is convertible into common at a conversion price of $37.50 a share.

The company returned to the common stock market in October, issuing five million shares of common at $38 each for a total of $190 million.

Texas Air also added to its equity base during the year through the redemption and conversion of outstanding convertible issues and the exchange of some senior debt obligations for common stock.

Texas Air's remaining two public offerings for the year were for debt. It issued $100 million each of 12½% senior increasing-rate extendible notes due 1991 and 14¼% senior notes due 1993 in February. Both issues were priced at par.

Giving effect to these transactions as well as to Texas Air's acquisitions for the year, the company's pro forma long-term debt and lease obligations as of June 30 would have stood at $4.5 billion or 79% of its total $5.7 billion capitalization. Without accounting for these transactions, debt and lease obligations totaled $1.3 billion or 81.3% of a $1.6 billion capitalization.

Texas Air's remaining financings for the year were lease-related private placements. The company, starting in 1986, was committed to acquire, by purchase or lease, aircraft with a value of more than $1 billion.

IDD Information Service Inc., New York, reported $350 million in lease-related transactions for Texas Air for the year. It could not be determined by press time if this represented all of the company's 1986 activity in this area.

Drexel Burnham Lambert Inc. acted as lead manager for Texas Air's public offerings during the year. Kidder, Peabody & Co., Merrill Lynch Capital Markets and Smith Barney, Harris Upham were co-managers. PaineWebber was the placement agent on private placements.

### Trans World Airlines

| | |
|---|---|
| Total financing | $879,700,000 |
| Private placements | $879,700,000 |
| No. of issues | 4 |
| Key underwriter | Drexel Burnham |

NEW YORK — Trans World Airlines dipped into the private placement arena to raise almost $663 million in debt in 1986. It also netted another $217 million through the sale-leaseback of aircraft.

These transactions put the company second among issuers in the transportation industry.

The $663 million in private debt financing was raised in February and March of 1986 and included $312.7 million in two issues of equipment trust certificates and $350 million in senior increasing-rate extendible notes.

Almost $213 million of the former represents 10-year certificates with a 14¼% coupon. Another $100 million came from the placement of 13¾% equipment trust certificates due in 1991.

The certificates are secured by a pool of 44 aircraft and 71 related spare engines, with title to the equipment reverting to TWA at maturity of the certificates.

The $350 million increasing-rate extendible notes, also issued in February, mature quarterly, with TWA having the option to extend the maturity for another quarter up until Feb. 1, 1991. The initial rate on the securities was 12.93%; however, their terms call for the rate to increase by 50 basis points for the first four quarters after issuance and by 25 basis points for every quarter thereafter.

All the securities were placed at par and carried public registration rights. As a result the securities have been trading publicly since last spring.

Drexel Burnham Lambert Inc. was the placement agent on the deals. At the end of the year, TWA purchased $100 million of the extendible notes in the open market.

Proceeds from the transactions were targeted for general corporate purposes, including acquisitions.

And shortly after the placement of much of the securities, TWA agreed to buy Ozark Air Lines, St. Louis, for $237 million in cash — a deal that was completed in September. In addition, TWA cash coffers were cited as one source of funds for TWA Chairman Carl Icahn's ill-fated attempt to take over USX Corp.

Following the Ozark acquisition, TWA entered into a sale-leaseback arrangement involving 35 used aircraft that previously had been owned by Ozark. TWA sold the planes to Polaris Aircraft Leasing Corp. and two Polaris affiliates and then leased them for terms of five to six year.

Some of the funds generated from the transaction were used to pay down outstanding debt. After accounting for that, the airline netted $217 million in cash from the transaction.

Additional cash was generated through the roughly $140 million sale of 50% of TWA's computerized reservation system last year to NWA Inc., the parent of Northwest Airlines. Payment included $120 million in cash and $20 million in notes.

### AMR Corp.

| | |
|---|---|
| Total financing | $842,941,000 |
| Public offerings: | |
| Debt | $398,969,000 |
| No. of issues | 3 |
| Private placements | $443,972,000 |
| No. of issues | 11 |
| Key underwriters | varied |

FORT WORTH, Texas — AMR Corp. raised $843 million in the public and private markets in 1986 to rank second among the top five transportation issuers.

The airline generated almost $400 million for general corporate purposes in three public transactions, one of which was launched overseas.

American Airlines, of which AMR is the parent, opened the company's financing activities in March with a $200 million units offering of subordinated debt and warrants. The company issued 200,000 units, each priced at $1,000 and consisting of one 10-year subordinated debenture carrying a 6¼% coupon and one warrant to buy AMR stock at $61.77 per share through March 1996. The conversion price provided an implicit 25½% conversion premium over the $49-per-share trading price of AMR at the time of the offering.

American chose the equity-linked deal because of the strong performance of the parent's stock. But the company got much cheaper financing as well, saving an estimated 300 basis points on the interest on the debentures. A straight-debt offering at the time would have carried an interest rate of more than 9%.

AMR reaped significant savings in April as well when the parent raised $102.2 million with a 200 million Swiss franc deal issued overseas. The 15-year securities carried a 5¼% coupon payable in Swiss francs. AMR hedged its currency exposure on the deal through a swap arrangement that gave the company a fixed-rate borrowing cost of 8.14%. That represented an estimated 50 to 75 basis points savings over what AMR would have had to pay at the time on a comparable offering in the United States.

In May, AMR officials thought interest rates had hit their secular low. On that premise, the company sold 100,000 warrants to Goldman, Sachs & Co. The warrants entitle Goldman to purchase $100 million of 9.1% 30-year debentures. AMR received $5 million for the debt warrants, which are good until May 1989. If the warrants are exercised and AMR has to issue the bonds, AMR's effective borrowing cost would be about 8½%, taking into account the $5 million proceeds from the warrants sale.

AMR had planned to launch a 30-year bond offering concurrently with the warrants sale, but delayed the $100 million offering when the bond market went to the doldrums.

It issued the 9% bonds in September at 96.8% to yield 9.32%. Net proceeds to AMR were just less than $97 million.

ing activities in 1986 were contained in the private placement arena and were lease-related. American Airlines financed the purchase of 20 aircraft through a number of leveraged lease transactions in the United States, United Kingdom and Japan.

Investment bankers leading the airlines deals last year included Morgan Stanley & Co. Inc., Salomon Brothers Inc. and Merrill Lynch Capital Markets.

### Delta Air Lines

| | |
|---|---|
| Total financing | $681,595,000 |
| Public offerings: | |
| Debt | $297,495,000 |
| No. of issues | 2 |
| Private placements | $384,100,000 |
| No. of issues | 3 |
| Key underwriters | Goldman, Sachs, Citicorp |

ATLANTA — Delta Air Lines raised $682 million in the public and private markets in 1986, ranking it third among issuers in the transportation arena.

May 8, the date of its first offering, was a day when the bond market reacted negatively to the Federal Reserve System's report of an unexpected surge in the money supply, while the Treasury Department's auction of $9 billion of 30-year bonds met with strong bidding by dealers and investors.

The airline offered $300 million of notes and debentures through underwriters led by Goldman, Sachs & Co. The issues consisted of $150 million of 8¼% notes due 1996 and $150 million of 9% debentures due 2016.

The notes were priced at 99.33% to yield 8.35%, while the debentures came to market at 99% to yield 9.098%. Net proceeds to Delta totaled $297.5 million and were tagged for general corporate purposes.

Delta last year responded to the industry's consolidation trend with a merger of its own, agreeing to acquire Western Air Lines Inc. in Los Angeles for $860 million.

The company also agreed to buy as many as 80 aircraft from McDonnell Douglas Corp. at an inflation-adjusted cost expected to reach $2 billion. Deliveries will be made through 1992.

The remaining $384 million in Delta financings consisted of leasing transactions for aircraft purchases. The deals were arranged through the private markets, with Citicorp acting as private placement agent.

### Eastern Air Lines Inc.

Total financing ..... $579,000,000
Private placements ..... $579,000,000
No. of issues ..... 4
Key managers Drexel Burnham, Merrill Lynch

MIAMI — Eastern Air Lines Inc.'s 1986 financing activities focused on the private placement market, where the company raised $579 million in four transactions in December.

The bulk of that — $500 million — was earmarked to help pay for the $660 million acquisition of Eastern by Texas Air Corp. as well as for general corporate purposes and retirement of outstanding debt.

The private financing, managed by Drexel Burnham Lambert Inc. and Merrill Lynch Capital Markets, consisted of three tranches: $200 million of seven-year, first-priority security equipment trust certificates; $200 million of 10-year, second-priority equipment trust certificates; and $100 million of 15-year, third-priority certificates.

The private certificates were secured by used Eastern aircraft, which had liens against them from creditors. Those creditors released the aircraft from the liens upon repayment of debt.

The proceeds from the private placements were earmarked for distribution roughly as follows:

About $110 million was slated for payment of the Eastern merger with Texas Air, with $130 million going toward related expenses involving special consents, amendments and redemptions of some debt and preferred stock. About $120 million was to be directed toward retirement of existing debt, and $140 million in remaining cash was targeted for working capital.

In addition to the $500 million transaction, Eastern completed one additional private placement in December. The $79 million deal consisted of secured notes and Merrill Lynch was the agent.

Texas Air completed its acquisition of Eastern in December, despite efforts by union members to thwart the merger. The deal paid Eastern shareholders $10 a share, $6.25 in cash and $3.75 in subordinated debentures.

## Rail/shipping

### Burlington Northern Inc.

Total financing ..... $872,556,000
Public offerings:
Debt ..... $872,556,000
No. of issues ..... 4
Key underwriters ..... Morgan Stanley, Salomon Brothers

SEATTLE — Burlington Northern Inc. used its proceeds from four debt issues to fund general corporate activities and to retire a portion of the 15% debentures issued by a company acquired by Burlington in 1983, El Paso Natural Gas Co.

Burlington Northern, a company primarily engaged in the transportation and natural resources businesses, made a 10-year 9⅜% notes offering of $300 million in February. The company followed that in April with a $200 million issue of 9% debentures due 2016.

In October, Burlington Northern Railroad Co., a subsidiary, issued $275 million of consolidated mortgage 9¼% bonds due 2006, while El Paso in the same month issued $100 million of 9⅛% debentures due 2011.

The company redeemed about $457 million of preferred stock in 1986.

Morgan Stanley & Co. and Salomon Brothers Inc. are Burlington's underwriters.

### CSX Corp.

Total financing ..... $844,800,000
Public offerings:
Debt ..... $844,800,000
No. of issues ..... 4
Key underwriters ... First Boston, Merrill Lynch, Morgan Stanley, Salomon Brothers

RICHMOND, Va. — CSX Corp. tapped the capital markets for long-term debt needed to finance the $804 million acquisition of Sea-Land Corp., the largest U.S.-flag container-shipping company. CSX spent an additional $79 million investing in other enterprises.

Formed in 1980 from the merger of the Chessie System Inc. and Seaboard Coastline Industries Inc., CSX now operates transportation, energy, technology and properties units.

CSX raised $245 million in June by selling 9½% sinking fund debentures due 2016 that were priced at 98% to yield 9.71% to maturity.

The next month it returned to the capital markets with an 8.4% 10-year note offering, priced at par, that raised $200 million. In August, CSX issued par-priced 20-year debentures that raised $300 million and carried a 9% coupon.

The last issue, in October, brought proceeds of $100 million through an 8¼% note offering that was priced at 99.8% to yield 8.28% to maturity.

First Boston Corp. served as the lead manager in all four deals. Merrill Lynch Capital Markets, Salomon Brothers Inc. and Morgan Stanley & Co traded places as co-managers.

A special section on leasing will be published June 15.

### Union Pacific Corp.

Total financing ..... $419,930,000
Public offerings:
Debt ..... $419,930,000
No. of issues ..... 4
Key underwriters .... E.F. Hutton, Merrill Lynch, Union Bank/Switzerland, First Boston

NEW YORK — Union Pacific Corp.'s biggest issue of the year was made in connection with the $1.2 billion acquisition of the Overnite Transportation Co.

Purchase of the trucking company was funded primarily by bank debt, part of which was refunded in December when Union Pacific raised $248 million in a 7⅛% notes offering. The 10-year notes were priced at 99.05%.

Commercial paper also was used to refinance the bank debt.

In another long-term financing, Union Pacific raised $100 million in a 10-year Eurodollar note issue, priced at 99¾%, that carried a coupon of 7⅜%. The company received $73 million by selling two issues of trust equipment certificates.

Almost 10.4 million of Union Pacific shares were bought back for $506 million in a program that authorizes the purchase of up to $1.2 billion worth of stock.

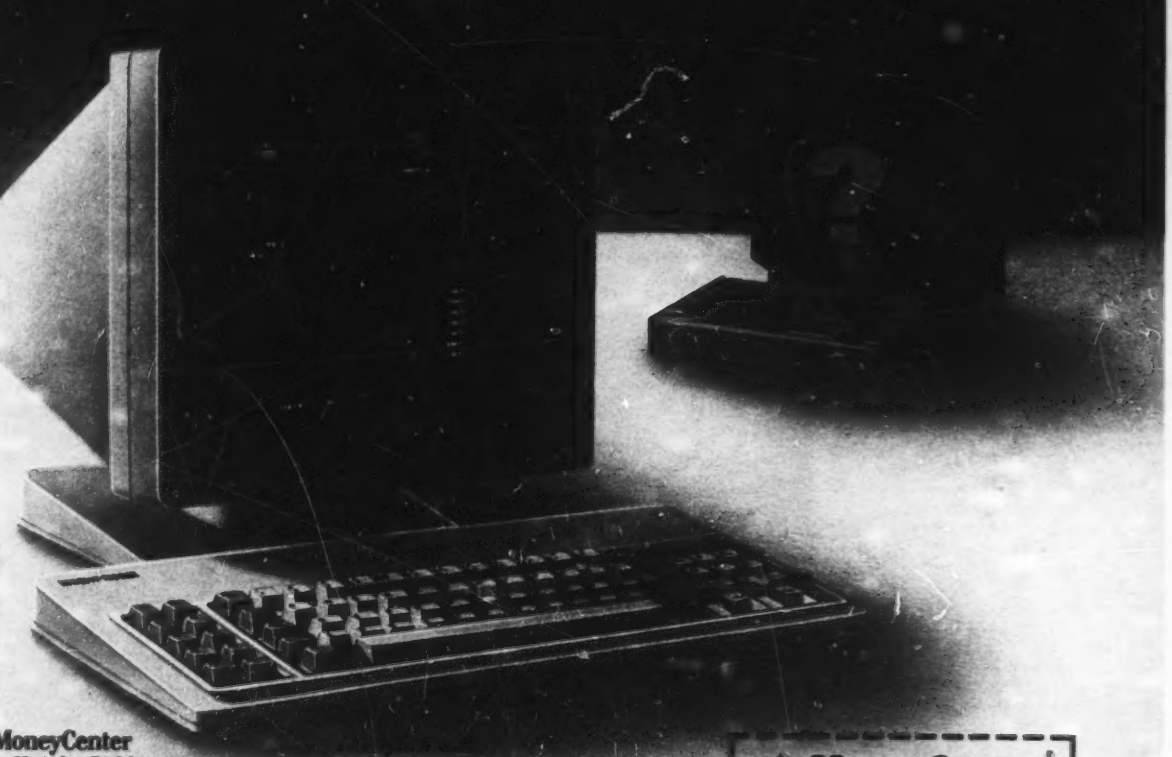
### American President Cos

Total financing ..... $200,000,000
Public offerings:
Debt ..... $200,000,000
No. of issues ..... 2
Key underwriters ..... Goldman, Sachs, Salomon Brothers

OAKLAND, Calif. — After using funds from cash flow and an equity offering to fund acquisitions in 1985, American President Cos. Ltd. in January 1986 raised $100 million by selling 10-year notes priced at par.

Proceeds from the debt offering

THE INTELLIGENT ALTERNATIVE TO TELERATE



It's MoneyCenter from Knight-Ridder.
Delivered on a personal computer, this intelligent terminal provides accurate and timely fixed income and capital markets data. MoneyCenter can display 100 instruments simultaneously, including Treasury and mortgage backed securities, futures from around the world, money market instruments and foreign exchange. Real time charts appear on the same screen with critical trading data. (Try *that* on a Telerate.)

Intelligent and Extremely Reliable.
MoneyCenter utilizes its worldwide satellite communications network to provide unsurpassed reliability in delivering time critical information.

Real Time Charts.
The intelligent alternative analyzes price relationships and monitors spreads, and alerts you when the spread penetrates your predetermined levels. MoneyCenter displays historical and real time charts for multiple instruments on the same screen—by the tick, minute or day. (All this, and it costs less than Telerate.)

24-hour Worldwide News.
MoneyCenter brings you 24-hour on line news and market analysis from Knight-Ridder, with a key word search feature to find *your* choice of news and important statistics. So call today, or fill in this coupon. Because when it comes to intelligence, there is no alternative.

were to increase the transportation company's liquidity drained by the acquisitions.

In 1985, American President spent $60 million for National Piggyback Services Inc., National Piggyback Specialized Commodities Inc. and Intermodal Brokerage Services Inc. Transportation equipment costing $232 million also was funded from cash flow and the proceeds of a November 1984 equity offering.

In June, the company made an offering for $3.50 convertible exchangeable preferred stock that resulted in proceeds of another $100 million.

Proceeds were to be used to replace some of the company's ships and upgrade other pieces of equipment. Company officials announced in May the beginning of a $500 million capital expansion program that would be implemented over a two- or three-year period.

### Exxon Shipping Co.

Total financing .....$149,550,000
Debt .....$149,550,000
No. of issues .....1
Key underwriter.....Salomon Brothers

HOUSTON — Exxon Shipping Co., a wholly owned subsidiary of Exxon Corp., raised $149.6 million in the capital markets to provide permanent financing for the purchase of two oceangoing tankers.

The guaranteed debt securities, which come due Oct. 1, 2011, offer a 7½% coupon in effect until Oct. 1, 1993, when they are subject to a mandatory put at par plus accrued interest. The price to the public at issuance was 99.7%.

After the mandatory put date, the securities likely will be resold. The coupon after the put date will be determined by Exxon Shipping.

## Health care

### American Medical International Inc.

Total financing .....$640,085,000
Public offerings:
Debt .....$640,085,000
No. of issues .....6
Key underwriters ....Salomon Brothers, Goldman, Sachs

BEVERLY HILLS, Calif. — American Medical International ended a period of dependence on the capital markets with six issues that brought the company $640 million in 1986.

The company, which owns and operates hospitals in the United States and abroad, is ending its period of expansion in which debt made up the difference between spending and cash flow. A leaner, more focused AMI is expected to emerge.

In 1986, the company spent $813 million for the construction of new facilities and the expansion of existing ones. Assets generated from operations amounted to $477 million.

Some of the company's recent trips to Wall Street have been to refinance old debt. In July, for example, it sold $300 million in subordinated notes to reduce long-term debt by repaying bank lines of credit and commercial paper that totaled $410.6 in May 1986. A $100 million note due in 1989 carried a 9% coupon and was priced at par; a $200 million note carried a 9½% coupon and also was priced at par.

The company, in February, sold $65 million of sterling debt to repay short-term obligations in British currency.

AMI also made two notes offerings in January that netted almost $200 million. One $100 million issue due in 1991 carried a 9.625% coupon and was priced at 99.875%. The other issue, also $100 million, carried a 9¾% coupon and was priced at 99.35%.

In February, the company made a Eurodollar offering that brought $75 million in proceeds.

Goldman, Sachs & Co., Salomon Brothers Inc. and Dean Witter Reynolds Inc. acted as the company's underwriters in the domestic offerings.

The Long Term Credit Bank of Japan managed the Eurodollar offering and Barclays Bank, the sterling deal.

### Hospital Corp. of America

Total financing .....$496,875,000
Public offerings:
Debt .....$496,875,000
No. of issues .....3
Key underwriters ....Salomon Brothers, Morgan Stanley

NASHVILLE, Tenn. — Hospital Corp. of America used the $497 million it received from the debt market in 1986 to replace floating-rate with fixed-rate debt.

The company, which operates acute-care and psychiatric hospitals, started the year with a 9% debentures issue due 2016 that raised $149 million. The March offering was priced at 99¼%.

In April, the company issued 8% 10-year notes priced at par that raised $150 million.

The company's last issue of the year, offered in August, brought $198 million through the sale of seven-year 7⅛% notes priced at 99%.

The company began a stock repurchase program in November 1985 that authorized the repurchase of $350 million common shares. At the end of 1986, it had repurchased 9,092,122 shares of common stock at a price of $332.3 million.

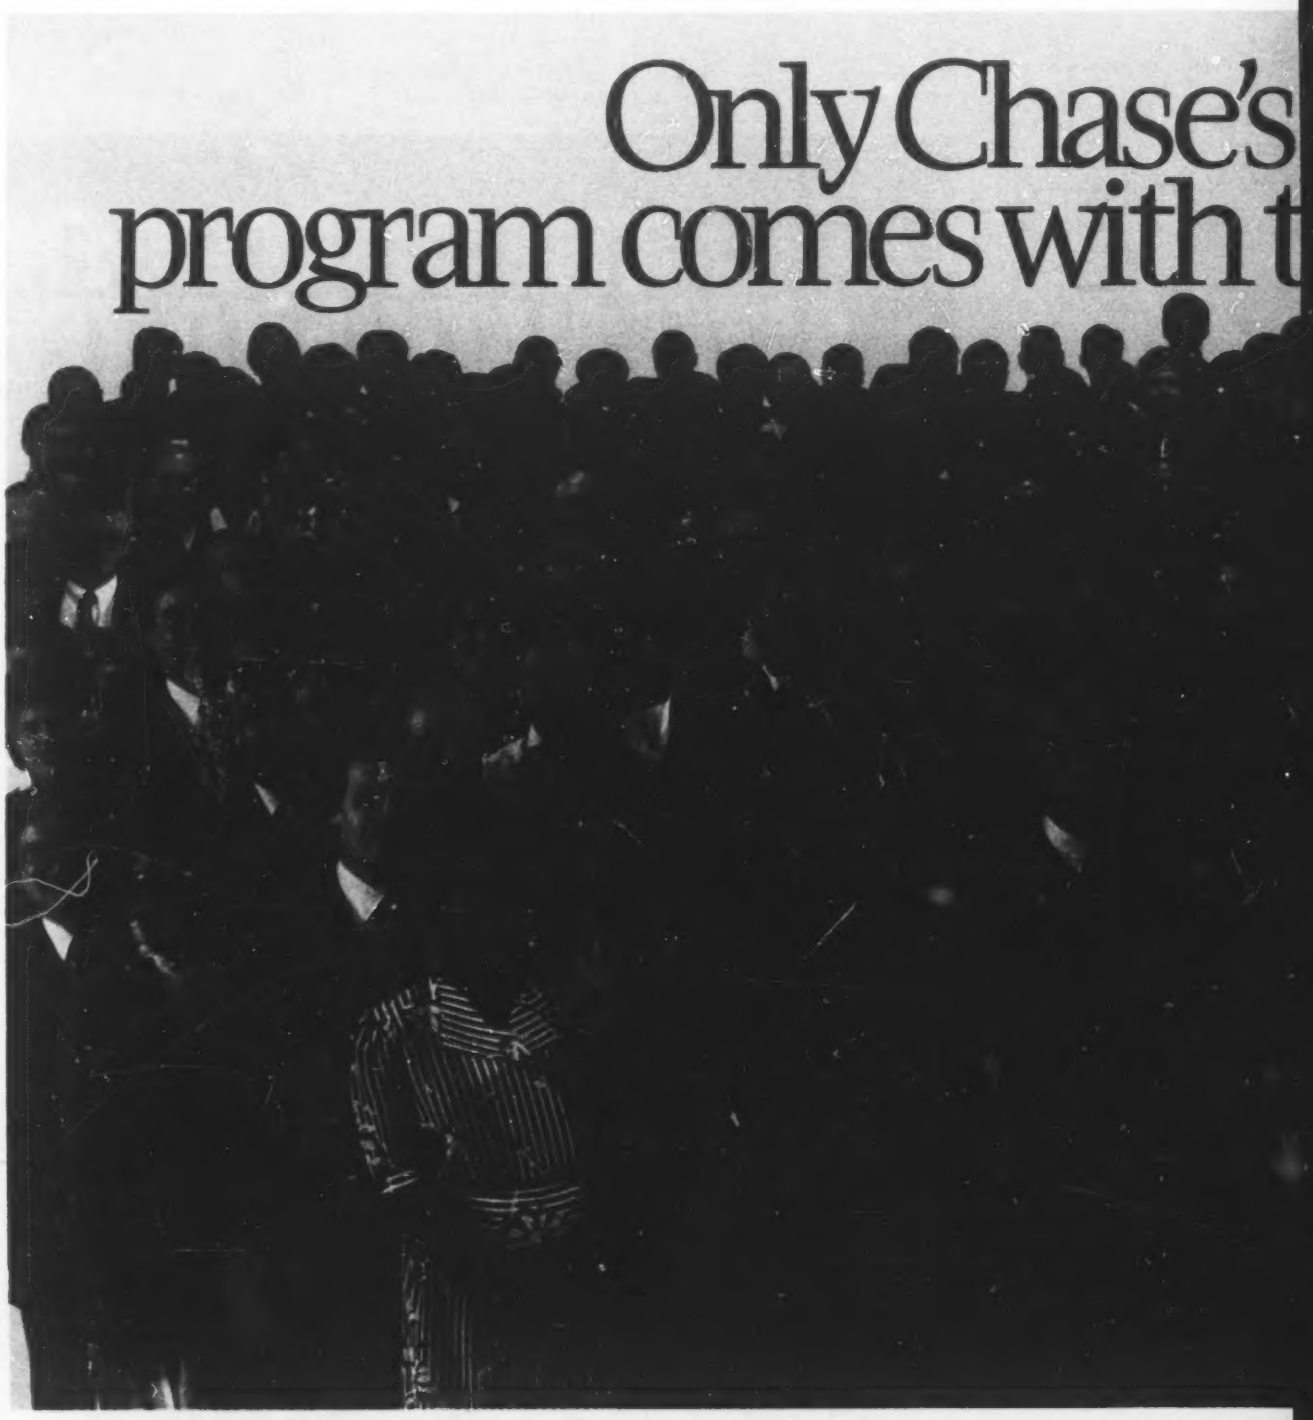
In October, Hospital Corp. and The Equitable Life Assurance Society of the United States formed Equicor-Equitable HCA Corp., a corporation in which each company has a 50% interest.

Equicor provides managed health care and other employee benefit products.

Hospital Corp. contributed cash and other net assets totaling $214 million to the joint project.

In 1986, the company made acquisitions and dispositions that resulted in a $1.6 million net gain.

Salomon Brothers Inc. served as the lead manager in two of the 1986 offerings; Morgan Stanley & Co. Inc. was lead manager in the third. Co-managers in the various offerings were Prudential-Bache Securities Inc.; Goldman, Sachs & Co.; Salomon, and Morgan.



Not all of Chase's state-of-the-art technology runs on electricity.

Over a thousand of our most advanced features are people. They, as much as our technology, are the reason our Master Trust customers stay with us so long: an average of nearly ten years.

## National Medical Enterprises Inc.

Total financing ..... $200,000,000
Public offerings:
Debt ..... $200,000,000
No. of issues ..... 1
Key underwriter ..... Merrill Lynch

LOS ANGELES — National Medical Enterprises Inc. in January sold Liquid Yield Option Notes to raise $200 million.

The LYONs, a product of Merrill Lynch Capital Markets, were sold to the public at 25% of the $800 million principal amount at maturity. The price to the public produces a yield to maturity of 7.5%, computed on a semiannual basis.

The LYONs are convertible into common stock at the holders' option at any time, unless the notes previously are redeemed or repurchased, at a conversion rate of 11.09 shares per note.

Proceeds from the notes will be used to repay outstanding debt and to fund general corporate activities.

National Medical Enterprises, the nation's second-largest health care-services company, started a stock repurchase plan in September. To date, 5,350,000 shares have been repurchased at a cost of $128 million. The company plans to repurchase up to 10 million of the 78 million shares outstanding.

Since midsummer, the company has sold eight acute-care hospitals and converted three to psychiatric or substance-abuse treatment centers.

National Medical plans to focus on treatment centers that specialize in psychiatric care, substance-abuse care and physical rehabilitation.

## Forum Group Inc., Forum Retirement Partners L.P., Forum Health Partners

Total financing ..... $198,750,000
Public offerings:
Debt ..... $100,000,000
No. of issues ..... 1
Private placements ..... $35,000,000
No. of issues ..... 1
Partnership offerings ..... $63,750,000
No. of issues ..... 1
Key underwriter ..... Drexel Burnham

INDIANAPOLIS — The Forum Group Inc. in August raised $100 million by selling 6¼% convertible debentures due 2011. Other entities related to Forum tapped the capital markets for an additional $99 million in 1986.

Forum Group Inc. develops and operates residential units for the affluent elderly.

In December, Forum Retirement Partners L.P. sold five million preferred depositary units to raise $64 million. The partnership was formed to own residential units developed by Forum. These properties are leased or managed by Forum Group Inc.

Forum Retirement Partners L.P. absorbed another entity created by Forum Group Inc., Forum Health Partners, which in January raised $35 million in a private placement to finance a mortgage for four residential centers. Forum Retirement Partners L.P. offered common units of the partnership to Forum Health Partners in exchange for their interests in four residential centers.

Forum Retirement Partners L.P. used $10.5 million of the offering and the issuance of common units to Forum Group Inc. for cash to purchase the Forum Group's two-sevenths participation in the first mortgage of Forum Health Partners.

About $4.5 million of the proceeds were applied to the purchase of a residential center from Forum Group Inc. Another residential center was to be acquired from Forum Group Inc. with $21 million of the proceeds.

First mortgage debt owed by an affiliate of Forum Retirement Partners L.P. was to be retired with $10.2 million of the proceeds. Almost $1 million of the proceeds were applied to purchase the limited partnership's interest in an affiliate. The balance is to be used to purchase additional properties and refinance mortgage indebtedness.

Proceeds from the convertible offering were used to repay debt and finance the purchase of other residential units.

## Maxicare Health Plans

Total financing ..... $125,000,000
Public offerings:
Debt ..... $125,000,000
No. of issues ..... 1
Key underwriters ..... Salomon Brothers, Montgomery Securities

LOS ANGELES — Proceeds from Maxicare's September 1986 debt offering were applied to the $372 million purchase of Health-America Corp., which was completed in November.

Maxicare raised $125 million by selling 11¾% senior subordinated notes due 1996. Cash and bank borrowings funded the balance of the HealthAmerica acquisition. Debt and equity offerings in 1985 contributed to a $361 million cash position that enabled Maxicare to make acquisitions.

Maxicare, in October, completed the acquisition of Health-Care USA for $66.2 million. Liquid assets were used for that purchase.

Maxicare, a health maintenance organization, operates prepaid medical plans that entitle members to fixed-fee medical service provided by practitioners who work with the company.

Salomon Brothers Inc. was lead manager for the September offering; Montgomery Securities acted as co-manager.

## Bank equity fund draws $4 million

MINNEAPOLIS — Marquette Bank Minneapolis' new select-value equity fund already has drawn more than $4 million in assets, all for tax-exempt employee benefit plans.

The fund, managed by Marquette Capital Management Corp., the bank's investment advisory subsidiary, uses a value-oriented style. It focuses on such variables as dividends to average yields, expected dividend growth and price and earnings values. Generally 40 to 50 stocks will be held in the fund. ■

# Agencies active in 1986

## FNMA, FHLMC, SLMA among innovative financiers

WASHINGTON — Three quasi-governmental agencies, the Federal National Mortgage Association, Federal Home Loan Mortgage Corp. and the Student Loan Marketing Association, were among the biggest and most innovative financiers in the market in 1986.

Here are thumbnail sketches on the financing activities and innovations of Fannie Mae, Freddie Mac and Sallie Mae.

• • •

**Fannie Mae** is a federally chartered, stockholder-owned corporation that operates a secondary market for home loans by purchasing mortgages and selling debt and mortgage-backed securities.

Fannie Mae's total debt issuance in 1986 amounted to $39.997 billion, which was used to finance the corporation's purchase activities in the mortgage market.

During 1986, the corporation continued to attract funds from a global investor base. There was heavy overseas demand for Fannie Mae dollar debentures and the yen-denominated debentures sold in the European and Japanese markets.

But direct overseas offerings played a smaller role in its financing activities in 1986 compared with previous years because of the attractive cost of domestically issued debt.

During 1986, Fannie Mae also added $67.6 million to stockholders' equity by issuing 11.5 million detachable common stock purchase warrants as part of a debenture offering.

In addition to the debt issues, Fannie Mae issued $60.56 billion of mortgage-backed securities, including $2.4 billion of an innovative new security called Stripped Mortgage Backed Securities.

Goldman, Sachs & Co. developed the SMBS idea and was underwriter for Fannie Mae's first such issue. An SMBS consists of two or more classes of securities. Each class represents a specified percentage of undivided ownership interest in the principal payments to be made on a pool of mortgage loans or mortgage-backed securities certificates and a different specified ownership interest in the interest payments on such a pool.

Additionally, an SMBS issue may be structured with separate classes for principal and interest. Traditional mortgage-backed securities give the investor an undivided interest in the entire pool of underlying mortgage loans.

The bulk of Fannie Mae's financing comes from the corporation's issuance of mortgage-backed securities. Those securities create a source of guaranty fee income, but without the fi-nancing risk associated with Fannie Mae's portfolio investing activities.

Most of the corporation's mortgage-backed securities are issued through lender swap transactions, whereby participating lenders place pools of mortgages in trust in exchange for securities.

Fannie Mae expects mortgage-backed securities will continue to grow through issuance of various types.

Also in 1986, Salomon Brothers Inc., working with Fannie Mae, issued $200 million of a then new security, known as a real estate mortgage investment conduit, tailored to meet the new tax law. REMICs operate like a trust for tax purposes but allow issuers more flexibility in structuring mortgage-backed securities. The offering was collateralized by mortgage-backed securities bought from Fannie Mae. Fannie Mae did not actually issue the securities itself.

• • •

**Freddie Mac** is a publicly chartered corporation, the preferred stock of which is owned by savings institutions and the purpose of which is to increase the availability of mortgage money for home loans. It does so primarily by buying mortgages from lenders and selling the mortgages as participation certificates, pledging them as collateral for Freddie Mac collateralized mortgage obligations.

The corporation issued about $102.3 billion in mortgage-backed securities, which financed almost all of the agency's needs. Debentures and discount notes aren't included in the total.

Of the total, Freddie Mac issued $100.1 billion in participation certificates, which are monthly pass-throughs and are considered a sale of assets, not a debt obligation. These include 15- and 30-year fixed-rate single-family mortgages and 10- and 15-year fixed-rate multifamily mortgages.

One innovative twist on the participation certificates was Freddie Mac's $335 million issue of them backed by adjustable-rate mortgages.

It was the first Freddie Mac participation certificate backed exclusively by recently originated 2% Treasury indexed ARMs offered to investors and marked the corporation's implementation of a program to finance the purchase of ARMs through the sale of mortgage-backed securities.

Under the ARM participation certificate program, Freddie Mac purchases ARMs from mortgage lenders for cash, and then forms pools of ARMs and sells the participation certificates backed by those pools to investors. Salomon Brothers was the lead manager.

In addition there was $1.85 billion in CMOs, and $381 million of a new security called Mortgage Cash Flow Obligations, another first for Freddie Mac.

MCFOs are unsecured general obligations of Freddie Mac with a structure similar to the Freddie Mac CMO. Unlike the CMO, however, the mortgages underlying the MCFO are not pledged in trust as collateral, nor are payments of principal and interest on the MCFOs secured by a lien on the underlying mortgages. Salomon Brothers was lead underwriter on the offering.

Freddie Mac underwrites the bulk of its issues. Only five Freddie Mac issues were underwritten or partly underwritten by Wall Street firms.

• • •

**Sallie Mae** is a federally chartered stockholder-owned corporation and the nation's major financial intermediary to the education market.

By buying insured student loans and providing other financial services to financial and educational institutions participating in the Guaranteed Student Loan Program, Sallie Mae replenishes local supplies of student credit.

The corporation uses a variety of debt instruments in both domestic and overseas markets to fund its operations. In 1986, the association raised $3.7 billion in net new funds.

Sallie Mae was the first to offer in the United States zero-coupon bonds denominated in a foreign currency. Shearson Lehman Brothers Inc. publicly offered the $140 million (U.S.) Australian dollar zero-coupon notes. After a separate currency exchange, Sallie Mae stood to net $74 million in proceeds and repay about $109 million at maturity.

The corporation also brought another new security to market, issuing a $53 million (U.S.) New Zealand-dollar note.

Sallie Mae also issued its first Eurobond offering, $100 million of seven-year Eurodollar notes; offered $300 million five-year notes with equity warrants and equity puts; and $250 million in yield curve notes.

# Top 50 . . .

*Continued from page 33*

Indeed, all of the top five utility sector issuers — GTE Corp., Pacific Gas & Electric Co., NYNEX Corp., Southern California Edison Co. and Long Island Lighting Co. — cited lower interest rates and refinancing opportunities as reasons for their 1986 debt offerings.

For example, Southern California Edison's $1.2 billion in 1986 financing helped the utility in its redemption of $2.7 billion in debt. Pacific Gas used the $1.7 billion in proceeds from its offerings last year toward the redemption of $1.8 billion in existing debt.

In the manufacturing industry, Union Carbide Corp. made a tender offer at a premium for $2.5 billion in 13½% to 15% debt issued in early 1986 in a recapitalization plan designed to fend off hostile suitor GAF Corp.

While many of the largest issuers achieved their rankings as a result of acquisition activity, two that moved into the Top 50 were corporate spinoffs launching initial public stock offerings.

The Henley Group, composed of 35 former Allied-Signal Inc. businesses, raised $1.2 billion in an IPO that ranked it among the top five in the manufacturing industry. Coca-Cola Enterprises Inc., formed by The Coca-Cola Co. and managed by former Coke executives, raised $1.1 billion through an IPO that put it among the top five service company issuers.

Outside of the banking and finance arenas, total financing for the top five in the remaining eight industries was: $9.9 billion for manufacturing; $7.6 billion for service companies; $7.3 billion for utilities; $7 billion for natural resource companies; $4.3 billion for retail companies; $4 billion for transportation companies; $2.5 billion for rail/shipping concerns; and $1.7 billion for health care concerns.

Of the $85.8 billion raised by the Top 50 issuers, almost $79 billion stemmed from public and

# Variable rates . . .

*Continued from page 6*

premium. Although the premium generally would be capped at $100 per participant, it would be indexed to 150% of wage inflation.

"With no control over the assumptions used to calculate the (PBGC) deficit, and no clear picture of the basis that would be used to determine wage growth, we are reluctant to support any kind of automatic adjustments or indexing," Mr. Anderson said.

A Washington attorney representing the U.S. Chamber of Commerce dismissed the variable-rate premium as no more than a short-term revenue raiser.

Richard Fay, a partner with Reed, Smith, Shaw & McClay in Washington, said the answer to curbing the PBGC's financial problems is better pension plan-funding, not altering the PBGC premium structure.

"We would favor tighter funding standards" and not "monkeying around with the PBGC premium," Mr. Fay said.

He described as silly statements that a variable-rate premium would, by itself, lead to better pension funding.

But the concept received its strongest support from the National Association of Manufacturers.

Michael Gulotta, who testified on behalf of NAM and also is president and chief actuary of Actuarial Sciences Inc., Piscataway, N.J., labeled the current flat-rate premium an unjustified tax on well-funded pension plans.

"A variable-rate approach reflects reality — the reality that (poorly funded) plans represent the greatest risk to the PBGC," he said.

Mr. Gulotta likened the current premium to an insurance company charging the same rate for term life insurance for an 85-year-old as for a 25-year-old.

A representative of the General Accounting Office said a variable-rate premium would be more complex than the flat-rate structure, but would be more fair.

"We believe it is more equitable than the existing flat rate because those plans generally representing no immediate potential claim would pay the lowest premium," said Joseph Delfico, senior associate director of the GAO's Human Resource Division, in his written testimony.

PBGC Executive Director Kathleen P. Utgoff, the chief architect and proponent of the variable-rate premium, urged quick action on the proposal.

If the PBGC premium keeps rising, employers with well-funded plans, and that resent subsidizing the poorly funded plans, might begin to terminate their defined benefit plans, she said.

"It is the well-funded plans that we are worried about. They are the ones who could leave the system unless something is done" to stabilize premiums, she said.

Ms. Utgoff, in response to congressional questioning, denied a higher premium would place such a burden on a financially troubled company that it would file for bankruptcy, terminate its underfunded pension plans and dump the liabilities onto the PBGC.

The higher premium is not significant in terms of a company's ability to survive, she said, noting the cost of a bankruptcy filing alone might exceed the higher PBGC premium.

Ms. Utgoff also said that limiting so-called distress terminations of underfunded plans to those companies that are liquidating under Chapter 7 of the Bankruptcy Code is not a solution to the PBGC's financial problems.

Now, under a provision in the Single Employer Pension Plan Amendments Act of 1986, companies that have filed for reorganization under Chapter 11 can terminate underfunded plans if the bankruptcy judge approves.

Ms. Utgoff noted limiting such terminations to Chapter 7 companies probably would not prove effective in protecting the PBGC from big pension terminations.

A company in Chapter 11 could sell off assets to pay creditors and then, by the time it filed for Chapter 7, there would be few assets available for the PBGC, she said.

Ms. Utgoff agreed that other changes — principally requiring better funding of pension plans — are needed along with a variable-rate premium to bring new stability to the PBGC insurance program. ■

*Continued from page 48*

private debt offerings, while $6.8 billion came from offerings of common and preferred stock.

Of the $14 billion raised in international transactions, $5.3 billion was generated through Eurodollar offerings and $8.7 billion was for debt offerings with interest or principal denominated in such currencies as the Australian or New Zealand dollar, Swiss franc, deutsche mark and yen.

International offerings by the Top 50 issuers accounted for 37% of the $38.3 billion raised by all U.S. issuers in the Eurobond market.

The Top 50 raised $76.7 billion in the foreign and domestic public markets, making up 24.2% of the $317 billion issued by U.S. companies worldwide. The remaining $9.1 billion in private placement transactions represents 8.8% of the $103.3 billion raised by U.S. companies in the overall private placement arena.

IDD bases a company's industry classification on which of its businesses generated the greatest percentage of revenue.

The rankings of the Top 50 issuers within each of the 10 industry categories were based by IDD on the net proceeds from public and private placement transactions. Only firmly underwritten public offerings were included for ranking purposes, while private placements included were those where the company used an investment bank as placement agent. Debt offerings had to carry maturities of at least a year to be included. In addition, each tranche of multiclass securities was counted as one issue.

Bank debt, on-going issuing facilities such as medium-term note programs, and tax-exempt offerings were not included in determining total financing for ranking purposes. However, individual profiles may include information on these types of transactions.

Also, IDD accumulates its private placement data from investment banking firms. For reasons of client confidentiality, the firms may not provide IDD with information on all private deals they arrange and, therefore, these numbers may not be complete. In cases where the issuer has supplied information on a private transaction not in IDD's data base, these transactions have been added to the totals. ■

# Advisers boost . . .

*Continued from page 2*

of investment managers outperformed the market.

AmeriTrust increased equity cash to 12% from between 8% and 10% at the end of 1986, said Richard Hyde, chief investment officer.

"We continue to be surprised (at the equity market) and we continue to be constructive, but are a little bit troubled. We feel the market is fairly fully valued by most benchmarks. What will cause it to go higher from here? We believe it could go higher, so we aren't going to make a major bet and raise cash to 30%. That's not our style. But the temptation is greater with each 100-point move in the market," he said.

Lincoln Capital raised its cash reserves to 8% from the 1% that was the lowest level of those contacted by *P&I Age* at year end.

J. Parker Hall III, president, said the increase was not because of market twists but "because some of the stocks we held at year-end outperformed the market and we trimmed back and just haven't reinvested the cash as yet."

Mr. Hall said Lincoln specializes in established growth companies and "we think they look quite attractive in the market today because (price-earnings ratios) are at a lesser premium to the market than in several years. I think we might well work this cash back into the market without worrying about a possible correction."

Lincoln has about $2.2 billion in equities under management.

Sun Bank reduced its cash reserve position to 7.5% from 14% at the end of 1986, said Anthony Gray, executive vice president.

"We sat around here on New Year's Eve and were modestly negative on the market and held 14% cash. The market had been drifting lower for four or five months and only a few stocks were doing well, most were doing poorly. We turned out not to be right; we had that cash invested the second day of the month," in time for the first-quarter market explosion.

Mr. Gray said no changes are anticipated in Sun Bank's current cash position. Sun Bank has about $5 billion in equities under management.

Harbor Capital Management reduced its equity cash reserves to 8% from 15% at the end of 1986 and put the money into the market, said Richard Spindler, investment officer.

"We started to get more active in the fourth quarter of 1986. It started slowly and kept up at a steady rate. Now we have the problem of what to do. At 8% there's not much leeway to do much of anything."

Harbor normally invests in growth and value stocks in almost equal proportions and has found it increasingly difficult to find acceptable value-oriented issues in the current market.

"I don't see us with zero cash anytime soon," said Mr. Spindler. "The 8% is high. But whether the market is overvalued or not, we're letting the pricing tell us. It is getting harder to find stocks."

Harbor manages about $700 million in equities.

Herb Hansen, president of Hansen Investment Management Co., said his firm began raising cash during the quarter as the market moved higher, ending the quarter with 13% cash, down slightly from 14.6% at the end of 1986.

"That's high for us. We tend to be fully invested but it is very hard to find value in this market. We don't like to pay more than market multiples."

Mr. Hansen said he is concerned about the currency crisis and the decline of the dollar internationally. "That's our big concern, but we are optimistic that the currency crisis will be resolved and then you can make a case for the S&P at 360 by the end of the year from about 290 now," he said. Hansen manages about $552 million in equities.

Sit Investment Associates Inc. reduced equity cash slightly in the first quarter to 10% from a 10% to 12% range in the fourth quarter of 1986.

"We took down some because equity assets went up. We sold some toward the end of the quarter," said Eugene Sit, president and chief investment officer. "We believe the market has been good and is due for a pause and we want to have some money just in case."

Mr. Sit said a market pullback of 100 to 150 points is possible sometime in the second quarter.

Sit manages about $2.4 billion in equities.

Alliance Capital Management held steady at 5% cash reserves in the first quarter, reflecting the company's desire to remain nearly fully invested.

"We think the U.S. market, among the world's capital markets, is reasonably valued and we think there will be a significant improvement in earnings and current market levels are justified. We aren't bearish," said Clint Kendrick, president.

Alliance has about $17 billion in equities under management. ■

*Continued from page 2*

cific Gas & Electric Co., San Francisco, and $116 million in government bonds for the New York City Board of Education Pension Fund.

The firms that placed fourth and fifth did so because of annuity purchases by the Los Angeles County Employees' Retirement Association. This is the first time any managers placed in the top 10 because of annuities.

The Travelers Corp. received $254 million worth of business and Aetna Life & Casualty Co., $200 million. Both companies are in Hartford, Conn. Aetna also had a $30 million real estate account, for the Connecticut Trust Funds.

Bucking the passive trend were the funds hiring The Boston Co., Boston, for $144.8 million worth of active accounts. The firm's biggest chunk of business was a $116 million active equity account for the Mississippi Public Employees' Retirement System, Jackson.

Mellon Bank, Pittsburgh, had $120 million in new business reported — in government bonds for the New York City Board of Education fund.

Loomis, Sayles & Co. Inc., based in Boston but with offices around the nation, had $115 million in new assets reported. The largest account was $100 million in equities for Pacific Gas & Electric.

Oppenheimer Capital Corp., New York, received $104 million in new business for active equity strategies, with the largest client being AMA Advisers Inc., Chicago. Pacific Investment Management Co., Newport Beach, Calif., was a beneficiary of the New York City Board of Education's moves, winning a $94.4 million account for mortgage-backed securities.

Also during the first quarter, the California Public Employees' Retirement System established allocations for six managers it selected last year. These managers weren't listed as top managers for the first quarter because they already were recognized as such for the second quarter of 1986.

Managers and their assignments were Atalanta/Sosnoff Capital Corp., New York, $500 million in equities; Dimensional Fund Advisors Inc., Santa Monica, Calif., $500 million in small-capitalization equities; Fidelity Bank, Philadelphia, $200 million in equities; First Chicago Investment Advisors, Chicago, $500 million as a swing manager; Lazard Freres Asset Management, New York, $500 million in equities; and TSA Capital Management, Los Angeles, $250 million in equities.

Munder Capital Management Inc., Detroit, had a new $350 million fixed-income account from the Kentucky Retirement Systems, Frankfort, reported in the quarter, but it was advisory only.

Analytic Investment Management Inc., Irvine, Calif., and Balch, Hardy & Scheinman Inc., New York, each won the assignment to write options on up to $150 million of the Houston Policemen's Retirement System's equity assets.

In terms of number of new accounts, Morgan Stanley & Co., New York, led with 10 tax-exempt funds committed to a venture capital limited partnership.

Bankers Trust followed with eight and Loomis, Sayles with six. Heitman Advisory Corp. and JMB Institutional Realty Corp., both of Chicago, had five each.

Managers with large or multiple accounts terminated, according to *P&I Age* reports during the quarter, included Alliance Capital Management Corp., New York, which saw $350 million in active equities reassigned by the New York City employees' and Fire Department systems; BEA Associates Inc., New York, which had $264.7 million reassigned by the New York employees' and police funds; Pioneering Management Corp., Boston, with a $120 million account terminated by the Baltimore Employees' Retirement Systems; and ABD International Management Corp., New York, which, following staff changes, was terminated by American Information Technologies Inc., Chicago; NYNEX Corp., New York; Pacific Telesis Group, San Francisco; and The Common Fund, Fairfield, Conn. ■

# Growth slows . . .

*Continued from page 3*

ecutives to accept portfolio insurance takes a long time. "It's just a fairly long educational process," said Bob Haber, vice president of Wells Fargo.

Future growth may come among small funds, said Pete Thomas, vice president of Skye Investment Advisors Inc., Cupertino, Calif.

Skye provides portfolio insurance for small funds through a pooled fund at Massachusetts Mutual Life Insurance Co., Springfield, and for larger funds through RepublicBank Dallas.

Some managers said pension fund officers' approach to portfolio insurance is changing, in some cases to an emphasis on protecting the surplus assets of pension funds.

"They're really beginning to focus on the surplus and look at assets less liabilities," said Jeff Geller, vice president and principal of BEA Associates Inc., New York.

Financial Accounting Standards Board Statement 87, providing for balance sheet recognition of pension fund surpluses or deficits, has brought this about, the managers said.

Still, what has been the standard reason for using dynamic hedging has not vanished. "Just because you're hearing a lot about FASB 87 doesn't mean that people have forgotten about protecting gains," Mr. Geller said.

The rampaging stock market has given many pension funds gains to protect. But dynamic hedging managers differ on whether the bull market has encouraged or discouraged business.

"You know the saying, 'I'm not going to get insurance until my neighbor's house burns,' " said Jim Donegan, senior vice president and partner of Westridge Capital Management, Los Angeles, supporting the view that many pension executives will wait until the bull market runs its course before trying to protect assets.

In a bear market, he said, "I'm looking for the floodgates to open dramatically. They're going to come running and they're going to want the insurance then."

Added William O. Melvin, director of investments for Webster Capital Management, New York: "I think the enthusiasm (for portfolio insurance) has definitely been postponed because of the bull market." Webster just began to market portfolio insurance.

Still, while the bull market may have lulled some people into expecting perpetual prosperity, it has moved others toward protective strategies to lock in gains, said John O'Brien, chairman and chief executive officer of LOR.

Interest in using dynamic hedging for bond portfolios also is growing. In a bear bond market — with rising interest rates lowering the market value of lower-interest bonds — greater numbers of pension funds may seek this strategy, managers said. To date, just a few billion dollars' worth of pension fund bond holdings have been hedged dynamically.

Even though their overall trend was upward, the financial markets have been volatile, raising the cost of dynamic hedging for many investors (*Pensions & Investment Age*, March 23).

"The sponsor community is just becoming much more educated about the pros and cons of insurance strategies, particularly the cons, with costs exceeding expectations," said Tim Taussig, manager of client development for BEA.

That is leading to more customizing of strategies to minimize the number of times pension funds have to face higher-than-expected costs, Mr. Taussig said. Pension executives have realized short-term insurance with a high floor return is expensive, so they are adjusting their parameters and, in some cases, becoming sellers as well as buyers of the insurance, he said.

Pension funds become sellers of insurance by taking the other side of the trades made by those buying it. Buyers of insurance, in most of the strategies, sell futures short; sometimes, these futures are underpriced when the insurance program kicks in.

Investors who take the other side of these trades do so because they see an arbitrage opportunity in buying the cheap futures and selling the more expensive stock holdings. This strategy is becoming increasingly popular with pension funds (*P&I Age*, April 6). Many of the managers offering portfolio insurance also offer this form of arbitrage. ■

# *Integration . . .*

*Continued from page 54*

Stephen Ross and Richard Roll, academicians turned money managers, developed the arbitrage pricing theory model several years ago. The model, marketed by Ross and Roll Asset Management, Philadelphia, concentrates on a comprehensive breakdown of risk and is flexible in that it adapts to the needs of the individual pension fund.

They say that because not every investor shares the same beliefs, requirements and desires, a customized approach makes sense. One pension executive may have a strong conviction the business cycle will soon meet an unexpected decline and may want to recycle the weighting against the stocks most affected by the exposure.

In their view, the pension fund executive could use the portfolio as insulation against operational risks. Because pension funds represent a significant portion of total corporate assets, managers may want to hedge the business risks of a company. That would require using a different investment objective than outperforming the S&P 500.

Stephen Berkowitz and Dennis Logue of Berkowitz, Logue & Associates, Columbia, Md., longtime backers of the integration concept, are about to launch a product along this line.

Mr. Berkowitz said there are obstacles. One, he explained, is pension fund managers are judged on whether they beat the S&P 500, and that benchmark wouldn't be pertinent using the integration strategy.

"If a pension plan manager were asked if he beat the S&P 500 and he didn't own a major industry sector in order to offset some corporate characteristic, he'd be in trouble," Mr. Berkowitz said, adding customized indexes will have to be designed for that purpose.

Jack L. Treynor, president of the Los Angeles investment management firm by the same name, cited another roadblock.

"People who hire and fire aren't taking the broad view. They are taking the pension balance sheet in isolation. To change that you have to get to the investment committees of the board of directors," Mr. Treynor said. ■

# State seeks proxy vote disclosure

**By Marcia Parker**

SACRAMENTO, Calif. — The California Legislature is considering a far-reaching bill that would require investment managers, master trustees and others who act in a trust capacity in the state to make public their proxy voting records — and more.

Slated for the first round of debate in the state Senate Judiciary Committee May 12, the trustee bill has been proposed at a time when the spotlight is on voting rights and practices during this proxy season.

The bill is contained in a broad package of proposals dealing with corporate governance issues, takeover abuse protections and insider trading, according to Dick Damm, senior consultant in the state Senate Office of Research.

The package comes on the heels of the U.S. Supreme Court's landmark decision upholding an Indiana law curbing takeovers.

Corporate governance experts, lawyers, academicians and government officials have predicted the high court's ruling will open the floodgates to other states eager to adopt laws that will slow hostile takeovers and bolster shareholder rights.

If the trustee bill is approved, these experts say it could serve as model legislation for other states. The trustee bill is believed to be the first in the nation that requires public disclosure of voting records.

Traditionally, corporate pension funds have delegated the proxy voting authority to the investment manager or master trustee, whose voting records rarely were made public.

Public pension funds, on the other hand, historically have retained the voting authority and have been more willing to make public the vote.

The push for disclosure of voting records has come from several groups. But not everyone thinks that is the best remedy.

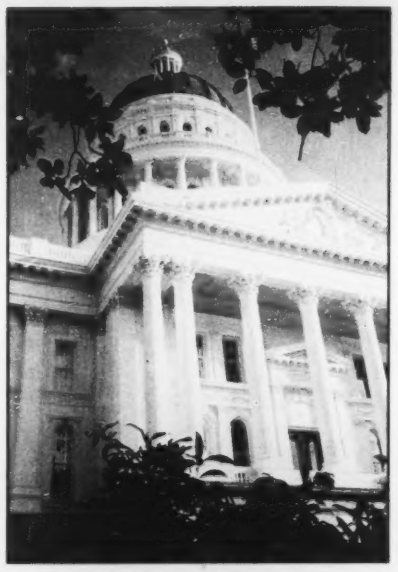
Robert Monks, who heads Institutional Shareholder Services, a shareholder rights group in Washington, said public disclosure would go a long way toward ending the real or perceived pressure on investment managers and trustees to vote with management. Mr. Monks, who helped draft the bill, hopes other states will follow California's lead if it is passed.

A recent study of the proxy voting process by the Investor Responsibility Research Center in Washington included disclosure among the many recommendations made by those it surveyed. IRRC Director Jamie Heard said he endorses the trustee bill.

Dean LeBaron, president, Batterymarch Financial Management, Boston, which is well known for making public its voting record in advance, hailed the bill.

"I am a fan of disclosure," he said. "We endorse it because it would make everyone who has the voting authority — investment managers, plan sponsors, trustees — accountable publicly."

Most money managers and master trustees contacted by *Pensions & Investment Age* said they grudgingly backed the bill



*The California Legislature has proposed a bill requiring trustees to disclose proxy voting records.*

but were concerned with what they believe will be costly and time-consuming record keeping and reporting duties.

Masako Dolan, director of policy and planning for the trustee bill's sponsor, state Sen. John Garamendi, said the Los Angeles County Bar Association had objected mainly to the record keeping and reporting burden.

Ms. Dolan said the bill has been amended to delete a requirement that the trustee report the voting records to the state Department of Corporations, which she thinks will alleviate much of the concern.

The California Bankers Association has voted to oppose the measure.

Mr. Damm said most money managers or master trustees probably would avoid taking a public stand against disclosure. "Who can be against disclosure?" he asked.

T. Boone Pickens and his United Shareholders Association in Washington, however, have backed secret balloting. But Ralph Whitworth, a spokesman for the association, said the group "supports anything that makes the system more accountable."

Mr. Garamendi's bill would force money managers and trustees to keep voting records for three years, notify beneficiaries of their voting record and their rationale, identify conflicts of interests in their votes and contacts with boards of directors.

The bill defines a trustee as any sole proprietorship, partnership, corporation or similar entity that solicits or accepts trust business in the state from the general public for remuneration and has or controls more than 100 trusts or one or more com-

# Court rules life insurer is fiduciary of IPG assets

**By Joel Chernoff**

HARTFORD, Conn. — In a blow to the life insurance industry, a federal district court has ruled an insurer is a fiduciary under ERISA with regard to assets underlying an immediate participation guarantee contract.

The case involves an IPG held by the International Brotherhood of Electrical Workers Local Union No. 90 pension fund, Wallingford, Conn., purchased from the John Hancock Mutual Life Insurance Co., Boston.

Assets underlying insurance contracts that provide a "guaranteed benefit" generally have not been considered plan assets under the Employee Retirement Income Security Act if the assets are held in an insurer's general account.

The Connecticut decision puts insurers "in an untenable position," said Stephen Kraus, senior associate general counsel for the American Council of Life Insurance, Washington.

State insurance laws prohibit insurers' favoring any contract holder, yet the ruling would force them to simultaneously meet ERISA's requirement of acting in the exclusive benefit of plan participants and beneficiaries, he explained.

"It's impossible for an insurance company to act exclusively in the benefit of (an individual) contract holder," said Stephen Goldberg, counsel for Aetna Life & Casualty Co., Hartford, Conn.

But lawyers for retirement funds disagree. "Congress did not intend that every insurance contract be exempt from ERISA," said Nell Hennessy, a partner with Willkie Farr & Gallagher, a Washington law firm, which represented U S WEST Inc., Englewood, Colo., in an IPG-related suit against Aetna.

IPG contracts are open end, with no maturity. If a retirement plan seeks to terminate one, it can be slapped with a "market value adjustment" or face lengthy payouts with low interest rates if it selects a book value payment option. Some retirement funds have asserted they have been hit with "hidden charges" when ending the contracts.

The problem became particu-

# AMAX taps pension fund again

**By John Covaleski**

GREENWICH, Conn. — AMAX Inc.'s pending plan to recapture $54 million in surplus pension assets will be the company's eighth pension plan termination since 1985, when it began a restructuring aimed at reducing its debt, now more than $2 billion.

AMAX has recaptured a total of $147.3 million in nine separate pension plan terminations since 1983, according to the Pension Benefit Guaranty Corp. That includes a 1983 spinoff/termination — one of the first done — in which $124 million was recaptured, of which $80 million was reported in 1986.

Money from each of the terminations has been used to either help pay off existing debt or to reduce borrowing needed for acquisitions made as part of the restructuring, said a spokesman in AMAX's corporate finance office.

The pending termination is for the $130 million defined benefit plan for salaried employees that was spun off in 1983.

The company plans to substitute a money purchase plan for the salaried defined benefit plan, proposing an April 30 termination (*Pensions & Investment Age*, March 9). A money-purchase plan is a form of defined contribution

# IBM buys $440 million GIC

By Fred Williams

IBM Corp., Stamford, Conn., has purchased a $440 million guaranteed investment contract for its employee savings plans from the Travelers Insurance Co., Hartford, Conn., one of the largest GIC deals in two years.

The $440 million window contract is part of nearly $600 million in new savings plan contributions that IBM put out to bid among GIC providers. Home Life Insurance Co., New York, and The Hartford Insurance Group, Hartford, received smaller allocations.

Although GIC rates are rising, one GIC broker said the IBM contracts were negotiated before the run-up in GIC yields, so IBM likely will experience lower overall returns. Yields have increased more than 100 basis points in the past three to four weeks on some five-year GICs, coinciding with the slumping and volatile bond market.

IBM officials refused to discuss any aspect of the GIC purchases, confirming only that the company's two savings plans had combined GIC assets of $849 million in 1985.

Industry sources familiar with the deal said IBM purchased an intermediate-term window GIC yielding about 60 basis points over intermediate-term Treasury securities. The contract begins July 1. Contributions will be accepted for six to 12 months, then will be locked in for the balance of the maturity period.

Another large GIC investment was made this year by ITT Corp., New York, with a newly formed GIC management unit at Bankers Trust Co., New York.

ITT purchased a $200 million GIC through the new unit formed in October. Its purchase makes up a sizable portion of the nearly $500 million under management in the unit. Bankers Trust manages the GIC portfolios on a separate account basis with PRIMCO, a Louisville, Ky., GIC investment specialty firm, said Richard Kaye, manager-structured bonds at Bankers Trust.

Rates on five- or six-year GICs are in the 9% range, said Mr. Kaye.

Yields on GICs now are "unbelievable," said John Knight, president of Lamberson Knight GIC Inc., Short Hills, N.J., as yields have been "gyrating on the way up," keeping pace with the bond market that has been "hammered in the last four weeks."

"GICs are heating up. We're getting a lot more interest now. When you get full percentage point moves, it generates more interest," said Mr. Knight.

GIC rates "are heating up tremendously" said Michael Dubrow, managing partner with Chambers, Dunhill, Rubin & Co., a Beverly Hills investment banking firm. He said top rates now are at 9.36% compounded, up from 8.6% to 8.4% "just a few weeks ago."

**Despite the dramatic increase** in GIC yields, spreads between GICs and Treasury securities with the same maturities continue to be narrow.

The spread remains in the 100- to 110-basis-point range, Mr. Dubrow said, while "historically spreads have been 130 to 140 basis points over Treasuries."

"Spreads are still down, and have been for a long time, reflecting the difficulty insurance companies are having finding lucrative assets (investments) and, because of the volatility in the bond market, some of them are wisely sitting on the sidelines," he said.

One GIC consultant suggested IBM might have had fewer bidders than expected.

"It presents a problem in terms of capacity for insurance companies, and we are seeing fewer (insurers) willing to bid on $200 million to $400 million cash flows . . . The bigger the amount, the bigger their risk," he said. ■

*Textron's Richard A. Watson*

# Ex-Cell-O managers trimmed

By Trudy Ring

PROVIDENCE, R.I. — Textron Inc., which bought Ex-Cell-O Corp. last year, has terminated Alliance Capital Management Corp., New York, and one other equity manager of the Ex-Cell-O pension fund and transferred the assets, roughly $144 million, to Textron's investment subsidiary.

Also, Jack A. Stone, the Ex-Cell-O assistant treasurer who oversaw the pension fund, has left the company.

Although Richard A. Watson, president of Textron Investment Management Co., declined to identify the managers terminated, a spokesman at Alliance confirmed the firm had been terminated as an equity manager. The spokesman did not reveal the size of the account.

Mr. Watson said the terminated managers ran about 40% of Ex-Cell-O's $360 million defined benefit fund.

The primary reason for the change was that Textron officials favor in-house money management, Mr. Watson said. Of Textron's own $1.6 billion defined benefit fund, $1.3 billion is run in-house.

Further changes in the Ex-Cell-O fund are probable, he said. "The likelihood is that over time, the Ex-Cell-O pension plan will be consolidated with the pension assets of Textron, at least for investment purposes," he said.

The money taken from the two terminated managers is being managed primarily in equities by the Textron subsidiary, Mr. Watson said.

According to the 1987 Money Market Directory, Ex-Cell-O's other equity managers were Batterymarch Financial Management

*Continued on page 45*

# Batterymarch cut by 5 more clients

By Marlene Givant and Trudy Ring

BOSTON — Batterymarch Financial Management has lost at least five clients and $190 million in assets so far this year, bringing the firm's loss since the beginning of 1986 to almost $4 billion and 42 clients.

As of Jan. 1, Batterymarch managed $7.7 billion in tax-exempt assets, a 33% drop from the $11.5 billion it reported as of Jan. 1, 1986.

In the first four months of 1987:

- Pan American World Airways Inc. Pilots' Variable Fund, New York, with $568.6 million in assets, pulled its $56.7 million equity account. Of that, $11 million was in the Trustees' Commingled Fund, Batterymarch's mutual fund administered by the Vanguard Group of Investment Cos. Inc.

The assets and new cash were used to fund Ardsley Partners for $25 million in domestic equity, and Alliance Capital Management for $19 million in an active international equities commingled fund. Some assets also were given to Nicholas-Applegate Capital Management; Lord, Abbett & Co.; and GAMCO Investors Inc. The fund had been with Batterymarch at least five years.

- National Fuel Gas Co., Buffalo, N.Y., with $270 million in total assets, pulled $46 million from Batterymarch. The assets were reallocated to existing manager Manning & Napier Advisors, and a new hire, Neuberger & Berman. The money, split $25 million and $21 million, remained in equities. The fund had been with Batterymarch six years.
- The New York Stock Exchange's $100 million retirement plan terminated its $31 million account with Batterymarch at the end of March. One-third of the assets went to existing manager INVESCO Capital Management Inc. and two-thirds to new hire George D. Bjurman & Associates. The NYSE plan had been a client since 1983.
- Pittston Co., Greenwich, Conn., with $200 million in pension assets, terminated its $30 million domestic equity account. Further details weren't available.
- The $125 million pension fund at ENSERCH Corp. Dallas, withdrew its $25 million in assets, putting the money in a stock index fund with Mellon Capital Management Corp.

Funds that dropped Batterymarch in late 1986 included the $1.7 billion Rockefeller Foundation, New York; the $500 million Mead Corp. pension fund, Dayton, Ohio; and the $60 million Mills College, Oakland, Calif., endowment fund. They pulled accounts of $100 million, $35 million and $13 million, respectively (*Pensions & Investment Age*, Nov. 10 and Dec. 22).

After three years of poor performance and the recent defections of five professionals (*P&I Age*, March 23), business is a far cry from Batterymarch's 1984 peak of $12.1 billion in assets under management.

That success came after the firm beat the Standard & Poor's 500 stock index during the often-rough market tides of 1974-79 and 1981-83.

While the firm has shone in bear markets, its returns have suffered in the bull market of the past three years. Last year, the firm's average account returned 16.3%, compared with 18.7% for the S&P 500. In 1985, the return was worse, 23.9% vs. the index's 31.8%, and 1984's return of - 1.2% greatly lagged the index's 6.3%.

Still, some clients note Batterymarch's first-quarter returns are above the index, 21.7% vs. 21.4%, and the firm's average compound rate of return from inception in 1970 through the end of 1986 is 14.2%, compared with the S&P's 11%.

"Over the past 17 years, we have gained more extra return vs. the market averages in falling markets than we have in rising markets," Dean LeBaron, founder, wrote in the firm's 1986 annual report. "Since we are now in the fifth year of one of the most exuberant bull markets in the last half-century, it is not startling to find Batterymarch results lagging . . . During 1986, some of our clients lost patience and shifted assets to other approaches."

Batterymarch's returns began to rebound in mid-1986, Mr. LeBaron added in an interview. In

# Crossing network aiming for liquidity

**By Chuck Paustian**

While the developers of the first electronic crossing network try to boost liquidity and increase efficiency, creators of a second network expect theirs to be operating this month, and Chase Manhattan Bank officials still contemplate establishing a third network.

Despite several, earlier crossing attempts that failed because of lack of liquidity, three pension funds and three money managers crossed about 686,000 shares April 23 through Instinet Corp.'s electronic crossing network.

(Another 373,500 shares were crossed the same day between two institutions that had arranged the transaction themselves.)

The electronic crosses worked, in part, because of a new effort to cultivate both sides of a trade and a new commitment to using the system any day there is sufficient demand, said Edward C. Story, a partner with Plexus Group, Santa Monica, Calif., which markets the crossing network for Instinet.

Institutional investors that previously used or attempted to use the Instinet network generally welcomed the new features.

"Personally, I think it is a very positive move," said Lester T. Brol, a trust officer in the strategic investment group at The Northern Trust Co., Chicago, which was one of the first institutions to use the Instinet network.

"If I'm the person instigating the crossing, I can let the world know I have a vanilla index program I want to do on the system that evening," he said.

Although Northern has tried to use the system a few times, it has had only one successful crossing.

"You just need a massive amount of liquidity to make this thing work and make it attractive to participants," said Theodore R. Aronson, partner of Aronson & Fogler, Philadelphia, whose firm has yet to succeed in crossing.

The crossing network appeals particularly to index fund managers that often have baskets of stock they want to trade but usually aren't active traders.

"A passive fund, unless you're putting money in or taking money out, doesn't need as much trading. We try to trade as little as possible, anyway," said Carl Liebscher, director-investments at Deere & Co., Moline, Ill. About $1 billion of Deere's $2.2 billion pension fund is invested in a passively managed equity portfolio.

Mr. Story said in addition to the system's daily availability (instead of only Wednesdays and the day before the first and 15th of each month), crossing network personnel will try to spark additional activity by eliciting information from participants on whether it's a buy or sell transaction, how many different stock names there are and whether the basket is part of the Standard & Poor's 500 stock index.

Under this approach, if one institution entered a transaction into the electronic crossing, Instinet and Plexus personnel can try to locate the other side of the transaction from among system users.

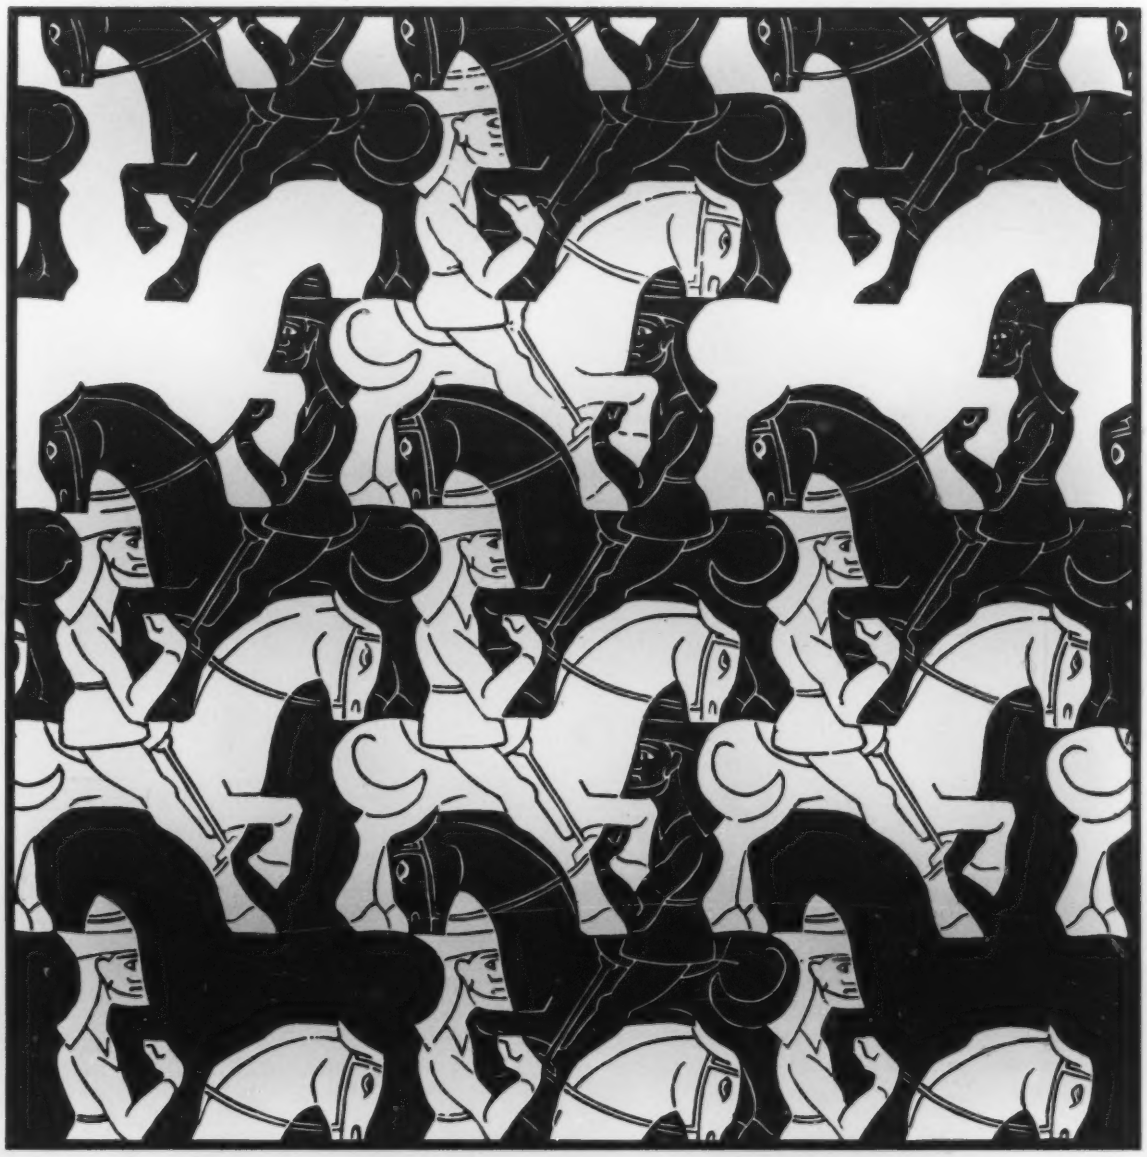
Progress on the other electronic trading system — developed by Jefferies & Co. Inc., Los Angeles, and being marketed by the consulting firm BARRA, Berkeley, Calif. — continues.

"We've been testing and just getting ready," said Donald L. Luskin, senior vice president in the Chicago office of Jefferies. ■

## Corrections & clarifications

• The estimate of assets **Leland O'Brien Rubinstein Associates Inc.**, Los Angeles, has under management in its portfolio insurance programs is $22 billion. A table in the April 20 issue contained an incorrect figure.

• Mention of **Douglas Sheldon,** senior investment officer-real estate, was omitted inadvertently from the questionnaire submitted by the California State Teachers' Retirement System for inclusion in the Jan. 26 profile issue.



BEYOND THE OBVIOUS

In the world of investments as well as in art, patterns can overlap one another. Confounding traditional boundaries.

At Concord Capital we look beyond the obvious for our investment insights. We aren't predisposed to growth stocks. Or small companies. Or asset value. We take a broader view of the equity market. We target opportunities that others miss.

The results are clearly visible. Over the last five years, we outperformed 87% of the managers in Frank Russell Company's universe of equity managers.

# Corporate Finance

## Firms drop currency swap

By Marci Baker

Although the volatile foreign exchange and interest rate environments generally are keeping U.S. issuers out of the international financing arena, some U.S. corporations have begun to go after cheaper financing through the issuance of unhedged currency-based bond offerings.

Exceptions exist, but the weak dollar and uncertain U.S. interest rate environment have contributed to making swap-driven, currency-related deals uneconomic for U.S. issuers.

Non-dollar debt offerings, however, can provide savings on financing costs for some companies willing to forgo the swap and retain the exposure to fluctuations in the exchange rates, issuers and investment bankers said.

A few U.S. issuers already have dabbled in the concept. The Black & Decker Corp., Towson, Md.; IBM Corp., Armonk, N.Y.; The Dow Chemical Co., Midland, Mich.; and Chevron Corp., San Francisco, issued debt denominated in Swiss francs and deutsche marks earlier this year.

None of these transactions included full currency swaps, although investment bankers said some might have been partially hedged with swaps or forward contracts to reduce currency risk on interest payments.

Moreover, General Motors Corp., Detroit, raised debt last May, but opted against swapping the interest and principal obligations into U.S. dollars.

"You may start to see some more issuers doing (unhedged offerings)," said William Schroth, managing director at First Boston Corp., New York. "There are a good deal of people talking about it."

Andreas Tobler, vice president at Credit Suisse, agreed, adding the greatest prospects for unhedged or partially hedged currency transactions lie with the lowest coupon markets, including Japan, West Germany and Switzerland.

Coupons on currency-denominated issues in these markets can be three to four percentage points lower than rates on comparable offerings in the U.S. market, investment bankers explained. At the same time, the dollar has depreciated substantially against the yen, deutsche mark and Swiss franc.

Further declines in the dollar's value would narrow the gap between the non-dollar and would-be dollar-based cost of financing, because the issuer's foreign exchange costs associated with making interest and principal payments would increase. That drop in the dollar would have to be substantial, however, before the cost advantage would be eliminated.

Meanwhile, the issuer would benefit further if the dollar began to climb against the issuing currency.

Issuers launching unhedged currency-based transactions generally have operations in the countries in which their deals have been sold. Plus, they already have done non-dollar deals and are comfortable working with foreign currencies.

Some issuers are doing the transactions to meet funding obligations in those currencies, while others have launched deals for the currency play.

Black & Decker in February raised money to pay off $100 million in Eurobonds carrying a 9⅛% coupon through an offering of 5⅞% notes denominated in deutsche marks.

"We have very significant deutsche mark exposure through our manufacturing operations in Germany," said Stephen Page, treasurer, explaining the company's decision not to swap its new obligation into U.S. dollars.

The currency exposure is not a concern for accounting purposes, he added: "The currency fluctuations are a special equity item for accounting purposes, so there's no consequence to the profit and loss statement."

Like Black & Decker, Dow Chemical has operations in foreign countries, including Switzerland, although meeting Swiss franc funding obligations was not the main reason for its recent note offering in that currency. Rather, it was done for the currency and interest rate play.

The company raised roughly $130 million through a 200 million Swiss franc offering of 12-year notes carrying a 4¾% coupon. A comparable U.S. offering at the time would have carried an 8% to 8½% coupon.

"We were looking around for alternative financing opportunities. Swiss franc rates were more attractive than U.S. dollar rates," said Robert Lafferty, manager-funding operations.

Dow also ran estimates on how much the dollar would have to decline against the Swiss franc before the cost of the currency transaction would "break even" with a comparable dollar transaction. "The drop would have to be fairly substantial before the issue would become more expensive to us than a dollar offering," Mr. Lafferty said.

Despite the example set by Dow and others that have engaged in unhedged currency-denominated debt deals, the majority of U.S. issuers will wait for swap-driven financing opportunities to arise.

"I have a hard time believing that companies would want to engage in outright (currency) speculation when it comes to their liabilities," said Ken Sullivan, managing director at Drexel Burnham Lambert Inc., New York.

John Lipsky, vice president at Salomon Brothers Inc., New York, agreed, noting the swap market has evolved because most corporations don't view debt financing as an appropriate avenue for speculating in foreign currencies.

"If you issue without a swap, what you are essentially doing is playing in the currency markets," said the chief financial officer at a major U.S. bank. "I can make currency plays in other ways. I don't need to do it with my debt offerings."

"U.S. corporations are conservative and don't like to go unhedged in currency-based offerings," said a banker at Yamaichi International Inc. Predictions that more companies would enter into unhedged deals may be more rhetoric from Wall Street firms than an actual trend, he said.

He conceded, however, that issuing in yen without a swap is a way to achieve attractive financing in the current non-dollar environment. "After you add in the

## TV anchors bank deal

By Brad Rudin

HEWLETT, N.Y. — When Anchor Savings Bank decided to go public, the use of television to advertise the offering came as easily as switching on the set.

The use of television to promote the public offering, a rare practice, helped the bank raise gross proceeds of $202.3 million.

"We're just doing what we've always done," said Dor.ald L. Thomas, chairman and chief executive officer and a veteran of almost two decades in front of the camera on behalf of Anchor.

Anchor, the 15th largest thrift in the country, operates 132 branch offices in New York, New Jersey, Florida and Georgia. It added 104 offices from 1981 to 1985 by acquiring 13 troubled thrift institutions.

In addition to diversifying its geogra-

## Pace of credit downgrades slows in first quarter

By Brad Rudin

Although the number of downgrades continued to outpace the number of upgrades, the downward slide of corporate credit quality slowed during the first quarter.

The five credit-rating agencies handed out 186 downgrades and 89 upgrades in the first quarter compared with 211 downgrades and 87 upgrades in the fourth quarter of 1986.

"Corporate credit quality stabilized somewhat in early 1987," according to a Standard & Poor's Corp., New York, statement announcing the first-quarter rating results.

Restructurings continued to inject an additional element of risk in corporate debt, the Standard & Poor's statement said.

For example, S&P downgraded Goodyear Tire & Rubber Co., Akron, Ohio, to reflect asset sales that will be used to fund most of the company's $2.6 billion stock repurchase plan, which followed Sir James Goldsmith's unsuccessful bid for the company.

All five credit-rating agencies handed out more downgrades than upgrades, but the proportion of downgrades to total rating actions dipped at two agencies. Downgrades amounted to 66% of the first-quarter rating actions taken by Moody's Investors Service, New York, compared with 83% in the fourth quarter of last year. At Duff & Phelps Inc., Chicago, the percentage of downgrades to total actions edged down to 60% from 61% in the previous quarter.

Downgrades accounted for 74% of Standard & Poor's ratings actions in the first quarter, up two percentage points from the last quarter of 1986. Analysts at Fitch Investors Service Inc., New York, decided on downgrades in 71% of their rating actions in the first quarter, up from 57% during the fourth quarter. At McCarthy, Crisanti & Maffei Inc., New York, analysts handed out downgrades in 53% of their first-quarter rating actions compared with 46% in the previous quarter.

Deteriorating credit quality among financial institutions emerged as a theme in the first-quarter data made available by the rating agencies. Both Standard & Poor's and Moody's reported the lower quality of assets held by banks contributed to the downgrades.

Moody's, citing the banks' exposure to energy and real estate loans, downgraded MCorp., Dallas, Allied Bancshares Inc., Houston and RepublicBank Corp., Dallas. In the RepublicBank action, the agency also cited the proposed merger with InterFirst Bank Dallas N.A. InterFirst suffers from weaker asset quality than RepublicBank, Moody's said.

Chase Manhattan Corp.'s rating by Moody's slipped because of "competitive pressure on the company's core business franchise," according to an agency report. Moody's downgraded Merrill Lynch & Co., saying the investment bank's commitment to merchant banking raises the risk of its debt issues.

The utilities presented a brighter picture, according to Standard & Poor's, which gave this sector the distinction of being the only group among five to receive more upgrades than downgrades.

Overall, the rating agencies seemed cautiously optimistic about credit quality.

"For the remainder of the year, we would expect a better balance between upgrades and downgrades, barring the resurgence of takeover mania," said William A. Cornish, chairman of the credit-rating committee at Duff & Phelps. Mr. Cornish, in a statement, pointed to cost reductions and the sale of "subpar operations" as reasons for the optimistic outlook.

In its statement, Moody's predicted "downgrades of corporations and financial institutions will continue to outpace upgrades by a substantial margin during 1987 — though to a lesser degree during 1986." A prolonged decline of the dollar, an increase in interest rates, higher oil prices and shaky loans to less developed countries could exert additional pressure on credit quality, Moody's added in a more negative note.

Economists from outside the credit-rating agencies offered an optimistic short-term view of credit quality, saying the dollar's

## TV deal . . .

*Continued from page 21*

phic base, Anchor has been boosting non-interest sources of income by emphasizing the sale of assets and fees from loan origination and servicing.

The bank recently sold 17,595,000 shares in a subscription offering that converted it to a federally chartered stock from a federally chartered mutual savings bank. Because of strong investor demand, the bank offered more than the 15,300,000 shares indicated in the offering circular.

Each share sold for $11.50, the top of the range indicated in the circular.

Pleased by investor response to the offering, Mr. Thomas hailed Anchor as being "the first thrift institution that completely sold out its offering through the community without the help of Wall Street."

In a subscription offering, shares are offered to customers and employees. People who live in counties where the bank has offices also are eligible to buy stock.

If the subscription offering had failed to sell all the shares, a syndicate made up of Salomon Brothers Inc., Goldman, Sachs & Co., Prudential-Bache Securities Inc., Shearson Lehman Brothers Inc. and Smith Barney, Harris Upham & Co., all of New York, would have underwritten a public offering of the unsold shares.

Madison Avenue likely helped to make the services of Wall Street unnecessary.

Anchor has used television in its efforts to transform itself into a regional banking network with assets of $7.3 billion from a local bank with $260 million in assets.

"My wife and I have been on television for 18 years," said Mr. Thomas, who joined the bank in 1966. "We've been beating the drums for a long time."

Barbara Thomas suggested a part for herself in the commercials, saying her presence would underscore the bank's commitment to equal opportunity for women, Mr. Thomas recalled. "She earns $1 a year and she does it just to help me out."

Their tag line, "Your Anchor banker, he understands; your Anchor banker, she understands," is one of those familiar lines television viewers anticipate.

"We've got great recognition," Mr. Thomas said. "We've been stopped in London, Rio de Janeiro, Buenos Aires and Singapore. It's amazing the recognition you get from TV."

Mr. Thomas will get an extra measure of recognition from investors if he can continue to improve the bank's once-doleful, bottom-line performance. Anchor suffered net losses from 1982 through 1985, turning the corner last year with a profit of $41.2 million.

During the early 1980s, when thrifts began living with deregulation, Anchor found itself squeezed between savings accounts that reflected changing money market rates and long-term fixed-rate mortgage loans. The reduced spread between the income earned by the bank's assets and the cost of its funds contributed to operating losses that moved to $53.2 million in 1985 from $7.4 million in 1982.

The bank's return to profitability rests on the reduced cost of funds resulting from lower interest rates and a strategy that reduces its sensitivity to interest-rate fluctuations.

Anchor in the past several years has tried to improve its asset/liability management by selling its long-term fixed-rate loans and buying shorter-term or variable-rate instruments with the proceeds.

The bank also has sought to insulate itself from interest-rate risk by expanding the fee-generating services available to customers. Anchor intends to establish an investment management unit and a trust department after getting regulatory approval.

# Medical benefits timetable set

STAMFORD, Conn. — A definitive statement by the Financial Accounting Standards Board on the accounting treatment of retiree medical benefit liabilities, which experts claim could exceed an organization's net worth in many cases, will not be forthcoming until after the first quarter of 1989.

The seven-member board has established a general timetable leading up to the final statement. In a bulletin to clients, the international consulting firm of William M. Mercer-Meidinger-Hansen Inc. reported the timetable includes an exposure draft of the accounting statement during the first quarter of 1988 followed by public hearings on the issue in the third quarter of 1988. A final statement is scheduled to be released in the first quarter of 1989 with the effective date yet to be determined.

Michael Merlob, an associate in the Stamford office of Mercer-Meidinger-Hansen who prepared the bulletin, said "it is quite clear from the tone of the meetings that recognizing the cost of other post-employment benefits is an issue that employers will have to address."

The cost of post-retirement health benefits to corporations is a potentially formidable problem because liabilities in many of these plans have been mounting and few companies pre-fund retiree medical liabilities.

Many benefit experts claim when the FASB statement requires recognition of these liabilities, employers' balance sheets may reflect drastic changes.

"Employers may soon have to make some difficult decisions about their post-retirement benefit plans," Mr. Merlob wrote.

Among the decisions employers will face will be, "whether to reduce their potential exposures."

In order to make these decisions on an informed basis, employers will need information such as a detailed analysis of current retiree medical costs, he wrote. ■

## Firms dropping currency . . .

*Continued from page 21*

cost of the swap, there's no net advantage over doing a straight dollar deal domestically," he said.

Not surprisingly then, many U.S. companies are preferring to wait out the uncertainty in the currency and interest rate environments.

"We are always looking for financing opportunities, but it's difficult to do anything cost effectively right now," said Mitch Johnson, senior vice president-corporate finance at the Student Loan Marketing Association, Washington. "Issuers and investors both are sitting on the sidelines until some direction in the markets becomes clearer."

If companies must raise capital, especially of any size, "the only market to go to is really the domestic market," said Mr. Tobler.

But some overseas or non-dollar financing opportunities have come up, particularly for high-quality industrial and financial concerns.

For U.S. issuers, there has been a real shift toward the less volatile, higher-yielding currencies, where issuers can still get cheaper all-in financing after swapping obligations into dollars, Mr. Lipsky said. In particular, demand has remained strong for Australian and New Zealand dollar-denominated offerings launched in the United States.

Increased demand by Japanese investors late last month led foreign and U.S. issuers, including Morgan Guaranty Trust Co., Morgan Stanley Group Inc. and the World Bank, to launch yen-denominated offerings.

The greatest potential overseas has been and continues to be with equity-linked transactions, Mr. Sullivan said.

The world stock markets are booming and investors are eager to buy equity-linked deals, both in the Eurodollar and currency markets, said Mr. Tobler.

Japanese issuers have been the most active issuers lately of Euro-convertibles or debt with equity warrants. Some U.S. corporations have participated as well. Cetus Corp. raised $100 million in late April with an offering of 15-year convertible Eurobonds.

Other issuers, meanwhile, have sought to stimulate lackluster demand in the Eurodollar market with offerings of Eurodollar debt with gold warrants.

But as long as the value of the dollar remains uncertain, overseas investors will not have a taste for dollar issues. Only one-third of overall international issuance has been dollar-denominated so far this year, a decline from 1986 when 55% was done in dollars, said Mr. Lipsky. ■

## Credit . . .

*Continued from page 21*

decline to date will bolster corporate balance sheets and credit quality.

Increases in the prices of imported goods will enable U.S. manufacturers to boost their own prices, a development that augurs well for profits because unions do not have the clout to push up wages, said Stan Shipley, an economist at E.F. Hutton & Co., New York.

In the short term, the trade advantages produced by the declining dollar offset the devalued dollar's upward pressure on interest rates, said Neal M. Soss, chief economist at First Boston Corp., New York. A prolonged uptick in interest rates would weaken the economy and erode credit quality, he said.

Some of the good news coming from the rating agencies is the result of companies raising equity to replace debt, said David D. Hale, chief economist at Kemper Financial Services Inc., Chicago. "I think what you are looking at is the counterpart to the big stock market boom."

A healthy equity market will support credit quality for the next few quarters, but the longer term prognosis remains clouded by the possibility of a recession in 1988 or 1989, Mr. Hale said. ■

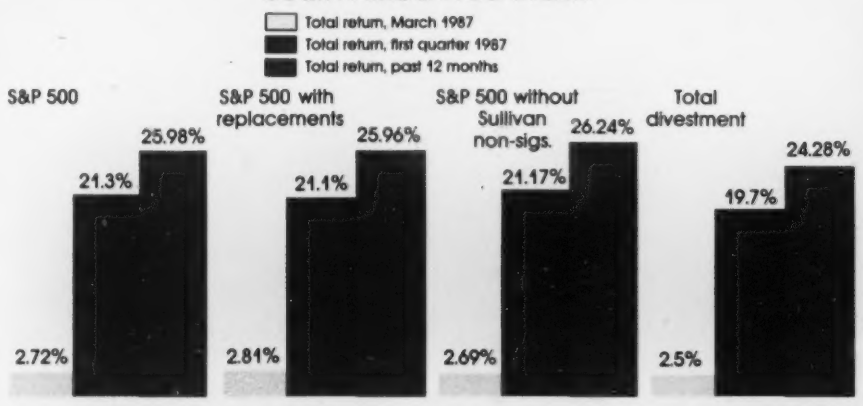
# Statistically speaking

The Statistically Speaking page offers an at-a-glance look at statistics for the latest quarter.

The Wilshire South Africa Free Index, Mercer-Meidinger bullet GIC data, First Chicago's MMI and the Russell 3000 returns will appear regularly.

Other data will be used as time and space allow.

## South Africa Free Index



Source: Wilshire Associates, Santa Monica, Calif.

**S&P 500 with replacements:** replaces a South Africa-related company with next largest company in the industry. **S&P 500 without Sullivan non-signatories:** excludes 20 companies, no replacements. **Total divestment:** eliminates all companies with South Africa involvement, no replacements.

## Multiple Markets Index

The Multiple Markets Index is a benchmark for total portfolio returns. It is composed of eight asset classes used by retirement plan executives; it is calibrated to reflect the same degree of risk of the typical pension portfolio; it uses passive fixed policy weights; and it represents the individual asset classes by the broadest and most complete market return data available.

# Executives warned of proxy vote liability

**By Marcia Parker and Marlene Givant**

WASHINGTON — Corporate executives who direct the voting of pension fund proxies might be assuming liability for their outside managers' day-to-day investment decisions, warned two top officials of the Labor Department's Pension and Welfare Benefits Administration.

In addition, money managers and bank trustees who allow corporate executives to vote fund shares without explicit authority from the trust agreement are not relieved of their fiduciary liability, the officials said on separate occasions.

The warnings came at the end of a proxy season in which at least 60 companies waged aggressive campaigns against proposals designed to rescind or put to a vote shareholder rights' plans adopted by the companies without shareholder approval (*Pensions & Investment Age*, March 9). Shareholders rights' plans are often known as "poison pills" because they are designed to make unfriendly takeover bids difficult.

In some of the proxy solicitation campaigns, some corporate chief executive officers asked other chief executives to urge their pension fund managers to vote the pension fund proxies with management.

The Department of Labor is researching how pension plans handle proxy voting and whether institutional investors are contacted by corporations attempting to influence proxy votes. The department is "looking for a good case" to test current practices, said David Walker, deputy assistant secretary of labor.

Mr. Walker also warned that if an investment manager follows the direction of a third party — the corporate client — on a proxy vote, neither the manager nor the company is "off the hook" with regard to fiduciary responsibilities, unless the pension plan's trust agreement specifically gives

# McKesson leads move to drop annual reports

**By Barry B. Burr**

At least one major corporation — McKesson Corp., San Francisco — is abolishing its annual report, and others are considering following suit.

McKesson, backed by the Securities and Exchange Commission, will become the first to kill its annual report as a means of disclosing its financial statements.

The sharp change in reporting to shareholders, initially advanced by General Motors Corp., Detroit, and the Financial Executives Institute, appears likely to be adopted by other companies, including GM and Walt Disney Productions, Burbank, Calif.

Executives interviewed pointed out the impetus for the change is to improve readability of company reports to shareholders and to save money on publishing a glossy annual report.

Disney Controller Bruce F. Johnson said his company could scrap its annual report this fall. "We're giving serious consideration to it as we're asking other FEI companies to," said Mr. Johnson of the new reporting concept.

"A lot of (other companies) are thinking of doing it," added Eugene M. Flegm, GM's assistant controller.

Some companies might avoid producing even a summary report and provide only a proxy and a 10-K, he added.

McKesson in June will turn its glossy annual report into a summary more freely discussing the company's past and outlook with abbreviated financial statements, while disclosing its complete financial details in the tissue paper-like proxy statement.

Unlike GM and Disney, McKesson wasn't involved in the FEI project to simplify reporting, noted Alan Seelanfreund, executive vice president and chief financial officer for the drug and beverage distributing company.

"We looked at that (FEI project) and thought it made sense," Mr. Seelanfreund said.

McKesson's fiscal year ended March 31. Mr. Seelanfreund said the company plans to send out its new summary report together with the proxy to shareholders June 15.

A proposal to the SEC from GM in December suggested a reporting change similar to that McKesson will adopt and Disney is considering.

# *TI fund does leaseback*

**By John Covaleski**

Texas Instruments Inc., raising cash to increase its production capacity, has arranged a sale-leaseback of a 115-acre tract the company owns with its $750 million pension fund.

Under the pension fund's $34.3 million purchase, which was approved by the Department of Labor, TI will lease the tract in Plano, a Dallas suburb, back from the pension fund for a period of up to 10 years or until the fund terminates the lease to sell the tract.

The company has agreed to lease the property for 10% of the sales price annually, or $3.43 million per year, and pay all property taxes and utility charges.

The company also will pay the pension fund any difference between the $34.3 million purchase price and either the property's market value after the lease ex-

# Restructuring slashes assets

**By Fred Williams**

DALLAS — The restructuring of Diamond Shamrock Corp. into two companies following an unsuccessful takeover attempt has cut total employee benefit assets to $176 million from $256 million and pension assets to $123 million from $190 million near the end of 1986.

The takeover attempt by a group of investors led by T. Boone Pickens started in December and ended in March with a cash tender offer by the company for 20 million outstanding shares at $17 per share (vs. $15 per share from the Pickens group). It resulted in the spinoff April 30 of the Shamrock refining and marketing unit and the replacement of Shamrock's chairman and chief executive officer.

Diamond Shamrock changed its name this month to Maxus Energy Corp., Dallas; the refining and marketing subsidiary became Diamond Shamrock R&M Inc., San Antonio, Texas.

The restructuring also prompted the termination of five defined benefit plans.

Internal manager John Ring, director of pension investments at Diamond Shamrock, will retain that post with Maxus — managing Maxus' $112 million in pension assets — and will manage Diamond Shamrock R&M's $11 million in pension assets as well.

Although Mr. Ring's office managed about $256 million in employee benefit assets, that amount has dropped to about $176 million since the restructuring, including the assets of Diamond Shamrock R&M, he said. The assets dropped by the $80 million that was paid to Aetna Life and Casualty Co. to purchase annuities for participants in the five terminated plans.

Although the plans were "fully funded" at the time they were terminated, said Mr. Ring, there will be no asset reversions resulting from the action.

"The details are still in the process of being worked out, but any surplus will remain in the trust," he said. "My group will continue to manage their (Diamond Shamrock R&M) pension and savings plan assets. They will become a client. We have a contract with them just as with any investment manager with a client company," said Mr. Ring.

The decision to continue using the Maxus investment management service was made by Diamond Shamrock R&M, said Mr. Ring. "It gives them an opportunity to confront their principal problem, which is to set up what was a division into a complete operating company," he said. "They know the assets will be managed as they have been and have some continuity of management. If they decide to change they can make that decision in the future. Right now they have a full plate to take care of."

Robert C. Becker, vice president and treasurer of Diamond Shamrock R&M, said he has no immediate plans to seek outside investment management services for the plan.

"If we didn't trust him to run the plan, we wouldn't have stayed with him. John has done an excellent job.

*John Ring will manage assets of companies formed in the Diamond Shamrock restructuring.*

"We don't plan to do anything with regard to the pension plan until at least the first quarter of next year."

Mr. Becker said Diamond Shamrock R&M is ending its approximately $17.5 million employee savings plan to institute an employee stock ownership program. He said methods of distributing assets from the savings plan are being reviewed.

"That plan will be terminated and distributions made either to employees or some other alternative such as an (individual retirement account) rollover or ESOP rollover. It hasn't been decided yet," he said.

Mr. Ring declined to discuss the reasoning behind the termination of the five defined benefit plans in January. But sources said the terminations coincided with the Pickens group's effort to acquire Diamond Shamrock, and management probably wanted to put any surplus assets out of reach.

The remaining $123 million in pension assets are for the Maxus plan, which covers 2,500 employees, and a small portion for the former Diamond Shamrock chemical unit that was sold last year

# Turnaround due?

## Oil, gas exploration deals grow

**By Fred Williams**

Exploration programs, the riskiest investments in the oil and natural gas business, are gaining acceptance by pension fund officials and investment specialists who anticipate healthy returns for investors with long-term investment horizons.

Most experts believe the oil and gas market hit bottom in 1986 and prices, particularly gas prices, are poised for a spectacular recovery beginning in the next few months.

The resulting ground-floor opportunity for savvy direct oil field plays has prompted several pension funds to put assets into exploration and natural gas development programs. But these investments have yet to capture widespread interest in the pension industry.

Among the multiplayer deals that have captured tax-exempt money:

- Smith Offshore Exploration Co., Houston, launched a $145 million natural gas exploration deal involving seven tax-exempt investors — Harvard University, Massachusetts Pension Reserves Investment Trust, Yale University, Wellesley College, Duke University, University of North Carolina and the Kamehameha Schools/Bishop Estate of Hawaii. (*Pensions & Investment Age*, April 20.)
- Investment Advisers Inc., Minneapolis, completed a $10 million natural gas partnership last year involving investments from Gustavus Adolphus College, the Minneapolis Police Relief Association, Minneapolis Employees' Retirement Fund, Twin City Iron Workers Local 512, and Twin City Carpenters Retirement Fund (*P&I Age*, Jan. 12).

Meanwhile, a number of new deals are expected this year or are on the market, including offerings from Apache Petroleum Co., Minneapolis; Lawrence Energy Associates Inc. Boston; LANGASCO, Pittsburgh; and Merrico Resources Inc., Ardmore, Okla. American Energy Reserve Consultants, Houston, is in the final stages of a $50 million natural gas program involving pension fund investments.

Faced with all the new deals, pension fund executives are taking both an active and a wait-and-see approach to oil and gas investing. But few of those with existing investments are negative about the market's future.

David Norris, director-retirement funds at Boise Cascade Corp., Boise, Idaho, said his fund invested an undisclosed amount in the American Gas and Oil Investors' third program, AmGO III, in 1986. AmGO III closed with $17 million.

AmGO is a private placement limited partnership with First Reserve Corp., Greenwich, Conn., as general partner. Boise Cascade is also a participant in AmGO I.

"At the time we made the decision, we were looking at a market turn and we felt there was substantial upside potential," said Mr. Norris. "If you believe energy markets are cyclical, we made the commitment when it looked like we were at the bottom in petroleum prices.

"When you think about where energy costs are going, you are looking at some healthy returns in the future.

"We are seven years into the 1980s from those days in 1980-'81 when a lot of people made investments in oil and gas and got burned. I'm not an expert on gas prices, but our sense is that demand can certainly get to the place where we will have a correction in gas prices, which will make a lot of us smile."

Manville Corp., Denver, within the past month put $4 million into a J.P. Morgan Investment Management Inc. pooled oil and gas fund bringing its total investment to $23 million of a $30 million commitment to that fund.

C.F. Lemons, manager-pension and thrift funds, said Manville will fulfill existing commitments but isn't seeking new "illiquid investments" because it is reorganizing under the protection of Chapter 11 of the Bankruptcy Code.

Roger Wohlert, assistant treasurer-corporate finance at Southwestern Bell Corp., St. Louis, said the company's fund boosted its investment in producing properties through InterFirst Bank Dallas to $28 million as of March 31 from $15 million in February 1985.

"I think the outlook is now better than it was six months ago. We aren't seeing a lot of bargains, though. People are still paying some high prices," he said.

Southwestern Bell is committed to oil and gas and "we think through the longer term it will be a good investment," he said.

David Bullett, vice president-securities with the Teachers Insurance and Annuity Association — College Retirement Equities Fund, New York, which has more than $200 million in oil and gas

# AAFES cuts back real estate

**By Fred Williams**

DALLAS — The nearly $1.2 billion pension fund of the Army & Air Force Exchange Service, Dallas, is de-emphasizing equity real estate investments because of anticipated lower long-range returns and is increasing international and domestic equity index investments.

Ken Weaver, assistant comptroller-insurance, said AAFES officials hired State Street Bank and Trust Co., Boston, to manage a $25 million Morgan Stanley Capital International Europe Australia Far East index fund, and gave $12.5 million each to existing active international equity managers Morgan Grenfell Investment Services Ltd., New York, and Citicorp Investment Management, London. The additional allocations bring Morgan Grenfell's assets under management for AAFES to about $42.5 million and Citicorp's to about $46.5 million.

In addition, $100 million will be placed in a Standard & Poor's 500 stock index fund with Wells Fargo Investment Advisors, San Francisco.

Mr. Weaver said the AAFES pension fund will reduce its current real estate allocation of approximately 8.4% of total assets to about 3% following an asset allocation study by Wyatt Asset Services Inc., New York.

"No new money will be going into real estate, and we will begin drawing our real estate position down in line with the asset/liability study," he said.

Mr. Weaver said real estate investments have not produced the returns AAFES officials need to continue to provide automatic cost-of-living adjustments for retirees.

"We have an aggressive plan with automatic cost-of-living allowances. Real estate has provided very good fund diversification, but not the good returns we need for our plan. We've had some decent returns in real estate:

# International assets on the move

## United Kingdom benefits from shift

By Marlene Givant

International money managers, believing the Japanese market is overvalued, are shifting to U.K. stocks the assets previously invested in Japan.

During the first quarter of 1987, the median non-U.S. equity portfolio was invested 34.3% in Japan vs. 36.1% during the last quarter of 1986. In the same period, the allocation to the United Kingdom increased 76%, to 18.5% from 10.5%, according to InterSec Research Corp., Stamford, Conn.

The median portfolio also increased its allocation to Pacific Basin markets other than Japan, to 10% from 8.4%, and lowered its allocation to continental Europe, to 30.6% from 38.1%.

The median portfolio was 1.6% invested in markets not included in the Morgan Stanley Capital International Europe Australia Far East index and 1.4% in cash. In the last quarter of 1986, the respective figures were 0.1% and 1.6%.

The median portfolio was overweighted compared with the index in all areas except Japan. The index's first-quarter weightings were 57% in Japan, 14.1% in the United Kingdom, about 5% in other Pacific Basin markets and 23.9% in the Continent. This compares with 53.9%, 13.2%, about 5% and 27.9%, respectively, in the previous quarter.

Among money managers reporting increased holdings in U.K. stocks were Schroder Capital Management International Inc., New York, which doubled its U.K. weighting during the first quarter to 20%; Kleinwort Benson International Investment Ltd., New York, which boosted its exposure to 23% from its 8% of last September; and Nomura Capital Management Inc., New York, up to 18% to 19% from 16%.

At the end of 1986, most managers expected strong U.K. economic growth in 1987 from high consumer demand. Some believed such growth would trigger increased demand for imports and severe selling of sterling, causing the government to raise interest rates.

When oil prices rose early this year, Schroder Capital's fear of such a development disappeared. Its executives believe other nations will spend more on oil imports, helping the heavily oil-driven economy to thrive and making Britain's economy more competitive. As an added bonus, the economy's growth will enhance government tax revenue, said Richard Foulkes, executive vice president. The firm runs nearly $2 billion for North American institutions, most of them tax exempt.

The expected re-election of Prime Minister Margaret Thatcher also is raising optimism, managers said.

"Declining interest rates, lower corporate taxation and strong (1986) GNP growth — at 3%, one of the more rapid rates in Europe — provided an unexpected boost to investor confidence in the U.K.," said Ian Lindsay, vice president of Kleinwort Benson, which runs $314 million, including $100 million for U.S. tax-exempt clients.

While nearly tripling its U.K. allocation, the firm trimmed its Japanese exposure to about 32% compared with 39% in October.

Kemper-Murray Johnstone International Inc., Chicago, however, underweighted the United Kingdom as of March 31 by supplementing equity exposure with a traded options program, said Michael Parlett, portfolio manager. Mr. Parlett said he thought the market would drop at the end of the quarter and it did, by 7%. Since then, the market has rebounded, swelling the firm's exposure to 15% from 11.3%.

The firm runs $334.9 million for U.S. tax-exempt clients.

Nomura Capital Management has reduced Japanese exposure relative to the index, but less so than most other managers.

"We do not change asset allocation substantially within a quar-

*Continued on page 58*

## Japan exposure cut 80%

By Marlene Givant

CLEVELAND — By sharply reducing its 80% exposure to Japan, the $290 million Cleveland-Cliffs Inc. pension fund here has cut its international assets nearly $20 million.

Since February, Cleveland-Cliffs' international equity holdings have dropped to less than 7% of assets or $20 million, including $16 million in Japan, from a peak of 13% of assets or $37.7 million, including $30 million in Japan.

Most of the money was shifted into intermediate-term corporate bonds, with a small amount going to domestic equities. The fund's overall asset mix is about 40% fixed income and 60% equities, with venture capital included in equities.

"We've brought international exposure down lately because the Japanese market has gotten a little frothy," said S. Sterling "Ted" McMillan III, vice chairman of Greenleaf Capital Management, Shaker Heights, Ohio, administrator of the fund. The firm manages $400 million, including the $290 million Cleveland-Cliffs fund.

Cleveland-Cliffs' fund had been internally managed by Mr. McMillan, until he left in October to join Greenleaf. He had worked at Cleveland-Cliffs for 21 years, most recently as vice president-finance.

*A "frothy" Japanese market has S. Sterling McMillan reconsidering his allocation there.*

Mr. McMillan didn't shift investment styles when he shifted jobs. Cleveland-Cliffs' approach seeks price inefficiencies, resulting in purchases of small, emerging growth and entrepreneurial company stocks, many of which are now overpriced in Japan, he said.

The managers really go out of their way to pick good stocks. In six years, they've spent 12 work weeks in the Far East dealing directly with local brokers. Europe is the next stop on their itinerary.

*Continued on page 58*

## *New wave sweeping bond arena*

By Marci Baker

Bond managers at Pacific Investment Management Co., Newport Beach, Calif., recently saw an opportunity to protect client portfolios from a potential increase in bond market volatility with a two-step hedging strategy using options and futures.

With options on Treasuries priced cheaply, the manager bought $300 million call options on Treasury futures in early April, effectively paying for the transaction through the simultaneous sale of Treasury futures.

A few weeks earlier, Bankers Trust Co. — Investment Management Group, New York, had bought cheaply priced puts on Treasury notes in an effort to hedge the downside risk on some of its pension accounts.

The transactions represent the new wave of fixed-income management, wherein bond managers make new, broader use of highly sophisticated investment vehicles to hedge portfolios.

Corporate pension funds, confronted with increased volatility in the bond market, and that volatility's impact on corporate balance sheets because of Financial Accounting Standards Board Statement 87, are seeking fixed-income managers who can reduce it.

The old-fashioned, "seat-of-the-pants" bond manager will not be able to prosper in the new environment, according to consultants and money managers. At the same time, they don't believe the traditional active bond manager will become obsolete.

GTE Corp., Stamford, Conn., for example, uses managers with and without hedging capabilities and, while GTE executives continue to look at such strategies for internal management, they have yet to use them.

"Over time, (derivative instruments)

*Continued on page 61*

# Endowment locks gains with cash

NEW YORK — To lock in significant equity gains, officials of the $535 million Rockefeller University endowment have shifted 10% of assets to cash from equities since January.

Another 4% was moved to international and small-capitalization stocks from straight domestic equity.

The current asset mix is 56% equity, including 7.5% international and some small-cap stocks; 20% fixed income; 12% venture capital and small-cap stocks that once were venture capital investments; 10% cash and cash equivalents; and 2% miscellaneous investments, according to David Lyons, treasurer.

"There's a growing consensus that the market is high when you look at discounted dividend models.

"Both our managers and the finance committee have concluded we should protect our remarkable gains even if it means giving up another leg of the bull market," said Mr. Lyons.

"Economics alone don't drive this (market). There's psychology; a lot of the growth is liquidity. But I don't think the fund would derive anything in the future like we've seen in the past few years."

The fund's equity and fixed-income manager, Rockefeller & Co., New York, which manages much of the Rockefeller family money, is far more bullish on long-term bonds than equities.

"When they look into their crystal balls, they probably think long bonds now will outperform the (Standard & Poor's 400 stock index), according to risk-adjusted present value models. They usually look ahead eight years.

"They would probably rate a 30-year Treasury today as better than the S&P 400," said Mr. Lyons.

In addition, he said an investor could lock in 10% per year over 10 years by investing in so-called "battered bonds" such as Government National Mortgage Association securities.

"It's hard to believe you'll do that well in the stock market. We expect a downward correction. If long-term Treasury rates continue to rise as they have been in the past six weeks, the managers may shift more to fixed income from equities," he said.

"There's a lot of concern that equities will go down.

"We've had such remarkable gains we'd certainly like to hang on to a portion of it and not lose it all."

The fund returned 15.3% for the year ended Dec. 31, 16.7% compounded annually for the three years and 19.1% compounded annually for five years.

The median returns of Merrill Lynch Consulting Service's universe of total balanced portfolios of 1,200 tax-exempt funds were 14.6% for one year ended Dec. 31, 15.3% annualized for three years, and 17.3% annualized for five years.

The fund was slightly above the median in the Merrill index last year, and in the top quartile for three and five years, according to Ronald J. DiPrinzio, the endowment's consultant at Merrill.

Mr. Lyons said the fund always looks better in the longer term because in any given year, its managers "are positioning."

Returns are high largely because managers are free to jump at opportunities as they spring up, Mr. Lyons said.

"There are no formal restrictions. Our managers meet with the finance committee three times a year. There's a back-and-forth, an exchange. They can certainly move quickly on a day-to-day basis. That was absolutely imperative to their performance.

"Our managers are opportunistic. Sometimes things are quiet for a while, sometimes not. We're getting into interest rate-sensitive stocks . . . There's always a

Investment in growth stocks, particularly those in the technology sector, aided the top bank and insurance company pooled equity funds in periods ended March 31.

A leader in every period covered by the latest Pensions & Investments' Performance Evaluation Report was Sun Banks Inc., Orlando, Fla. It placed first in the one-, three- and five-year periods ended March 31, second in the 10-year period and tied for eighth in the latest quarter.

PIPER includes 302 pooled equity funds. All returns for periods longer than a year are compound annualized.

Anthony Gray, president of Sun Bank Investment Management, a subsidiary set up by Sun Banks last year, said technology was, by far, the equity fund's star performer in the latest quarter. "We made just obscene profits in technology," he said.

While Sun Banks and several other fund managers had stellar performance, median PIPER equity funds failed to beat the Standard & Poor's 500 stock index in every period of the report

For the year ended March 31, the median fund returned 21.1%, compared with 26.2% for the index. For the most recent quarter, the median fund's return was 19.1%, the S&P 500's, 21.4%.

For the three years ended March 31, the median fund had a compound annual return of 25.1%, while the index had 27.4%. Annualized returns for the five-year period were 24% for the PIPER median and 26.6% for the index; for the 10-year period, 16.3% for the median and 17% for the index.

Sun Banks, however, beat the index handily in every period. The pooled fund returned 40.6% for the year and 26.9% for the quarter. On a compound annual basis, it was up 43.7% for three years, 39.7% for five and 23.2% for 10.

The fund, with assets of $270 million, invests in large-capitalization, well-known companies with above-average growth rates. Managers make large allocations to sectors they favor, none to those they don't.

The fund has just a market weighting in technology, Mr. Gray said, but does not hold IBM Corp., so has numerous other technology names, such as **Digital Equipment Corp., Computer Associates International Inc.** and **Intel Corp.**

The fund's technology component returned 70% in the first quarter, Mr. Gray said. "When I say it had a great quarter, it really had a great quarter."

Food companies constitute another favored sector, with holdings including **CPC International Inc., Kraft Inc.** and **Quaker Oats Co.**

A sector not favored by the Sun Banks fund is energy; the fund has no energy holdings and has not had for several years, he said.

Security Pacific National Bank, Los Angeles, overweighted technology stocks in its Equity E fund, helping it to outstanding performance in the most recent year and quarter. The Equity E fund returned 34.1% for the year, ranking second to the Sun Banks fund, and 33.6% in the quarter, placing first.

Three stock purchase criteria are followed in managing the $25 million Equity E fund, according to William H. Duncan, managing director of Pacific Century Advisers, San Diego, the Security Pacific subsidiary that manages the fund. The stocks must be in companies with positive earnings momentum; must be outperforming the market or have rising relative strength; and must be in a group that is outperforming the market.

In technology, which definitely beat the market in the first quarter, the fund's holdings include **Tandem Computers Inc., Seagate Technology, Apple Computer Inc.** and **Digital Equipment.**

The fund also was overweighted

# High yields boost fixed-income pool

By Fred Williams

High-yield and high-coupon bond managers emerged as the top performers in Pensions & Investments' Performance Evaluation Report on bank and insurance company pooled fixed-income funds, with at least three of the top five funds for the quarter using high-yielding corporate securities of varying quality.

First Variable Life Insurance Co., Little Rock, Ark., topped the list for the three months ended March 31 with a return of 6.1% on its employee benefit fixed-income fund and came in third for the 12 months with 14.4%.

The median PIPER return for the quarter was 1.4%, and for the year, 8.4%. The Shearson Lehman Government/Corporate bond index returned 1.5% for the quarter and 8.1% for the 12 months, and the Salomon Brothers Long-term, High-grade Corporate Bond index, 1.9% and 10.2%. PIPER comprises 287 pooled fixed-income funds. Returns for longer than one year are compound annualized.

Rebecca Garner, vice president at Amherst Investment Management, which runs the First Variable Life D-2 fund, said the fund depends on high-yield, or junk bonds, but not exclusively.

"It's not just junk bonds," she said. "Some of our biggest gains were in nuclear utilities. We were able to buy single A bonds for about 45 cents on the dollar. I play sectors but we are very conservative for junk-bond players; I don't buy (leveraged buy-outs) and I don't buy blind pools. That's what people pay me to do.

"I don't play the current yield game; I play for total return. If you're looking for current yield this isn't where you belong. I don't buy and sell, I'm not a trader. I don't buy something just for the flip. When I buy I want to hold and when I sell it's either for credit reasons or it is overvalued. We rarely sell just to take a profit."

The First Variable portfolio, which contains about 30 issues and is broadly diversified by industry sectors, also did well for longer periods.

For three years ended March 31, the fund returned a compound annualized 18.4%, ranking in the top 20%, and for five years it returned 20.7%, ranking fifth in the PIPER universe.

Those figures compare with the median returns of 16.3% and 16.4%, for the respective periods in PIPER; the Shearson Lehman returns of 17.6% and 10.7%; and the Salomon returns of 23.5% and 17.5%.

For the quarter, First Variable was followed by RCB Trust Co.,

# For Every Investor, There's A Perfect Balance Between Risk And Return

There's an element of risk in every investment. And, from one investor to the next, the tolerance for risk varies according to his goals, philosophy and temperament.

At First Union's Capital Management Group, we understand the importance of managing risk as well as maximizing return. Very few investment managers can match our consistency of superior returns at such moderate levels of risk.

To find out more about the investment approach that helps us to strike that perfect balance between risk and return, call Debbie Tate Corson at (704) 371-5155 for a copy of our investment management brochure. What the rankings in this P.I.P.E.R. Survey don't tell you about us, this brochure will. Call today. The sooner you get our investment team working for you, the sooner you'll see the results.

# WHAT IF YOU COULD IMPROVE RETURN ON A $500 MILLION PORTFOLIO BY .3 PERCENT?

There is one system—just one—designed to help you realize that kind of potential by changing nothing but your people's access to information.

The system is ISA PRISM. Integrated, on-line, real-time, IBM mainframe-based—PRISM is designed to give financial professionals instant access to the information they need to achieve optimum return.

And it's from ISA—a United Telecom company—whose systems are already helping manage half a trillion dollars on three continents.

If your organization is managing securities without PRISM, you may be settling for a smaller return than you should. Have someone look into it. Call us at 1-800-554-1193. In Georgia, 404-587-6865.

CUSTOMER INFORMATION FROM GENERAL MOTORS

# HOW GM IS TAKING THE LEAD IN QUALITY

NOT JUST WORLD CLASS—A NEW, SCIENTIFIC STANDARD OF EXCELLENCE.

People were calling the heartland of American industry "The Rust Belt." It was 1980. We said there would be an American industrial renaissance. And we meant it.

GM laid out a four-part strategy. And went to work.

**At the heart of the strategy is the automobile, and at the heart of the automobile is the drivetrain. We were determined to set a new standard of excellence with the automobile in operation.**

And we decided to do it the hard way. Instead of using engineering specifications or a survey method that fit well with our strengths and minimized our weaknesses, we asked you, our customer, what you want and need in an automobile in operation, what we call driveability.

Then we took the desires of the most demanding drivers, the 90th percentile, and called that standard our minimum. We said that every GM car, not just those that cost $25,000 or more, would have to meet the 90th percentile standard.

**World class, which had been sufficient during the early stages of our strategy, was not a tough enough standard anymore.** The GM Uniform Test Standard is a dynamic measure of excellence in engineering and manufacturing on a scale determined by the customer. It is the most rigorous test in the industry.

Across our entire 1987 production, from the Allante to the lowest priced car we sell, 96% of all GM vehicles tested meet the driveability expectation of the most demanding customers—the 90th percentile.

Here are some of the tests: After sitting out all night in low temperatures, the cars are checked for ease of starting and ability to back out of the garage and accelerate when cold. Then we check for idling at stop lights and smooth acceleration to 15, 25, 35, 45 and 55 mph maneuvers.

Every car is checked for performance in hard braking to a stop and then accelerating into traffic. And at the same time, the transmissions are evaluated for shift smoothness, noise, and overall operation.

When that's all done, we do it all over again under hot operating conditions.

**The result: so far in 1987, 96% of all GM cars tested meet or exceed the demanding driver's standard.**

On other aspects of quality—the fit and finish of the parts other than the engine and transmission—GM is also making enormous strides toward setting new standards of excellence.

And our goal is to keep raising the standard until GM cars stand above their competition in every category and every price range.

We've made this leap in quality here in America. In Fort Wayne, Ind., and Linden, N.J. In Michigan and Georgia and California. We are doing it here. With the best people and the best technology in the world.

We had a vision. We believed an American industrial renaissance was possible. And it is!

We are demonstrating to our fellow Americans in industry that timidity is not the answer. Retrenchment is no solution. At GM, we say, "Go for it!" And we have.

**The vision is paying off.**

### Make Your Own Comparison

We invite you to visit any GM dealer to test drive any new GM car. Compare its driveability to your demanding standards. Then compare it to any of the cars built by our competitors.

For example: Take any expensive Japanese car, with air conditioning, automatic transmission, and so on, and compare it to a medium-priced GM car. You're the customer, you decide which car has the best driveability. See for yourself how GM's vision is paying off.

*This advertisement is part of our continuing effort to give customers useful information about their cars and trucks and the company that builds them.*

# UAM buying its 15th firm

BOSTON — United Asset Management Corp. has agreed to acquire Rice, Hall, James & Associates, San Diego, from its principals.

Rice, Hall, James will be the 15th investment firm in the UAM group, said Archer Des Cognets, UAM senior vice president. UAM is a publicly traded holding company for investment management firms.

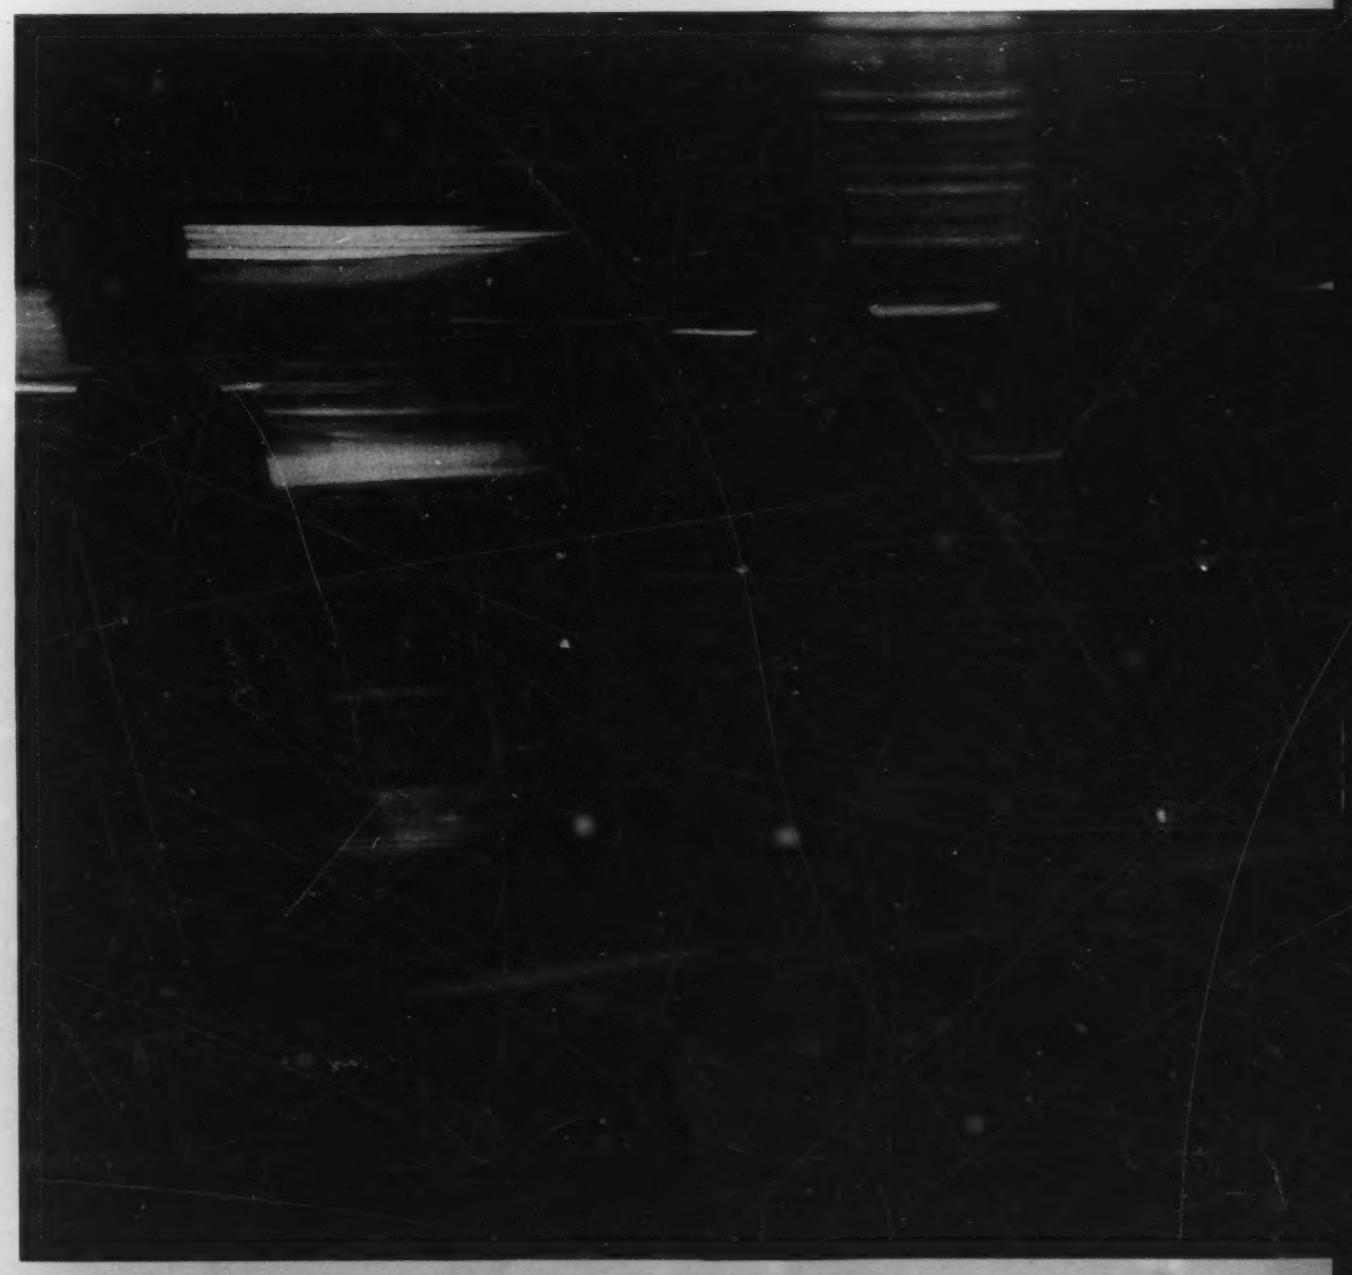
Rice, Hall, James has about $680 million under management, of which about 55% is tax-exempt, Mr. Des Cognets said. It manages mostly balanced accounts; the total asset mix is roughly two-thirds equities and one-third bonds.

UAM was attracted to Rice, Hall, James because of the quality and stability of its personnel, Mr. Des Cognets said.

Rice, Hall, James is headed by Louis E. Rice, president, and Samuel R. Trozzo, executive vice president.

The sale likely will close in late May, Mr. Des Cognets said.

BellSouth



# Technology . . .

*Continued from page 15*

in cyclical, industrial stocks, including **Stone Container Corp.** and **Himont Inc.**

The fund's performance has improved greatly in recent years. Its compound annual return for the three years ended March 31 was 25.8%, placing it in the fifth decile of PIPER funds, and 25.2% for the five years, placing it in the fourth decile. Because it started in 1981, it was too new for the 10-year period.

Mr. Duncan said the fund's investment philosophy changed in late 1984. Before that, it included some emerging growth stocks as well as large-capitalization ones; now, while still growth-oriented, its holdings are all fairly large, well-known companies.

A focus on earnings growth also aided Citizens Bank of Chillicothe, Mo. Its $15.5 million pooled equity fund was third among all funds for the quarter, returning 31.1%, and fourth for the 10-year period, with a compound annual return of 22.5%.

It placed slightly lower, but still in the top 10% for the year, with 28.1%, and for the three-year period, with an annualized 30.2%. It was in the fifth decile in the five-year period, with a compound annual return of 24.1%.

Ed Douglas, president of Citizens Bank, attributed the five-year performance to a period in the early 1980s when the market moved in anticipation of earnings, not with them, and the fund's holdings tended to lag.

Mr. Douglas and the other investment committee members — Bill Welch, chairman of the bank, and Edgerton Welch, chairman emeritus — pick stocks from among those receiving Value Line's highest rating. Value Line ranks stocks on a scale of 1 to 5, with 1 being the highest.

The rankings are based on earnings momentum, price momentum, price relative to earnings and past pricing relative to other companies.

The investment committee supplements Value Line rankings with other outside research and its own analysis and picks 25 to 30 issues, Mr. Douglas said. Committee members like to see a growth rate above the price-earnings ratio and a high degree of dependability for growth, he said.

Stocks sometimes are sold when they drop to a Value Line 2 rating and always when they drop to a 3.

To protect against a major market decline, Citizens of Chillicothe recently overlaid the fund with a dynamic hedging strategy run by BEA Associates Inc., New York, Mr. Douglas said. Dynamic hedging uses futures transactions to assure a minimum return. The program run by BEA for the bank assures the fund will lose no more than 5% over three years.

One stock that has helped the fund reach its high level is its biggest holding, **Liz Claiborne Inc.**, which it bought in late 1984 at 12⅝ and now is trading in the 60s, he said. Other good performers include drug companies, such as **Marion Laboratories Inc.** and **Merck & Co. Inc.** and, in technology, **Digital Equipment**.

One of the top funds for the 10- and five-year periods was near the bottom for the three- and one-year periods but rebounded in the latest quarter. It, too, held technology stocks.

The fund, Toronto-based Manufacturers Life Insurance Co.'s U.S. equity fund, had a 25.5% compound annual return in the 10-year period, placing first. It was second for the five years, returning 32.2%.

The fund's 19.8% return in the three-year period and 10% return for the year put it in the bottom decile in both periods. In the most recent quarter, it returned 22%, placing it in the third decile.

"The things that hurt us in the previous two years are what helped us in the first quarter this year," said Veronica Onyskiw, assistant vice president.

The fund, now at $130 million, is heavily growth-oriented. Value is a consideration, too, but growth comes first, Ms. Onyskiw said.

In addition to its several technology holdings, including **Digital Equipment, Cray Research Inc., Sun Microsystems Inc.**, and **Digital Equipment,** it holds oils, such as **Atlantic Richfield Co.** and **Mobil Corp.**; chemicals, such as **Dow Chemical Co.** and **GAF Corp.**; papers, including **Bowater Inc.** and **Stone Container**; and drugs, such as **Marion Laboratories** and **Merck**.

A leader in almost every period of the survey was the separate capital growth fund offered by The New England (formerly New England Mutual Life Insurance Co.), Boston. The fund was fifth for the 10-year period, with a 21.9% compound annual return, and third for the five years, with 31.6%. It fell out of the top five but remained in the top 10% for the three-year period, returning a compound annualized 30.3%.

In the year ended March 31, it dropped to the fourth decile with a 23.8% return. It rebounded in the latest quarter, ranking fourth with 30.4%.

The fund, now at $80 million, invests in stocks that appear likely to have significant earnings growth in the next one to three years, said Bruce Murison, director of consultant marketing.

The fund's manager is Kenneth Heebner, a vice president of Loomis, Sayles & Co. Inc., Boston. The New England owns two-thirds of Loomis, Sayles.

Those growth stocks have come from several sectors. "Technology has been our most important area in the first quarter," Mr. Murison said, citing holdings in **Apple Computer, Seagate Technology** and **Digital Equipment.**

Also important in the quarter were drug and health care stocks, such as **Upjohn Co.** and **Merck**, and some bets on cyclical areas, such as automotive -- **Ford Motor Co.** — and papers — **Stone Container.**

The reason the fund's relative performance fell in the year ended March 31 likely was that 1986 was not a good year for growth funds, Mr. Murison said. ■

# IS where the action is.

It's happening now. It's happening fast. It's economic growth and business opportunities. And it's all happening in the nine Southeastern states of the BellSouth region.

In ten years, population will boom at a rate 44% faster than the rest of the nation; new jobs will be created at a rate 20% faster than the national average.

In ten years, there will be over 4 million new housing starts and about 4 million new jobs. Real personal income in the region will rise by 2.9% per year, compared to 2.7% for the nation.

The BellSouth management team is prepared to capitalize on this growth. They're committed to forward-looking business strategies and new technologies. And they're determined to stay ahead of the growing need for state-of-the-art products and services to meet customer needs in an expanding marketplace.

Selective acquisitions are a part of BellSouth's growth plans. BellSouth is already involved in new business opportunities that will lead to even greater revenues nationally and internationally.

BellSouth not only is in the midst of the action but is helping to make it happen.

To learn more about BellSouth, contact your broker or write: L.E. Spradlin, Director of Investor Relations, BellSouth Corporation, 675 West Peachtree Street, N.E., Atlanta, Georgia 30375, 404-420-8136.

The BellSouth family of companies provides telecommunications, information systems and publishing services through South Central Bell, Southern Bell, BellSouth Services and BellSouth Enterprises.

# Moody's sets index

NEW YORK — Moody's Investors Service Inc. has established a new corporate bond index.

"Broadly speaking, our intent is to provide corporate bond investors with a practical and immediate yardstick of price changes such as long been available in the stock market," said William O. Dwyer, president, in a prepared statement.

Moody's, in the April 2 Bond Survey, a weekly magazine it publishes, distinguished its index by noting the bond-rating agency is "an independent analytical observer of the corporate market which is not involved itself in the trading of securities of any type."

The New York-based agency also announced Commodity Exchange Inc. filed in October for approval to trade a futures contract based on Moody's Investment Grade Corporate Bond Index.

# High yields . . .

*Continued from page 15*

Stamford, Conn., whose special fixed-income fund ret urned 5.1%; Summit Trust Co., Summit, N.J., bond fund, 4.5%; and Beverly Bank & Trust Co., Chicago, bond fund, 4%.

RCB and Beverly reported using either junk bonds or high-coupon issues.

Ron Stajkowski, senior vice president at Beverly, said the basis for the fund's first-quarter success "revolves around a philosophy of high coupons with either non-call or call provisions where if they are taking it out it is taken out at a profit."

The $7 million fund is structured in a "barbell approach" where approximately 37% of the portfolio is "very short term" and matures within seven years. The remainder has a maturity in the 20-year range or more.

"That may appear to be assuming a lot of maturity risk by extending the portfolio, but I did it by buying high-coupon issues," he said.

The high-coupon approach "generates a lot of cash no matter what interest rates do," he said. The portfolio is made up of high-grade corporate bonds with high coupons, he said.

Mr. Stajkowski said interest rate forecasts play an important role in positioning the portfolio, which has an average maturity of 10 to 11 years.

"I'd say you have to do it (forecast rates) if you are operating with fixed-income money. You have to make a forecast. And if you are confident in it, you have to follow up with investment decisions," he said.

Beverly Bank's bond fund finished near the top for the longer periods as well, reporting 12.8% for the year, and compound annualized figures of 20%, 19.3% and 12.8% for the three-, five- and 10-year periods respectively.

For the 12 months ended March 31, Delaware Trust Co., Wilmington, with 21.2%, finished far ahead of second place Security Pacific National Bank, Los Angeles, with 15.3%. In third place was First Variable Life, followed by TransAmerica Life Insurance Co., San Francisco, with 14.3%.

Ken Holmes, vice president at Delaware, said the $22 million pooled fund holds medium-term high-quality bonds in the 10-year maturity range and is actively managed.

"We don't forecast and act upon interest rate forecasts. We believe the bond market is inefficient and we try to capitalize on those inefficiencies. We are active managers and for those terms we have been 99% invested; we don't hide in cash or swing maturities way out. We try to stay in the 10-year range most of the time," he said. There are "probably a dozen" issues in the portfolio, he said.

Delaware Trust also finished in the top five for the three- and five-year periods, with annualized returns of 23.2% and 21.7% respectively.

But officials at Denver Investment Advisors, which runs the First Interstate Bank of Denver fund, claim interest rate forecasting is fruitless and depend instead on fundamental analysis and basic long-term bond management.

First Interstate Bank of Denver's fund is one of the more successful longer-term bond fund investors, placing third for the three-year period with a compound annualized return of 23.7%; fourth for the five-year period with an annualized 21.5%; and placing in the top 10% for 10 years, with 12.3%. For the quarter, it matched the Shearson return of 1.5% and for the year it ranked in the top 10%, reporting 10.8%.

"For the long term I don't know anyone who can consistently forecast interest rates," said Tom Stevens, senior fixed-income manager at DIA.

The $55 million portfolio has a definite long-term emphasis, with an average maturity of 21.6 years and an average coupon rate of 9.61% at the end of the quarter, said Tom Larkin, vice president at DIA. The fund relies on long-term corporate bonds "because over the long term they have a built in yield advantage," he said.

"We de-emphasize market timing and utilize fundamental research, much of it done internally. It's a very fundamental approach to fixed-income investing. We don't bounce around a lot and we follow a traditional long-bond approach," he said.

Mr. Stevens said the key to the fund's success is found in a 1977 decision by Denver Investment Advisors to split its bond management into intermediate- and long-term portfolios.

"By separating them we found we could focus on each maturity and add value in that maturity class," he said. "Rather than making interest rate anticipation-type moves, we could focus on one to 10 years and longer than 10 years, which effectively neutralized interest rate forecasts. We also place a lot of emphasis on research. The Shearson Lehman Government/Corporate bond index is about 75% governments and agencies. We concentrate about 75% on corporates, which have a built-in 75 to 80 basis points advantage over the index."

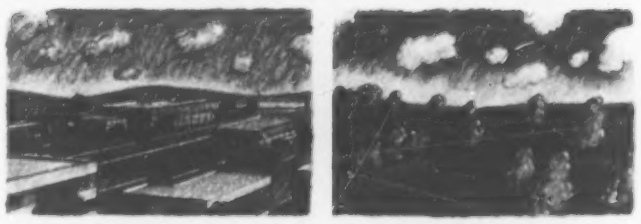
For the three years ended March 31, United Bank of Denver topped the PIPER performance list with an annualized return of 25% followed by Centerre Trust Co. of St. Louis, 24.5%; and First Interstate Denver.

United of Denver again topped the list for the five-year period with a return of 22.9%, followed by Centerre, 21.8%; Delaware Trust, 21.7%; and First Interstate, 21.5%.

United of Denver also topped the ten-year PIPER performance with a return of 13.2% followed by Sovran Bank and Centerre Trust, each with 12.9%; and Beverly Bank with 12.8%. ■

# Beat The Cycle.

**First Wachovia's counter-cyclical approach to real estate investing out-performs the competition.**



At First Wachovia, we recognized the benefits of real estate in the portfolio almost two decades ago. We saw positive real rates of return, diversification and low volatility.

So we developed a unique long-term formula for dealing with changes in the marketplace and shifting supply and demand.

Our counter-cyclical policy is simple but effective. In certain economic climates we buy quality land slated for development and assume the role – and the profits – of the developer. At other times we are better served by acquiring attractive, mature properties.

This approach allows us to take advantage of any phase of the real estate cycle. Gives us the staying power for long-term performance. And brings us a return that consistently outpaces the leading investment indices.

Our 15-year record speaks for itself. If you'd like to know more, call Nick Verano or Cindy Christopher at (919) 770-5906.

FIRST WACHOVIA

# Bonuses drop, incentives up

LINCOLNSHIRE, Ill. — Annual bonuses paid to top-level corporate executives have decreased as a percentage of total compensation while long-term incentives have increased, a recent survey by Hewitt Associates shows.

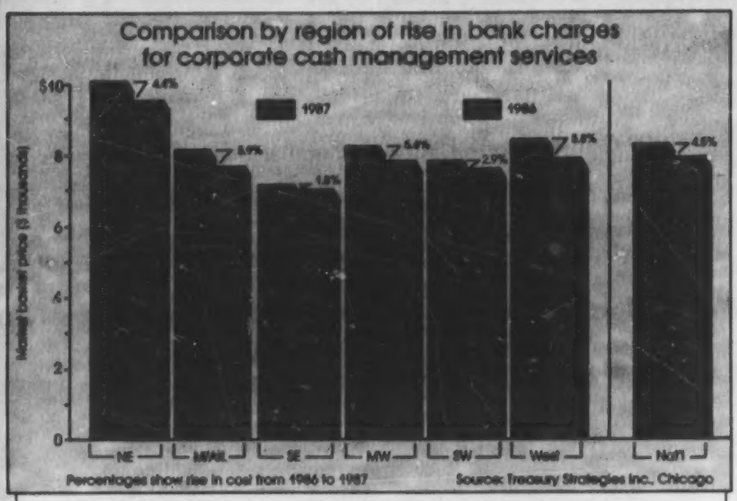
The Hewitt data, collected from 300 major companies nationwide, revealed annual bonuses made up only 17% of an executive's total compensation package in 1986, compared with 20% in 1983 and 23% in 1980.

The data also showed long-term incentives, such has non-qualified stock option plans, represented 23% of the executive's total compensation in 1986, compared with 22% in 1983 and 20% in 1980.

Benefits, such as supplemental retirement plans, also have increased, according to the findings. Benefits represented 17% of the compensation package in 1986, compared with 15% in 1983 and 13% in 1980.

Every surveyed company reported at least one perquisite program for upper level executives. Most offered an average of seven, the most popular being physical exams. ■

# Cash Management



## Compensating balance payments soar 35.2%

By Barry B. Burr

CHICAGO — Corporations that pay for cash management services with compensating balances saw their costs skyrocket an average 35.2% in the last year, while those that pay with cash found costs rise a more modest 4.5%, a survey shows.

The survey by Treasury Strategies Inc. found, in aggregate, banks nationwide raised prices for all eight cash management services.

But the survey noted differences by region and product. Increases were highest in the mid-Atlantic states and lowest in the Southeast.

The results show corporate cash managers "need to be smart shoppers" for bank services, said Anthony J. Carfang, principal, Treasury Strategies.

By product, increases were highest for account maintenance and lowest for controlled disbursement.

Overall, the increases were about double those reported by Treasury Strategies last year, when the cost of paying by compensating balances rose 16% and by cash, 2.7%.

Mr. Carfang said the wide differences between the two payment methods ought to persuade corporations to pay more bank charges in cash.

Among other findings, Treasury Strategies reported regional differ-

## Oppenheimer loses its hedging clients

By Barry B. Burr

Cash managers at Ogilvy Group Inc., Campbell Soup Co., Automatic Data Processing Inc. and other corporations are withdrawing or seriously re-examining their participation in a dividend capture program with Oppenheimer & Co., New York, after its hedge failed to work, causing some losses.

Executives said the problems were peculiar to Oppenheimer's strategy, rather than to dividend capture programs in general. Oppenheimer was buying utility common stocks and hedging with stock index futures or options.

"There are times the hedge does not work," said Anthony Marchese, Oppenheimer senior vice president, who helped run the program.

Stephen M. Strocker, assistant treasurer and assistant secretary of Ogilvy Group in New York, said Ogilvy, which has $5 million to $6 million in corporate cash Oppenheimer, is withdrawing from the dividend capture program after suffering unspecified losses he said aren't "a material amount for our company."

"We're going to convert it into cash as we meet the 46-day holding period."

Corporations can qualify to exclude from their income for income tax purposes 80% of the dividend they receive, if they hold the stocks for at least 46 days.

At Campbell Soup, Camden, N.J., Brenda Edgerton, assistant treasurer-financing and risk management, said, "We're disappointed with what's gone on with Oppenheimer as a manager.

"The hedge they had on the program was in no way hedging the program . . . it wasn't protecting the underlying portfolio," she added.

"The program was just as unprotected with the hedge as without the hedge," she said. "It was just throwing money away."

Campbell decided to withdraw from Oppenheimer's dividend capture program before the firm revealed the program wasn't working.

Ms. Edgerton said Campbell still has money with Oppenheimer.

"We are winding down the program," Ms. Edgerton said. "We can't withdraw all at once."

She declined to specify how much Campbell has had with Oppenheimer, or give details about performance.

According to Leonard Schafer, manager of Campbell Finance Corp., Wilmington, Del., the soup company's investment subsidiary, the company had between $10 million and $50 million with Oppenheimer (*Pensions & Investment Age*, May 12, 1986).

Oppenheimer had been a manager for about 1½ years, Ms. Edgerton added.

Campbell Soup Company

At Automatic Data Processing, Roseland, N.J., Ken Rand, vice president-treasury operations, said the company was planning to meet with Oppenheimer executives before deciding whether to continue its participation.

"We're reviewing it," Mr. Rand explained. "We haven't made any decision on what to do with it."

Automatic Data Processing has $5 million with Oppenheimer.

## 6 chemical companies try trade program

By Chuck Paustian

Six of the country's major chemical companies are developing a pilot program using the automated clearinghouse to pay trading partners electronically.

Participants are: PPG Industries Inc., Pittsburgh; Union Carbide Corp., Danbury, Conn.; E.I. Du Pont de Nemours & Co., Wilmington, Del.; The Dow Chemical Co., Midland, Mich.; Air Products and Chemicals Inc., Allentown, Pa.; and Sun Refining and Marketing Co., Philadelphia. Others have expressed an interest in the pilot.

Executives estimate the trading volume between any two of the six corporations at as much as $5 million each month.

Under most of the agreements, money will be available to the receiving corporation as it has been under the paper check system. After participants are comfortable with the system, however, float terms may be adjusted.

While work on the electronic payment system is conducted under the general auspices of the Chemical Industry Payments Group, payment agreements between any two companies are negotiated independently.

"Basically what it comes down to is allowing each corporation to decide how it wants to make payments," said Thomas Tabor, assistant manager-global treasury operations at PPG Industries. "It's an approach that will allow us to make (the system) as broad as possible as quickly as possible."

Initially, PPG Industries, Union Carbide and Dow Chemical will send and receive payments electronically through the automated clearinghouse using the corporate trade payment, or CTP, format.

"The long-term solution that PPG Industries perceives is that we will be providing an ANSI X-12 payment to the banks that would then be translated by the bank into the format required by the supplier," said Mr. Tabor.

(X-12 is a standard for electronic financial transactions among corporations from the American National Standards Institute. Unlike other National Automated Clearing House Association payment formats, the corporate trade exchange, or CTX, format transmits remittance data in the X-12 standard.)

Jack Potz, manager-cash management at Union Carbide, said his company even-

*PPG Industries, Pittsburgh, is participating in a program to pay trading partners electronically.*

tually would switch to the CTX format once banks are capable of handling it.

"The current expansion of the NACHA format to CTX is a good compromise between the CTP format and the ANSI X-12," said Mr. Potz.

"From our view, it's the banks that are going to make this (electronic corporate payments) work on a national basis," he said.

Conrad Pritscher, financial manager of banking and planning at Dow Chemical U.S.A., an operating unit of Dow Chemical, agreed. "Right now, (CTX) is useless because not one bank can handle it," he said.

Currently, participants in the pilot program are focusing on establishing electronic payment agreements with each other partly because of the tremendous amount of interaction among the companies.

Roger D. Bailey, manager of global treasury operations at PPG, said high volume and large dollar amounts make the electronic payment systems economically feasible.

He said PPG already has reached an agreement with Dow and is close to finalizing contracts with Union Carbide, Du Pont and Sun Refining.

PPG Industries' transactions, which will begin this month, will be through its bank, Pittsburgh National Bank, Pittsburgh.

Mr. Potz said Union Carbide has active relationships with Dow and Exxon Chemical Co., while the company is close to an agreement with Procter & Gamble and Du Pont, as well as PPG.

Union Carbide, which began exchanging electronic payments with Dow in February 1985, uses Manufacturers Hanover Trust Co. and Irving Trust Co., both in New York, to handle its payments.

Mr. Pritscher said Dow Chemical also has electronic payment agreements with Du Pont, Exxon Chemical, Exxon Co. U.S.A., Xerox Corp. and Sears, Roebuck & Co., and is working on a contract with Sun Refining. Dow uses The Northern Trust Co., Chicago, to handle its electronic payments.

Officials of the other companies could not be reached for comment.

Both PPG Industries and Union Carbide plan to incorporate as many other companies into their electronic payment systems as possible.

Mr. Bailey said company executives hope to eventually

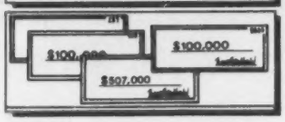
# Workstation added

**Cash accounts**



MILWAUKEE — A.O. Smith Corp., in separate projects, is installing a treasury workstation and is undertaking a study of its disbursement system, said Stephen J. Rothe, cash manager.

The company bought the treasury workstation from MH Financial Management Systems Inc., Chicago.

In addition, Smith hired NCNB National Bank, Charlotte, N.C., to conduct the disbursement study.

Mr. Rothe noted First Tennessee Bank, Memphis, now handles the company's controlled disbursement from its Johnson City, Tenn., branch.

"We wanted someone a little bit objective," he added, referring to NCNB. He said NCNB doesn't provide any such service for the company.

The company has used First Tennessee for controlled disbursement for several years, he said.

Mr. Rothe said the MH workstation will enable the company to save more than $10,000 annually by dropping intermediary services that gather reports from its nine banks. Smith has been using Manufacturers Hanover Trust Co., New York, and M&I Marshall & Ilsley Bank, Milwaukee, for the reporting, he added.

The workstations will automatically gather the information.

Smith could have gathered the data directly without the workstation or intermediary services, but that would have been too time consuming and costly, he added.

He said Smith chose MH for the workstation because "they have a large number of systems (in the market) and a solid history of treasury workstations. We feel they will be there in the long run."

He expects MH, a unit of Manufacturers Hanover Trust Co., New York, to begin installing the treasury workstation in late May.

He doesn't expect the new system to become fully operational for about six months, until he and others in the cash management department learn to use it.

The workstation will replace much of the manual gathering and rekeying of information on the company's daily cash position, including bank balances.

## Con-Ed unit hires 4

NEW YORK — A unit of Consolidated Edison Co. of New York hired four investment managers to run corporate cash, according to John Perkins, director-financial services.

The unit, Gramercy Capital Corp., hired Ross Capital Corp., Paramount Capital Group Inc., and M.D. Sass Investors Services Inc., all of New York, and invested in a limited partnership run by George Weiss Associates Inc., Hartford, Conn.

All four run dividend capture programs and were assigned $100 million total, Mr. Perkins said.

Gramercy is a non-regulated financial unit formed in October by Con Ed to invest its excess cash.

Weiss was assigned $40 million, while the other three each received $20 million, he said. Mr. Perkins said Weiss' strategy involves buying utility stocks, while shorting, or selling, a similar utility, or even the same utilities.

The other managers will invest in high-yield common stocks, generally avoiding utilities because of Con Ed's limitation on the amount of utility stocks it may own.

At the same time, the managers will write, or sell, call options on the stocks.

Mr. Perkins said the four managers are the first of what he expects will be several groups of money managers the company will hire to invest $300 million in corporate cash generated by the utility.

Ultimately, he said, the company expects to deploy another $200 million with outside managers in fixed income and stocks. He said it is nearing selection of more managers.

Mr. Perkins said the total amount represents "corporate cash we're holding in reserve for the utility whenever our next building cycle comes around, maybe in another 10 years."

CONTRARY TO POPULAR OPINION,
NOT ALL BEARS LOOK ALIKE.

Neither do global asset managers. That's why more and more U.S. plan sponsors are turning to Julius Baer Investment Management. For good timing and consistently superior performance. In both fixed interest and equity markets.

We draw on the strong portfolio management capabilities of JBIM in London. And on the strategy and policy-making expertise of the Julius Baer Group, Zurich, which has over 40 years experience in international portfolio management and billions invested in global fixed income and equity markets.

If your objectives call for customized global asset management services, we invite you to take a closer look at JBIM. Contact: Jay A. Dirnberger, Managing Director, JULIUS BAER INVESTMENT MANAGEMENT INC., 330 Madison Avenue, New York, N.Y. 10017, Tel.: (212) 949-9055.

# Payments . . .

*Continued from page 27*

ences from the national average in price increases. Charges for the eight cash management services surveyed rose in aggregate:

- 5.9% in the mid-Atlantic states;
- 5.8% in the West;
- 5.6% in the Midwest;
- 4.4% in the Northeast, including New York;
- 2.9% in the Southwest, including Texas; and
- 1.8% in the Southeast.

For the eight cash management services, Treasury Strategies found charges rose nationally in the year ended in January:

- 17.8% for account maintenance, including statement charges and Federal Deposit Insurance Corp. premiums, if any;
- 7.2% for cash concentration;
- 6.9% for balance reporting;
- 2.7% for account reconcilement;
- 1.4% for controlled disbursement;
- 4.9% for wholesale lockboxes;
- 3.8% for incoming wire transfer; and
- 4.7% for outgoing wire transfer.

Mr. Carfang said Treasury Strategies surveyed 78 banks, including nearly all of the top 20 money center banks and about 50 of the top 150 regional banks. Only 30 banks were surveyed last year.

The survey, unlike previous surveys, didn't break out differences in pricing between money center and regional banks. "It turned out to be a distinction that was confusing to some people and offensive to some banks that considered themselves money center banks and that we called regional," he said.

Treasury Strategies doesn't disclose price changes of particular banks.

The rise in prices are based on changes in Treasury Strategies bank price index over the past year, as illustrated in the accompanying chart. The index measures the monthly cost of a representative market basket of cash management services to a manufacturing company with $250 million in sales.

A typical company using the eight services would spend on average $8,290 a month, based on the national average. A company using Northeast banks would pay the highest, $10,040, while one using Southeast banks would pay the lowest, $7,160.

Mr. Carfang said this year's aggregate increases, though higher than last year, are still below price jumps earlier in the decade, caused largely by the Monetary Control Act of 1980, when banks began passing on increased fees the Federal Reserve Board charged for cash management services.

The results show corporations "really need to consider the option of paying in fees rather than balances, because balances have gone up quite a bit," he said.

Compensating balances are non-interest bearing deposits corporations maintain at banks.

He attributed the rise in balances to declining interest rates and an attendant drop in the earnings credit rate, an interest rate banks impute on the balances, allowing corporations to offset the cost of cash management services.

The average earnings credit rate fell to 5.46% from 7.1% last year, according to the survey. In 1980, it was 13.6%.

Combining the drop in the earnings credit rate and the rise in bank prices, a typical corporation needed $250 in balances to pay for every $1 in monthly cash management service charges as of January 1987.

By contrast, corporations needed $185 in balances last year. In 1980, when Treasury Strategies began the survey, they needed $100 in balances.

Mr. Carfang said, as a result of the survey, corporate executives should conclude they need to give increasing attention to bank charges.

He suggested the price increase in account maintenance was the highest because "I guess banks have a feeling that it isn't a price-sensitive product. People aren't going to close accounts just because the price goes up 17%. It's not very elastic" in price.

He also noted more banks are charging for FDIC premiums. He said from two-thirds to three-quarters of the banks surveyed assess such charges, often $58 a month for every $1 million a corporation has in balances.

"It's one of those things that has really never been challenged" by corporate cash managers, Mr. Carfang said.

"The FDIC charges banks for insurance based on total ledger balances, irrespective whether those balances are insured," he added. Corporate deposits are essentially uninsured, with the FDIC only covering $100,000.

The FDIC fee assessed by banks on corporations "is another one of those ways of taxing the big guys," he said. "It especially hurts companies that have a lot of checks coming in," such as securities firms.

He said the effects of increasing competition among banks is evident in the results that found little increase in controlled disbursement costs.

Such costs "actually declined at several banks," he said. "The market is really competitive for controlled disbursement right now."

He doesn't expect any shakeout, with some banks dropping the services, because of the low cost. "I expect prices to continue to fall," he added. ■

# Real Estate

## Retail bonanza

### County plan invests in centers

By Steve Hemmerick

BAKERSFIELD, Calif. — The $340 million Kern County Employees' Retirement Association in Bakersfield, Calif., has invested about 80% of its $20 million real estate allocation in neighborhood shopping centers in California.

Retail investments generally have outperformed other classes of real estate, according to the FRC Property Index. Indeed, Phil Franey, county treasurer, said the fund expects an annual return of between 8% and 9% on the centers.

Its California shopping center purchases include $3.6 million for the 86,500-square-foot Carroll Way shopping center in San Diego; $2.7 million for the 27,890-square-foot Padre Plaza center in San Diego; $3.5 million for the 28,695-square-foot Sunnymead center in Mareno Valley; and $4.7 million for the 105,584-square-foot La Verne center in La Verne.

Kern County entered the real estate market in early 1986. It purchased the La Verne Center in February and the Padre Plaza in January; the rest were purchased during 1986.

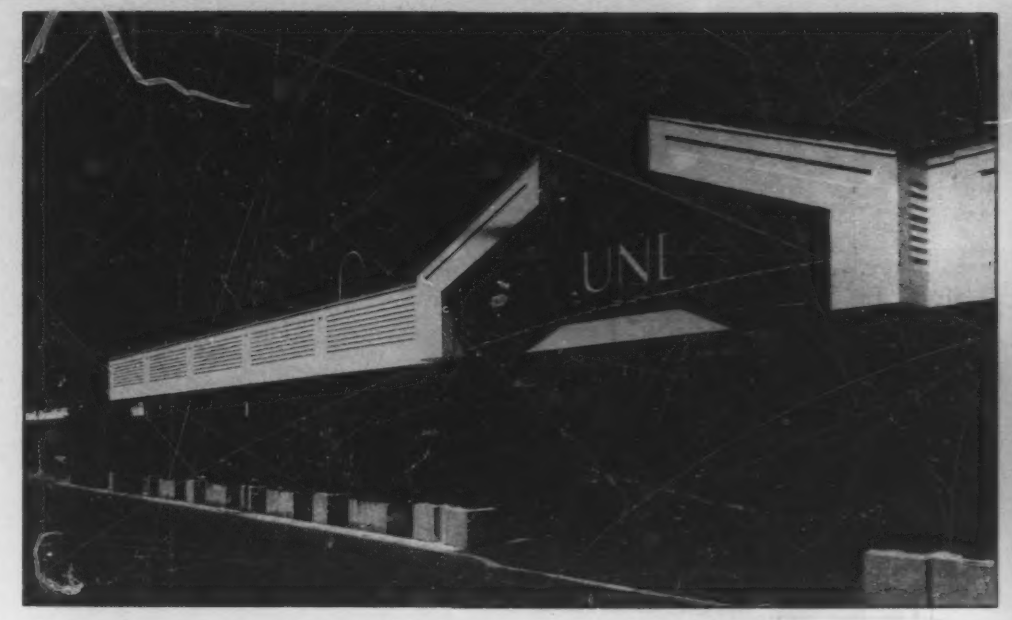
In addition, the fund paid $3.7 million for the 45,789-square-foot Woodrise office building in Bakersfield.

Mr. Franey said the nine-member board prefers to invest in California because it likes an emphasis on in-state investments and because of a uniformity of laws and restrictions regarding real estate properties. But he said it's possible the fund will buy elsewhere in the future.

So far, the fund has invested about $19.2 million of its $20 million allocation, all through its real estate adviser, Trident/Meyer Real Estate Advisors, Anaheim, Calif.

The board has final say on approving equity properties, which are brought to the board after Trident/Meyer staff members do due diligence on the potential investments.

At a future date, Mr. Franey expects the fund will invest further in equity real estate and could add more investments outside the retail area. First, however, the fund probably will do an asset allocation study once a consultant is hired. Finalists are: Callan Associates, San Francisco; SEI Funds Evaluation Services, Wayne, Pa.; and Wilshire Associates, Santa Monica, Calif. Presentations will be made April 22, and a selection is expected next month. ■



*Retail properties, such as the Colonial Square shopping center near Minneapolis owned by The RREEF Funds, are drawing the interest of pension fund executives committing new money to real estate.*

## Pension execs commit to real estate projects

By Steve Hemmerick

Several pension fund executives are making real estate commitments, believing they can find good deals despite many trouble spots.

- The $7.3 billion Virginia Supplemental Retirement System, Richmond, will invest $100 million in joint development projects in Virginia and another $100 million in projects elsewhere.
- The $265 million pension fund of Maytag Co., Newton, Iowa; the $100 million pension fund of Clorox Co., Oakland, Calif.; and the $730 million endowment of the Massachusetts Institute of Technology, Cambridge, have allocated undisclosed amounts to the RREEF MidAmerica/East-V closed-end real estate fund, managed by The RREEF Funds, San Francisco.
- The $488 million Colorado Fire & Police Pension Association, Denver, purchased, at an undisclosed price, an office building sold by a liquidated RREEF fund, and a strip retail center in Aurora, Colo., also at an undisclosed price. Both purchases were made through Mellon Real Estate Investment Management Corp., New York, which advises the system on direct real estate investments.

In Virginia, the joint development projects haven't been selected yet, but a requirement for investment will be that partners put up $1 of their own money for each $1 the pension fund invests.

That will be an incentive to achieve top returns, said Tom Hassard, investment officer-real estate, for the Virginia fund.

He said the fund is negotiating with one insurance company, but he declined to identify the company or discuss the project. Mr. Hassard said other pension executives have put together similar deals where partners put up an equal share of money, and Virginia officials believe such an approach should be effective.

The $125 million RREEF fund will invest during the next 18 to 24 months in shopping centers, industrial properties and office buildings.

Like previous MidAmerica/East funds, it will invest in all-cash transactions in substantially leased, well-located properties costing up to about $15 million.

In Denver, Johnnie Rogers, deputy executive director of the Colorado Fire & Police fund, said the office building the fund bought from RREEF is a 31,000-square-foot V-shaped building. The purchase includes 110,000 square feet in development rights. The building and development rights are in the Denver Tech Center, a big development project in the

*First Chicago's Fund F is moving into retail and apartment properties such as the Bethesda Hill complex in Bethesda, Md.*

## *First Chicago fund takes on new focus*

By John Covaleski

CHICAGO — After sustaining $34 million in asset withdrawals last year, a restructuring of property holdings in First Chicago Investment Advisors' Fund F is resulting in votes of confidence from some clients.

As of March 31, the open-end fund had $662 million in gross assets — the market value of the properties and the cash held in the account.

Charles A. Perlik, co-chairman of the $10 million Newspaper Guild International Pension Fund, Washington, and Jeff Molitor, manager of pension assets at the $1.1 billion Standard Oil Co. fund, Cleveland, each said they are encouraged by a restructuring under way in Fund F.

First Chicago is shifting the fund's allocation away from offices and into retail and apartment properties.

Mr. Perlik said the Newspaper Guild's pension fund board will meet soon to review its about $2 million investment in Fund F. He added the restructuring "will be the inducement that will make us stay."

He said fund officials have been "very disappointed" with Fund F, noting its 5.2% return for calendar year 1986 compares to 15.9% returned by the pension fund's overall investments last year.

The Guild fund also has about $2 million invested in a balanced account managed by NWQ Investment Management Co., Los Angeles, and the remainder in guaranteed investment contracts, Mr. Perlik said.

Mr. Molitor at Standard Oil said he's not overly concerned about Fund F's 1986 return rate noting, "it was a dismal year all

## Returns in index vary by region

By Steve Hemmerick

Office building returns were up in the East and down in the South — with a gap of almost 15 percentage points — during 1986, the FRC Property Index shows.

The index reported a return of 11.6% for office properties in the East, where construction has been moderate and the economy, relatively healthy, vs. a −3.2% for those in the South, which has suffered from an office building spree in some areas coupled with a depressed oil economy. One-

# Office vacancy rate is steady at 21.5%

By Steve Hemmerick

LOS ANGELES — The office vacancy rate has held steady at 21.5% in major American metropolitan areas for the three quarters ended March 31, according to the Coldwell Banker Office Vacancy Index.

This leveling off of vacancy rates, after about three years of increases, could mean rates have hit or are approaching a peak in metropolitan areas, at least in the short term, said Gregg Gotthard, a real estate analyst with Coldwell Banker in Los Angeles.

But the leveling most likely will remain only if the economy stays strong, Mr. Gotthard said.

The nine months of steady rates is the result of declining vacancies in downtown areas and increasing vacancies in the suburbs.

The downtown office vacancy rate reached a peak at 16.8% June 30. By March 31, the downtown vacancy level fell to 16.3%.

A 5% vacancy rate for offices is considered optimal. That last occurred Dec. 31, 1981, when the office vacancy rate was 4.8%. The suburban vacancy rate increased to 23.9% as of March 31, from 23.8% Dec. 31 and 23.3% June 30.

For the quarter ended March 31, vacancy levels increased 5.4 percentage points in Oklahoma City, which now has the highest vacancy rate of all downtown areas at 32.2%.

San Diego had the largest decrease in vacancy rates for the quarter, down 2.8 percentage points to 14.2%.

The suburban area of Atlanta reported the largest increase in vacancy rates as of March 31 to 21.7%, up 2.5 percentage points from the previous quarter. The largest decrease in suburban office vacancy occurred in suburban San Antonio, Texas, down 2.2 percentage points to 29.7%.

Deregulation of banks and thrifts, the interest of foreign investors and domestic pension fund officials' willingness to support new developments have made the market harder to predict.

But Mr. Gotthard noted construction in suburban areas has gradually fallen to about 60 million square feet from 90 million square feet in 1985. If absorption levels — or tenant demand for space — remain steady, the suburban office vacancy rate could decline.

Predictions about downtown development are complicated by the five- to eight-year building time because of restrictions during the planning and environmental approval processes.

Some developers, figuring at current absorption levels there is only a two-year demand for downtown office space, could begin building again, causing vacancy rates to rise.

Most of the weakness in the office market has been the result of the supply of space and not the strength of the economy, said Randall C. Zisler, a vice president with Goldman, Sachs & Co., New York.

Though he didn't think office vacancy problems have hit "bottom," he said, "I think we are getting close to it. You are starting to see an increase in absorption, which has prevented the vacancy rate from rising much further." ■

April 1987

# Returns in . . .

*Continued from page 39*

year office property returns were 6.6% in the Midwest and −0.9% in the West.

(The FRC Property Index monitors performance of $11.2 billion in unleveraged commercial properties managed by real estate advisers who are members of the National Council of Real Estate Investment Fiduciaries. The index, calculated by the Frank Russell Co., Tacoma, Wash., divides the country into four geographic regions.)

The only sharper regional differences in returns on office buildings occurred in 1978, 1979 and 1980 between the East and Midwest regions, but in those cases all investment returns were positive.

In 1980, the sharpest regional difference — 33 points — separated the returns of office buildings in the tight Eastern market, which scored to a 41.2% return, and the Midwest, which had an 8.1% return.

Since then, regional differences had been narrowing.

Because of the large number of office properties in the South and West, the overall index return for office buildings for calendar 1986 was 3.9%, vs. 8.3% a year earlier.

Many real estate advisers reported earlier in the year that they were doing some sharp re-evaluations of property values, and those re-evaluations seem to be reflected in the index numbers.

The downward appreciation was so sharp that 1986 was the first year in the index's nine-year history that office buildings in the aggregate showed a decrease in property values.

In fact, the devaluation of office properties was responsible for dragging down the index's overall return of 6.3% for all property types last year. The income return during 1986 was 7%, but the total return for the year fell lower because of a −0.7% in appreciation.

Retail properties across the country scored a 11.2% return in 1986, nearly double the overall return. The 1985 return for retail properties was 11.3%.

Part of the reason office buildings have such an impact on return is that 50.4% of the total market value of the properties in the index are offices.

Retail properties reflect only 18.8% of the market value of the index. The East produced the highest retail returns, 16.7%, followed by 11.9% in the Midwest, 10.6% in the West and 9.6% in the South.

According to W. Richard Russell, a senior vice president with Equitable Real Estate Investment Management Inc., New York, regional and super regional malls are the most preferred retail property types because they tend to respond well to inflationary and deflationary periods.

Industrial properties registered an 8.1% overall return in 1986 — 11.8% in the East, 10.1% in the Midwest, 8.2% in the West and 4.8% in the South. The 1985 return was 11.5%.

During the year, warehouse industrial properties outperformed office research and development properties by 140 basis points.

Despite the better performance of retail and industrial properties, the overall index's returns are expected to lag until office properties pick up.

"The question is, 'How long will those (office leasing) markets remain weak?' Our expectation . . . is that the nation as a whole will have weak leasing markets for a substantial number of quarters, certainly for the next couple of years," said Randall C. Zisler, a vice president in the real estate research department at Goldman, Sachs & Co., New York.

He noted the situation isn't all bleak: The Northeast and certain classes of properties, such as retail, have done well.

Also, he said, large properties with high-quality tenants — such as trophy office buildings — have shown appreciation in value, even in weaker markets.

"What is interesting is that practically all property types have done well in the Northeast. The reason for that is that in the Northeast during the last seven years, there has been relatively less construction there on a per capita basis and/or in relationship to the existing inventory of space," said Mr. Zisler.

Also, he said, the rate of growth in the economy in the Northeast has been strong, and the region has outperformed all others in return on investment for properties.

On the subject of appreciation, Mr. Zisler said, "I would expect that for the remainder of the year, the index is going to be showing no appreciation or negative appreciation."

But over the long term, real estate offers risk-return characteristics that have a low correlation with those of stocks and bonds. Consequently, real estate reduces the risk of the pension or other portfolio and smooths returns, he said.

He warned, however, that investors have to property pickers, not market pickers. ■

# U.K. benefits . . .

*Continued from page 3*

ter, but as the Pacific Basin was being reduced little by little, money was moved to Europe," which is relatively undervalued, said Sawada Haru, vice president. At the end of the first quarter, Europe represented 46%, of which 19% was in the United Kingdom.

The firm is not reducing its 46% Japan exposure (as of the end of the first quarter). "We can find good value across the board — even in financial and construction sectors — even though the overall market seems to be high. The Japanese market still has upside protection. We look at other valuations besides (price-earnings ratios); p/e is an important one, but that's not the only one in judging a country or market," he said. Nomura runs $800 million for tax-exempt clients.

Simms Capital Management Ltd., New York, isn't reducing Japanese exposure further, either. Japan now represents 30.8% vs. 34% at the end of last year. "We reduced it and are happy with the companies we own," said Arthur Williams III, partner.

The firm runs $500 million in global and international assets, of which $40 million is for U.S. tax-exempt clients.

"We think that commodities on a worldwide basis priced in dollars are very cheap for yen and deutsche mark investors and businesses buying commodities for their operations. There's room for these things to jump in price," he added.

Exposure to West Germany varies widely. Schroder scaled back to 10% March 31 from 16% at the end of last year because the German government failed to stimulate its economy.

"We were greatly disappointed the German government did not boost domestic demand the way world leaders urged them to do. Given their unremitting intransigence, we expected the German economy to be weaker," Mr. Foulkes said.

"Japan's government has at least muttered about stimulating the economy, proposing measures."

Kemper-Johnstone, on the other hand, remains overweighted in Germany vs. the index at 11.1% as of March 31 vs. 14.3% at the end of December. ■

# Exposure cut . . .

*Continued from page 3*

Flying the extra mile has paid off, even though the fund's contrarian strategy leads it far from the mainstream large-capitalization stocks that dominate the Morgan Stanley Capital International Europe Australia Far East index.

In mid-1986, after investing 80% in Japan and 20% in Hong Kong for its six years in international equities, it began moving to its current 16% in Europe, 64% in Japan and 20% in Hong Kong.

In the five years ended Dec. 31, Cleveland-Cliffs' international portfolio tied the top international fund manager in Pensions & Investments' Performance Evaluation Report, earning a compound annualized 30.8%, compared with the EAFE's 28.8%.

For the three years, the fund earned a compound annualized 36.9%, compared with the EAFE's 42.2%. The top PIPER manager for the same period returned an annualized 44.3%.

In 1986, with the dramatic mid-year shift in asset mix, the fund returned 65.5% vs. the EAFE's 70%, and the top-ranking PIPER fund's 97.7%.

"(Our investments) are generally out-of-the-way-type vehicles that bigger funds couldn't make a meaningful dent into," said Mr. McMillan.

"We go where the hunting grounds are best, internal rates of return are highest and the whole cultural and political structure is cooperative, not antagonistic to business."

That's why "we toyed with Australia and turned it down at the very beginning because we didn't feel the business climate was favorable," Mr. McMillan said.

His team then focuses on individual sectors where internal rates of return are highest. Japan's sectors are not among them now to the extent they were in the past.

But stocks in small-company sectors were more undervalued by the Japanese market during the past six years than they are now.

In the past, "it was our impression Japan underpriced emerging growth stocks relative to the rest of the economy and overpriced mundane stocks.

They value relatively highly the companies we'd value lowly here in the U.S." e.g., automobile and steel companies and fisheries.

The investment approach seeks inefficient pricing in 10 different stock categories from low price-earnings to emerging growth and small capitalization. Each category has different buying criteria.

Greenleaf implements its approach with the broad investment guidance of Nicholas Bratt, managing director of Scudder, Stevens & Clark, New York. "But our portfolio doesn't really resemble theirs. We impose our criteria on his knowledge base," Mr. McMillan said.

Its global trustee is Mitsubishi Bank, subagent of the fund's master trustee, AmeriTrust Co., Cleveland.

Cleveland-Cliffs decided to move its pension management to Greenleaf when Mr. McMillan, who wanted to add several new staff members, realized it would be more cost-efficient to have outside management. As part of the arrangement, Greenleaf hired several of Cleveland-Cliffs' in-house staff members.

Mr. McMillan, although not originally planning to move to Greenleaf, resigned as Cleveland-Cliffs' vice president-finance to avoid a potential conflict of interests over his ownership of shares of MLX Corp., the reorganized McLouth Steel Products Corp., in which Cleveland-Cliffs held a 23% interest. Cleveland-Cliffs is primarily an iron company that services the steel industry.

"We didn't want to lose performance," he said, in explaining the selection of Greenleaf.

"We looked for an outside outfit where we could put our outfit. Only one outfit in Cleveland had the flexibility and investment style and approach we wanted. That was Greenleaf."

Before receiving the Cleveland-Cliffs account, Greenleaf had a relatively small amount under management, which was important to the Cleveland-Cliffs' approach. Also, its investment team was not encumbered by a bureaucracy.

Other advantages were the non-Wall Street staff and the Cleveland location.

"Managers here are not from Wall Street but from industry. That is absolutely critical to having a fresh and different perspective on money management," said Mr. McMillan, a Wall Street investment manager before joining Cleveland-Cliffs.

"We have a strong contrarian streak in our thinking, and a long-term perspective. If you play the quarter-to-quarter game, you're always trying to outguess the next guy and I can't do that. Wall Street tends to penalize a company whose current earnings are below normalized earnings (average earnings over a 10-year period). The psychology behind inefficient pricing is an immense herd instinct," he said.

Wall Street hardly considers that some companies have cyclical earnings, he noted.

One such company held by Cleveland-Cliffs' pension fund, **Dow Chemical Co.**, had subnormal earnings from 1977 to 1983 but is now at normal to higher earnings. ■

# Executives warned . . .

*Continued from page 1*

the corporation the authority to vote the proxies.

Without such authority, "both are liable," he said.

Morton Klevan, director of policy development and evaluation for the Pension and Welfare Benefits Administration, went even further: "If a plan sponsor feels strongly about proxy voting, it appears that the worst thing he could do, from a legal point of view, is direct the proxy voting of his investment manager," he said.

Speaking at a conference at the Boston University School of Law, Mr. Klevan outlined the risks and duties of pension and trust fiduciaries as corporate shareholders. He was speaking as an individual, not as a representative of the Labor Department.

If the chief financial officer or chief executive officer reserved the vote for himself in the plan document by deeming himself a plan trustee, the company could be liable for the day-to-day investment decisions of the plan's outside investment managers, Mr. Klevan said.

But that depends on "whether the courts conclude that the voting of shares of stock managed by an investment manager is an integral part of the investment manager's management of plan assets," Mr. Klevan said.

When directing proxy votes violates the Employee Retirement Income Security Act, all parties involved — including a plan's trustee, investment manager and the executive directing the vote — could be held liable for any resultant losses to the plan, he said.

If a corporate officer directs the pension fund's trustee bank to vote in favor of a proxy proposal, the first questions to ask are whether the plan expressly provides for directed trustees, whether the plan provisions cover direction on these sorts of issues and, if so, is the chief financial officer the person described in the plan as the one to give the direction, Mr. Klevan said.

If the plan document does not designate the chief financial officer or other executive as the one to give the direction, "the directions should be ignored by the trustee," said Mr. Klevan.

If the plan specifies the trustees are to be subject to the direction of the chief financial officer with respect to the voting of proxies on all matters other than routine ones, the trustees then would have to examine the direction to determine whether it violated any provisions of ERISA. If so, the trustee would be duty-bound to ignore the direction, he said.

The chief financial officer cannot validly direct an investment manager to vote the proxies. "There are no provisions in ERISA for directions to investment managers," said Mr. Klevan. An investment manager is not a trustee of assets of a plan, therefore, investment managers cannot be directed, he said.

If a plan document gives the executive the right to vote proxies on all non-routine matters, he could vote the proxies only if he were a duly appointed trustee of the plan, he said.

That's because only trustees or investment managers can dispose of plan assets. (The right to vote has an economic value and would be considered a plan asset, Mr. Klevan said.)

In another scenario, if the trustee bank is also an investment manager, there may be a question as to whether a named fiduciary can appoint an investment manager to manage a particular asset or assets of the plan while reserving the proxy vote to plan trustees.

*Morton Klevan believes sponsors should have written guidelines for proxy votes.*

"It can be argued both ways but is usually an open question," Mr. Klevan said.

Given the risk of sharing liability with a chief officer who directs proxy votes, and "because investment managers and bank trustees cannot, as a practical matter, prevent gratuitous directions or suggestions as to how to vote proxies," Mr. Klevan advised managers and trustees to have written guidelines for voting on corporate governance issues and to communicate these guidelines to clients prior to engagement.

Mr. Walker, who is widely expected to be named head of the pension unit, replacing Dennis Kass, indicated in a separate interview that the Department of Labor is working closely with the Securities and Exchange Commission in examining the proxy voting activities.

The SEC is responsible for proxy voting and tender offers. The Labor Department's interest in corporate governance issues and proxy voting stems from its oversight of pension and welfare benefit plans and the fiduciaries who vote on behalf of those plans and the plan assets.

The government's efforts come at a time when both agencies have come under fire from shareholder rights groups, big institutional investors and others who say neither department has taken a strong stand on corporate governance issues.

Mr. Walker said the Labor Department is encouraging corporate pension fund executives and investment managers to prepare proxy voting guidelines, and to document voting and the reasoning behind the votes.

In addition, he said the department is considering whether to provide guidance to ease the growing confusion over what a fiduciary's duties on corporate governance are under ERISA.

"It's clear that fiduciary duties aren't well understood," Mr. Walker said.

When the fiduciary is a corporate executive, a potential conflict erupts among the best interests of the company, the best interests of the shareholders and the best interests of the management.

Under ERISA, a fiduciary is mandated to act with the sole interests of the beneficiaries in mind.

The deputy assistant secretary vowed the department would "aggressively prosecute" violators. The SEC has taken the same position.

Shareholder rights' groups and large institutional investors have charged the Labor Department and the SEC have not moved aggressively against the apparent conflict of interest in corporate proxy battles. In particular they have cited this year's letter-writing campaign by chief executives.

They have argued the threat of losing a big client could be enough to make a money manager succumb to pressure from corporate executives.

Corporate executives argue they are just trying to make their views known, and are not trying to unduly influence the manager.

Mr. Walker admitted "some activities are troubling, and the conflicts of interest potential is huge." But he noted there is nothing illegal about a company revoking the voting authority of money managers, so long as the company recognizes it is acting as a fiduciary and carries out those duties in line with the law. ■

# Assets of top 100 up 22%

**By Carol Wiley**

The nation's 100 largest money managers reported a healthy 22.4% increase in total assets under management and a 23% increase in tax-exempt assets in 1986.

*Pensions & Investment Age*'s top 100 managers had $1.811 trillion under management as of Jan. 1, vs. $1.48 trillion a year earlier. Tax-exempt assets of the top 100 grew to $1.037 trillion as of Jan. 1 vs. $843 billion a year earlier.

Gains resulted primarily from the booming capital markets and, secondarily, from new business, especially in such areas as 401(k) salary reduction plans.

Among the highlights of *P&I Age*'s 14th annual directory of investment advisers:

- Market share among the top 100 shifted to banks and their subsidiaries and away from insurance companies and their subsidiaries, which last year claimed the biggest market share (*see story on Page 2*).
- Insurers generally increased their equity exposure during the year ended Jan. 1, while banks generally increased their investments in real estate.

Consultants and insurance company executives alike were hard pressed for an explanation for the insurers' increased activity in the stock market.

Ronald Jones, partner with Hewitt Associates, Lincolnshire, Ill., said he found it "puzzling" and suggested that, because insurance companies generally offer specific products rather than a total portfolio approach, their asset mix is "demand-driven." "(Independent) managers are actively making their decisions, and their asset mix is determined by their decisions," Mr. Jones said. "The (independent) managers decided to cut back as the bull market went higher, but the insurance company clients decided to go higher into equities with the bull market."

Peter Heard, senior pension analyst at The Travelers Cos., said he and others at the insurance company were stumped by the statistic.

"Maybe it's the advent of indexed funds," Mr. Heard said, "or maybe plan participants saw the market taking off and saw a way to take advantage of it."

- The amount of bond index fund money under management by the top 25 managers in that category skyrocketed 102% during the year ended Jan. 1, to $24 billion from $11.86 billion.
- Equity index funds grew more slowly. The top 25 equity index fund managers reported a 37% increase, to $91.9 billion as of Jan. 1 from $67.2 billion.
- Investments in international markets increased 84% among the top 25 international managers, to $47.4 billion as of Jan. 1 from $25.8 billion.
- The top 25 managers of 401(k) and 457 savings plans showed a 132% gain in assets under management for such plans, to $53.79 billion as of Jan. 1 from $23.16 billion a year earlier.
- The number of managers using options and financial futures increased substantially during the year ended Jan. 1, with 259 using options (up from 220); 126 using stock index futures (up from 91); and 122 using fixed-income futures (up from 82).

Tables listing these and other leading managers in various asset classes can be found throughout *P&I Age*'s 1987 directory.

Among the 100 largest managers were 38 banks and their subsidiaries, 34 independent investment advisers and 28 insurance companies and their subsidiaries.

Statistics were compiled from questionnaires submitted by 984 U.S., Canadian and other foreign managers of U.S. tax-exempt assets. Profiles of these firms begin on Page 15.

In the ranking of the top 100, subsidiaries of larger organizations were ranked separately if they submitted a separate profile. For example, Alliance Capital Management Inc., a subsidiary of Equitable Life Assurance Co., was ranked as a separate entity.

Of the 984 money managers, 646 are U.S. and foreign (excluding Canadian) investment advisers; 215 are U.S. banks, trust companies and their subsidiaries; 69 are U.S. insurance companies and their subsidiaries; and 54 are Canadian banks, insurers and independent money managers.

The top 25 independent investment advisers reported $215 billion in tax-exempt assets under management as of Jan. 1, an increase of 23.6% from last year's $174 billion.

The five largest independent

# Specialized products return banks to No. 1

By Chuck Paustian

After slipping to second place a year ago, banks, trust companies and their subsidiaries regained the largest share of tax-exempt assets among the Top 100 firms in *Pensions & Investment Age*'s directory of investment managers.

Banks and trust companies also reaffirmed themselves as the dominant group managing tax-exempt assets among the top 200 firms and overall.

"Maybe the worst is over for the banks. They suffered some hemorrhaging in the '70s," said Ronald A. Jones, a partner at Hewitt Associates, Lincolnshire, Ill.

Development of specialized investment products and revitalized working conditions have spurred banks and trust companies in their climb back to the top, other industry observers said (*see accompanying story on this page*).

According to data collected for *P&I Age*'s 14th annual directory, banks, trust companies and their subsidiaries managed $425.17 billion as of Jan. 1, or 41%, of the $1.037 trillion in tax-exempt assets run by the 100 largest firms. The previous year, banks, trust companies and their units had a 36% share of the assets among the top 100 firms ranked by tax-exempt assets.

Insurance companies and their subsidiaries placed second among the top 100 firms, with $373.32 billion, or 36%, of the tax-exempt assets as of Jan. 1, down from 38% — and first place — a year earlier.

Independent management firms again finished third, with $238.51 billion, or 23%, down from 26% in 1986.

Subsidiaries of banks and trust companies, as well as units of insurance companies, are included in the respective overall categories, accounting for some of the market share lost by the independent management firms.

*P&I Age* began including the subsidiaries' assets in the broader category for banks and trust companies in 1984 and for insurance companies in 1985.

One factor influencing the comeback of banks and trust companies is the success of many of their investment products, such as index funds and dedicated or immunized bond portfolios.

"Some of them have been innovative in developing products they can sell effectively and manage effectively," said Hewitt's Mr. Jones.

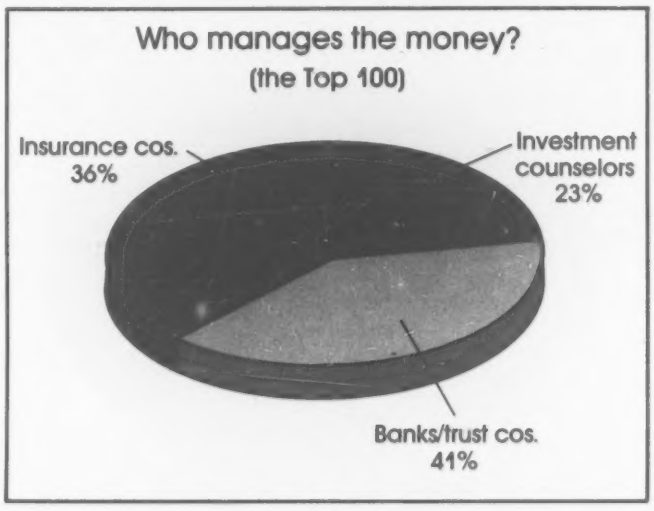
"The growth of the index funds is a big one," said Ronald D. Peyton, president of Callan Associates Inc., San Francisco. "Combine that with the fact that index funds have tended to outperform active managers," and that accounts for much of the shift in tax-exempt assets, he said.

Howard H. Pohl, a principal of Becker, Burke Associates Inc., Chicago, noted that while insurance companies also offer various passive products, the asset levels in such products as guaranteed investment contracts don't rise in value like the assets in index funds.

"A lot of the insurance company assets are in GICs and other kinds of contracts, which are not marked to market," but rather carried at book value, Mr. Pohl said.

The other reason for the resurgence among banks and trust companies is the reorganization of trust departments to resemble the structure and atmosphere of independent management firms.

Mr. Peyton added the new environment at the banks, trust companies and their subsidiaries has led to improved performance. He said with performance figures the same, or better, than their competitors, banks can capitalize on existing business relationships with companies.



The banks, trust companies and their subsidiaries also captured the largest share of the tax-exempt market among the top 200 firms and among all managers profiled by *P&I Age*.

Of the $1.273 trillion in tax-exempt assets managed by the 200 largest firms as of Jan. 1, banks, trust companies and their subsidiaries ran $521.93 billion, or 41%, up from the 38% in 1986.

Insurance companies and their units ran $394.63 billion in tax-exempt assets as of Jan. 1 for a market share of 31%, down from 32% the previous year. Independent counselors had $356.44 billion, or 28%, down from the 30% market share they had in 1986.

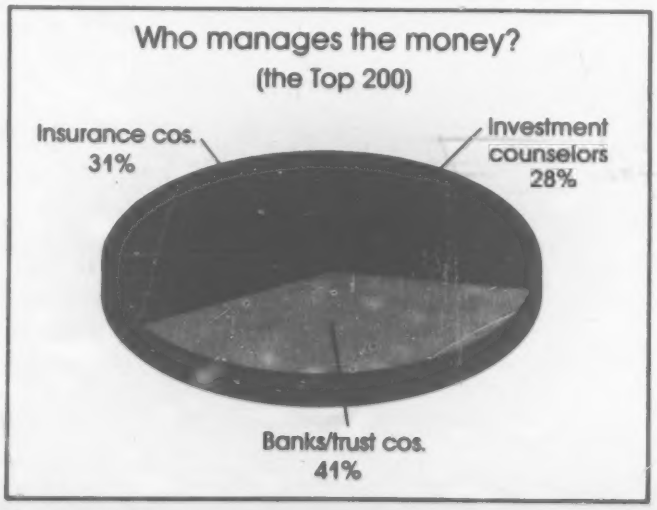
Among the total universe of 930 management firms profiled, banks, trust companies and their subsidiaries ran $574.13 billion, or 37.9%, of the total $1.516 trillion in tax-exempt assets as of Jan. 1. In 1986, banks, trust companies and their units also had a 37% share of the market.

Independent investment firms placed second in the overall category, with $525.74 billion in tax-exempt assets, or 34.7% of the market, up from a 33% market share in 1986. Insurers and their units ran $416.26 billion in tax-exempt assets for a 27.4% share of the market as of Jan. 1, down from 30% the previous year.

In the category for banks, trust companies and their subsidiaries, the five top firms, ranked by tax-exempt assets, were: Wells Fargo & Co., San Francisco, with $53.91 billion in tax-exempt assets; J.P. Morgan Investment Management Inc., New York, with $48.17 billion; Bankers Trust Co. — Investment Management Group, New York, $46.9 billion; State Street Bank & Trust Co., Boston, $23.57 billion; and Citicorp Investment Management Inc., New York, $18.61 billion.

Among insurance companies and their subsidiaries, the top five firms were: Prudential Insurance Co., Newark, N.J., with about $76.25 billion in tax-exempt assets; Metropolitan Life Insurance Co., New York, $51.53 billion; Aetna Life & Casualty Co., Hartford, Conn., $38.88 billion; Equitable Life Assurance Co., New York, $37.46 billion; and The New England, $26.11 billion.

Among the independent managers, the top five firms were: Miller, Anderson and Sherrerd, Bala Cynwyd, Pa., $11.5 billion; Lehman Management Co. Inc., New York, $11.47 billion; Scudder, Stevens & Clark, New York, $11.3 billion; Delaware Investment Advisers, Philadelphia, $11.1 billion; and The Boston Co. Inc., Boston, $10.36 billion. ■



# Competitive spirit reaping dividends

By Joel Chernoff

Banks are making a comeback.

Shunned after the 1973-'74 recession, bank trust executives since have tried to stem the disastrous loss of market share.

Many banks — especially the largest ones — spun off pieces of their trust departments into subsidiaries, enabling them to provide competitive compensation packages to attract and retain key personnel and to avoid the banks' bureaucratic structure.

Some created niches in specialized areas such as index funds, dynamic hedging and dedicated bond portfolios, areas where they have the deep pockets to support expensive computer hardware and software and where loss of key personnel would have less impact.

But all the news isn't good. Some key staffers still leave to get the equity ownership denied them in bank structures, and middle-tier banks still lag their money management counterparts in compensation by a large margin.

Even at the best banks, it's still hard to shed the bureaucratic ties. "It boils down to one thing: culture," said W. Denman Zirkle, managing director for marketing at Marinvest Inc., the money management arm of Marine Midland Banks, New York.

"I think it's slowly changing. I think most clients are willing to look at them, whereas 10 years ago they wouldn't have been willing," said Don Gingery, director of investment management research at William M. Mercer-Meidinger-Hansen Inc., Louisville, Ky.

"To shake that bank image is pretty tough," he added.

In the late 1960s and the early 1970s, the banks had it made. Corporate executives turned to their main lender to take management of their pension assets off their hands. Assets generally were managed in balanced accounts.

But the bear market of 1973-'74 and passage of the Employee Retirement Income Security Act of 1974 caused corporate executives to start rethinking pension investment strategies.

The banks were slow to respond. Ten years ago, the banks were "fat, dumb and happy," said James Knupp, principal in the consulting firm of Ennis, Knupp & Associates, Chicago.

Many of their best personnel, meanwhile, left to set up their own shops, taking valued accounts with them.

(According to annual surveys conducted by *Pensions & Investment Age*, the banks' market share among the 100 largest investment firms declined to 36% as of Jan. 1, 1986, from 47.6% eight years earlier. Last year, however, the market share rebounded to 41%, fueled by huge increases in indexed assets.)

It wasn't until the late 1970s that banks seriously started to try to reverse the trends. A key pace-setter was Chase Investors Management Corp., New York, which had been spun off from Chase Manhattan Bank in 1972. Chase created numerous specialized investment "shops within a shop" in the late

*Continued on page 138*

# Passive strategies losing their gleam

By John Covaleski

The percentage of externally managed tax-exempt assets invested through passive approaches has remained virtually unchanged during the past 12 months, providing additional evidence the passive management trend has peaked.

The amount of assets managed passively by managers grew by $86.9 billion to $412.4 billion as of Jan. 1. This represented 27.2% of the $1.516 trillion in total tax-exempt assets under management by the 930 managers, excluding Canadian firms, profiled in this issue.

Last year, the 806 managers profiled in *Pensions & Investment Age* reported $325.5 billion, or 26.8%, of the $1.216 trillion in tax-exempt assets they managed were in passive vehicles as of Jan. 1, 1986.

Of the $412.4 billion in passive assets, insurers managed 62.4%; banks, 28.7%; and independent counselors, 8.9%.

Most of the passive assets are managed by the 200 largest investment management firms. The 0.4 percentage point increase in the amount of assets invested passively apparently reflects the fact the new managers profiled this year had little or no passive assets.

The 1987 total includes $127.76 billion, or 8.4%, of total tax-exempt assets, managed in bond and equity indexes. Bond and equity indexes in the Jan. 1, 1986 data were $79.5 billion, or 6.5%, of total assets at that time.

In the current survey, equity index managers reported managing $102.6 billion, fixed-income index managers reported $25.2 billion, and dedicated and immunized bond portfolio managers reported $39.4 billion. The figures include assets managed by banks, insurance companies and investment counseling firms.

Wells Fargo Investment Advisors, San Francisco, had the largest amounts of indexed assets — $40.5 billion as of Jan. 1 — up from $25.2 billion a year earlier.

Of the $40.5 billion, $34.3 billion was in equity index funds. Wells Fargo took on 57 new indexed clients in 1986.

Bankers Trust Co., New York, ranked second among index fund managers with $21.7 billion as of Jan. 1, up from $19.2 billion a year ago. Of the $21.7 billion, $19.5 billion was in equity index funds.

Wells Fargo managed the largest amount of indexed bond funds, $6.2 billion, followed by Mellon Bond Associates, $4 billion.

Five of the top 10 equity index fund managers and five of the top

# Consultant pools showing steady growth in assets

By Marcia Parker

Consultant and money management firms that also act as managers of managers for small pension funds have seen a slow but steady growth in assets under management since their inception.

Since the concept was introduced in 1980 to help small funds tap top money management capabilities, the six firms known to offer the service have amassed more than $7 billion in assets.

When three consulting firms (Frank Russell Co., Tacoma, Wash.; Rogers, Casey & Barksdale Inc., Stamford, Conn.; and Evaluation Associates Inc., Westport, Conn.) pioneered the concept in the early 1980s, small pension plans didn't have access to successful large money management firms with huge minimum investment requirements.

Then, as now, small funds didn't have the in-house staff to monitor a host of managers, keep up with the growing number of asset classes and handle the administrative burden.

To solve those problems, Russell, RCB and EAI developed some pooled asset vehicles that allowed smaller plans to band together to form a large asset base. The firms are responsible for hiring, firing and monitoring the large money managers with diverse investment styles selected to run each vehicle. Fee structures vary from firm to firm.

While Russell, RCB and EAI still dominate the field and have been the most successful in marketing the service, a few small firms have joined the pack.

Russell and RCB increasingly are attracting large pension funds, which are using the manager-of-manager approach to make specialty investments. The smaller firms still are targeting small pension funds.

Together the three big firms have more than $6.8 billion under management for mostly discretionary clients. They offer a broad array of manager-of-manager funds, including international, special equity, fixed income and alternative investments such as timber and arbitrage.

Among the smaller firms that offer manager-of-manager services are Berg Fiduciary Associates, Port Chester, N.Y.; Collins Associates, Newport Beach, Calif.; and Abel/Noser Corp., New York. They have about 12 discretionary clients and manage about $235 million.

As a rule, they do not offer their own captive pooled investment vehicles to their clients.

According to consultants that monitor manager-of-managers services, such services can be costly and difficult to evaluate. In addition, conflicts of interest can emerge.

Potential conflicts, for example, involve the consultant or investment management firm collecting two fees — as consultant and manager; structuring the manager-of-manager funds in which it will invest client assets; and in the hiring of managers with which the firms might have long-standing relationships.

As a result, said Paul Erlendson, investment consultant, Callan Associates Inc., San Francisco, small pension funds should make sure costs are reasonable because that will affect the performance of the manager-of-managers fund and should address potential conflicts of interest ahead of time.

Despite the caveats, Dave A. Benson, manager of investments at Texasgulf Inc., Stamford, Conn., said he believes the positives outweigh the negatives.

"Even though you're one step removed from the investment process and there's another layer of expense, you get the benefit of having some knowledgeable firm do the work while you're trying to juggle so many things. There is a cost benefit in that."

Texasgulf has about 10% of its $215 million in pension assets invested in RCB's manager of manager international equity and fixed-income funds.

"It makes sense for a small fund like ours that wants the diversity and the expertise," Mr. Benson said.

"On the international side, we wanted the same kind of diversification of investment styles that we had in our domestic investments, but we didn't have enough funds to give to individual managers. The approach will continue to play an important role as an alternative for funds of our size."

Of the big three, Russell manages just more than $5 billion in tax-exempt assets for about 150 clients. That figure includes $2 billion in separate manager-of-manager accounts for two large clients — the United Air Lines Pilot Variable Plan, Chicago, and the Idaho Public Employees Retirement System, Boise.

Most of its clients hire Russell on a discretionary basis.

"We find our performance is consistently above average. We're not knocking our socks off. But we don't want to be there anyway because that would imply a greater degree of risk than we are comfortable with," said Paul Kaltinick, president of the trust department of Frank Russell Trust Co.

Among Russell's clients are Chesebrough-Pond's Inc., Westport, Conn.; A.B. Dick Co., Chicago; and the Town of Greenwich (Conn.) Retirement System.

RCB, which manages about $3.3 billion in tax-exempt assets for manager-of-manager clients, offers nine different categories of investment programs, ranging from core equity to real estate and international (which includes five different subgroups).

"Our focus has really been in dealing with niche areas," said Edgar Barksdale, principal. He declined to name clients.

After three years, EAI has about 20 pension clients and $500 million under management, and offers 11 manager-of-manager funds including a timber fund and an arbitrage fund.

All of EAI's clients have retained the firm on a discretionary basis. Usually clients start by investing in commingled funds and some move to separate accounts. He declined to identify his clients.

"By no means is the business a landslide. What you have is a sophisticated pension fund sponsor who has taken the multiple manager philosophy to the point of maximum efficiency," said Bill Crerend, EAI chairman.

"He buys multiple managers. It enables someone who is comple-

# RCB fund adds indexing

By John Covaleski

STAMFORD, Conn. — Rogers, Casey & Barksdale Inc. has added an index component to a multimanager commingled fund, which two clients say has produced lackluster returns.

RCB tapped Wells Fargo Investment Advisors, San Francisco, to manage a specialized indexed equity product in its Fund for Employee Benefit Trusts. The fund has about $237 million in assets from 10 pension funds, most of which have less than $100 million in assets.

Wells Fargo was allocated an estimated $19.75 million, or 8% of the fund's assets.

Darrell Hartline, senior vice president-finance with Genesee Hospital, Rochester, N.Y., said he's pleased with the addition of the indexed component after having been less than pleased with returns from the RCB fund. All of the hospital's $28 million in pension assets are invested in the RCB fund.

Mr. Hartline said he expects the fund's performance to improve with the indexed component, noting index funds generally have outperformed active management. He declined to release specifics, but said RCB's returns haven't been "as high as we would have liked to have seen."

A spokesman for the $64 million Bausch & Lomb Inc. pension fund, also in Rochester, reported a 10% return for the year ended Dec. 31 from its $35 million investment in equity components of the RCB fund. The Standard & Poor's 500 stock index returned 18.7% for the same period.

The returns could be misleading, however, because Bausch & Lomb used RCB as a consultant in all of 1986 and had money in separately managed accounts until the RCB fund began operating in March 1986. The Bausch & Lomb spokesman declined further comment.

Edgar W. Barksdale, treasurer of RCB, said Wells Fargo was added to enhance the investing strategy of the multimanager fund and to further diversify it. He said the move was not prompted by low returns, but acknowledged returns may improve.

"If you look at the last five years, indexes have outperformed active managers," Mr. Barksdale said.

Mr. Barksdale also said he doubts the returns reported by Bausch & Lomb were correct. But he declined to disclose return figures, explaining the fund is too new for returns to provide a true representation.

Wells Fargo was added to the fund along with a new equity manager after three managers were terminated because of poor returns.

The fund now has 14 managers investing in equity, fixed-income

# 11 dropped from top 100

By Marlene Givant

Eleven investment advisers dropped off *Pensions & Investment Age*'s list of the 100 largest managers of tax-exempt assets.

Only a few lost their positions because their tax-exempt assets under management decreased. Indeed, most of the managers dropped from the top 100 showed an increase in assets, but not enough to keep pace with other, faster-growing firms.

Among those losing tax-exempt assets is BA Investment Management, San Francisco, which had $3.245 billion as of Jan. 1, compared with $4.342 billion a year earlier. BA's asset drop was due solely to losing one large client officials wouldn't identify.

Investment performance has made up a part of the difference, according to Richard Frodsham, senior vice president. The firm ranks 105 in *P&I Age*'s 1987 listings compared with 69 a year ago.

United Capital Management, Denver, dropped to 145 from 93 because it lost three clients for a total of $500 million, said Denise Bryant, vice president-marketing. The firm had $2.35 billion as of Jan. 1 vs. $2.93 billion in 1985.

United Capital's performance on tax-exempt accounts was 2.73% for the year ended Dec. 31, vs. 18.7% for the Standard & Poor's 500 stock index. Its preliminary first-quarter 1987 return was 26.8% vs. 21.3% for the S&P 500, Ms. Bryant said.

"We invest heavily in low-priced, cheap stocks of basic industries and capital goods industries," she explained. Those industries first suffered from the recession in the early 1980s and then were hit by the impact of the strong dollar, she said. "As the dollar weakens, we're beginning to see those stocks perform."

National City Bank, Cleveland, dropped to $2.73 billion as of Jan. 1 from $2.8 billion a year earlier. The firm's rank this year is 128 vs. 100 last year.

Tax-exempt assets managed by Gardner & Preston Moss, Boston, declined by only $100 million (to $2.79 billion) during the year ended Jan. 1, yet the firm slipped to 127 from 97 in the rankings. Performance and new business almost offset the January 1986 loss of a $500 million balanced account with the Arizona State Retirement System, Phoenix, according to Sue Ellen Whelan, manager of marketing administration for the firm.

Tax-exempt assets of IDS Equity/Fixed-Income Advisors, Minneapolis, grew by $375 million to $3.21 billion, yet it slipped to 106 from 98; and Nationwide Insurance Cos., Columbus, Ohio, added $190 million for a total of $3.309 billion but slipped to 102 from 86.

Continental Assurance Co., Chicago, experienced small growth in its tax-exempt assets because it manages mostly guaranteed insurance contracts, which are valued at book. It also runs some equity accounts.

Continental's ranking fell to 102 from 96 a year earlier. The firm managed $3.28 billion in tax-exempt assets as of Jan. 1, vs. $2.9 billion a year earlier.

"Our growth isn't as accelerated because it's more structured," said Ted Czupek, manager of pension investment marketing.

Tax-exempt assets of Lord, Abbett & Co., New York, an equity and fixed-income manager, increased to $3.21 billion from $3.18 billion in 1985, but the firm's rank dropped to 107 from 85.

Some officials said the figures their firms provided last year were incorrect, rendering inaccurate the year-to-year comparison of assets.

The Vanguard Group of Investment Cos. Inc., Valley Forge, Pa., plunged to 241 from 71 because the tax-exempt figure the firm provided in 1985 — $3.89 billion — was incorrect, according to Ron L. Cannon, vice president-institutional marketing.

Mr. Cannon said Vanguard, a family of mutual funds, gained $1.5 billion in tax-exempt assets this year, most of which are managed by Vanguard's outside advisers. Tax-exempt assets internally managed by Vanguard in 1986 totaled $1.2 billion.

At Bank One, Indianapolis, formerly American Fletcher National Bank, Leif E. Nulsen, senior vice president and chief investment officer, said the bank did not lose tax-exempt assets in 1986.

The $3.74 billion tax-exempt figure the firm furnished last year was incorrect, he said. "We must have included some corporate cash in 1985 that isn't tax exempt." As of Jan. 1, the bank had $3.2 billion in tax-exempt assets.

Mercantile Trust Co., St. Louis, 99 last year with $2.8 billion in tax-exempt assets, dropped out of the top 100 and out of *P&I Age*'s directory because its parent company, Mercantile Bank Corp., spun off $2.72 billion in institutional assets to form Mississippi Valley Advisors. ■

# N.Y. private firms pay execs the most

Senior investment executives in private investment firms in New York and surrounding areas receive higher levels of compensation than their counterparts in banks or investment firms in other areas.

The results of the 1986 Callan Investments Institute investment management compensation survey showed the mean base salary of chief executive officers/managing partners in New York investment counseling firms is $197,900 per year.

Since most firms also provide a bonus, based on profitability or performance, the mean base salary and bonus total $341,200 for the chief executive officers of New York investment counselors.

By comparison, chief executives of investment firms in the Northeast (excluding New York), Midwest, Southwest and West Coast have a mean salary plus bonus of $228,200, $275,200, $300,000 and $159,700, respectively.

Senior investment committee members also are more handsomely compensated in the New York area. Senior investment committee members have a mean annual salary of $147,000 in New York and a mean base salary plus bonus of $219,200. Senior investment committee members have mean salary plus bonus in the Northeast, Midwest, Southwest and West Coast of $174,100, $166,300, $160,000 and $138,700, respectively.

According to the survey, which included data from 69 firms, investment management industry executive annual compensation growth has "greatly exceeded" other industries and has more than kept pace with inflation.

According to Callan, median pay in the investment business increased by 22% compared with 6% in other industries. Investment management compensation is projected to increase by another 17% in 1987 compared with an expected average increase of 5% in other industries.

"As in all surveys, certain firms decline to participate," said the survey text. "It appears the larger and more successful the firm, the more likely the maintenance of confidential salary policies.

"Other reasons for declining survey participation include transition from partnership to corporate form, incomparable positions, and desire to avoid publicity of high salaries so as not to incite jealousy and intensify their focus on fees. These phenomena suggest our survey may understate salaries, particularly for senior executives."

Other survey findings include:

- Firms spend an average of 47% of their revenue for base

# *Directory data obtained from questionnaires*

The information contained in the stories, profiles, charts and tables in this special issue was developed by *Pensions & Investment Age* from answers to detailed questionnaires.

Questionnaires were sent to client contacts or chief investment officers at more than 2,300 banks, trust companies, insurance companies and independent investment advisers in the United States, Canada and Europe. Real estate and international managers also were included, even though *P&I Age* publishes separate directories on those subjects.

A team of editorial staff members in Chicago worked on this issue — the 14th annual directory of investment advisers — for almost five months before its publication.

All quantifiable answers to the questionnaires were entered into a spreadsheet program from which the charts, tables and other statistics were compiled.

All information, except where noted, was as of Jan. 1, 1987.

As in previous years, all managers were asked to provide total and tax-exempt assets under management; tax-exempt asset mix; kinds, number and names of tax-exempt clients; areas of investment capabilities; investment approaches to stocks, bonds and real estate, where appropriate; names and titles of chief investment officer and client contact; the parent company name and total assets under management; and dollar amounts in categories such as equity real estate, mortgage-backed securities, mortgages, foreign investments, indexed funds and dedicated/immunized bond portfolios.

Banks and trust companies also were asked to break out the tax-exempt assets into commingled and separate accounts, with numbers of clients in each category.

Insurance companies also were asked to give detailed information about the separate and general accounts.

### Abbott Capital Management
*P.O. Box 81107, 1 Market St., Wellesley Hills, Mass. 02181; (617) 235-1088*

| | |
|---|---|
| Total assets managed | $215,000,000 |
| Tax-exempt assets managed | $215,000,000 |
| Tax-exempt clients | 6 |
| Types of accounts managed | CEG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Abbott Capital Management Inc. is a venture capital funds manager that uses a qualitative approach.

The firm uses in-depth analyses of the management teams to manage a 10- to 12-year venture capital partnership.

All assets Jan. 1 were in venture capital funds.

Clients include AT&T, Army and Air Force Exchange Service, Unisys and Carleton College.

Raymond L. Held, president, is chief investment officer. Stanley E. Pratt, chairman, is client contact.

### ABD International Management Corp.
*10 E. 53rd St., New York, N.Y. 10022; (212) 319-5020*

| | |
|---|---|
| Total assets managed | $1,813,000,000 |
| Tax-exempt assets managed | $1,467,000,000 |
| International assets managed | $1,311,000,000 |
| Tax-exempt clients | 13 |
| Types of accounts managed | CEF |
| Minimum separate account | $15,000,000 |
| No. of portfolio managers | 8 |
| Size of research staff | 79 |

ABD International Management Corp. is an international and currency manager.

For equities, it takes an active approach to currencies and stock selection based on industry rotation worldwide and within markets. The currency decision is considered separately from asset allocation and security selection.

Its fixed-income approach uses interest rate anticipation, currency considerations, technical analysis and macroeconomic analysis regarding currency implications.

The asset mix Jan. 1 was 89% stocks and 11% cash.

There was $1.161 billion in foreign stocks and $150 million in foreign cash.

One hundred and fifty stocks are followed closely and 500, generally; 60% of the research is generated internally.

ABD is 75% owned by Dresdner Bank and 25% owned by Hypo Bank.

Clients include General Motors, General Electric, the Common Fund and AT&T.

Wilhelm Heischman is chief investment officer. Jurgen Schwarz, vice president, is client contact.

### Abel/Noser Corp.
*90 Broad St., 23rd Floor, New York, N.Y. 10004; (212) 344-2610*

| | |
|---|---|
| Total assets managed | $200,000,000 |
| Tax-exempt assets managed | $200,000,000 |
| Tax-exempt clients | 6 |
| Types of accounts managed | C |
| Minimum separate account | $5,060,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 4 |

Abel/Noser Corp. is an equity manager.

Its equity approach is quantitative, emphasizing low price-earnings ratio. It invests in undervalued stocks with high earnings potential which recently reported earnings surprises using a ranking system with manual override when significant adverse information is published.

The asset mix Jan. 1 was 100% stocks.

Clients include Honeywell, Springs Industries and the United Food and Commercial Workers International union.

Stanley S. Abel, chairman, is chief investment officer. Richard T. McSherry, executive vice president, is client contact.

### ABN/LaSalle
*135 S. LaSalle St., Chicago, Ill. 60690; (312) 443-2497*

| Total assets managed | $1,500,000,000 |
| Tax-exempt assets managed | |
| Total | $800,000,000 |
| Commingled | $200,000,000 |
| Separate | $600,000,000 |
| 401(k) and 457 assets managed | $100,000,000 |
| Mortgage-backed assets managed | $40,000,000 |
| International assets managed | $2,000,000 |
| Tax-exempt clients | |
| Commingled | 200 |
| Separate | 50 |
| Types of accounts managed | CEJ |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 5 |

ABN LaSalle is an equity, fixed-income, balanced and international manager.

Using an equity approach based on growth stock, Graham & Dodd and quantitative principles, ABN LaSalle offers a family of quantitatively driven products.

Fixed-income portfolios are managed using duration as a measure of potential volatility. The shape of the yield curve and interest rate forecasts are major inputs. Fixed-income futures are used.

The tax-exempt asset mix Jan. 1 was 15% stocks, 40% bonds, 20% cash, 5% mortgage-backed securities and 20% GICs.

ABN LaSalle manages assets for 50 401(k) or 457 savings plans. As of Jan. 1, the bank also managed $5 million in dedicated or immunized portfolios.

The parent company is ABN. Assets under management by ABN, subsidiaries and affiliates are $7 billion.

James F. Sullivan, senior vice president, is chief investment officer and client contact.

### Acquest Capital Management Inc.
*300 E. Long Lake Road, Suite 280, Bloomfield Hills, Mich. 48013; (313) 645-5130*

| | |
|---|---|
| Total assets managed | $65,000,000 |
| Tax-exempt assets managed | $44,000,000 |
| Real estate assets managed | $44,000,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | C |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 3 |

Acquest Capital Management Inc. is a real estate manager emphasizing product knowledge, market research, sophisticated financial analysis, development skills, management control and integrity.

The asset mix Jan. 1 was 10% equity real estate, 45% mortgages and 45% hybrid debt.

Clients include Dow Chemical, Operating Engineers' and Detroit area Carpenters.

David G. Ong, president, is chief investment officer. Delores M. Hoenes, acquisition manager, is client contact.

### The Adams Express Co.
*7 St. Paul St., Baltimore, Md. 21202; (301) 752-5900*

| | |
|---|---|
| Total assets managed | $468,000,000 |
| Tax-exempt assets managed | $3,000,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | C |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 6 |

The Adams Express Co. is an equity manager, emphasizing growth stock, low price-earnings ratios and Graham & Dodd principles. It accomplishes risk averse investment through value, quality and investment merit of each security based on earnings and dividend growth. It emphasizes energy stocks. Options are used.

The firm was 100% invested in stocks Jan. 1.

The parent company is Adams Express Co. Total assets under management by the parent company, subsidiaries and affiliates are $744 million.

W.D. MacCallan, chairman and chief executive officer, is chief investment officer. Monica C. Loh, vice president-investment advisory services, is client contact.

### Addison Capital Management Co.
*1608 Walnut St., 13th Floor, Philadelphia, Pa. 19103; (215) 735-2121*

| | |
|---|---|
| Total assets managed | $153,000,000 |
| Tax-exempt assets managed | $22,000,000 |
| Tax-exempt clients | 6 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 1 |

Addison Capital Management Co. is an equity and balanced manager.

Its equity approach is quantitative, emphasizing low p/e ratios and sector rotation in a value-oriented, contrarian philosophy with a diversified list of out-of-favor stocks drawn from a mixture of capitalization sizes.

Its fixed-income approach is passive.

The asset mix Jan. 1 was 95% stocks, 3% bonds and 2% cash.

Clients include Pennsylvania Employes and Health Management Systems.

Jay R. Massey, president, is chief investment officer and client contact.

### Aegis Capital Management
*40 Wall St., 47th Floor, New York, N.Y. 10006; (212) 889-2777*

| | |
|---|---|
| Total assets managed | $43,000,000 |
| Tax-exempt assets managed | $15,000,000 |
| Tax-exempt clients | 7 |
| Types of accounts managed | CF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 1 |

Aegis Capital Management Corp. is a fixed-income, yield enhancement and options and futures manager.

Its fixed-income approach combines dynamic yield enhancement and risk-controlled arbitrage. Futures and options are used to protect principal, create liquidity and enhance yields for U.S. Treasury portfolios.

All assets Jan. 1 were in fixed-income, hedged fixed-income and futures arbitrage accounts.

Clients include Carolina Clinic and North Carolina Forestry.

Jonathan B. Greenspan, vice president, is chief investment officer. Thomas P. Zucosky, president, is client contact.

### Aetna Capital Management
*145 King St. West, 14th Floor, Toronto, Ontario M5H 3T7; (416) 864-3782*

| | |
|---|---|
| Total assets managed | $660,000,000 |
| Tax-exempt assets managed | |
| Total | $556,000,000 |
| For subsidiaries of U.S. firms | $60,000,000 |
| Real estate assets managed | $147,000,000 |

Aetna Capital Management Ltd., a Canadian firm, is an equity, fixed-income, balanced, real estate and short-term manager.

The firm uses fundamental analysis in its selection process, looking for long-term value using a variety of measures and an assessment of management strength.

Its fixed-income approach uses bonds with a high-yield/low-volatility orientation. Value is added through duration trades and sector swaps and finding undervalued securities. High-quality mortgages sometimes are used.

Its real estate approach uses a series of closed-end funds, retaining 25% of the project and acting as manager.

The asset mix Jan. 1 was 17% Canadian stocks, 21% bonds, 32% cash, 5% equity real estate, 24% mortgages and 1% U.S. stocks.

The parent is Aetna Canada. Assets managed by the parent, subsidiaries and affiliates total $942 million.

William H. Alexander, president, is chief investment officer. Judith A. Lake, vice president, is client contact.

Aetna Life Insurance Co. is an equity, fixed-income, balanced and real estate manager.

Its equity approach emphasizes companies with positive future earnings momentum and superior relative p/e ratio targets. Passive management is also offered.

Its fixed-income approach uses sector analysis. The approach is designed to control market risk while emphasizing cash flow and value to maximize total returns. Cash used to govern duration within a prescribed band is generally less than 25% of portfolio.

Its real estate approach includes strategic analysis, acquisition, aggressive property management and a disciplined sales program.

The separate accounts asset mix Jan. 1 was 26% stocks, 5% bonds, 15% cash, 17% equity real estate, 8% mortgages and 29% annuity closeouts.

There was $1.554 billion in real estate equity, $732 million in mortgages, $11.2 million in equity index funds and $135 million in dedicated or immunized portfolios.

There are 360 401(k) and 457 savings plans clients. Options and stock index futures are used.

The parent company is Aetna Life & Casualty. Total assets under management by the parent company, subsidiaries and affiliates are $104.556 billion.

Donald G. Conrad, executive vice president, is chief investment officer. T. Jerald Moore, vice president, is client contact.

### Aetna MIM Asset Management Ltd.
*151 Farmington Ave., YCC1, Hartford, Conn. 06156; (203) 275-3710*

| | |
|---|---|
| Total assets managed | $210,000,000 |

| | |
|---|---|
| Total assets managed | $7,000,000,000 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 8 |

AIG Global Investors is an equity, fixed-income, balanced and international manager.

Its equity approach is to buy global growth stocks, using a disciplined, long-term approach.

Fixed-income portfolios, when used, are constructed with an emphasis on quality and analyzing longer-term trends.

It follows 300 stocks closely and 1,000, generally; 20% of the research is generated internally.

The parent company is American International Group.

Richard J. Hoffman, president, and Richard B. Goodwyn, chairman, are chief investment officers. Mr. Hoffman is client contact.

### AIM Management Inc.

*11 Greenway Plaza, Suite 1919, Houston, Texas 77046; (713) 626-1919*

| | |
|---|---|
| Total assets managed | $8,268,000,000 |
| Tax-exempt assets managed | $181,000,000 |
| 401(k) assets managed | $1,000,000 |
| Tax-exempt clients | 7 |
| Types of accounts managed | CFG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 5 |

AIM Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach utilizes growth and emerging growth stocks. Equities are monitored on basis of earnings momentum and relative strength in the marketplace.

Its fixed-income approach focuses on high-yield and convertible bonds. The firm creates overdiversified portfolios loaded with lower-quality issues to capitalize on yield premiums. In the convertible sector, the firm seeks the high level of current income that exceeds yields in the equity market.

All assets Jan. 1 were in bonds.

There is one 401(k) client. Options are used.

Charles T. Bauer, president, is chief investment officer. Gary T. Crum, senior vice president and assistant treasurer, is client contact.

### Albion Management Group

*Alta Lodge, Alta, Utah 84092; (801) 742-3500*

| | |
|---|---|
| Total assets managed | $12,000,000 |

| Tax-exempt clients | 10 |
| Types of accounts managed | C |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 2 |

Albion Management Group is an equity and a balanced manager.

Its equity approach emphasizes growth stock, emerging growth stock and low p/e ratios. It seeks values overlooked by other investors. It looks for companies with a market niche, growth and earnings potential in products under development, hidden assets and other special situations. Options are used.

Its fixed-income approach relies on interest rate anticipation.

The asset mix Jan. 1 was 68% stocks, 14% bonds and 18% cash.

Toby Levitt, president, is chief investment officer. Amy S. Landis, vice president-corporate and pension accounts, is client contact.

### Aldrich, Eastman & Waltch

*265 Franklin St., Boston, Mass. 02110; (617) 439-9000*

| | |
|---|---|
| Total assets managed | $2,000,000,000 |
| Tax-exempt assets managed | $2,000,000,000 |
| Real estate assets managed | $2,000,000,000 |
| Tax-exempt clients | 37 |
| Types of accounts managed | CEG |
| Minimum separate account | $100,000,000 |
| Size of research staff | 87 |

Aldrich, Eastman & Waltch Inc. is a real estate manager.

Its approach is flexible and opportunistic, reflecting property fundamentals and current market conditions. It emphasizes adding value through active management of both the property and the capital structure of the investment.

The asset mix Jan. 1 was 95% equity real estate and equity-oriented debt instruments, and 5% mortgages.

Thomas G. Eastman, principal, is chief investment officer. Robert J. Hannan, vice president, is client contact.

### Alexander, Scriver & Associates Inc.

*1099 18th St. Suite 2810, Denver, Colo. 80202; (303) 298-1858*

| Size of research staff | 1 |

Alexander, Scriver & Associates Inc. is an equity, fixed-income, balanced and international manager.

Its equity approach uses Graham & Dodd principles. Managers first act as contrarians, looking for overreactions in markets by analyzing price information quantitatively and later apply more traditional analytical techniques to establish value.

Its fixed-income approach uses interest rate anticipation and sector analysis.

The asset mix Jan. 1 was 51% stocks, 5% bonds and 44% cash.

There are three 401(k) clients.

The parent company is Chemical New York Corp. Total assets under management by the parent company, subsidiaries and affiliates are $16 billion.

Gerald H. Scriver is chief investment officer. Robert J. Reed, senior vice president, is client contact.

### Fred Alger Management Inc.

| | |
|---|---|
| Total assets managed | $3,327,000,000 |
| Tax-exempt assets managed | $3,198,000,000 |
| Tax-exempt clients | 80 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $500,000 |
| Size of research staff | 30 |

Fred Alger Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth stocks, identifying and investing in "life-cycle change" and "high-unit volume" growth companies and those catering to rapidly expanding markets.

Its fixed-income approach uses interest rate anticipation and sector, spread and credit analyses. The firm adds value and consistency through active maturity and sector positioning based on yield curve anticipation and spread analysis. Carefully researched lower credit issues are used occasionally.

The asset mix Jan. 1 was 83% stocks, 8% bonds and 9% cash.

A total of 1,400 stocks are followed closely and 1,600, generally; all research is generated internally.

The parent company is Fred Alger & Co. Inc. Assets under management by the parent and all subsidiaries and affiliates total $3.337 billion.

Clients include Alaska, ABC, Boilermaker-Blacksmith National Pension Trust and city of Wichita.

Fred Alger is chief investment officer. Krista M. Woodall, senior vice president and director of marketing and client service, is client contact.

In *Pensions & Investment Age*'s annual survey of investment advisory firms, "tax-exempt assets" refers to U.S. institutional tax-exempt assets only and does not include individuals, IRAs or Keogh plans.

| Types of accounts managed | CEFJG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 47 |
| Size of research staff | 13 |

Alliance Capital Management Corp. is an equity, fixed-income, balanced, international, and venture capital manager.

Using emerging growth and sector rotation, the firm identifies and invests in stocks with two- to three-year relative earnings strength at an early stage and at a reasonable price.

Its fixed-income approach is passive, using interest rate anticipation and sector analysis. It manages market risk by limiting duration deviations from the market. Value is added through heavy sector concentrations and opportunity trading.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 79% stocks, 8% bonds, 5% cash and 8% mortgage-backed securities.

It has $2.89 billion invested in stock index funds; $45 million in bond index funds; and $268 million in dedicated or immunized bond portfolios.

The parent company is The Equitable Life Assurance Society of the United States. Total assets under management by the parent, subsidiaries and affiliates are $90.772 billion.

Dave H. Williams is chief investment officer. Margaret M. Frankowski is client contact.

| Minimum separate account | $15,000,000 |
| No. of portfolio managers | 9 |
| Size of research staff | 4 |

American Express Asset Management is an international manager.

Its equity approach is thematic, identifying global investment themes or forces and use valuation screens to select attractively priced companies benefiting from these themes.

Its fixed-income approach is based on active currency and interest rate management. Returns in four major currency blocks are forecast to take significant currency and interest rate bets, carefully controlling risk-and-return tradeoffs.

Currency options are used.

The asset mix Jan. 1 was 97% stocks and 3% bonds.

The parent company is Shearson Lehman Brothers, a unit of American Express Co. Assets under management by the parent, subsidiaries and affiliates total $140 billion.

Karl Van Horn, chairman, is chief investment officer. The client contact is Susan Leader, director of marketing, 375 Park Ave., Suite 1407, New York, N.Y. 10022; (212) 415-0802.

### American Fund Advisors

Who offers your defined contribution plan participants the flexibility of daily telephone transfers between funds?

The same company who offers superior investment performance.

As a leading provider of 401(k) and other defined contribution plan services to more than 1,000 corporations across the country, Fidelity Investments offers a wide range of investment management and client services designed to meet the needs of both you and your employees.

**A Wide Array Of Top Performing Funds.** With more than $70 billion in assets under management, Fidelity offers a broad choice of performance driven mutual funds ranging from equity funds like Fidelity Magellan Fund and Fidelity Equity-Income Fund, to money market funds and GIC's. The funds are available on a *no-load* basis to plans with more than 200 eligible employees. And, as market conditions or personal investment objectives change, plan participants have the flexibility to transfer their investments among available mutual funds by telephone on any business day.

**Comprehensive Recordkeeping.** Fidelity's recordkeeping services are designed specifically to reduce your administrative burden. Not only can your employees call us directly to transfer existing balances, they can also redirect future contributions by telephone. Our state of the art system and experienced employee benefit professionals work to ensure timely and accurate reports for both you and your employees.

**Employee Communications Support.** Fidelity will work with you to develop the communication materials needed to support your employees from enrollment through retirement. We'll help you explain your program and the available investment options clearly and effectively. In addition, your employees can call toll-free 24 hours a day, seven days a week and talk with a knowledgeable Fidelity representative about available investment options.

For more information about Fidelity's defined contribution plan services, including fund prospectuses covering management fees and expenses, please call Jeffrey Paster, Corporate Market Manager, at 1-800-345-5033. In Massachusetts, call collect 617-570-5692.

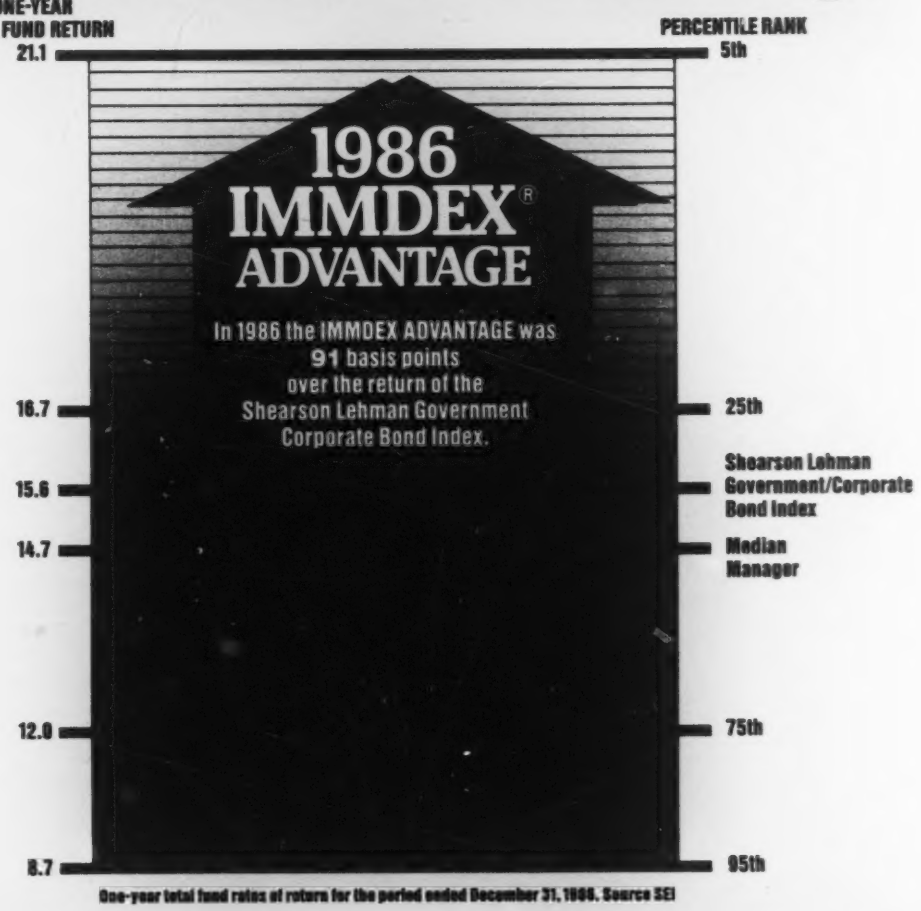
# Bond Indexation with the IMMDEX advantage



One-year total fund rates of return for the period ended December 31, 1986. Source SEI

**The Shearson Lehman Government/Corporate Bond Index has provided superior performance when compared to active fixed income managers. The Index has consistently provided first or strong second quartile returns over multiple time periods.**

**Immdex is a unique bond management system in which the annual return will match or exceed the index rate of return.**

**Immdex accomplishes this objective through two strategies:**

- **The index rate of return is achieved through a proprietary duration-matching strategy.**
- **Immdex capitalizes on market opportunities to further enhance total return.**

**First Wisconsin Trust Company is a leader in the area of quantitative fixed income management and we believe that the Immdex advantage will prove to be an attractive alternative to your current bond management approach.**

**Let us review how Immdex provides positive tracking to the Shearson Lehman Government/ Corporate Bond Index and enhanced market returns through the use of bond management techniques. Call or write Charles Groeschell at First Wisconsin Trust Company, First Wisconsin Center, Box 2054, Milwaukee, Wisconsin 53201. (414) 765-4789.**

ASB Capital Management Inc. is an equity, fixed-income, balanced and real estate manager.

It combines sector rotation, Graham & Dodd, market timing and valuation screens and models in its bottom-up approach, seeking undervalued securities and sectors.

The fixed-income approach combines interest rate anticipation, maturity and sector shifts, swaps and arbitrage and timely selection of new or undervalued issues. Options are used.

For real estate, it invests in high-quality, income-producing properties constructed with union labor, through participating and convertible mortgages and joint ventures.

The asset mix Jan. 1 was 30%

# IS where the action is.

It's happening now. It's happening fast. It's economic growth and business opportunities. And it's all happening in the nine Southeastern states of the BellSouth region.

In ten years, population will boom at a rate 44% faster than the rest of the nation; new jobs will be created at a rate 20% faster than the national average.

In ten years, there will be over 4 million new housing starts and about 4 million new jobs. Real personal income in the region will rise by 2.9% per year, compared to 2.7% for the nation.

The BellSouth management team is prepared to capitalize on this growth. They're committed to forward-looking business strategies and new technologies. And they're determined to stay ahead of the growing need for state-of-the-art products and services to meet customer needs in an expanding marketplace.

Selective acquisitions are a part of BellSouth's growth plans. BellSouth is already involved in new business opportunities that will lead to even greater revenues nationally and internationally.

BellSouth not only is in the midst of the action but is helping to make it happen.

### Ashfield/Pacific Asset Management

*750 Battery St., Suite 700, San Francisco, Calif. 94111; (415) 391-4747*

| | |
|---|---|
| Total assets managed | $455,000,000 |
| Tax-exempt assets managed | $170,000,000 |
| Tax-exempt clients | 50 |
| Types of accounts managed | CEF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 4 |

Ashfield/Pacific Asset Management is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth stocks with investments concentrated in small and medium-sized companies with accelerating earnings trends and consistently high returns on assets and equity. Purchase and sale disciplines emphasize relative p/e ratios.

Its fixed-income approach is passive and based upon relative value in attractive market sectors. Strategy emphasizes economic and interest rate cycles, liquidity and the yield curve.

The asset mix Jan. 1 was 55% stocks, 40% bonds and 5% cash.

J. Stephen Thornborrow is chief investment officer. J. Stephen Lauck and Andrew F. Mathieson are client contacts.

### Ashland Management

*26 Broadway, New York, N.Y. 10004; (212) 425-2803*

| | |
|---|---|
| Total assets managed | $508,000,000 |
| Tax-exempt assets managed | $430,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |

Ashland Management is an equity manager, using growth stock and low p/e stocks.

It takes a value-oriented approach, with all decisions based on reported financial information. Equity investments are substantially reduced when market returns on equity are not competitive with risk-free investments.

The asset mix Jan. 1 was 97% stocks and 3% cash.

The firm follows 200 stocks closely and 1,200, generally; 90% of research is generated internally.

Clients include Barker Welfare, Watkins-Johnson, Dayton Hudson and Memphis Light & Gas.

Charles C. Hickox, chairman, is chief investment officer. Minot Amory, director, is client contact.

The treasury management services directory will be published Aug. 10.

### Asset Management Associates

*1 Financial Place, 17 Front St., Salem, Mass. 01970; (617) 744-6001*

| | |
|---|---|
| Total assets managed | $15,000,000 |
| Tax-exempt assets managed | $15,000,000 |
| Real estate assets managed | $3,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | C |
| Minimum separate account | $100,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Asset Management Associates is an equity, fixed-income, balanced and real estate manager.

Its equity approach applies sector rotation, market timing and quantitative techniques to growth, emerging growth and low p/e stocks.

Its fixed-income approach uses interest rate anticipation.

In real estate, the firm customizes and analyzes small, value-oriented properties in emerging growth areas for income and appreciation.

The asset mix Jan. 1 was 75% stocks, 3% bonds, 2% cash and 20% equity real estate.

Frederick V. McDonald Jr. is chief investment officer. Linda Parsons is client contact.

### Associated Kellogg Bank

*200 N. Adams, P.O. Box 19006, Green Bay, Wis. 54307; (414) 433-3131*

| | |
|---|---|
| Total assets managed | $500,000,000 |
| Tax-exempt assets managed | $200,000,000 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $300,000 |
| No. of portfolio managers | 5 |

Associated Kellogg Bank is an equity, fixed-income and balanced manager.

Its equity approach uses growth stock and tends to be conservative, although there are two speculative funds.

Its fixed-income approach is passive and conservative. It avoids volatility with relatively short maturities.

The asset mix Jan. 1 was 45% stocks, 45% bonds and 10% cash.

The parent company is Associated Banc-Corp. Total assets under management by the parent, subsidiaries and affiliated companies are $1.4 billion.

Wilson Roane, vice president, is chief investment officer. Richard Langer, vice president-pension division, is client contact.

### Astrop Advisory Corp.

*5 Piedmont Center, Suite 417, Atlanta, Ga. 30305; (404) 239-0707 or (800) 237-7073*

| | |
|---|---|
| Total assets managed | $527,000,000 |
| Tax-exempt assets managed | $320,000,000 |
| Tax-exempt clients | 53 |
| Types of accounts managed | CEF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Astrop Advisory Corp. is an equity and balanced manager.

It combines growth and emerging growth stock in its equity approach. Its established-growth approach invests in larger-cap companies, and its emerging-growth approach, smaller companies. The firm sponsors and manages no-load mutual funds.

Its fixed-income approach is passive, focusing on interest rate anticipation.

Its asset mix Jan. 1 was 70% stocks, 16% bonds, 10% cash and 4% no-load mutual funds.

The firm generates 45% of research internally.

Clients include CIBA-Geigy, Rhodes, The Allen Group and Georgia-Pacific.

H. Eugene Caldwell, president, is chief investment officer. Dixie P. Anderson, executive vice president, is client contact.

### Atalanta/Sosnoff Capital

*499 Park Ave., New York, N.Y. 10022; (212) 755-2800*

| | |
|---|---|
| Total assets managed | $3,330,000,000 |
| Tax-exempt assets managed | $3,116,000,000 |
| 401(k) assets managed | $7,000,000 |
| Tax-exempt clients | 118 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

Atalanta/Sosnoff Capital Corp. is an equity and balanced manager.

Its equity approach combines low p/e stocks and sector rotation. Managing portfolios in a pragmatic and disciplined way, it focuses on achieving absolute rates of return.

Its fixed-income approach uses interest rate anticipation and sector analysis. The firm avoids concentration in longer maturities.

The asset mix Jan. 1 was 92% stocks, 5% bonds and 3% cash.

There is one 401(k) client. The firm follows 150 stocks closely and 600, generally; 80% of research is generated internally.

Total assets under management by the firm and its subsidiaries and affiliates are $3.475 billion.

Clients include Levi Strauss, Tektronix, Kraft and Philadelphia.

Martin T. Sosnoff, chairman and chief executive officer, is chief investment officer. Laura A. Steele, director of client service, is client contact.

What Wall Street could have learned from the garment district

The more mass production there is in the industry, the more value discerning customers place on the master tailor's touch.

If the mass markets can't meet your particular needs for mortgage product or services, you deserve Verex Capital Markets Group. We will create and deliver a custom package tailored to your design.

### Atlanta Capital Management
*1360 Peachtree St., No. 1600, Atlanta, Ga. 30309; (404) 876-9411*

| | |
|---|---|
| Total assets managed | $1,354,000,000 |
| Tax-exempt assets managed | $1,231,000,000 |
| Mortgage-backed assets managed | $33,000,000 |
| Tax-exempt clients | 40 |
| Types of accounts managed | CFG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 9 |

Atlanta Capital Management Co. is an equity, fixed-income and balanced manager.

Its equity approach focuses on growth stock, looking for high-quality, above-average profitability and a growing stream of earnings. The firm uses a disciplined approach for comparing company worth to stock price.

Its interest rate anticipation approach to fixed income is highly disciplined, using A or better securities and maturity optimization.

The asset mix Jan. 1 was 76% stocks, 15% bonds, 6% cash and 3% mortgage-backed securities. The firm also managed $13 million in dedicated or immunized bonds.

Atlanta Capital follows 150 stocks closely and 300, generally; 70% of research is internally generated.

Clients include American Airlines, Miami, Maryland and Northeast Utilities.

Frederick L. Muller, president, is chief investment officer. J. Robert Douglas, managing director, is client contact.

### Avatar Associates
*900 Third Ave., New York, N.Y. 10022; (212) 753-7710*

| | |
|---|---|
| Total assets managed | $900,000,000 |
| Tax-exempt assets managed | $600,000,000 |
| 401(k) assets managed | $30,000,000 |
| Tax-exempt clients | 70 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 4 |

Avatar Associates is an equity and balanced manager.

Its equity approach uses active asset allocation, altering equity exposure to changes in stock market risk. Accounts utilize individual stocks and cash; index fund and cash fund; or only futures to hedge other equity assets.

Its fixed-income approach uses interest rate anticipation. This portion of balanced accounts utilize primarily U.S. government securities of intermediate maturities that are shifted, based on interest rate trends.

The asset mix Jan. 1 was 90% stocks and 10% cash.

There are three 401(k) clients.

Stock index futures are used.

Clients include K mart Corp., Boston Edison, CIBA-Geigy and Lear Siegler.

Edward S. Babbitt Jr., president, is chief investment officer. Bruce L. Poliquin, vice president, is client contact.

### Axe-Houghton Management
*Axe Castle, 400 Benedict Ave., Tarrytown, N.Y. 10591; (914) 631-8131*

| | |
|---|---|
| Total assets managed | $968,000,000 |
| Tax-exempt assets managed | $433,000,000 |
| 401(k) assets managed | $16,000,000 |
| International assets managed | $40,000,000 |
| Tax-exempt clients | 13 |
| Types of accounts managed | CFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 8 |

Axe-Houghton Management Inc. is an equity, fixed-income, balanced, international and index manager.

It offers both active and passive equity approaches. Its active approach emphasizes low p/e, growth and emerging growth stocks and sector rotation.

It also offers domestic and international indexed equity management. Options are used.

In fixed-income, interest rate risk exposure is based on multi-scenario interest rate outlook; credit risk exposure is based on the size of available quality spreads and analysis of individual credits.

The asset mix Jan. 1 was 82% stocks, 12% bonds and 6% cash.

There was $40 million in foreign stocks and $225 million in equity index funds.

There were three 401(k) clients.

The parent company is USF&G Corp. Total assets under management by the parent company, subsidiaries and affiliates are $8.9 billion.

John L. Schroeder, chairman, is chief investment officer. Stephen J. Darby Jr., president, is client contact.

### J.H. Ayres & Co.
*2016 Condor St., Colorado Springs, Colo. 80909; (303) 635-1414*

| | |
|---|---|
| Total assets managed | $1,400,000,000 |
| Tax-exempt assets managed | $1,344,000,000 |
| Tax-exempt clients | 152 |
| Types of accounts managed | CE |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

J.H. Ayres & Co. had all of its tax-exempt assets in equity mutual funds as of Jan. 1.

The firm uses market timing. Its expertise centers on changes in Federal Reserve System monetary policy, based on the principle that an expanding economy creates a favorable climate for investments.

Changes in money flows precede or coincide with basic changes in stock and bond prices and business. Using this data, the firm alternates investments between equity mutual funds and money market mutual funds. The firm follows about 50 mutual funds.

Clients include Viterbo College and Looart Retirement Trust.

James H. Ayres, president, is chief investment officer and client contact.

| Minimum separate account | $300,000 |
| No. of portfolio managers | 20 |
| Size of research staff | 35 |

Babson United Investment Advisors Inc. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes Graham & Dodd principles and growth and low p/e stocks.

The strategy is to recommend a properly diversified portfolio of attractive securities in line with client objectives to be held for the longer term.

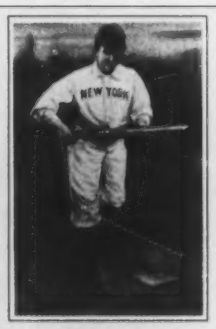
Its fixed-income approach uses interest rate anticipation. The aim is to provide the security of capital and level of income — market conditions considered — commensurate with the goals of the client.

The asset mix Jan. 1 was 74% stocks, 20% bonds and 6% cash.

A total of 250 stocks are followed closely and 800, generally; 80% of research is generated internally.

Donald G. Parsons is chief investment officer. Cassie M. Grant, senior vice president-sales, is client contact.

A special section on leasing will be published June 15.



**We don't try for home runs either.**

His name was Wee Willie Keeler, baseball's greatest place-hitter. Standing no taller than the batboy, his lifetime average of .345 remains today as one of the highest in baseball history. Yet in 17 seasons he managed to hit only 32 home runs. Some people say he never meant to hit any.

His approach to baseball was simple. Rather than go for the long ball, he just "hit 'em where they ain't." The result: 3 batting titles, an all-time major league record for most singles in a season with 202, and an entire season (564 at bats) without striking out once.

At Rampart, we don't try for homeruns either. Instead, we emphasize low risk, highly consistent returns, making use of option/equity skills that we've been developing for over a decade.

Unlike Wee Willie, we at Rampart will never make it to Cooperstown. But in our business, performance, not fame, is the name of the game.

RAMPART INVESTMENT MANAGEMENT COMPANY INC.

Providing unique option/equity programs for Institutional Investors.

Exchange Place, Boston 02109 (617) 742-7400

**We don't try for long shots either.**

His name was Walter Travis, the "Old Man" of golf. Though he did not pick up a bag of clubs until age 35, four years later he was among the most successful golfers in the world. His secret: Short, accurate drives and flawless putting.

This simple strategy helped him win every major amateur title in golf, including three times as National Champion, four times as Metropolitan Champion and once as winner of the prestigious British Amateur Tournament, the first non-British golfer ever to do so.

At Rampart, we don't try for long shots either. Instead, we emphasize low risk, highly consistent returns, making use of investment skills and options/futures hedging techniques that we've been developing for over a decade.

Unlike "Old Man" Travis, we at Rampart will never win national golf titles. But in our business, as in golf, consistency wins every time.

RAMPART INVESTMENT MANAGEMENT COMPANY INC.

Providing unique option/equity programs for Institutional Investors.

Exchange Place, Boston 02109 (617) 742-7400

**We don't try for aces either.**

In an era when the overhand serve was still a thing of the future, Richard Sears reigned as King of the Court.

A slight, unlikely looking athlete, Sears made up for his lack of size by developing one of the most consistent ground games in tennis. The key to winning, he believed, was to keep the ball in play until either the opponent erred or until he had an opportunity at a put-away.

So superior was he to his contemporaries that from age 19 to 26, he never lost a single match, capturing the first seven U.S. Championships.

At Rampart, we don't rely on aces either. Instead, we emphasize low risk, highly consistent performance in the equity and fixed income markets, employing investment skills and options/futures hedging techniques that we've been developing for over a decade.

Unlike Richard Sears, we at Rampart will never win national titles. But in our business, as in tennis, consistency and patience are the name of the game.

RAMPART INVESTMENT MANAGEMENT COMPANY INC.

Providing unique hedged investment programs for Institutional Investors.

Exchange Place, Boston 02109 (617) 742-7400

- **Hedged Equity & Fixed Income**

Bartlett & Co. is an equity, fixed-income, balanced, real estate and international manager.

Its equity approach centers on low p/e stocks and Graham & Dodd analysis in a value-oriented strategy emphasizing asset values and strong financial positions.

Its fixed-income approach uses sector analysis.

For real estate investments, it seeks overlooked commercial and industrial properties with an emphasis on current income.

Stock index and fixed-income futures are used.

The asset mix Jan. 1 was 50% stocks, 35% bonds, 9% cash, 1% equity real estate, 1% mortgages and 4% mortgage-backed securities.

William A. Friedlander, chairman, is chief executive officer. Woodrow H. Uible, partner-senior portfolio manager, is client contact.

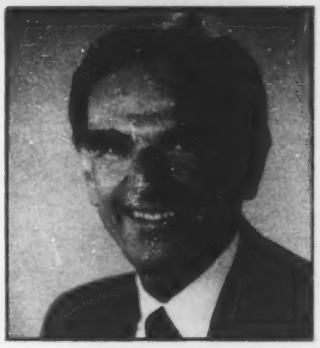
### Batterymarch Financial Management

*600 Atlantic Ave., Boston, Mass. 02210; (617) 973-9300*

| | |
|---|---|
| Total assets managed | $9,234,000,000 |
| Tax-exempt assets managed | $7,771,000,000 |
| International assets managed | $1,116,000,000 |
| Tax-exempt clients | 98 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 10 |

Batterymarch Financial Management is an equity, international and global manager.

It uses sector rotation in its quantitative equity approach, looking for cheap, unpopular stocks in an attempt to exploit uncertainty rather than fight it.



*Dean LeBaron*
*Batterymarch Financial*

The asset mix Jan. 1 was 99% stocks and 1% cash.

There was $1.12 billion in foreign stocks.

Batterymarch follows 2,000 stocks closely and 6,000 generally; 98% of research is generated internally.

Dean LeBaron, trustee, is chief investment officer. Dean Williams, trustee, is client contact.

### Baxter & Hoops Inc.

*115 W. Washington St., Indianapolis, Ind. 46204; (317) 635-7120*

| | |
|---|---|
| Total assets managed | $441,000,000 |
| Tax-exempt assets managed | $220,000,000 |
| Mortgage-backed assets managed | $120,000,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | CG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 1 |

Baxter & Hoops Inc. is a fixed-income manager.

Its fixed-income approach uses sector analysis. Fixed-income futures are used.

The asset mix Jan. 1 was 54% mortgage-backed securities, 37% cash and 9% bonds.

Clients include the Indiana State Teachers' Retirement Fund.

Gary Baxter and Norman Hoops, partners, are chief investment officers and client contacts.

### BBL Capital Management

*Avenue Marnix 24, Brussels, Belgium 1050; 011-32-2-517-30-94*

| | |
|---|---|
| Total assets managed | $703,000,000 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 22 |

BBL Capital Management Corp. is an equity, fixed-income, balanced and international manager.

Its equity approach is based on sector rotation, Graham & Dodd, market timing and quantitative methods together with low p/e stocks.

For fixed income, it anticipates interest rates, reviewing the portfolio's currency content and trying to leverage it through well-timed purchases of deep discount bonds.

The parent company is Banque Bruxelles Lambert. Assets under management by the parent, subsidiaries and affiliates exceed $6 billion.

Philippe Desirant, manager, is chief investment officer. G. Dunesme, managing director, is client contact.

### BB&T

*223 W. Nash, Wilson, N.C. 27893; (919) 399-4748*

| | |
|---|---|
| Total assets managed | $500,000,000 |
| Tax-exempt assets managed | |
| Total | $300,000,000 |
| Commingled | $50,000,000 |
| Separate | $250,000,000 |

| No. of portfolio managers | 5 |
| Size of research staff | 1 |

BB&T is an equity, fixed-income and balanced manager.

Its equity approach is based on growth stock, sector rotation and market timing. It uses relative p/e analysis to determine value, then screens for growth, momentum and technical factors. Market timing is used for cash.

Its fixed-income approach uses interest rate anticipation. The portfolio holds one- to eight-year bonds with the average maturity determined by current trends.

The asset mix Jan. 1 was 60% stocks, 35% bonds and 5% cash.

The parent company is Branch Corp. — Trust Division. Total assets under management by the parent and subsidiaries and affiliates are $1.5 billion.

David Bryan, vice president, is chief investment officer and client contact.

*Albert L. Zesiger*
*BEA Associates Inc.*

### BEA Associates Inc.

*153 E. 53rd St., New York, N.Y. 10022; (212) 832-2626*

| | |
|---|---|
| Total assets managed | $6,485,000,000 |
| Tax-exempt assets managed | $6,193,000,000 |
| 401(k) assets managed | $2,000,000 |
| Mortgage-backed assets managed | $6,000,000 |
| International assets managed | $336,000,000 |
| Tax-exempt clients | 216 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 6 |

BEA Associates Inc. is an equity, fixed-income, balanced and international manager.

BEA uses a value orientation equity approach, seeking situations where it disagrees with consensus estimates of cash flows and discount rates.

In fixed income, it structures portfolios to resemble client-specified benchmarks, adding value through issue selection, sector selection and swapping.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 59.9% stocks, 15.4% bonds, 10% cash and 14.7% futures.

As of Jan. 1, the firm managed $334 million in dedicated or immunized bond portfolios, $267.3 million in foreign stocks and $68.4 million in foreign bonds.

It has two 401(k) clients.

Clients include Central State Teamsters, Oregon and General Foods.

Albert L. Zesiger, president and chairman, is chief investment officer. Douglas A. Love, director of research, is client contact.

### Beacon Capital Management

*2 World Trade Center, Suite 8546, New York, N.Y. 10048; (212) 912-6900*

| | |
|---|---|
| Total assets managed | $625,000,000 |
| Tax-exempt assets managed | $615,000,000 |
| Tax-exempt clients | 14 |
| Types of accounts managed | CEF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 6 |

Beacon Capital Management is an equity, fixed-income and balanced manager.

Its equity approach relies on Graham & Dodd analysis. It invests in undervalued stocks of good-quality companies undergoing positive change.

For fixed income, it actively manages U.S. government, agency and quality corporate securities based on its economic and monetary analysis and interest rate anticipation.

Options, stock index futures and fixed-income futures are used.

Its asset mix Jan. 1 was 54% stocks, 36% bonds and 10% cash.

The parent company is The Bank of New York.

Clients include Dow Jones, Melville and Children's Aid Society.

Samson Wang is client investment officer. Perry C. Sporn is client contact.

### Bear Stearns Asset Management

*55 Water St., New York, N.Y. 10041; (212) 952-8200*

| | |
|---|---|
| Total assets managed | $2,040,000,000 |
| Tax-exempt assets managed | $1,800,000,000 |
| 401(k) assets managed | $100,000,000 |
| Mortgage-backed assets managed | $126,000,000 |
| Tax-exempt clients | 91 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 8 |

Bear Stearns Asset Management is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented, focusing on low p/e stocks. The firm uses a set of proprietary equity screens to isolate companies with strong fundamental characteristics whose prices are below market or industry levels. It then identifies those stocks with strong upside price potential.

Its fixed-income approach is conservative. The firm invests primarily in U.S. government securities and adjusts a portfolio's average maturity according to interest rate trends.

The asset mix Jan. 1 was 42% stocks, 49% bonds, 2% cash and 7% mortgage-backed securities.

About 100 stocks are followed closely and 1,900, generally; 75% of the research is generated internally.

Bear, Stearns & Co. Inc. is the parent company.

Clients include Automatic Data Processing, Archdiocese of New York, Commonwealth of Massachusetts and the American Federation of Musicians.

Peter N. Marron is chief investment officer. John F. Boneparth, director-marketing, is client contact.

### P.E. Becker Inc.

*2185 Pacwest Center, Portland, Ore. 97204; (503) 223-1720*

| | |
|---|---|
| Total assets managed | $275,000,000 |
| Tax-exempt assets managed | $164,000,000 |
| 401(k) assets managed | $4,000,000 |
| Tax-exempt clients | 57 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

P.E. Becker Inc. is an equity, fixed-income and balanced manager.

Emphasizing low p/e stocks, its equity approach uses strong fundamental research to identify companies with low expectations and strong financials.

Its fixed-income approach uses sector analysis. The market is searched for the best value relative to risk. Active management is used.

The asset mix Jan. 1 was 55% stocks, 30% bonds and 15% cash.

Clients include Washington Water Power and Bally's Grand.

Patrick E. Becker, president, is chief investment officer and client contact.

### Beese, Fulmer & Pincoe Inc.

*United Bank Building, 220 Market Ave. South, Suite 1150, Canton, Ohio 44702; (216) 454-6555*

| | |
|---|---|
| Total assets managed | $96,000,000 |
| Tax-exempt assets managed | $17,000,000 |
| International assets managed | 2,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 2 |

Beese, Fulmer & Pincoe Inc. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth stock, Graham & Dodd analysis and market timing, focusing on fundamental valuation with earnings growth and market price sensitivities.

Its fixed-income approach relies on interest rate anticipation and sector analysis. Quality distinctions are mandated by yield curve differentials.

The asset mix Jan. 1 was 58% stocks, 32% bonds and 10% cash.

Dennis Fulmer, chairman, is chief investment officer. William A. Pincoe, president, is client contact.

### Bell Capital Management

*1945 The Exchange, Suite 235, Atlanta, Ga. 30339; (404) 952-7039*

| | |
|---|---|
| Total assets managed | $70,000,000 |
| Tax-exempt assets managed | $60,000,000 |
| Tax-exempt clients | 90 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 3 |

Bell Capital Management Inc. is an equity and fixed-income manager.

Its equity approach uses growth stock and market timing.

Its fixed-income approach is driven by interest rate anticipation.

The asset mix Jan. 1 was 70% stocks, 20% bonds and 10% cash.

It follows 50 stocks closely and 80, generally; half the research is generated internally.

Ron H. Bell, president, is chief investment officer and client contact.

### Berg Capital Corp.

*600 Madison Ave., 14th Floor, New York, N.Y. 10022; (212) 308-4705*

| | |
|---|---|
| Total assets managed | $65,000,000 |
| Tax-exempt assets managed | $24,000,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | CF |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Berg Capital Corp. is an equity manager. A value investor, it invests in stocks with unrecognized value and using significant cash reserves to protect value in hostile markets. Fundamental analysis is the basis of its approach.

The asset mix Jan. 1 was 67.5% stocks, 1.2% bonds and 31.3% cash.

Fifty stocks are followed closely and 100, generally; 25% of research is generated internally.

Clients include Kidde, National Patent Development and Interstate Bakeries.

Jonathan A. Berg, president, is chief investment officer. Deborah C. Foord, vice president, is client contact.

### Berkshire Bank & Trust Co.

*P.O. Box 1169, Pittsfield, Mass. 01202; (413) 499-1600*

| | |
|---|---|
| Total assets managed | $125,000,000 |
| Tax-exempt assets managed | $32,000,000 |
| Mortgage-backed assets managed | $3,000,000 |
| International assets managed | $500,000 |
| Tax-exempt clients | 54 |
| Types of accounts managed | CEFG |
| Minimum separate account | $100,000 |
| No. of portfolio managers | 2 |

Berkshire Bank & Trust Co. is an equity, fixed-income and balanced manager.

Its value-oriented equity approach seeks equities that are undervalued relative to various measures or intrinsic value. Selected stocks are expected to meet price objectives within two years.

Its fixed-income approach uses interest rate anticipation. Price sensitivity is analyzed over various maturity ranges and distributions are set accordingly.

The asset mix Jan. 1 was 50% stocks, 35% bonds, 5% cash and 10% mortgage-backed securities. It had $500,000 in foreign stocks.

The parent company is The Conifer Group. Assets under management by the parent, subsidiaries and affiliates total $1 billion.

Brent K. Stephans, assistant vice president and investment officer, is chief investment officer. Thomas C. Doane, investment officer, is the client contact.

### Bernstein-Macaulay Inc.

*410 Park Ave., New York, N.Y. 10022; (212) 906-2907*

| | |
|---|---|
| Total assets managed | $12,375,000,000 |
| Tax-exempt assets managed | $715,000,000 |
| Mortgage-backed assets managed | $50,000,000 |
| Tax-exempt clients | 19 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 10 |
| Size of research staff | 2 |

Berstein-Macaulay Inc., a fixed-income manager, offers conservative risk management. Its approach emphasizes active sector management, moderate maturity/duration adjustments and credit analysis on individual issue selection. Options and fixed-income futures are used.

It offers a computer-based screening approach for equities to existing clients and foreign investors.

The asset mix Jan. 1 was 50% stocks, 39% bonds, 4% cash and 7%

mortgage-backed securities.

The firm follows 50 stocks closely and 100, generally.

The parent company is American Express Co. Assets under management by the parent, subsidiaries and affiliates total $140.02 billion.

Clients include Arizona, Hawaii, American Universal Insurance and New Orleans.

Robert G. Moore, president, is chief investment officer. John P. Arnold, senior vice president, is client contact.

### Sanford C. Bernstein & Co.

*767 Fifth Ave., New York, N.Y. 10153; (212) 486-5800*

| | |
|---|---|
| Total assets managed | $8,500,000,000 |
| Tax-exempt assets managed | $7,300,000,000 |
| Tax-exempt clients | 1,278 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 22 |
| Size of research staff | 31 |

Sanford C. Bernstein & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented, using Graham & Dodd analysis to seek extreme mispricings. Value is defined by the relationship of price to long-term earnings and dividends. Sector rotation is also used.

Using sector analysis, the firm is a value-oriented, intermediate-term bond manager. Quantitative research evaluates relationships between and within sectors and along the yield curve, and also values the components of a bond (call, sector, quality, etc.). A disciplined buy/sell process is used.

Fixed-income futures are used.

The asset mix Jan. 1 was 76% stocks, 22% bonds and 2% cash.

Sanford C. Bernstein follows 544 stocks closely and the same number generally; 90% of research is generated internally.

Clients include New York State Teachers, Johnson & Johnson, Ralston Purina and Allegheny Power System.

Peter Carman is chief investment officer and chairman of the investment policy committee. Richard S. Abramson, director-pension asset advisers, is client contact.

### Berry Hartell & Evers

*550 Kearny St., San Francisco, Calif. 94108; (415) 362-5637*

| | |
|---|---|
| Total assets managed | $220,000,000 |
| Tax-exempt assets managed | $28,000,000 |
| 401(k) assets managed | $2,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CEF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 4 |

Berry Hartell & Evers is an equity, fixed-income and balanced manager.

It uses Graham & Dodd analysis in its growth stock equity approach.

Its fixed-income approach is passive, using staged maturities, short or medium term, with A or better ratings.

Covered call options are used.

The asset mix Jan. 1 was 65% stocks, 25% bonds and 10% cash.

There are two 401(k) clients.

It follows 70 stocks closely and 250, generally; half the research is generated internally.

K. Berry is chief investment officer. Charles Osborne is client contact.

### Bessemer Trust Co.

*630 Fifth Ave., New York, N.Y. 10111; (212) 708-9100*

| | |
|---|---|
| Total assets managed | $5,138,000,000 |
| Tax-exempt assets managed: | |
| Total | $661,000,000 |
| Commingled | $8,000,000 |
| Separate | $653,000,000 |
| International assets managed | $167,000,000 |
| Tax-exempt clients: | |
| Commingled | 3 |
| Separate | 65 |
| Types of accounts managed | CEFG |
| Minimum separate account | $5,000,000 |
| Size of research staff | 7 |

Bessemer Trust Co. is an equity, fixed-income, balanced, international and real estate/oil and gas direct investment manager.

Its equity approach focuses on market cycle and market theme analysis, taking greater risks in stock selection in rising markets and employing defensive strategies to preserve capital in bear markets.

Its fixed-income approach uses interest rate anticipation and sector analysis. Portfolios are actively managed to preserve capital.

Real estate and oil and gas direct investment programs are determined by individual objectives and risk parameters.

Option and stock index futures are used.

The asset mix Jan. 1 was 51% stocks, 30% bonds, 17% cash and 2% other; $167 million was in foreign stocks.

The parent company is The Bessemer Group Inc. Assets under management by the parent, subsidiaries and affiliates total $6.01 billion.

John R. Whitmore is chief investment officer. Robert C. Elliott, senior executive vice president, is client contact.

### Beutel Goodman & Co. Ltd.

*20 Eglinton Ave. W., Suite 2000, Toronto, Ontario M4R 1K8; (416) 485-1010*

| | |
|---|---|
| Total assets managed | $3,000,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,400,000,000 |
| For subsidiaries of U.S. firms | $1,000,000,000 |
| Real estate assets managed | $100,000,000 |
| Tax-exempt clients: | |
| Total | 63 |
| U.S. subsidiaries | 13 |
| Types of accounts managed | CFU |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 10 |
| Size of research staff | 4 |

Beutel Goodman & Co. Ltd., a Canadian firm, is an equity, fixed-income, balanced and real estate manager.

Its equity approach is based on sector rotation and Graham & Dodd analysis. It uses a contrarian and value-oriented approach that seeks to accumulate deeply undervalued equities that are at a discount to intrinsic value at a low multiple of earnings.

Its fixed-income approach uses interest rate anticipation and sector analysis, emphasizing liquidity, quality and income stream. Total returns are augmented through active management that exploits anomalies in yield curve relationships and deviations from expected rate trends.

In real estate, the firm operates closed-end diversified pools of commercial properties, emphasizing those that can be upgraded.

The asset mix Jan. 1 was 36% Canadian stocks, 35% bonds, 14% cash, 4% equity real estate and 11% U.S. stocks.

Beutel, Goodman & Co. Ltd. is the parent company. Total assets under management by the parent company, subsidiaries and affiliates are $4.412 billion.

David A. Williams, vice president, is chief investment officer. William W. Ashby, vice president, is client contact.

### Beutel, Goodman Capital Management Ltd.

*2030 Texas Commerce Tower, Houston, Texas 77002; (713) 221-1790*

| | |
|---|---|
| Total assets managed | $1,202,000,000 |
| Tax-exempt assets managed | $1,202,000,000 |
| Tax-exempt clients | 31 |

| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 8 |

Beutel, Goodman Capital Management Ltd. is an equity and balanced manager.

Its equity approach uses sector rotation and Graham & Dodd analysis. The firm seeks companies selling at a discount to their book or asset value, or companies selling at a low relative p/e multiple, given their investment characteristics and forecasted earnings growth.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 90% stocks and 10% cash.

The firm follows 200 stocks closely and 500, generally; 80% of research is generated internally.

The parent company is Beutel, Goodman & Co., Toronto. Total assets under management by the parent, subsidiaries and affiliates are $4.412 billion.

Clients include New York State Teachers, Pacific Gas & Electric, Hercules and Minnesota.

Robert McFarland, president, is chief investment officer and client contact.

### Beutel, Goodman International PLC

*37-39 St. Andrew's Hill, London, England; 011-44-1-489-0218*

| | |
|---|---|
| Total assets managed | $210,000,000 |

| Size of research staff | 1 |

The Beyreuther Co. is an equity manager that emphasizes growth stock and quantitative research combined with passive management. Its customized passive equity product, designed to beat the S&P 500, is based on a universe of fast-growing and fundamentally strong, domestically traded equities.

All assets were in stocks Jan. 1.

Beyreuther follows 100 stocks closely and 1,700, generally; 50% of research is generated internally.

Its client is Associates in Gynecological Surgery and Obstetrics.

Paul A.R. Beyreuther is chief investment officer and client contact.

### George D. Bjurman & Associates

*10100 Santa Monica Blvd., Suite 2300, Los Angeles, Calif. 90067; (213) 553-6577*

| | |
|---|---|
| Total assets managed | $596,000,000 |
| Tax-exempt assets managed | $581,000,000 |
| Tax-exempt clients | 34 |
| Types of accounts managed | CFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 1 |

George D. Bjurman & Associates is an equity, fixed-income, balanced and dedicated or immunized bond portfolio manager.

Its equity approach is quantitative, using low p/e stocks and sector rotation techniques. Portfolio managers emphasize large- to medium-cap equities that are undervalued and have positive earnings and price momentum.

Its fixed-income approach uses interest rate anticipation and sector analysis, emphasizing high-quality issues with short- to intermediate-term maturities with the best risk/reward characteristics.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 60% stocks and 40% bonds.

O. Thomas Barry III, senior executive vice president, is client contact.

### Black, Galper & Heessels

*Suite 1010, P.O. Box 413, 2 First Canadian Place, Toronto, Ontario M5X 1E3; (416) 869-0163*

|---|---|
| Total assets managed | $1,453,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,413,000,000 |
| For subsidiaries of U.S. firms | $312,000,000 |
| Tax-exempt clients: | |
| Total | 75 |
| U.S. subsidiaries | 8 |
| Types of accounts managed | CFU |
| Minimum separate account | $14,000,000 |
| No. of portfolio managers | 6 |

Black, Galper & Heessels Ltd., a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach combines sector rotation, market timing and low p/e stocks. Its fixed-income approach is based on interest rate anticipation.

The asset mix Jan. 1 was 40% Canadian stocks, 48% bonds, 2% cash and 10% U.S. stocks.

Eighty to 100 stocks are followed closely and 150 to 200, generally; half of the research is generated internally.

Paul F. Black, president, is chief investment officer and client contact.

### William Blair & Co.

*135 S. LaSalle St., Chicago, Ill. 60603; (312) 236-1600*

| | |
|---|---|
| Total assets managed | $1,920,000,000 |
| Tax-exempt assets managed | $885,000,000 |
| Mortgage-backed assets managed | $10,000,000 |
| International assets managed | $20,000,000 |
| Tax-exempt clients | 135 |
| Types of accounts managed | CEF |
| Minimum separate account | $1,500,000 |
| No. of portfolio managers | 13 |
| Size of research staff | 13 |

William Blair & Co. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes emerging growth and growth stock. The firm identifies small and midsize growth stocks where stable growth, conservative finances and established quality managements should lead to long-term capital appreciation.

Its fixed-income approach uses sector analysis to find high-quality, intermediate maturity instruments to produce current income with little capital risk.

The asset mix Jan. 1 was 69% stocks, 21% bonds and 10% cash. It had $20 million in foreign stocks.

Clients include Toys "R" Us, Kresge Foundation, Morton Thiokol and Purdue University.

Conrad Fischer, chief investment partner, is chief investment officer. Rocky Barber, partner and manager-investment management department, is client contact.

### Arnhold & S. Bleichroeder International

*45 Broadway, New York, N.Y. 10006; (212) 943-9200*

| | |
|---|---|
| Total assets managed | $450,000,000 |
| Tax-exempt assets managed | $390,000,000 |
| International assets managed | $378,000,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | C |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 12 |

Arnhold & S. Bleichroeder International is an international manager.

Its approach is to select securities, not countries, by evaluating fundamental criteria and comparing absolute and relative price-earnings and price-cash flow.

Managers build 30-stock portfolios and target a 50% return for each holding over 12 to 18 months.

The asset mix Jan. 1 was 97% stocks and 3% cash.

One hundred stocks are followed closely and 250, generally; 50% of research is generated internally.

The parent company is Arnhold & S. Bleichroeder Inc. Assets under management by the parent, subsidiaries and affiliates total $1.1 billion.

Clients include Allied-Signal, United Technologies, PG&E and Xerox.

Howard B. Moss, senior vice president, is chief investment officer. Frederic C. Reynolds, vice president, is client contact.

### BMI Capital Corp.

*67 Wall St., New York, N.Y. 10005; (212) 422-1619*

| | |
|---|---|
| Total assets managed | $310,000,000 |
| Tax-exempt assets managed | $243,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 8 |

BMI Capital Corp., an equity manager, uses Graham & Dodd analysis to identify growth and emerging growth stocks with low p/e ratios. Focusing outside the mainstream, it invests in rapidly growing and misperceived companies believed to offer both value and dynamics.

The asset mix Jan. 1 was 93% stocks and 7% cash.

Brean Murray, Foster Securities Inc. is the parent company.

Clients include Minnesota, GTE, Upjohn and Norton.

James D. Awad, president, and Francis J. Houghton Jr., chairman, are chief investment officers.

Sandra A. Jerro, vice president, is client contact.

| Minimum separate account | $500,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 2 |

Bollinger & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth stock, sector rotation and market timing.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 70% stocks, 20% bonds and 10% cash.

It follows 250 stocks closely and 300, generally; half the research is generated internally.

Colorado Fire & Police is a client.

Jay Guy Bollinger is chief investment officer and client contact.

The directory of master trust banks will be published in the Sept. 7 issue.

### Bolton Tremblay Inc.

*70 University Ave., Suite 1000, P.O. Box 10, Toronto, Ontario M5J 2M4; (416) 595-5201*

| | |
|---|---|
| Total assets managed | $2,480,000,000 |
| Tax-exempt assets managed | $825,000,000 |
| Tax-exempt clients | 98 |
| Types of accounts managed | CEFPU |
| No. of portfolio managers | 14 |

Bolton Tremblay Inc., a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach uses sector rotation and Graham & Dodd, emphasizing longer-term considerations rather than trading for short-term market swings.

Its fixed-income approach uses interest rate anticipation and sector analysis, actively trading bond portfolios to maximize total returns. It emphasizes quality and marketability.

The asset mix Jan. 1 was 45% Canadian stocks, 40% bonds, 5% cash and 10% U.S. stocks.

Prenor Group Ltd. is the holding company for Bolton Tremblay Inc.

Clients include McGill University, Canadian Opera Foundation, The University of Kings College and The Art Gallery of Ontario.

Ian T. Scott, president, is chief investment officer and client contact.

### Bondoux Investment Management

*100 Spear St., Suite 850, San Francisco, Calif. 94105; (415) 974-5585*

| | |
|---|---|
| Total assets managed | $25,000,000 |
| Tax-exempt assets managed | $10,000,000 |
| Tax-exempt clients | 5 |
| Types of accounts managed | C |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 7 |

Bondoux Investment Management is an equity and balanced manager.

It uses both fundamental and technical stock selection methods to achieve total return objectives. Sell disciplines are strongly emphasized to lock in favorable price movements and to preserve asset values in declining markets.

The asset mix Jan. 1 was 80% stocks and 20% bonds.

Kathryn W. Bondoux, principal, is chief investment officer and client contact.

### Bostian Research Associates Inc.

*360 Madison Ave., New York, N.Y. 10017; (212) 907-0180*

| | |

| Types of accounts managed | C |
| Minimum separate account | $2,000,000 |
| Size of research staff | 1 |

Bostian Research Associates Inc. is an equity manager.

Its disciplined, quantitative, market-timing strategy is used both for regular equity portfolios and for its market timing index fund using S&P 500 stock index futures. Options, stock index futures and fixed-income futures are used. Asset allocation timing advice is provided.

The asset mix Jan. 1 was 50% stocks and 50% stock index futures.

Clients are Loews and K mart.

David B. Bostian Jr., president and chief investment officer, is the client contact.

### The Boston Co. Inc.

*1 Boston Place, Boston, Mass. 02106; (800) 225-5267*

| | |
|---|---|
| Total assets managed | $16,609,000,000 |
| Tax-exempt assets managed | $10,355,000,000 |
| 401(k) assets managed | $188,000,000 |
| Real estate assets managed | $1,515,000,000 |
| International assets managed | $107,000,000 |
| Tax-exempt clients | 156 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 22 |
| Size of research staff | 15 |

The Boston Co. Inc. is an equity, fixed-income, balanced, real estate and international manager.

Its active equity management approach uses quantitative value-oriented screening and emphasizes stocks undervalued in earnings and dividend growth, with appreciation potential. Its index funds track the S&P 500, Wilshire 5000 and Capital International indexes.

Its active fixed-income approach emphasizes interest rate anticipation, avoiding extreme strategies. Portfolios are positioned with the best relative value as to industry and quality sectors. Its passive approach uses debt securities to meet client needs, tracking the Shearson-Lehman Aggregate index or its components.

In real estate, most assets are managed on a separate account basis by The Boston Co. Real Estate Council Inc., with the primary investment vehicle equity-oriented debt.

Options and stock index futures are used.

The asset mix Jan. 1 was 30% stocks, 34% bonds, 8% cash, 15% equity real estate and 13% short-term money market investments; it had $1.5 billion in equity real estate, $107 million in international equity index funds, $517 million in equity index funds, $71 million in bond index funds and $281 million in dedicated or immunized bond portfolios.

There is one 401(k) client.

The parent company is American Express Co. Assets under management by the parent, subsidiaries and affiliates total $140.02 billion.

James N. von Germeten is chief investment officer. John L. Carty, vice president and director-institutional markets and client relations, is client contact.

### Boston International Advisors Inc.

*1 Liberty Square, Boston, Mass. 02109; (617) 574-9050*

| | |
|---|---|
| Total assets managed | $88,000,000 |
| International assets managed | $88,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| Minimum separate account | $5,000,000 |
| Size of research staff | 7 |

Boston International Advisors Inc., an equity and international manager, uses passive and quantitative techniques with growth and low p/e stocks. The firm also manages custom index funds — EAFE and South Africa-free. Options and stock index futures are used.

The asset mix Feb. 28 was 100% foreign stocks.

The five principals make up the firm's investment committee. Jennifer Dunning, managing director, is client contact.

### Boston Security Counsellors

*60 State St., Boston, Mass. 02159; (617) 742-9858*

| | |
|---|---|
| Total assets managed | $500,000,000 |
| Tax-exempt assets managed | $200,000,000 |
| Mortgage-backed assets managed | $10,000,000 |
| Tax-exempt clients | 40 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Boston Security Counsellors Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses growth, emerging growth and low p/e stocks analyzed through Graham & Dodd principles. Selections are based on criteria measuring value growth and financial strength.

Its fixed-income approach is passive and uses interest rate anticipation.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 40% stocks, 35% bonds, 20% cash and 5% mortgage-backed securities.

The parent company is Advest Group Inc. Assets managed by the parent, subsidiaries and affiliates are $950 million.

Edward B. White is chief investment officer. Lisa Castellano, associate, is client contact.

### Bounty Management Corp.

*Bedford Building, 99 Bedford St., Boston, Mass. 02111; (617) 357-8285*

| | |
|---|---|
| Total assets managed | $108,000,000 |
| Tax-exempt assets managed | $65,000,000 |
| Tax-exempt clients | 60 |
| Types of accounts managed | CE |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Bounty Management Corp. is an equity and balanced manager.

Its equity strategy is quantitative, combining momentum and value investing based on a contrarian approach.

In fixed income, it swings in and out on the Treasury yield curve based on year-to-year interest rate forecasts for long-term investments only.

The asset mix Jan. 1 was 39% stocks, 28% bonds and 33% cash.

Clients include The Charlton School, Crozer Theological Seminary and Marianist Society.

Raymond N. Bligh, president, is chief investment officer and client contact.

### Bowen, Hanes & Taylor Inc.

*100 Galleria Parkway, Atlanta, Ga. 30339; (404) 951-8891*

| | |
|---|---|
| Total assets managed | $500,000,000 |
| Tax-exempt assets managed | $380,000,000 |
| Real estate assets managed | $11,000,000 |
| Mortgage-backed assets managed | $5,000,000 |
| Tax-exempt clients | 41 |
| Types of accounts managed | CEFG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 3 |

Bowen, Hanes & Taylor Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses low p/e and growth stocks. The firm uses a conservative, quality-oriented, top-down approach.

Its fixed-income approach is based on interest rate anticipation.

In real estate, it seeks capital gains opportunities in undeveloped land.

The asset mix Jan. 1 was 80% stocks, 11% bonds, 5% cash, 3% equity real estate and 1% mortgage-

A Desk Reference on Soft Dollars . . .

From The People Who Wrote The Book

Capital Institutional Services is the largest independent brokerage firm specializing in "Soft Dollar" brokerage. Since its founding in 1977, CIS has done only one thing: "Soft Dollars". We've done our homework and learned how to do it right. Soft Dollars can be an important tool for the acquisition of research and other services of benefit to plan beneficiaries.

CIS has prepared a compendium of regulatory releases and legal opinions affecting "Soft Dollars" and directed brokerage. This brochure is must reading for Plan Sponsors, Managers and others involved in supervising the investment of Plan assets. Included are the latest regulatory releases from the SEC and from the Department of Labor. Please call Douglass Shear, Senior Vice President, Director–Plan Sponsor Division, at 1-800-247-6729 or 214-720-0055, for your complimentary copy. Or send your business card to:

Martin H. Wexler, president, is chief investment officer. Elizabeth Stirling, vice president, is client contact.

### Daniel Breen & Co.

*700 Louisiana, 3400 RepublicBank Center, Houston, Texas 77002; (713) 223-2110*

| | |
|---|---|
| Total assets managed | $623,000,000 |
| Tax-exempt assets managed | $543,000,000 |
| Tax-exempt clients | 25 |
| Types of accounts managed | CEFG |
| No. of portfolio managers | 4 |
| Size of research staff | 1 |

Daniel Breen & Co. is an equity, fixed-income and balanced manager.

Its equity approach is rotational, seeking relative value to the S&P 500. It uses specific valuation models for each type of stock and 10 years of relative information on each stock.

Its fixed-income approach is based on interest rate anticipation, blending fundamental analysis with relative valuation computer models to create a proprietary rotational approach.

Options are used.

The asset mix Jan. 1 was 80% stocks, 16% bonds and 4% cash.

Thirty-five stocks are followed closely and 1,500, generally; 60% of research is generated internally.

Clients include Reader's Digest, Continental Telecom, General Dynamics and Wesleyan University.

Daniel A. Breen, president and chief investment officer, and Harry M. Flavin, senior vice president, are chief investment officers. Edward S. McCullough, senior vice president, is client contact.

### Bridgewater Asset Management

*372 Danbury Road, Wilton, Conn. 06897; (203) 762-8511*

| | |
|---|---|
| Total assets managed | $25,000,000 |
| Tax-exempt assets managed | $25,000,000 |
| Tax-exempt clients | 3 |
| Types of accounts managed | EG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 10 |

Bridgewater Asset Management is a fixed-income manager for its tax-exempt accounts. For corporate taxable accounts it also does tactical and global asset allocation using futures swaps and options.

Its fixed-income approach uses market timing and an interest rate system it devised to move among long-, medium- and short-term securities.

All tax-exempt assets Jan. 1 were in bonds. The firm manages risks on $600 million.

It is affiliated with Bridgewater Associates, a research firm. Assets under management by the affiliates total $625 million.

Raymond T. Dalio, president, is chief investment officer. Charles S. Schnelle, executive vice president, is client contact.

| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Capital Technology Inc. is an equity and balanced manager.

Its equity approach uses emerging growth and low p/e stocks, investing in small, fast-growing companies that are selling at low p/es relative to their industry and to the overall market.

The asset mix Jan. 1 was 97% stocks and 3% cash.

The firm follows 175 stocks closely and 300, generally; all research is generated internally.

Clients include Flint, Mich.; Lincoln National; USG; and E-Systems.

Robb W. Rowe, president, is chief investment officer. Robert Mathai is client contact.

## Capitol Bank and Trust Co.

*1 Bulfinch Place, Boston, Mass. 02114; (617) 723-5300*

| | |
|---|---|
| Total assets managed | $248,000,000 |
| Tax-exempt assets managed | $244,000,000 |
| International assets managed | $14,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CFGJ |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 2 |

Capitol Bank and Trust Co. is an equity, fixed-income and balanced manager.

Its equity approach is based on Graham & Dodd analysis and low p/e stocks.

Its fixed-income approach uses interest rate anticipation and sector analysis, focusing on maturity and sector swaps in anticipation of secular change. Minor portfolio adjustments are made in anticipation of cyclical developments or market inefficiencies.

The asset mix Jan. 1 was 27% stocks, 70% bonds, 3% cash. It had $14 million in foreign bonds.

The parent company is Capitol Bancorporation.

G. Peter Grote, vice president and senior trust officer, is chief investment officer. Annmarie Gradito is client contact.

International manager profiles will run June 29.

## Profiles

### Capitoline Investment Services Inc.

*919 E. Main St., Richmond, Va. 23219; (804) 782-7222*

| | |
|---|---|
| Total assets managed | $3,341,000,000 |
| Tax-exempt assets managed | $2,200,000,000 |
| Tax-exempt clients | 141 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 14 |
| Size of research staff | 6 |

Capitoline Investment Services Inc. is an equity, fixed-income, balanced and GIC manager. It also offers active short-term cash management.

Its equity approach is opportunistic and changes investment focus based on judgments of relative value.

Its fixed-income approach emphasizes intermediate-term obligations; the maximum average maturity is 10 years. Sector and quality yield spread analysis are used to structure portfolios.

Options are used.

The asset mix Jan. 1 was 24% stocks, 17% bonds, 26% cash and 33% GICs.

One hundred-fifty stocks are followed closely and 830, generally; 40% of research is generated internally.

The parent company is United Virginia Bank.

Clients include Amtrak, Media General, Overnite Transportation and Sweet Briar College.

Ernest C. Frohboese, senior vice president, is chief investment officer. William E. Heisler, vice president and director of marketing, is client contact.

### Cashman, Farrell and Associates

*1285 Drummers Lane, Wayne, Pa. 19087; (215) 688-5900*

| | |
|---|---|
| Total assets managed | $926,000,000 |
| Tax-exempt assets managed | $920,000,000 |
| Tax-exempt clients | 13 |
| Types of accounts managed | CEG |
| No. of portfolio managers | 2 |
| Size of research staff | 4 |

Cashman, Farrell and Associates is an equity manager whose approach is contrarian and stresses low p/e stocks.

The asset mix Jan. 1 was 65% stocks and 35% cash.

The firm follows 120 stocks closely and 400, generally; 85% of research is generated internally.

Clients include Rockwell, Boeing, Borden and Pennsylvania State Teachers.

James Farrell, partner, is chief investment officer. Gerald T. Hofmann, partner, is client contact.

### Catanzarite-Zimberoff Asset Management Inc.

*10358 Artesia Blvd., Bellflower, Calif. 90706; (213) 920-9771*

| | |
|---|---|
| Total assets managed | $15,000,000 |
| Tax-exempt assets managed | $13,000,000 |
| Tax-exempt clients | 35 |
| Types of accounts managed | CJ |
| Minimum separate account | $100,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 1 |

Catanzarite-Zimberoff Asset Management Inc. is an equity and balanced manager.

Its equity approach combines Graham & Dodd analysis and growth stock. It concentrates on the economic environment and specific fundamentals of a company. Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 40% stocks, 48% bonds and 12% cash.

The parent company is Catanzarite & Co. Assets under management by the parent, subsidiaries and affiliates total $20 million.

Dorothea Zimberoff, executive vice president, is chief investment officer and client contact.

### Cedar Hill Associates Inc.

*33 N. LaSalle St., Suite 2600, Chicago, Ill. 60602; (312) 641-3161*

| | |
|---|---|
| Total assets managed | $56,000,000 |
| Tax-exempt assets managed | $40,000,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | CG |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 2 |

Cedar Hill Associates is an equity, fixed-income and balanced manager.

Its equity approach is based on Graham & Dodd principles. Using computer screens, the firm selects issues that appear quantitatively cheap, based upon effective combinations of book value, earnings, dividends and market capitalization within the S&P.

The fixed-income approach is based on total return, identifying critical turning points in interest rates.

The asset mix Jan. 1 was 89% stocks, 9% bonds and 2% cash.

Forty stocks are followed closely and 500, generally. Research is internal.

Clients include the Illinois Teachers.

Joel H. Jastromb, president, is chief investment officer and client contact.

### Centerre Trust Co. of St. Louis

*510 Locust St., St. Louis, Mo. 63101; (314) 436-9265*

| | |
|---|---|
| Total assets managed | $9,632,000,000 |
| Tax-exempt assets managed: | |
| Total | $4,365,000,000 |
| Commingled | $575,060,000 |
| Separate | $3,790,000,000 |
| 401(k) and 457 assets managed | $350,000,000 |
| Mortgage-backed assets managed | $800,000,000 |
| International assets managed | $158,000,000 |
| Tax-exempt clients: | |
| Commingled | 550 |
| Separate | 180 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 13 |
| Size of research staff | 6 |

Centerre Trust Co. of St. Louis is an equity, fixed-income, balanced, real estate, international and 501(c)(9) manager.

Its equity buy and sell discipline is driven by a quantitative valuation process based on long-term growth and profitability. Sector selection, sector diversification and concentration methods are employed.

Its fixed-income approach uses constant monitoring of economic conditions to forecast interest rates.

Options are used.

For real estate, Centerre acts as a manager of managers.

The asset mix Jan. 1 was 25% stocks, 66% bonds, 5% cash and 4% international equity; there was $800 million in mortgage-backed securities included in the bond allocation, $300 million in equity index funds and $100 million in dedicated or immunized bond portfolios.

There are 100 401(k) clients.

Centerre Bancorporation is the parent company.

Jim McGuire is chief investment officer. Richard W. Hibbs, vice president and director of employee benefits marketing, is client contact.

In *Pensions & Investment Age*'s annual survey of investment advisory firms, "tax-exempt assets" refers to U.S. institutional tax-exempt assets only and does not include individuals, IRAs or Keogh plans.

### Centre Square Investment Group Inc.

*1700 Market St., Philadelphia, Pa. 19101; (215) 786-7070*

| | |
|---|---|
| Total assets managed | $972,000,000 |
| Tax-exempt assets managed | $928,000,000 |
| 401(k) and 457 assets managed | $144,000,000 |
| Tax-exempt clients | 158 |
| Types of accounts managed | CEFGJ |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 4 |

Centre Square Investment Group Inc. is an equity, fixed-income, balanced and cash investment manager.

Its equity approach is to select high-quality companies having accelerating earnings momentum with potential for market appreciation. Managers package industry sectors and trade at the margin in core positions to reduce risk.

Its fixed-income approach is to structure portfolios to resemble but outperform the Shearson Lehman Government/Corporate Bond index through shifts in asset allocations, maturities and durations.

The asset mix Jan. 1 was 60% stocks and 40% bonds.

There were 21 401(k) and 457 plan clients.

The parent company is First Pennsylvania Corp. Assets under management by the parent, subsidiaries and affiliates total $8.1 billion.

Donald E. Carver, president, is chief investment officer. Brett P. Wilder, senior vice president, is client contact.

### Chase Investment Counsel

*300 Preston Ave., Suite 403, Charlottesville, Va. 22901; (804) 293-9104*

CIGNA Asset Advisers Inc. is an equity, fixed-income, balanced, real estate and international manager.

Its equity approach is to select stocks at a discount to their value as ongoing businesses, based on analysis of underlying earnings growth, balance sheet and cash flow.

Its fixed-income approach is top-down with emphasis on analyzing and identifying trends in economic and business cycles that produce significant changes in interest rates.

Its real estate approach is a disciplined system employing top-down portfolio management with concentration in moderate-size, suburban properties. Value is added through detailed planning and incentives.

The separate accounts asset mix Jan. 1 was 33% stocks, 35% bonds, 12% cash and 20% equity real estate.

There was $1.083 billion in equity real estate and $82.7 million in foreign stocks.

There are 1,400 401(k)/457 clients.

The parent company is CIGNA Corp. Total assets under management by the parent company, affiliates and subsidiaries is $44.1 billion.

Clients include Connecticut, Kellogg, Yale and United Methodist Church.

Richard W. Maine of CIGNA Investments Inc. is chief investment officer. Richard R. Anderson, senior vice president, is client contact.

| Size of research staff | 29 |

Citicorp Investment Management Inc. is an equity, fixed-income, balanced, real estate, international, GIC, venture capital, index, immunization futures, special equity and cash manager. It also offers tactical asset allocation.

Its equity approach is growth-oriented, relying heavily on positive earnings revisions. Equal emphasis is placed on fundamental research, quantitative disciplines and valuation models in determining weightings.

In fixed-income, it shifts portfolio sector, quality, coupon, issuer, duration and currency profiles in response to early identification of changes in the social, political and economic climate.

Options, stock index futures and fixed-income futures are used.

Its real estate approach emphasizes prime, income-producing properties in major cities with investments structured as direct-equity ownerships and convertible participating mortgages.

The asset mix Jan. 1 was 60% stocks, 24.5% bonds, 12% cash, 2% equity real estate, 1% mortgages and 0.5% mortgage-backed securities.

There was $319 million in equity real estate; $132 million in mortgages; $77 million in mortgage-backed securities; $1.87 billion in foreign stocks; $2.57 billion in foreign bonds; $284 million in foreign cash; $499 million in equity index funds; and $261 million in dedicated or immunized portfolios.

The parent company is Citicorp. Assets under management by the parent, subsidiaries and affiliates total $49.18 billion.

Robert G. Wade Jr. is chief investment officer. Joan McIlroy, vice president, is client contact.

| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 9 |

CMB Investment Counselors is an equity, fixed-income, balanced and mortgage pass-through securities manager.

Its equity approach is growth stock and value-based. The firm seeks good relative value among stocks with strong sales and earning momentum across five analytical categories: major growth; developing growth; credit cyclical; cyclical value; and asset value.

It takes a value-oriented fixed-income approach focusing on sector analysis. It seeks broad areas of un-

# What's the point of no returns?

There *is* none. There's no reason to use an investment team if they aren't netting you positive, consistent returns.

That's our point. You can get the talent you need, using BANK ONE, INDIANAPOLIS' Asset Management Team. We're building on over 160 years of experience in managing both equity and fixed-income portfolios for employee benefit and institutional accounts.

Proof? For over 10 years, our team has outperformed *both* Standard & Poor's 500 Stock Index and the Shearson Lehman Government/Corporate Bond Index. And with less volatility.

We do it with up-to-date quantitative and scenario-based analysis, to identify the best investment opportunities and the highest quality securities. We do it with individual attention to *your* investment objectives.

And it pays off. In lower annual contributions. Healthier cash flow. Achieved by positive, consistent returns.

Which is the whole point, after all.

For more information, and for a copy of our monthly *Economic Outlook* newsletter, call **Phillip E. Chambers, Vice President and Investment Officer, BANK ONE, INDIANAPOLIS Asset Management Division. (317) 639-8151.**
